## VINYL, POLYETHYLENE, AND NYLON TUBING AVAILABLE

See Index for Ordering Information

# PARKER BRASS COMPRESSION FITTINGS

- Manufactured from CA 360, CA 345, or CA 377 brass rod
- Listed with Underwriter's Laboratories for flammable liquid
- Compression fittings meet functional requirements of SAE J-512, ASA, and ASME
- Temperature range: -65 to 250°F

Parker compression fittings eliminate the need to flare, solder, or otherwise prepare tubing before assembly. For use where excessive vibration or tube movement is not involved. Use with copper, brass, or aluminum. Installs easily. All sealing surfaces precision machined for reliable and leakproof closures. Fittings include sleeve and nut. See chart below for maximum working pressures. Parker brand.

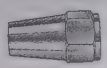
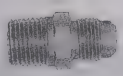
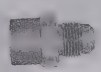
## TUBING WORKING PRESSURE RANGES

Temperature and type of tubing used are important factors; however, the following table is a good guide for proper selection. Temperature 73°F.



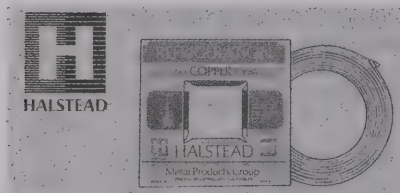




| PSI | Tube O.D. (In.) | Tube Wall (In.) |
|---|---|---|
| 400 | 1/8 | 0.030 |
| 400 | 3/16 | 0.030 |
| 300 | 1/4 | 0.030 |
| 300 | 5/16 | 0.032 |
| 200 | 3/8 | 0.032 |
| 200 | 1/2 | 0.032 |
| 150 | 5/8 | 0.035 |
| 100 | 3/4 | 0.035 |
| 75 | 7/8 | 0.035 |

# PARKER 45° BRASS FLARE FITTINGS

- Brass construction
- UL Listed for flammable liquids
- Meets specifications and standards of SAE, ASA, ASME and MS
- Working temperature range of -65° to 250°F



Applications include refrigeration equipment, air compressors, oil burners and machinery. Use with thinwall tubing where application requires joints to withstand high pressures

Can be used with flareable copper, brass, aluminum and welded steel hydraulic tubing. Flare tubing seals remain leak-free even when disconnected and reconnected. Resists mechanical pull-out. Seal faces precision machined.

## AIR CONDITIONING AND REFRIGERATION TUBING

- Meets ASTM Spec. B280
- 50 ft. coils
- Coils cleaned and capped

**Halstead 90 Day Limited Warranty**
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

Prices on these items are subject to change without notice. Contact local branch for current pricing.

Copper refrigeration tubing connects air conditioning and refrigeration equipment. Lengths of tubing are easily joined by sweating or using flare fittings. Made according to the American Society for Testing and Materials (ASTM) Standard Specification B280. All coils are cleaned and capped to keep contaminants from entering the tubing. Sold in 50 ft. coils. Halstead brand.

## TYPE L COPPER WATER TUBING

- Meets ASTM spec. B88
- 60 ft. coils

**Halstead 90 Day Limited Warranty**
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

Prices on these items are subject to change without notice. Contact local branch for current pricing.

Type L tubing for above- or below-ground water service and hydronic heater applications. Made according to the American Society for Testing and Materials (ASTM) Standard Specification B88. Soft copper tubing sold in 60 ft. coils. Halstead brand.

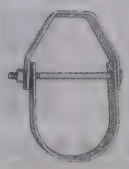
## TYPE K COPPER TUBING

- Lightweight, handles easily and takes up less space
- Easy to join with copper fittings
- Easily formed to eliminate elbows and joints

Tubing has superior thermal conductivity and requires no maintenance because joint fillings don't break down or pull apart. Melting point near 2000° F helps tubing maintain pressure when subjected to flames, making it preferred for fire sprinkler systems. Also ideal for domestic water service and distribution, fire protection, solar, fuel and fuel oil, HVAC and snow melting systems. Meets or exceeds building codes in all 50 states. 60 ft. length.

**Halstead 90 Day Limited Warranty**
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.



- Meets ASTM spec. B88

## ADJUSTABLE CLEVIS HANGERS

- Carbon steel with copper finish
- For suspension of non-insulated, copper tubing; light-duty
- Locknut above clevis yoke must be tightened securely after each adjustment to assure full rated load
- Threaded for 3/8" rod
- Complies with Federal Specification WW-H-171E, Type 12
- Made in USA • Grinnell brand

## SPLIT TUBING CLAMP

- Threaded for 3/8" rod
- Malleable iron with copper finish
- Provides tight fit on copper tubing
- Complies with Federal Specification WW-H-171E, Type 25
- Max. load rating: 180 lbs.
- Made in USA • Grinnell brand

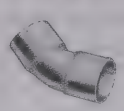
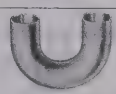
# NIBCO COPPER FITTINGS

- Wrot copper fittings are made from commercially pure copper mill products per ASTM Specifications B75 Alloy C12200; materials and workmanship are in accordance with ASME/ANSI B16.22
- To select proper fittings for plumbing use, use nominal size column; for air conditioning and refrigeration use, use the OD size column to find correct fitting.





Abbreviations: C = Female solder cup; Ftg. = Male solder end; F = Female NPT thread; M = Male NPT thread

- Cast fittings are made from copper alloy C84400, consisting of 81% copper, 7% lead, 3% tin, and 9% zinc per ASTM Specification B584; meet ANSI Standard B16.18
- All fittings are designed and manufactured to meet or exceed all current applicable standards

# PARKER BRASS PIPE FITTINGS

- **Connectors, unions, nuts and extruded elbows and tees are machined from CA 360 and CA 345 brass rod; forged elbows and tees are machined from CA 377 brass**
- **Meets SAE, ASME and ASA functional requirements**
- **Manufactured for low and medium pressure line connection work**
- **Temperature and working pressure ranges from -65 to 250°F at 1000 PSI**

Brass pipe fittings can be used with air, water, oil, fuels, and various gases connected by brass, copper or iron pipe. These fittings are applied in a wide variety of applications including: Industrial plants, construction equipment, and plumbing systems. Parker brand.

## MODERN PLUMBING

By E.K. Blankenbaker. *Modern Plumbing* provides basic information about tools, materials and equipment. Colorfully illustrated photographs, drawings and charts. Excellent coverage of piping materials, fittings, valves, meters, blueprint reading, soldering, brazing, welding, lead wiping, and safety. Some charts included are "Length Conversions," "English Metric Conversion Factors—Volume and Mass," "Building Material Symbols" and "Head Loss for Standard Galvanized Pipe." 1997 edition. 384 pages, 700 illustrations, hard cover.

**No. 5H580.** Shpg. wt. 2.5 lbs. List .....$50.50. Each .....**$39.00**

**No. 5H580**

# GRINNELL MALLEABLE IRON FITTINGS

- Class 150 malleable fittings and unions
- 150 PSI saturated steam pressure
- Fittings conform to American National Standards Institute ANSI 16.3; Unions, ANSI B-16.39
- Material specification is ASTM A-197
- 300 PSI WOG at 150°F
- Fitting dimensions conform to Federal Specifications WW-P-521; Unions, WW-U-531

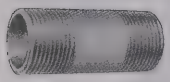
(*) Cast iron construction.

## WELDED STEEL STANDARD SCHEDULE 40 NIPPLES



- Black and galvanized
- Both ends threaded NPT threads
- Manufacturing conforms to ASTM A-733
- Material Specifications conform to ASTM-A-53 Type E or F
- Federal Specification is WWN 351
- When used in conjunction with standard malleable iron fittings and unions, nipples have compatible steam and WOG working pressure

## STANDARD SCHEDULE 40 CUT PIPE

- **Black and galvanized, both ends have NPT threads**
- **Manufacturing conforms to ASTM A-733**
- **Material specifications conform to ASTM A-53 Type E or F**
- **Federal specification is WWN 351**
- **When used with standard malleable iron fittings, pipe has compatible steam and WOG working pressures**

# WHEATLAND SCHEDULE 40 BLACK AND GALVANIZED PIPE

WHEATLAND

Made In U.S.A.

No. 5E550

No. 5E556

- Threaded at both ends
- Yield: 25,000 PSI min.; 30,000 PSI typical
- Tensile: 45,000 PSI min.; 50,000 PSI typical
- Hardness Range B: Rockwell "B" 55.0-65.0
- Max. pressure rating; WOG 720 PSI at 250°F, steam 600 PSI at 400°F

- Continuously welded to ASTM A-53 and Federal Specification WW-P404
- Black or galvanized 10 ft. lengths

## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

## SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE

Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.

## THE RIGHT STUFF. RIGHT HERE. RIGHT NOW.

It's more than just a slogan with Grainger. More than 78,000 products, most in stock and available for same day shipping, are available with a call to your local branch. And when you need product selection assistance, count on our trained personnel for fast, accurate answers to your technical questions.

# GRINNELL PIPE HANGERS/ATTACHMENTS

## C-CLAMPS

- Black malleable iron
- Upper attachment to secure pipe lines to American Standard I-beam
- Wide flange beam and channels where thickness of flange does not exceed 0.75 inches
- Setscrews should not be overtightened
- Includes locknut
- Complies with Federal Specification WW-H-171E Type 23
- Grinnell brand

| Rod Size (In.) | Grinnell Model 91007 | Stock No. | List | Each | Lots | Lots Qty. | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| 3/8 | 0003 | 5E562▲ | $1.90 | $1.58 | $1.42 | 35 | 0.2 |
| 1/2 | 0029 | 5E563▲ | 2.38 | 1.98 | 1.78 | 35 | 0.3 |

## ONE HOLE CLAMPS

- Black malleable iron
- For support of standard conduit, cable for wrought iron and steel pipe on walls or sides of beams
- Not recommended for use horizontally on ceilings, bottoms of beams or similar installations
- Maximum temperature is 450°F
- Grinnell brand

| Pipe Size (In.) | Grinnell Model 910007 | Stock No. | List | Each | Lots | Lots Qty. | Shpg. Wt. |

## FLEXIBLE COUPLINGS

FERNCO®

No. 4P003

- Flexible PVC construction
- Resist corrosion, rot, and chemical and sunlight degradation
- 305 stainless steel bands; 301 stainless steel screws
- Max. PSI: 4.3
- Max. temperature: 70°F

Couplings connect any combination of these plain end drainage materials; service weight and extra heavy cast iron; black or galvanized steel; copper; and DWV Schedule 40, Schedule 30, sewer and drain plastic. Fernco brand.

### COUPLINGS ADAPT TO THE FOLLOWING OUTSIDE PIPE DIAMETERS

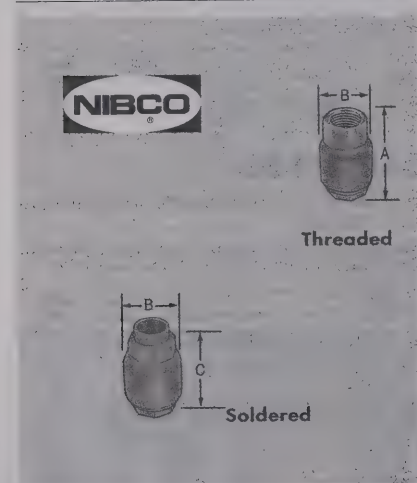
## Y-PATTERN CHECK VALVES



These valves are rated at 200 PSI for shock cold water, oil or gas. 125 PSI for both saturated steam to 353°F and fluid to 406°F. Bronze body, seat bonnet, hinge assembly. Conform to ASTM Specifications. Can be installed in horizontal and vertical positions and will operate in a declining plane of no more than 15°. Not for use with reciprocating air compressor service. Conform to Federal Specifications MSS SP-80. Nibco brand.

## RING CHECK VALVES

Rated at 250 PSI nonshock WOG to 180°F. Buna disc. Body and body end made of red bronze and conform to ASTM B-584. Actuated by #316 stainless steel spring. Can be installed in both horizontal and vertical positions with upward flow. Not for use as a foot valve or reciprocating air compressor service. ½" valves require 1.5 PSI to open; ¾ through 2" valves require 0.5 PSI to open. Nibco brand.

## THREAD SEALANTS

A

B

A & B **TFE Pipe Thread Sealant and Teflon Tape** are reliable sealants for all pipe threads, including plastic. Prevents corrosion, seizing, and galling. Withstands temperatures to 500°F and pressures to 10,000 PSI liquid or 2000 PSI gas. Meets UL Standards, MIL Specifications T-27703A. Anti-Seize Technology brand.

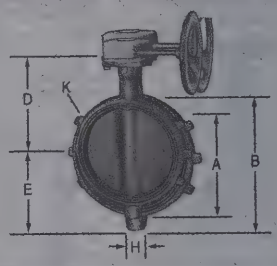
# COMMERCIAL BRONZE VALVES

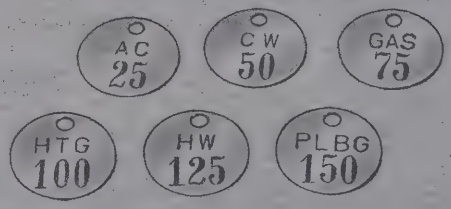


## BUTTERFLY VALVES

Lug Style with Leverlock Handle

NIBCO

Wafer Style with Handwheel Handle



These butterfly valves are rated to 200 PSI, vacuum to 27" mercury. Max. temperature: 225°F. Dead end service is at 200 PSI. Ductile iron body meets ASTM A-536. Extended neck allows for pipe insulation. Upper and lower bushings are standard. Molded in EPDM rubber liner fully supports valve body at flange seals. Quarter turn operation for full open or full close. Meets MSS-SP67, MSS SP25 and API-609. Not recommended for steam service. Nibco brand.

(*) Number of holes. (†) 2-6" sizes have leverlock handle; 8-12" sizes have handwheel handle.

## STANDARD BRASS VALVE TAGS

Six different consecutively numbered legends available. Round, 18-gauge solid brass tags are 1½" in diameter with a 3/16" tophole. Feature 1/4" black-filled characters above 1/2" black-filled numbers. Tags satisfy ANSI A13.1-1981-3.4. (For identification of materials in pipes of less than 3/4" in diameter. Use of permanently legible tags is suggested for valve and fitting identification). Sold in consecutively numbered lots of 25. Legends available are: AC (air conditioning), CW (cold water), HW (hot water), GAS, HTG (heating), and PLBG (plumbing). Made in USA. C.H. Hanson brand.

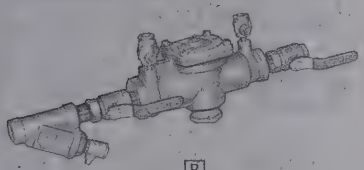
# BACKFLOW PREVENTER VALVES

WATTS REGULATOR

A

Replacement Parts Available
1-800-323-0620



## A DOUBLE CHECK VALVE ASSEMBLY

- Ball-type test cocks
- Full port bronze, quarter turn ball valve shutoffs
- Bronze strainer/stainless steel screen
- Supply pressure up to 175 PSI
- Water temperatures up to 180°F
- Replaceable seats
- CSA Certified (LM39769)

For protection of potable water supply in accordance with national plumbing codes, low hazard cross connections, and continuous pressure applications. Tested and Certified under the following standards for double check valve assemblies: ASSE Standard 1015 and AWWA Standard C-510-89. Designed to comply with FCCCHR of USC Manual, Section 10. IAPMO Listed. Watts brand (007QT Series).

| NPT Size (In.) | Dimensions (In.) L | W | Watts Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|

## B REDUCED PRESSURE ZONE BACKFLOW PREVENTERS

B

- Ball-type test cocks
- Full port bronze, quarter turn ball valve shutoffs
- Bronze strainer/stainless steel screen
- Supply pressure up to 175 PSI
- Water temperature up to 180°F
- Replaceable seats
- CSA Certified (LM39769)

For protection of potable water supply in accordance with national plumbing codes and water utility authority requirements. For high hazard cross connections in plumbing systems, or for containment at the service line entrance. Tested and Certified under the following standards for reduced pressure zone backflow preventers: ASSE Standard 1013, and AWWA Standard C-511-89. Comply with FCCCHR of USC Manual, Section 10. IAPMO Listed. Watts brand (009QT Series).

| NPT Size (In.) | Dimensions (In.) L | W | Watts Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|

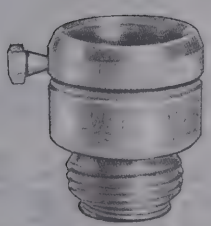
## C BACKFLOW PREVENTER VALVES



C

- With intermediate atmospheric vent
- Female union inlet and outlet connections
- Bronze body with stainless steel working parts
- Integral strainer and durable rubber discs
- Maximum pressure: 175 PSI
- Maximum emergency backflow temperature 250°F
- CSA Certified (LM39769)

For use under continuous pressure in laboratory/dairy equipment, processing tanks, sterilizers, and low hazard applications. For boiler feed lines to prevent backflow when supply pressure falls below system pressure. Tested and Certified under ASSE Standard 1012 and CSA Standard B64.3. Watts brand (9D Series).

| FNPT Size (In.) | Watts Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/2 | 9DM3 | 4A810 | $57.39 | $33.00 | 1.6 |
| 3/4 | 9DM2 | 4A811 | 57.36 | 35.00 | 1.6 |

## D HOSE CONNECTION VACUUM BREAKER

D

- Breakaway setscrew
- 3/4" Female hose thread inlet x 3/4" male hose outlet
- Maximum pressure: 125 PSI
- Maximum temperature: 180°F

Specially made for portable hoses attached to hose thread faucets. Prevents the flow of contaminated water back into potable water supply. Screws directly to sill cock.

Can be used at service sinks, pools, developing tanks, laundry tubs, dairy barns, marinas, and outside gardening applications. Important: Valves should only be used in areas where water spillage will not cause damage. Tested and Certified under ASSE Standard 1011 and CSA Standard B64.2. Watts brand.

**No. 6A766.** Vacuum Breaker. Shpg. wt. 0.3 lbs. List $15.90. Each.....**$11.41**

TELL US WHAT YOU NEED—WE'LL DO OUR BEST TO HELP YOU!

# HYDRONIC SPECIALTY VALVES

## A 2-WAY FLOW CHECK VALVES

- **Maximum temperature: 250°F**
- **Maximum pressure: 50 PSI**

Valves are used on hot water heating systems to maintain flow in one direction.

**Nos. 4A816 and 4A817** provide positive gravity shutoff when circulator pump is not running. Easily opened for gravity circulation.

**Nos. 4A813, 4A814, and 4A815** combine angle and horizontal checks. Extra expansion tank connection when installed at angle check. Watts brand (2000 Series).

## B AUTOMATIC VENT VALVES

- **Vent size: 1¼" dia., 3⅛" high**
- **Min. working pressure: 1.42 PSI**
- **Max. working pressure: 150 PSI**
- **Max. working temperature: 240°F**

Provide automatic air venting for hot or cold water distribution systems. Not for use with steam. Valves purge air that may be in system. Can also operate on an anti-vacuum device allowing air to enter the system when it must be drained. Repairable. Watts brand.

## C ASME PRESSURE SAFETY RELIEF VALVES

- **Wetted parts of bronze construction**

Heat resistant diaphragm isolates spring and working parts from water during release. Nonmechanical seat-to-disc alignment. Above drain seal eliminates water trapping and sediment fouling. Meet Military Specifications MIL-V-136-RD, Type III. Rating ASME. NB & HV. Watts brand (174A Series).

## D 1/2" BOILER FEED VALVES

- **Factory set at 15 PSI; fully adjustable from 10-25 lbs.**
- **Max. pressure: 100 PSI**
- **Max. temperature: 212°F**
- **Cast-iron body, complete units painted bronze**
- **Fast fill and purge lever permits rapid filling of system and sustained flow for air purging**
- **Unitized seat, stem, and disc with strainer screen for complete replacement maintenance**

No 4A824 has sweat union (1/2") on inlet only; other is 1/2" female NPT pipe thread. No. 3A558 is 1/2" female NPT pipe thread on both ends. Watts brand.

| Watts Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 1156F | **3A558** | $37.32 | **$23.99** | 2.0 |
| S1156F | **4A824** | 41.75 | **24.95** | 2.0 |

## E HIGH CAPACITY PURGE & BALANCING VALVE

- **Maximum pressure: 50 PSI**
- **Maximum temperature: 250°F**

Specially designed for exceptionally high capacity purging with a self-contained, tight seating ball-type purge valve. Balancing adjustment is by the same means and can be secured tightly by a packing compression nut to guard against accidental tampering while maintaining balanced adjustment. Bronze construction with 3/4" sweat connections. 3/4" hose thread connection for blow-off. 3¾"H x 2¾"L. Watts brand (PB56).

**No. 4A812.** Shpg. wt. 0.8 lbs. List $21.08. Each ..... **$16.87**

## NIBCO BOILER DRAIN VALVES

No. 5E389

- **Rated at 125 PSI water, oil, gas (WOG) to 180°F**
- **Made of solid bronze with aluminum handwheels**
- **3/4" garden hose thread-on outlet**

All valves have identical stem and bonnet assemblies. May be used interchangeably with any body type, in their respective pattern. Nibco brand.

B

C

D

E

F

G

H

## A FEED WATER PRESSURE REGULATOR

- Iron body diaphragm relief valve
- 1/2" threaded inlet connection
- Pressure relief valve opens at 30 PSI
- Feed valve set at 15 PSI and adjusts from 10-25 PSI
- Maximum temperature: 212°F
- Nonmechanical seat-to-disc alignment
- 5⅝H x 6½"L
- Watts brand (1450F)

**No. 4A822.** Shpg. wt. 3.1 lbs. List $70.05.
Each ..... $47.80

## B MULTI-ORIFICE FLOW CONTROL

- 1/2" sweat connections
- Adjusts to 2½, 3, 3½, or 4 GPM
- Maximum pressure: 150 PSI
- Maximum temperature: 250°F

For use with tankless heater installations. Select desired flows at 50 PSI by turning the cap to required setting. Watts brand (P3).

**No. 4A823.** Shpg. wt. 0.4 lbs. List $15.73.
Each ..... $12.62

## C TEMPERING VALVES

- Brass construction
- Solid wall hydraulic thermostat
- Sweat connections
- Maximum pressure: 150 PSI
- Maximum temperature: 180°F
- Standard temperature range: 120 to 160°F

For domestic hot water service. Mixes cold and hot water. Adjusting dial for temperature control. Heavy-duty stainless springs. Watts brand (70A Series). **Not to be used as an anti-scald device.**

| Size* (In.) | Watts Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/2 | 70A-1/2 | 4A818 | $43.34 | $29.60 | 0.6 |
| 3/4 | 70A-3/4 | 4A819 | 46.22 | 30.95 | 0.9 |

(*) Sweat connections.

## D CALIBRATED PRESSURE RELIEF VALVES

- Brass construction with stainless steel spring
- Not to be used as an operating control
- Adjustable range: 50-175 lbs.
- Maximum temperature: 180°F
- Male pipe thread inlet; 1/2" female pipe thread outlet

| Inlet MNPT | Watts Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/2" | 530-1/2 | 1X624 | $22.97 | $12.25 | 0.4 |
| 3/4 | 530-3/4 | 2X318 | 24.61 | 16.95 | 0.6 |

## E VACUUM RELIEF VALVE

- 1/2" male inlet connection
- Maximum water working pressure: 200 PSI
- Maximum temperature: 250°F

Automatically vents closed system to atmosphere when a vacuum is created. Prevents vacuum conditions which could siphon water from the system and burn out a heater or collapse a tank. Opens at less than 1/2" vacuum. Also suitable for steam service. Maximum pressure for steam service: 15 PSI. Tested and rated under ANSI Z21.22. AGA Certified. Watts brand (N36).

**No. 6A772.** Shpg. wt. 0.6 lbs. List $19.70.
Each ..... $13.99

## F WATER PRESSURE REDUCING VALVES

- Bronze body with integral stainless steel strainer and bypass feature
- Standard setting: 50 lbs.
- Maximum temperature: 180°F

Can be adjusted from 25-75 lbs. delivery pressure to the system. Nos. 2P080 and 2P081 include a union fitting that can be used on either side, and both ends are NPT threaded. Meets ASSE Standard 1003 (ANSI A112.26.2) and is listed by IAPMO.

| Size | Max. Supply PSI | Watts Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 1/2" | 400 | N35-BU-1/2 | 2P080 | $53.07 | $37.95 | 2.8 |
| 3/4 | 400 | N35-BU-3/4 | 2P081 | 59.07 | 41.95 | 2.7 |
| 1 | 300 | 25AUB-1 | 3A557 | 100.87 | 72.95 | 5.5 |

## G WATER PRESSURE REGULATOR

- Brass body
- Initial pressures up to 300 PSI
- 1/2" NPT female inlet and outlet connections
- Maximum temperature: 140°F
- 1/4" pressure gauge connection

Use for water, No. 2 fuel, and other liquids. Meets requirements for beverage dispensing equipment, paint spraying, pressure washers, drinking fountains, and many other services. Reduced pressure regulation from 3-50 PSI. Strainers (listed below) are recommended for use with regulators. Watts brand (263A).

**No. 2A645.** Shpg. wt. 1.3 lbs. List $45.59.
Each ..... $32.95

## H V-TYPE STRAINERS

V-type water strainers are used for beverage dispensers, ice cube makers, and instrument control systems. Bodies are constructed of cast bronze and have screwed end connections. Efficient and compact design has stainless steel strainer-screen which is easily cleaned by removing bottom cap. Working water pressure up to 250 PSI. Available in 4 sizes ranging from 1/8 to 1/2" NPT pipe. Watts brand (27 Series).

| Inlet / Outlet | Dimensions (In.) W | H | Screen Mesh | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| 1/8" | 1 | 1 | 40 | 3P855 | $11.76 | $11.82 | 0.3 |
| 1/4 | 2 | 1 | 40 | 3P856 | 15.80 | 12.63 | 0.4 |

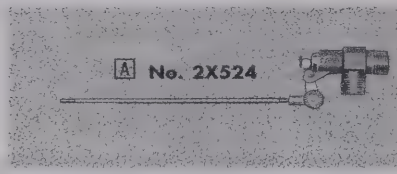
# FLOAT VALVE ASSEMBLIES, BALL VALVES, GATE VALVES AND FLOATS

## BRONZE FLOAT VALVE ASSEMBLIES



WATTS REGULATOR

### A 3/8 TO 1" ASSEMBLIES

Valve features machined-in seat and Buna N seals, cotter pin pivot assembly and fully adjustable float arm, male pipe threaded inlet and outlet. Float rod is solid brass with 1/4"-20 thread both ends. Watts brand.

### B 1¼ TO 2" ASSEMBLIES

Valve features machined-in seat and Buna N seals, cotter pin pivot assembly and fully adjustable float arm. Female pipe thread inlet and 2 x 1/2" free-flow outlet. Solid brass float rod with 3/8"-16 thread both ends. Watts brand.

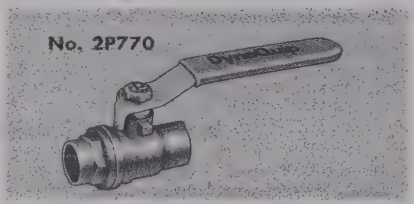
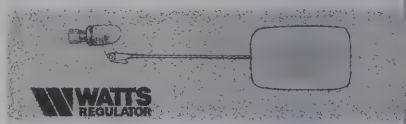
## BRASS SOLDER-END BALL VALVES



**Industrial quality** two-piece brass ball valves have standard porting and solder (sweat) ends at both ends. Suitable for standard and lead-free solder.

**Features include:** PTFE seats, brass ball, silicon bronze blowout-proof stem, and graphite filled PTFE stem packing.

Each valve is individually tested for leaks. 400 PSI WOG* (125 PSI with saturated steam).



**Corrosion-resistant** zinc dichromate plated steel handle and nut with dipped plastisol handle grip. Meets Federal Specification WW-V-35C, Type II, Composition BZ, Style 3, End Connection C, Class 400.

(*) Maximum working pressure, water, oil, gas.

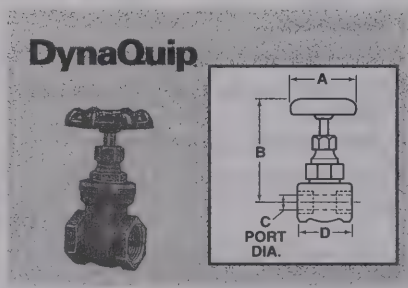
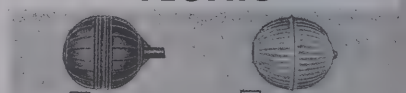
## COMPLETE FLOAT VALVE ASSEMBLY



- 3 GPM @ 100 PSI
- Solid brass body
- 304 Stainless steel seat (orifice)
- Adjustable level control
- Polypropylene float and copper stem
- 1/4" Brass compression fitting for 1/4" OD tubing
- Watts brand (M1/4FSS)

**No. 2X768.** Shpg. wt. 0.3 lbs. List.....$4.54. Each.....**$3.49**



## BRASS GATE VALVES

Brass gate valves to be used as main fluid shutoff in plumbing systems and liquid piping systems where positive shutoff is required. Valve features adjustable packing which allows easy adjustments to be made in the operating system if stem is leaking or easy replacement when system is down for maintenance. Non-rising stem provides stable height dimension for system design. Bonnet type, screw-in design. 200 PSI WOG maximum pressure. Temperature range of -20 to 150°F. For use only with fluids compatible with valve material construction. Dynaquip brand.

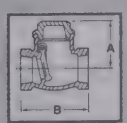
- **1/2" Male NPT pipe connection**
- **Maximum working pressure: 150 PSI**
- **Maximum shock pressure: 200 PSI**
- **Maximum velocity: 10 FPS**
- **Total volume: 10 cu-in.**
- **Maximum temperature: 180°F**

Permanent precharged air chamber (to 30 PSI) and sealed-in diaphragm flexes to absorb shock. Use in installation of dishwashers, washing machines, and other quick closing fixtures. Watts brand (150A).



**No. 3A559.** Shpg. wt. 0.7 lbs. List $23.28.
Each.....$16.95

## DYNAQUIP SWING CHECK VALVES

DynaQuip

No. 2A130

Swing check valves of cast brass designed to prevent fluid backflow in plumbing or liquid piping systems. Positive seating disc allows flow only in one direction. Screw-in cap provides easy access for periodic cleaning. Rated for 200 PSI WOG. Operating temperature range: -20 to 150°F. For use only with fluids compatible with the valve materials of construction.

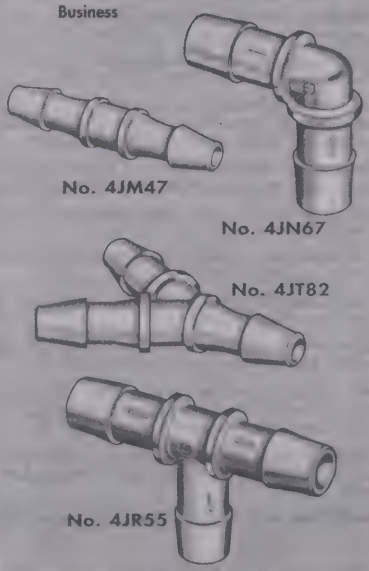
## HOSE FITTINGS



Single-barb hose fittings are available in two materials:

**Black Nylon:** Provides good tensile strength for general purpose.

**Natural PVDF (Polyvinylidene Fluoride):** Provides ultimate chemical resistance and mechanical strength and toughness.

- Precision molded, instrument quality
- Tubing ID ranges from 1/4 to 1"
- Sold only in packages of 10
- Eldon James brand

Women-Owned Business

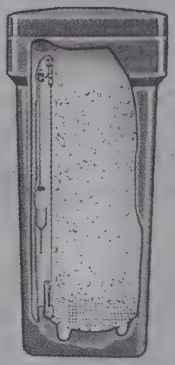
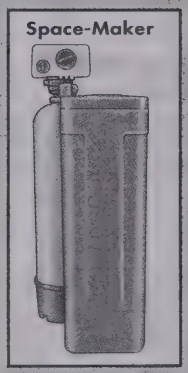
# RESIDENTIAL WATER SOFTENERS



We recommend that your water be analyzed before selecting water treatment equipment. Water analysis service kit No. 3P991 is available, see page 3074.

## MacCLEAN®



**FULL FLOW BYPASS VALUE is standard on all softeners.**

### MacCLEAN LIMITED WARRANTY

MacClean warrants all control valves on softeners and filters, including all internal and electrical components for up to 3 years and polyglass tanks for 5 years from date of manufacture. Text of warraanty available on request. See "Manufacturer's Warranties" on page opposite inside back cover.

**Microprocessor controlled models available for both time and meter initiated regeneration. Program is not lost even during power outages. Digital LCD read-out makes programming unit easy.**

**NSF** **Tested and listed under NSF Standard 44 for softening performance**

**Most MacCLEAN N Series softeners have been performance tested and validated by NSF (National Sanitation Foundation). This assures that components will not impart toxic chemicals to the water.**

**Standard Features:**

**Dependable, fully automatic motorized piston control valve** can be programmed to condition the hardest water and at the same time provide maximum salt efficiency. Rugged, glass filled Noryl control valve has only one moving part in water.

**Polyglass reinforced mineral tank** will never rust or corrode and is semi-transparent for visual inspection.

**Highest quality ion exchange resin** is stable and uniform for excellent exchange capacity and long life.

**Cyclone distributor** is a proprietary backwash system that vigorously scrubs the resin beads free of precipitated iron and other solids that ordinarily coat the beads.

**Meter water softeners** monitor water usage like a home water meter and signal regeneration according to amount of water used.

**Full Flow Bypass valve (included)** has 1" and 3/4" male pipe thread connections.

**Fully automatic, durable timer assembly** with heavy-duty gears makes programming simple.

**Float actuated safety brine valve** prevents overflow of brine maker during power outage.

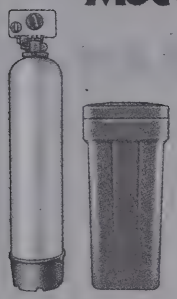
**Heavy-duty polyethylene brine maker** has 250 lb. salt capacity that minimizes frequency of salt refill.

**Salt support assembly** allows use of almost any type of salt including inexpensive rock salt, and minimizes "mushing" and necessity of frequent cleanouts.

**Compact space-maker models** are available where space is limited, but still have the advantage of separate mineral tank and brine tank.

**Installation and service video provided with all units.**

**Mechanical timer or meter.** Mechanical timer models (3P978; 3P979; 3P981; 5P236, and 3P984 through 3P986 are rugged, uncomplicated units that only require one setting (time of day) to program.



Nos. 3P977 and 3P982 are mechanical meter units. Utilize a simple and reliable turbine meter with mechanical valve to measure gallons of soft water used and to start regeneration based on actual water used rather than time. Eliminate costly premature regeneration, especially where water usage is highly unpredictable. Save water and salt. Turbine meter is accurate to 0.25 GPM.

**Microprocessor timer or meter.** All microprocessor units feature: 1. Quick and easy push button programming; 2. State of the art, Novram Memory that retains regeneration program even during power failures; 3. Digital display that show time of day, time of regeneration, length of regeneration cycles, and gallons consumed between regeneration; 4. Extra Cycle button that immediately initiates regeneration for additional soft water without disturbing normal program.

No. 3P975 is a microprocessor timer unit that uses an electronic time clock and mechanical valve. Can be set for 1-99 days between regeneration.

Nos. 3P973 and 3P974 are microprocessor meter units that use an electronic head, mechanical valve and a mechanical turbine meter to initiate regeneration after a programmed amount of soft water has been used. Turbine meter is accurate to 0.25 GPM. Microprocessor control uses a 9 volt battery backup.

# MacCLEAN®
# RESIDENTIAL WATER SOFTENERS

**MacCLEAN®**

**No. 3P981**
**RUST BUSTER**

**Superior iron removal and softening with one unit. Removes "clear water" iron up to 7 PPM. For best results, use Iron-X resin cleaner No. 3P966 with the salt. Private well systems should have precharged water tank only.**

**No. 5P236**
**ECONOMY SOFTENER**

**Built with same ruggedness as other units, but not equipped with the following features: bypass valve, salt support and cyclone. Use with block salt only.**

**Benefits of soft water:**

- **Removes hardness from water**
- **Improves the taste of beverages and foods cooked in water**
- **Washes clothing cleaner**
- **Makes bath soap and shampoo more effective**
- **Increases service life of water heaters and washers**
- **Removes small amounts of clear iron**

Water hardness is caused by dissolved calcium and magnesium compounds found in varying quantities in all municipal and well water supplies. These compounds form deposits similar to limestone and also combine with soap to produce soap scum. Deposits in pipes and appliances reduce water flow; interfere with operation. Soap scum causes streaks and spotting on glassware and accumulates on laundered fabrics causing discoloration and wear.

**HOW TO USE SIZING CHART:**

1. Determine adjusted water hardness by adding 3 times the amount of iron in the water in parts per million (PPM) to the hardness of the water in grains per gallon (GPG). Example: Water contains 19 GPG hardness and 2 PPM iron. Adjusted hardness equals 25 GPG [19+(3 x 2)]. Find the range on the left which includes this adjusted water hardness.
2. Locate the box intersected by Adjusted Water Hardness and No. of People in Household. Shading in box indicates which models would be suitable for your application. You may select a unit larger than indicated, but never smaller. Larger units allow you to regenerate less frequently.

| ADJUSTED WATER HARDNESS | NUMBER OF PEOPLE IN HOUSEHOLD | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 1-10 | | | | | | | | | | |
| 11-20 | | | | | | | | | | |
| 21-30 | | | | | | | | | | |
| 31-40 | | | | | | | | | | |
| 41-50 | | | | | | | | | | |
| 51-60 | | | | | | | | | | |
| 61-70 | | | | | | | | | | |
| 71-80 | | | | | | | | | | |
| 81-90 | | | | | | | | | | |
| 91-100 | | | | | | | | | | |

3P978 — 3P984 3P975 5P236 3P977 3P973 — 3P985 3P979 3P981 3P974 — 3P986 3P982 — 3P983

Note: No. 3P983 light-duty commercial unit sold on page 3072.

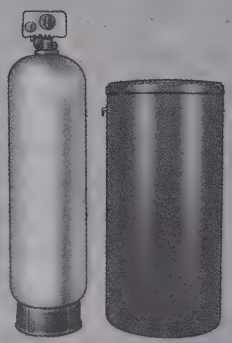
(*) Listed under NSF Standard 44. (†) Block salt only.

# MacCLEAN COMMERCIAL WATER SOFTENERS

## LIGHT-DUTY COMMERCIAL SOFTENER—90,000 GRAIN



**High-capacity two-tank system** for use in boiler treatment, large home, office, and restaurant applications.

**1" glass-filled, Noryl control valve** has only one moving part in water and an easy to program timer. Dependable motorized piston control valve. Corrosion resistant fiberglass reinforced mineral tank. Stable and uniform high quality ion exchange resin.

**Safety brine valve** prevents overflow of brine maker. Brine maker holds 800 lbs. of salt. Salt support assembly allows use of almost any type of salt and minimizes mushing and frequent cleanouts.

**Unit designed** for temperatures to 100° F and pressure to 125 PSI.

**Installation and service video provided.**

MacCLEAN®

- **12 GPM service flow rate**

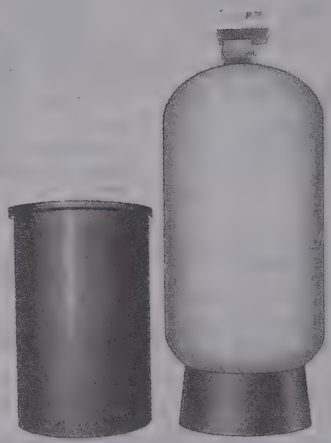
| Max. Grain Capacity | Service Flow Rate | Factory Salt Setting | Salt Storage | Dimensions (In.)* W | D | H | MacCLEAN Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|---|
| **90,000** | 12 GPM | 18 | 800 lbs. | 42 | 26 | 70 | US3000 | **3P983** | $1097.10 | **$1058.00** | 361.0 |

(*) Provides minimum work area around unit.

## COMMERCIAL WATER SOFTENERS—150,000 AND 360,000 GRAIN

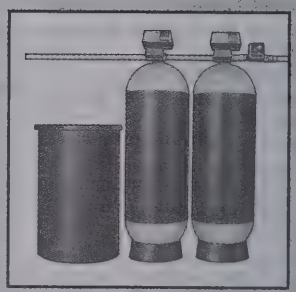
**Two-tank systems** for use in schools, nursing homes, hospitals, motels, apartment buildings, car washes, laundries, and factories.

**2" Solid brass control valve** provides high service flow with minimal pressure drop. Durable solid brass motorized piston valve—6 cycle with timed brine refill. Can be programmed to regenerate during low demand periods.



**Heavy-duty fiberglass mineral tank** never rusts or corrodes. High capacity ion exchange resin assures excellent exchange capacity and long life.

**Quartz gravel under drainage** assures multiple paths for water to exit tank, reducing pressure drop. Also provides uniform water flow across entire cross-sectional area of tank to prevent channeling.



**Heavy-duty brine maker** complete with air check and salt support assembly to minimize brine tank cleanout. Large salt storage capacity for less frequent refills.

**Unit designed** for temperatures to 100°F and pressure to 125 PSI.

**Installation and service video provided.**

MacCLEAN®

**For higher flow rates, twenty-four hour soft water or emergency back-up multiple systems can be plumbed in parallel**

| Max. Grain Capacity | Service Flow Rate | Factory Salt Setting | Salt Storage | Dimensions (In.)* W | D | H | MacCLEAN Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|---|
| **150,000** | 22 GPM | 30 | 800 lbs. | 60 | 24 | 90 | KS05000 | **3P967** | $2490.81 | **$2086.00** | 549.0 |
| **360,000** | 65 | 72 | 1200 | 72 | 30 | 96 | KS12000 | **3P968** | 4322.24 | **3918.00** | 1102.0 |

(*) Provides minimum work area around unit.

## SIZING COMMERCIAL SOFTENERS

**Sizing:** Service flow rate is the most important factor in determining the correct unit for your application. If 24-hour soft water is required, multiple units are needed to handle the service flow during regeneration of each unit. After selecting the correct unit or units to handle the flow rate requirements, be sure the system is of adequate grain capacity.

**To calculate grain capacity:** Multiply maximum gallons of water used per day by the water hardness in grains per gallon. The result is the grains or capacity required per day. Compare the needed grain capacity with the capacity of the unit selected (based on flow rate) to insure that the unit is large enough. Example: application requires 5000 GPD x 20 grains/gal. = 100,000 grain. Application requires 100,000 grain unit or more.

# MacCLEAN RESIDENTIAL WATER FILTERS

## CHEM-FREE IRON FILTERS Nos. 3P976 AND 5P235

Remove most types of iron without the need for a chemical regenerant. Systems use air to oxidize iron from the water which can then be filtered by media. Come complete with hydrocharger air injector, tank, and media. Note: Either an air to water tank with an air release valve or a captive air type pressure tank are acceptable, but no air to water type without an air release. If the pH of your water is below 7, the filter media must be periodically replenished with MpH adder (No. 3P969 sold on page 3074). To ensure proper functioning of filter, water must be supplied by a submersible pump—not included. Tested and Listed under NSF Standard 42 for iron reduction.

## GREENSAND IRON FILTER No. 3P980

Automatically regenerates with No. 3P988 potassium permanganate. Removes up to 8 PPM clear water iron. Comes complete with potassium storage tank.

## UP-FLOW ACID NEUTRALIZER No. 3P990

Raises pH to stop blue/green stains, reduces corrosion in plumbing pipe and water using appliances. Uses no electricity, requires no backwashing. Up-flow design minimizes media "cementing". Requires annual replenishment with No. 3P970 neutralizer media, see page 3074.

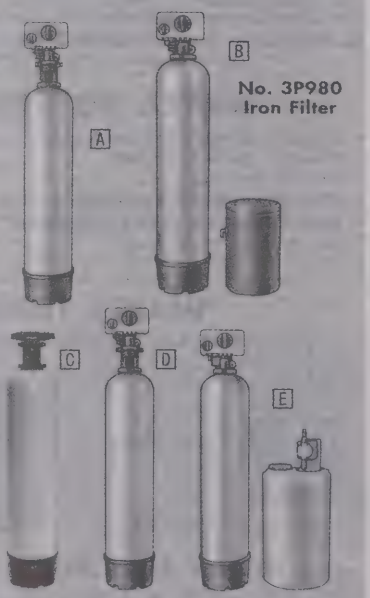
## TASTE AND ODOR FILTER No. 3P971

Automatic whole house backwashing filter contains activated carbon to improve taste and odor of water by reducing the chlorine and musty smells.

## TURBIDITY FILTER No. 3P972

Reduces murkiness in water due to silt and other suspended materials from pond and lake water. Automatically backwashes suspended materials to drain. Can filter down to 20 microns. **Note:** If water supply is of unknown or questionable quality, it should be tested to ensure that it is microbiologically safe for consumption. Also, do not use for sand removal.

## SULFUR FILTER No. 3P987



Removes up to 15 PPM of hydrogen sulfide gas. Shipped complete with electronic feed pump, solution tank, and automatic backwashing filter. Requires No. 3P989 Sul-X solution (sold separately).

**Note:** Pumping rate of well system is critical to operation of filters. Use following formula to check if your pump has adequate backwash requirements.

With pressure tank full, draw water into a container of known volume, measure the number of gallons drawn until the pump starts again. This is called Draw Down. Divide the number of gallons drawn by the cycle time and multiply the result by 60 to arrive at the pumping rate in gallons per minute (GPM).

## MacCLEAN®

- Iron filters eliminate rust stains, increase pH, improve taste, odor and color of water, use no salt or chemical regenerants, and conserve water
- Control valve design completes back washing quickly
- Temperature rating: 100°F at 125 PSI pressure
- 1" NPT water connection except No. 3P990 which is 3/4" NPT
- Installation and service video provided

No. 3P980 Iron Filter

| Fig. | Application | Filter Media | Flow Rates (GPM) Cont. | Service# | Pumping Rate Required | Dimensions (In.) W | D | H | MacCLEAN Model | Stock No. | List | Each | Shpg. Wt. |

(*) Requires addition of No. 3P969 MpH adder if untreated water has a pH below 7. (†) Requires annual addition of No. 3P970 neutralizer media. (‡) Chem-free filter Nos. 3P976 and 5P235 require a submersible pump that will deliver 7 GPM after the hydrocharger (comes with filter) is installed between pump and pressure tank. (#) 10 minutes or less with immediate recovery. No lawn sprinkling, no ground water heat pumps, no swimming pools

# WATER FILTER SELECTION CHART

| FILTER MODEL NO. | WATER PROBLEM: IRON | SULFUR | ACIDIC | CHLORINE | TURBIDITY |
|---|---|---|---|---|---|
| 3P976, 3P980, 5P235 | X | | | | |
| 3P987 | | X | | | |
| 3P990 | | | X | | |
| 3P971 | | | | X | |
| 3P972 | | | | | X |

**IRON:** Iron bearing water can leave rust stains on sinks, tubs, and toilets in addition to laundry, dishes, and glassware. Iron can also give a metallic flavor to water.

**SULFUR:** Hydrogen sulfide is an especially obnoxious contaminant. It produces a "rotten egg" odor and causes rapid deterioration of plumbing systems and water using appliances such as clothes washers, dishwashers, coffee makers, etc.

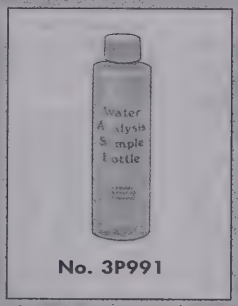
**ACIDIC WATER:** Acidic water is the result of a low pH. This condition can be very corrosive to the plumbing pipes and sometimes causes a blue/green stain.

**CHLORINE:** Many municipal water supplies as well as private well systems utilize chlorine as part of a method of water treatment. This can give a chlorine taste and odor to water.

**TURBIDITY:** Turbidity is caused by suspended material in water supply. The results of this can be a cloudy or murky water condition. Lakes and ponds often times have turbidity.

# WATER TEST KITS, WATER TREATMENT CHEMICALS AND FILTER MEDIA

## WATER ANALYSIS SERVICE KIT



**For use when water testing information from local water company or municipal water service is not available.** Use the kit to send a sample of water to be treated, with completed data form, to MacCLEAN's laboratory. An analysis will be returned, together with a recommendation of proper softener or filter model. Kit includes plastic bottle, data sheet, and return shipping carton. Read and follow instruction on request for analysis form regarding proper sampling technique and fill out all requested information. Test for sulfur (rotten egg odor) must be performed on site.

**No. 3P991.** Shpg. wt. 0.1 lbs. List $2.08. Each ..... **$1.20**

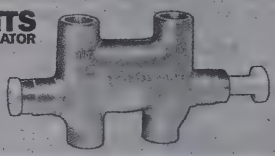
## MASTER TEST KIT

**On-site test kit** accurately analyzes 7 water contaminants: hardness, iron, pH, manganese, tannic acid, hydrogen sulfide, and copper. Enough reagents are supplied to conduct approximately one hundred tests for each contaminant. Detailed instructions and premeasured reagents make this professional kit easy to use.

**No. 4P065.** Shpg. wt. 9.0 lbs. List $312.85. Each ..... **$297.75**

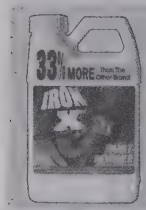
No. 3P991

MacCLEAN®



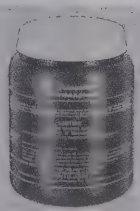
Master Test Kit
No. 4P065

## WATER SOFTENER BYPASS VALVE



- **Rugged, durable bronze body, Noryl plunger, Buna N O-rings**
- **Easy to operate**
- **Eliminates need for grounding strap**
- **Interchangeable push rods change direction of water flow**
- **In and Out markings cast into body**
- **3/4" copper sweat connections**
- **3" center house ports**
- **Watts brand (M9500).**

**No. 6A773.** Shpg. wt. 2.5 lbs. List $41.10. Each ..... **$29.00**



WATTS REGULATOR

## WATER TREATMENT CHEMICALS AND FILTER MEDIA

No. 3P966

No. 4P064

No. 3P969

No. 3P989

### IRON-X ALL PURPOSE RUST REMOVER

Restores capacity to iron fouled softener resin. Add 1/3 cup of Iron-X for each 100 lbs. of salt added to brine tank. Removes iron stains from clothing, bathroom fixtures, shower stalls, even house siding and concrete structures.

**No. 3P966.** Shpg. wt. 1.4 lbs. List $4.25. Each ..... **$4.10**

### POTASSIUM PERMANGANATE

**Used to regenerate greensand Iron Filter No. 3P980.** Technical grade of proper mesh size to assure proper dissolve rate in the saturator-regenerator tank. Be sure to read and follow special instruction on bottle for proper handling and usage.

**SPECIFICATIONS AND ORDERING DATA**

| Container Size | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 1.5 lbs. | 3P988 | $13.72 | **$11.49** | 1.8 |
| 5 | 4P064 | 42.32 | **40.35** | 5.6 |

**TELL US WHAT YOU NEED—WE'LL DO OUR BEST TO HELP YOU!**

### MpH ADDER

**For Chem-Free Iron Filters, Nos. 3P976 and 5P235.** Used to remove iron when water pH is below 7.0. Add MpH Adder to replenish the filter's capability to adequately increase pH. Also beneficial when added to Up-Flow Neutralizer, No. 3P990, bed to improve pH adjustment when pH is 6.0 or lower.

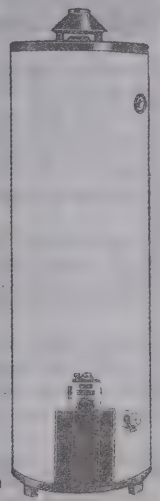
**No. 3P969.** ❸ Shpg. wt. 4.2 lbs. List $10.83. Each ..... **$10.48**

### SUL-X SOLUTION

**Used to precipitate sulfur (rotten egg odor) from water** to a form that can be filtered by the Sulfur Filter, No. 3P987. Read and follow instructions on outside of bottle for proper handling and usage.

**No. 3P989.** ❸ Shpg. wt. 10.0 lbs. List $13.00. Each ..... **$10.95**

### ACID NEUTRALIZER FILTER MEDIA



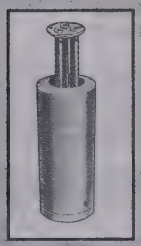
**A blend of calcium carbonate and magnesium oxide** used in the Up-Flow Neutralizer, No. 3P990. The neutralizing media will require periodic replenishment. Frequency and amount of replenishment depends on the volume of water used and its acidity prior to treatment. Filter media slightly increases the hardness of water, depending on raw water acidity and hardness.

**No. 3P970.** ❸ Shpg. wt. 47.0 lbs. List $33.41. Each ..... **$30.55**

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Sheets (MSDS) are available. See page opposite inside back cover.

# ENERGY EFFICIENT GAS WATER HEATERS

- Not for use in mobile homes



Rheem®

DESIGN AMERICAN GAS ASSOCIATION CERTIFIED

Replacement Parts Available 1-800-323-0620™

Nos. 6E700-6E711

Nos. 6E712-6E713

**High Efficiency Units (Nos. 6E712 & 6E713) Only:**

**Patented Unitized Heat Exchanger Core Design** welded before glass lining provides more heat transfer surface than a conventional single flue. Much higher BTU input can be employed, even while increasing thermal efficiency beyond conventional water heaters.

**NOTE: Conversion kits not available**

**All Units Feature:**

- Durable aluminized steel burner designed for efficient, quiet operation
- Temperature range: 60-160°F preset at 90°F
- 3/4" NPT water connections and relief valve opening
- Not supplied with T&P valve; order No. 4X563
- Stainless steel burners on LP units designed specifically for LP gas
- Meet or exceed National Appliance Energy Conservation Act (NAECA) requirements, ASHRAE Standard 90
- AGA Certified

**Energy Efficient Units Feature:**

- Four hole top providing easy access to 3/4" NPT water connection and relief valve opening
- Fuel efficient low input pilot
- Heavy gauge steel jacket with baked on enamel finish
- Glasslined tanks made of special materials, coated with an exclusive porcelain formula and fused to solid steel at 1600°F
- Energy cut-off device shuts off gas to pilot and burner if temperature exceeds safe limit

**High Efficiency Units Feature:**

- EverKleen™ — Patented, self-cleaning dip tube helps keep sediment in suspension through a spiraling, self-cleaning action
- Energy efficient flue baffle retains heat in flue longer for maximum heat transfer to tank water
- Simple but effective heat trap fittings cut convective heat loss by up to 60%
- Non-metallic corrosion-proof drain valve designed for quick draining
- Increased thermal efficiency resulting in lower operating cost
- High performance recovery
- Rigid polyurethane foam insulation for improved economy and fuel savings

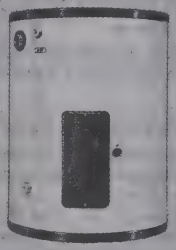
# ENERGY EFFICIENT ELECTRIC WATER HEATERS

Replacement Parts Available
1-800-323-0620



E11867

Rheem®

Tall and Low Boy

NOTE: Not for sale in Massachusetts, North Carolina, or California. See page 3016 for NC, MA, and CA models.

Tabletop

Compact

### TALL AND LOW BOY

- Available in 30 through 120 gallon sizes
- Rigid polyurethane foam insulation process for superior heat retention
- High-efficiency resistor heating elements specially treated magnesium oxide and tinned copper to resist corrosion
- Isolated tank design reduces heat loss
- Temperature range: 90-150°F preset at 120°F
- All water heaters have 6 year tank warranty with 2 year parts
- Low boy profile allows under counter installation

### TABLETOP*

- Baked enamel top is acid and heat resistant
- Cold water inlet, hot water outlet, relief valve and electrical connectors are at top of tank for easy access and fast economical installation, 36"H with 4" integral backsplash

### COMPACT*

- Energy efficient model for installation in limited spaces
- Anode rod designed to equalize aggressive water action
- Drain valve not included
- High efficiency heating element

### HIGH PERFORMANCE*

- Rigid 2Z\x" polyurethane foam with R-value of 20.0 (without pipe insulation, energy factor is 0.93)
- 21" diameter tanks
- High efficiency screw-type stainless steel premium resistor elements
- Exceeds toughest energy efficiency standards
- Temperature range: 90-150°F preset at 120°F
- 8 year tank and parts warranty

(*)Meets or exceeds National Appliance Energy Conservation Act (NAECA) requirements, ASHRAE Standard 90.

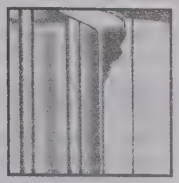
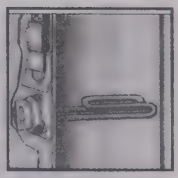
(*) Not for sale in Massachusetts, North Carolina or California. See page 3081. (†) Add 4" to height to include backsplash.



3/4" NPT water connections and relief valve opening. Not supplied with T & P valve, order No. 4X563. All models equipped with screw-type immersion elements. All models equipped with over temperature protector that automatically shuts off all power before temperature exceeds safe limits.

# HIGH EFFICIENCY AND INSTANTANEOUS ELECTRIC WATER HEATERS

## HIGH EFFICIENCY ELECTRIC WATER HEATERS



E11867

Rigid Polyurethane Foam Insulation for maximum heat retention.

Rheem

High efficiency screw-type stainless steel premium elements.

- Nos. 6E014-6E017 feature EverKleen™ patented self-cleaning dip tube which helps keep sediment in suspension through a spiraling, self cleaning action
- Temperature range: 90-150°F preset at 120°F
- Isolated tank design
- 4 ft. of pipe insulation
- Not supplied with T&P valve (order No. 4X563)
- 3/4" NPT water connections and relief valve opening
- Exceeds toughest energy efficiency standards including the National Appliance Energy Conservation Act (NAECA) requirements, ASHRAE Standard 90
- 10 Year tank and parts warranty

## INSTANTANEOUS ELECTRIC WATER HEATERS

POWERSTREAM New

E86070

- Mount in any direction
- Durable plastic housing
- Lead-free construction
- Copper sheathed heating elements
- Dual heat settings
- Complies with National Appliance Energy Conservation Act as of January 1, 1990

**No. 4P001.** 277V Heater designed for facilities such as factories, office buildings, and warehouses that have 440V service.

**No. 4P002.** Recommended where ground water temperatures exceed 60°F and flow rates are less than 1 GPM. Maximum outlet temperatures: 135°F. Not designed for use as a booster.

**WARNING:** Pay careful attention to unit selection. Temperature and volume of water are dependent on the kilowatt rating of heater. The higher the kilowatt rating, the greater the volume of hot water. Maximum outlet temperature: 135°F. These heaters are not designed to be used as boosters or preheaters.

**Install without a temperature/pressure relief valve** (refer to local codes) close to faucet or tap to eliminate long pipe runs. 3/8" NPT inlet and outlet.

12¼L x 3W x 6½"H. UL Listed. Powerstream brand.

# HIGH EFFICIENCY ELECTRIC WATER HEATERS & PORTABLE WATER HEATER EXPANSION TANKS

## HIGH EFFICIENCY ELECTRIC WATER HEATERS

Marathon

**MARATHON LIMITED WARRANTY**

Tank is warranted not to leak for as long as you own your home. If you should sell your home, or if heater is installed in a barn or rental property, the warranty is for 15 years from the original date of purchase. Parts are warranted for 5-years.

No. 6E022

Replacement Parts Available
1-800-323-0620

- Seamless, blow-molded polybutylene inner tank is rust and corrosion-resistant
- Molded tank is reinforced with multiple layers of fiberglass for strength
- Nos. 6E022 and 6E023 feature 2 inches of precast polyurethane foam; No. 6E025, 3 inches of precast polyurethane foam, which surrounds tank
- Molded high impact plastic exterior resists scratches and corrosion
- No anode rod is necessary, eliminating potential odor and service problems
- Factory installed T & P valve
- Protected drain valve
- Bowl-shaped tank bottom for efficient draining
- Heat trap nipples for increased efficiency

Electric units have front-mounted wiring panels which make electrical connections easier. Operate on 240 volts with 4500/4500 total wattage. Because all wiring runs in conduit, these heaters can be readily converted to off-peak utility use. Upper element contains a thermal fuse which opens when operation is attempted with inadequate water levels, preventing damage to tank. Element must be replaced when this occurs. 20.5 gallon recovery GPH at 90° rise.

| 180 | | | | | |

Use expansion tank No. 2P672
Use expansion tank No. 2P673
Temp. and/or volume beyond range of individual expansion tanks. Install multiple tanks in series for larger system.

No. 2P672

**5-YEAR LIMITED WARRANTY**

Text of warranty available on request See "Manufacturers' Warranties" on page opposite inside back cover.

**Diaphragm type potable water expansion tanks** are designed to accommodate the natural expansion of water in open water systems. Help eliminate the problem of weeping T & P valves and water hammer, when turning off hot water faucets. Water-logging, common in regular steel expansion tanks, is virtually eliminated.

**Drawn steel construction** with strong flexible double Butyl diaphragm. Steel retaining ring holds diaphragm securely. Epoxy finish protects tank exterior against rust. 3/4" NPTM connection on bottom of tank. Air changing valve on top of tank.

**Factory precharged to 40 PSI,** field adjustable. Maximum working pressure: 150 PSI. Maximum temperature: 200°F. For use in potable or open systems.

- **State and local codes may require installation of ASME rated features. No. 6E738 is ASME Coded. Consult applicable codes prior to purchase and installation.**
- **T & P valve is included with all water heaters on this page**

### [A] 3-YEAR WARRANTY GAS MODELS

- **Spark to pilot ignition (standing pilot on Nos. 6E741 and 6E742 models)**
- **All models equipped with a hand hole cleanout for inspection and ease of maintenance**
- **Heavy-duty models have patented unitized heat exchanger for increased heat transfer**
- **Internal flue damper models minimize heat loss during standby operation**
- **No. 6E738 is ASME Coded.**

Note: Gas conversion kits not available. Not for use in mobile homes.

### [B] 3-YEAR WARRANTY ELECTRIC MODELS

- **Electric units can be wired for 1 or 3 phase operation (18KW = 3-6000 watt elements; 36KW = 6-6000 watt elements)**
- **Screw in type stainless steel elements resist chemical corrosion and burnout**
- **Surface mounted thermostat fully adjustable up to 180°F, ensure instant shutoff for safety and economy of operation**
- **A light emitting diode diagnostic panel pinpoints a non-operating element when unlit**

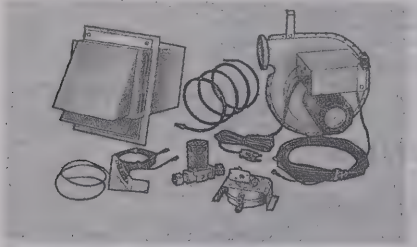
# POWER VENT NATURAL GAS WATER HEATERS AND RV WATER HEATERS

Replacement Parts Available
1-800-323-0620

## NATURAL GAS WATER HEATERS

**Modular Blower Assembly** (included) designed for easy maintenance service and fast installation. 110V electrical service required.



- **Power Glo™ Electronic Ignition System provides positive burner ignition without a pilot**
- **Honeywell Electronic Control Module controls ignition operation**
- **Rigid polyurethane foam insulation process for improved economy and fuel savings**
- **Exceeds requirements of the National Appliance Energy Conservation Act (NAECA), ASHRAE Standard 90**
- **3/4" NPT water connections and relief valve opening**
- **Horizontal or vertical venting**
- **Not supplied with T&P valve; order No. 4X563**
- **Temperature range: 60-160°F preset at 90°F**
- **Install up to 40 feet from outside wall using 3 inch PVC pipe for venting***
- **Exclusive power switch for vacation shutdown or servicing**
- **6 Year tank; 2 year parts warranty**
- **Conversion Kit not available**
- **Not for use in mobile homes**

* **Outside terminal fitting with screw included. Pipe is not included.**

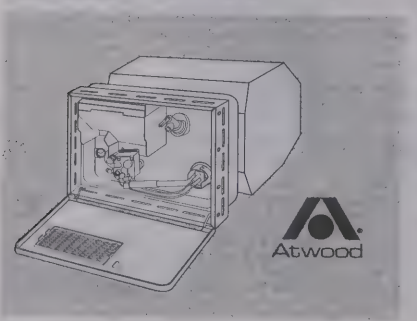
❷ These products are covered by California Proposition 65. California purchases or shipments, see first page of Grainger Branch Listing or call any California branch.



## WATER HEATER VENT PACKAGE

Includes components needed to vent gas water heaters up to 60,000 Btu input. AGA Certified. Tjernlund brand (VP-2).

- **Exhaust blower has 3" inlet and outlet, 115V motor with 6 ft. power cord**
- **24V Control relay and 24V solenoid switch**
- **Adjustable post-purge timer**
- **Gas diaphragm switch and 3" vent hood**
- **AGA Certified**

**No. 5C083.** Shpg. wt. 19.0 lbs. List $555.00.
Each ..... **$291.75**

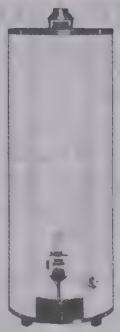
## 6 GALLON RV WATER HEATER

Designed for use in recreational vehicles, approved by AGA/CGA, this water heater is powered by LP gas. Regular standing pilot used. Rough opening - cutout size is 16 1/4" wide; 12 5/8" height; 17 5/8" depth needed. Equipped with T & P valve with a maximum pressure not to exceed 150 PSI. Energy cut-off switch shuts off gas if temperature exceeds safe limits. 1/2" NPT female water connections, 3/8" male flare fitting on gas connection. External gas connection reduces possibility of gas leaking to inside of coach. Serviceable entirely from outside. Maximum input 8800 Btu. Atwood brand (96110).

**No. 5P762** ❷. Shpg. wt. 28.0 lbs. List $291.64.
Each ..... **$254.50**

❷ These products are covered by California Proposition 65. California purchases or shipments, see first page of Grainger Branch Listing or call any California branch.

# NC, MA, CA CODE AND NSF APPROVED WATER HEATERS



Electric Water Heater

Replacement Parts Available
1-800-323-0620

**Manufactured to meet specific regulations** for sale and installation in areas covered by North Carolina, Massachusetts, and California NOx (the South Coast Air Quality Management District of California and Bay Area Air Quality Management District) codes.

- **North Carolina models include factory installed T&P valve and high temperature dip tube. Other states order No. 4X563 T&P valve.**
- **Massachusetts models comply with labeling requirements**
- **All models meet or exceed requirements of the National Appliance Energy Conservation Act (NAECA) ASHRAE Standard 90.**
- **3/4" NPT water connections and relief valve opening**
- **6 year tank warranty; 2 year parts warranty**

## NSF APPROVED 180°F SANITIZING COMMERCIAL WATER HEATERS

- **Water connection: 1¼" NPT brass nipples**
- **Adjustable thermostat from 100 to 190°F**
- **ASME T&P valve included • Glass lined storage tank**
- **Working pressure 150 PSI • Fused 120V control circuit**

These 240V single phase electric commercial water heaters are specifically designed for food service applications providing 180°F sanitizing rinse water to comply with National Sanitation Foundation and all Federal, State, County and local health department sanitation codes. These units can also be utilized as circulating tank commercial electric water heaters for gravity or pump circulations to an auxiliary storage tank. Heating elements are screw-in type made of Nichrome embedded in magnesium oxide sealed in a tinned copper tube for long life. A light emitting diode diagnostic panel pin points a non-operating element when unlit. Vanguard brand.

# IMMERSION WATER HEATER ELEMENTS

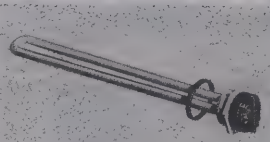
## CHROMALOX ELECTRIC REPLACEMENT WATER HEATER ELEMENTS

Elements are copper sheathed and tinned to minimize galvanic action. **Note:** Verify insertion length to ensure proper fit inside tank.

**High Watt Density Elements.** Supplied as original equipment on most domestic water heaters. Excellent for use in areas with normal water hardness and minimal mineral content.

**Low Watt Density Elements.** Low watt density elements are for use in areas with moderately hard water.

**"Water Wizard" Alloy Sheath Elements.** "Water Wizard" elements are recommended for use in areas with extremely hard water, high sulfur, and lime content. Constructed with a nickel base alloy sheath material. Due to their extremely low watt density, these elements are longer than those supplied on original equipment.



**Note:** All 240 volt elements may be used in 208 volt installations. However, resulting wattage at 208 volts will be 25% lower than rated wattage at 240 volts (i.e., No. 2E409, rated 240 volt, 4500 watt, will produce 3375 watts when used on 208 volts).

**Screw-in type elements** have 1" NPSM screw plug. Type AG-1 rubber gasket included. May be used with No. 2E483 adapt-o-flange to replace bolt-on flanged elements with 4 holes on 2½" diameter bolt circle.

**Bolt-on square flange type** elements fit all tank flanges with 4 bolt holes on 2½" diameter bolt circle. Flat 2½" square composition gasket and 1/2" thick round donut gasket are supplied.

**Note:** 6000 watt, 480 volt elements are available through Grainger Parts Operations. Call 1-800-323-0620 and ask for part number SG2603 or 413649.

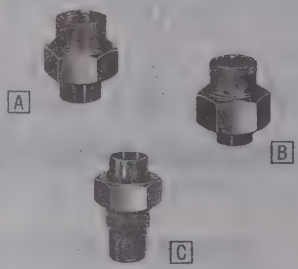
# WATER HEATER ACCESSORIES

## DIELECTRIC UNIONS



- **Rated at 250 PSI at 180° F**
- **Supplied with GA gaskets**

**Used to provide protection** against the destruction caused by galvanic and stray current corrosion. GA gaskets are suitable for water, air, oil, natural gas, propane, gasoline, kerosene, mineral oil, vegetable oil, and alkalines.

**Meet requirements of ANSI B16.39;** pipe threads are in accordance with ANSI B2.1 and solder joints meet National Plumbing Standards. Watts brand (3000 Series).

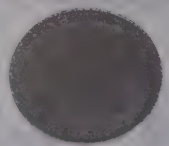
WATTS REGULATOR

## WATER HEATER STAND

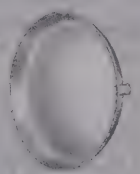
**Heavy 14-gauge,** galvanized steel deck and frame stand supports most commercial and residential water heaters up to 100-gallon capacity. Boltless frame can be assembled quickly using only a rubber mallet. Complies with Section 1310 of the Uniform Plumbing Code, and City of Los Angeles Code regarding water heater installation.

Dimensions: 24" square; 18" tall. Gorilla Rack brand.

**No. 2P885.** Shpg. wt. 30.0 lbs. List ..... $59.69. Each ..... **$46.55**



## WATER HEATER PANS



**High-impact polyethylene and aluminum** water heater pan protects floors, ceilings, moldings, and walls from leaky water heaters. Punch-out drain outlets accommodate three different drain positions. Manufactured in accordance with Southern Building Code international standards. Includes 1" PVC adapter with gasket and lock nut for connecting to 1" PVC pipe. Maximum temperature: 212° F.

## T & P RELIEF VALVES

**Accurate relief valves** for automatic temperature and pressure protection for hot water heaters and supply tanks. Factory set for 210° F, 150 PSI. Thermo-bond (non-metallic) protective coating on thermostat elements to protect them from the corrosive effects of hot water. Stainless steel spring and silicon seat washer. Manual test lever. ASME rated. CGA Listed. Meet FHA specifications, Mil. Spec. MIL-V-13612C and ANSI Z21.22 standard. Watts brand.

**Residential T & P Valve** rated by AGA for heaters up to 100,000 Btu/HR input. 4" thermostat. Brass body. UL Listed.

**Commercial T & P Valves** have bronze body and are also AGA Listed in addition to residential unit ratings/specifications and standards. Meet Military Spec. MIL-V-136-12D, Type 1. Temperature relief 210° F.

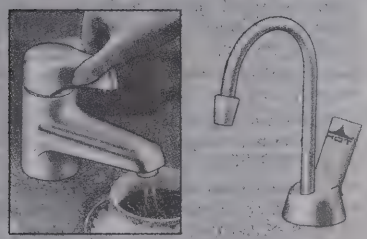
# HOT WATER DISPENSERS AND COMPACT BOTTLED WATER COOLERS

## HOT WATER DISPENSERS



IN SINK ERATOR

E28492

No. 2E729

No. 2E887

Nos. 4PL50 & 4PL51

Nos. 4PL49 & 4PL48

Water is electrically heated to a brewing/cooking temperature of approximately 190°F by a compact copper tank that mounts under the sink. The system is vented, so there is never a pressure buildup; neither a T&P valve nor a drain is necessary. All units have a 3 ft., 16/3 SPT cord with 3-prong plug. All 1/2 gallon models have additional insulation for lower stand-by heat loss and increased energy efficiency. In-Sink-Erator brand.

### STANDARD DISPENSER

**No. 2E729 1/3 gallon tank** with lever operation and adjustable thermostat preset at 190°F. Has a stainless steel gooseneck spout. Mounting hole: 1⅜"; 3/8" IPS water connection. Installs in counter tops up to 2" thick.

### PREMIUM DISPENSER

**No. 2E887 1/2 gallon tank** has a twist handle operation. Adjustable thermostat is preset at 190°F and faucet is chrome-plated faucet. Mounting hole: 1¼" or standard sink opening; 3/8" IPS water connection.

### TWIST HANDLE DISPENSERS

**Nos. 4PL51 and 4PL50** have an easy-to-use twist handle and easy top installation. Pours 60 cups per hour from 1/2 gallon tank. Has adjustable thermostat. Available in white or chrome colors.

### GOOSENECK DISPENSER

**Nos. 4PL49 and 4PL48** feature a goose neck spout with lever operation. Adjustable thermostat provides 190° F cooking hot water. Units have a 1/2 gallon tank for 60 cups per hour. Available in white or chrome colors.

## COMPACT BOTTLED WATER COOLERS

- 115VAC
- Lead-free construction
- Refrigerant 134a (CFC free)
- 20-gauge steel panels
- Light touch lever action faucets
- Permanently lubricated 1/20 HP compressor plus refrigeration system dryer
- Removable plastic drip receptacle and splash resistant strainer grid
- Three-prong, six-foot power cord
- Adjustable thermostat (cold to 40°F). No. 3H261 has adjustable cold control, hot thermostat is not adjustable; No. 3H111 has adjustable cold control.
- Provide 0.6 GPH of 50°F cold water
- No. 3H261 delivers 45 six-ounce cups of 180°F hot water
- Recessed faucets are protected from abuse
- Insulated stainless steel reservoir and water lines
- No. 3H261 has stainless steel hot tank with 500 watt external heating element
- Bottles not included
- Mocha tan color

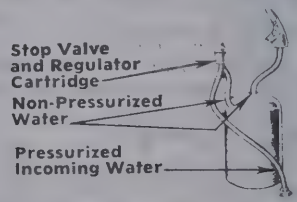
Manufactured with a waterway system utilizing copper components and completely lead free materials. All leaded materials, such as leaded brass, have been removed. All joints are brazed using only silver solder. Includes strainer with easily cleaned screen which traps water-borne particulate of 140 microns and larger prior to entry into water cooler. Features permanently lubricated compressor and fan motor, and refrigeration system dryer.

No. 7A887 Two-Level Water Cooler meets Americans with Disabilities Act requirements when properly installed.



**Features Include:**

- **115VAC**
- **Lead-free construction**
- **Classified by UL in accordance with ANSI/NSF 61, Section 9**
- **Refrigerant134A (CFC free)**
- **Exclusive Flexi-Guard® safety bubbler flexes on impact to help prevent accidental mouth injury and is vandal resistant**
- **Stainless steel splash-resistant multi-level basin saves surrounding walls from splashing**
- **Separate push button is sanitary and easy to access**
- **In-line flow regulator maintains constant stream height at line pressures of 20-105 PSI**
- **Nonpressurized cooling tank is designed to eliminate water damage in case of rupture**
- **Drain outlet is 1¼" diameter with 4" long hook-up for 1¼" slip joint; maximum space inside cabinet for easy access**
- **Inlet connection is 3/8" O.D. tubing connection; unobstructed for easy installation**

**Flexi-Guard® safety bubbler made of soft, pliable elastomer. UL Listed for flame retardation. Abrasion resistant.**

**Nonpressurized cooling tank design**

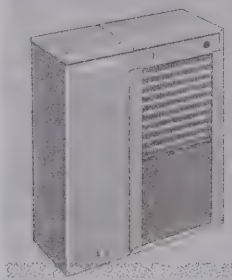
# PACKAGED WATER CHILLERS AND REMOTE WATER FOUNTAIN

Compact, highly efficient water chillers can be used to provide chilled water to drinking fountains, medical and experimental laboratories, or production machines. Chillers comply with the lead-free definition in the Safe Drinking Water Act of 1986 and Lead Contamination Control Act of 1988.

### CHILLERS FEATURE:

- **115VAC**
- **Lead-free construction**
- **Refrigerant134A (CFC Free)**
- **Automatic thermostat adjustable for 47° to 55°F output**
- **No. 3H047 is classified by UL in accordance with ANSI/NSF 61, Section 8.**
- **No. 3H047 has adjustable thermostat. Adjusts from 47° to 68°F for photo processing**
- **No. 5H300 is mocha tan color; No. 3H047 has galvanized steel cabinet**
- **5H300 cabinet has an acrylic enamel finish**
- **No. 5H300 has stainless steel cooling tank and water ways**
- **No. 5H300 has 1/4" O.D. water supply water tube; No. 3H047 has 3/8" O.D. tube**
- **Meet exacting sanitary codes—American Refrigeration Institute Standard 1010-94; UL Listed; CSA Certified**



### REMOTE FOUNTAIN FEATURES:

- **Stainless steel top and durable sandstone vinyl on steel cabinet**
- **Dial-A-Drink® Bubbler assures a smooth, even flow of water**
- **Built-in pressure regulator adjusts easily for 20 to 120 PSI**
- **3/8" IPS water connection**
- **Can dispense ambient water**

**HALSEY TAYLOR LIMITED WARRANTY**

Halsey Taylor warrants evaporator/chiller for 10 years, refrigeration systems 5 years, all other parts and labor 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

Replacement Parts Available
1-800-323-0620

**All Halsey Taylor standard models feature:**

- Double Bubbler™ projector on all units (except Nos. 4LW34, 4W165 & 5W410 which are Dial-A-Drink®) with anti-squirt groove to prevent tampering and provide a fuller, more satisfying drink
- Nonpressurized water cooling system to prevent water damage in the unlikely event of a ruptured chiller tank
- Separate chrome-plated drain strainer assembly is removable for easy cleaning of drain line
- Automatic stream height regulator automatically maintains stream height under line pressures varying for 20 to 90 PSI on all units except Nos. 4W165 & 5W140 which have pressure up to 120 PSI
- Energy saving precooler boosts capacity up to 60%. Featured on Nos. 2W188, 2W191, 3W070, 4LW34, 4W165, 5W409, 5W410 and 5W412
- No. 5W408 features stainless steel cabinet

**All Halsey Taylor 115V water coolers feature:**

- Lead-free construction
- Rugged steel cabinet with platinum vinyl finish
- Refrigerant 134a (CFC free)
- Contour stainless steel cooler top ensures proper drainage and prevents standing water
- Certified to ANSI/NSF61 Section 9
- Hermetically-sealed, positive start compressor with lifetime lubrication and built-in thermal overload protection
- Positive sensing thermostat controls temperature of storage water
- Maximum insulating efficiency. One-piece construction stops air leakage
- Easy installation and easy service accessibility

**No. 7A888 Barrier-Free Oasis® Model features:**

- Oasis® Split-Level Versacooler® water cooler
- Meets ADA requirements
- Heavy gauge galvanized steel frame for long life
- Easy to install and service
- Finished underside eliminates snagged clothing

**Heavy-duty Oasis® Models feature:**

- Oasis® Dial-A-Drink® bubbler.
- Water cooled condenser
- Use where dust, dirt, lint or excessive heat are problems, or where lint or dust would reduce capacity of conventional air-cooled models
- Mocha tan acrylic enamel finish
- Nos. 4W165 & 5W410 use a pressurized tank

## REMOTE WATER FOUNTAINS

Replacement Parts Available
1-800-323-0620

### ALL FOUNTAINS FEATURE:

- **Lead-free construction**
- **Durable, sturdy, and virtually maintenance-free design**
- **Applications include factories, warehouses, and outdoor use**
- **Nos. 5W414 and 5W416 feature Patented Double Bubbler™ projector with anti-squirt groove to prevent tampering and provide a fuller, more satisfying drink**
- **Water pressure: 90 PSI**
- **Self-closing stop**
- **3/8" IPS water connections**
- **Can be installed with remote chillers, sold separately on page 3087**

G **No. 5W416 Lever-handle Fountain Head** with tailpiece, and removable shut-off seat.

H **No. 5W414 Push Button Fountain** with single stream projector

I **No. 5W413 Bracket Fountain** with stainless steel satin finish and Dial-A-Drink® bubbler

J **No. 5W415 On-A-Wall Drinking Fountain** with stainless steel stain finish. Single push-button on the front of the cabinet keeps water flowing while button is depressed.

K **No. 5W417 Barrier Free On-A-Wall Fountain** with stainless steel satin finish. Single push-button on the front of the cabinet keeps water flowing while the button is depressed. Complies with ADA guidelines when properly installed.

# WATER FILTERS

## IN-LINE ICE MAKER FILTER

- **Filters particulates as small as 5 microns**
- **Reduces bad taste and odors**
- **Protects equipment from scale and corrosion**
- **Installs easily on cold water line**

Disposable filter provides clean, fresh-tasting ice and water for residential refrigerators. Triple action filter reduces dirt and rust particles, improves taste of ice and water, and inhibits scale buildup on ice-making mechanisms of refrigerator. First: Rigid cellulose fiber traps particles; Second: water passes through a bed of activated carbon to reduce unpleasant tastes and odors; Third: water continues through scale-inhibiting crystals to reduce lime scale buildup. Includes 1/4" O.D. tube fittings. Maximum flow: 1/2 GPM. Maximum temperature: 100°F. Maximum pressure: 125 PSI. Tested and listed under NSF Standard 42 for the reduction of taste, odor, and chlorine (Class III). Service life is 1500 gallons. 8¼ x 2⁵⁄₁₆" maximum diameter. Aqua-Pure brand (AP717).

**No. 3P782.** Shpg. wt. 0.8 lbs. List .....$20.63.
Each .....**$10.59**

No. 3P782

## BEVERAGE DISPENSER/COLD WATER FILTER

- **Installs easily on cold water line**
- **Reduces bad taste and odors**
- **Built-in shut-off valve**
- **Quick mount bracket for easy installation and maintenance**
- **Brass head**

**Improves taste, smell, and overall quality of water** for hot and cold drink vending machines, office coffee makers, ice-making machines and other commercial beverage dispensers. Also greatly reduces scale buildup in water lines, mixing valves and heating elements by preventing hard water minerals from accumulating. Rigid cellulose fibers stop dirt, sand, silt, and rust particles; activated carbon granules reduce musty, stale, and metallic tastes and odors including chlorine; and scale-stopping crystals dissolve slowly to inhibit the formation of deposits.

**Replaceable cartridge is easily removed** from mounting head by simply backing off thumb screw and pulling down. A shut-off valve built inside the mounting head automatically shuts off water flow when cartridge is removed, resumes flow when new cartridge is replaced.

**Forged brass head and mounting frame** can be attached to appliance cabinet or nearby wall close to cold water supply line. 1/4" NPT female threaded head simplifies installation. Maximum capacities: 1/2 GPM flow; 125 PSI pressure; 100°F temperature. 11½H x 2⁵⁄₁₆" Dia. NSF Listed. Includes mounting head, bracket, and cartridge. Aqua-Pure brand (AP305).

**No. 2P077.** Shpg. wt. 2.5 lbs. List .....$114.60.
Each .....**$65.35**

**No. 2P078.** Filter Cartridge. Aqua-Pure brand (AP317). Shpg. wt. 0.8 lbs. List .....$42.42.
Each .....**$24.58**

No. 2P077 No. 2P078

## MULTI-PURPOSE COLD WATER FILTER

- **Dual-purpose for taste/odor and dirt/rust**
- **Compact, point-of-use filter for cold water installations**
- **Reduces chlorine for 2000 gallons**

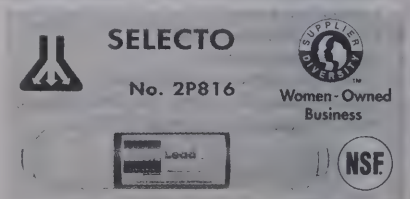
Use in beverage dispensers, water coolers, wet bars and recreational vehicles. Provides clean, fresh tasting water from wells, cisterns, and municipal systems. Particles of sand, rust, and dirt up to 5 microns are trapped as water passes through a cellulose fiber element, then unpleasant taste and odors are reduced by activated carbon, and finally a postfilter removes any particles which may have escaped. Maximum capacities: 2 GPM flow; 125 PSI pressure; 100°F temperature. Compatible with water coolers on pages 3086,3087, 3088,3089.

White molded plastic body won't rust or corrode. 3/8" NPT threaded inlet and outlet ports. 8¹³⁄₁₆ x 4⅞" Dia. Includes one cartridge. Aqua-Pure brand (AP200).

**No. 2P075.** Shpg. wt. 2.2 lbs. List .....$92.61.
Each .....**$48.00**

**Replacement Cartridges.** Carton of two. Aqua-Pure Brand (AP217).

**No. 2P076.** Shpg. wt. 1.8 lbs. List .....$43.56.
Each .....**$25.85**



No. 2P075 No. 2P076

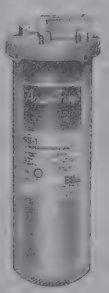
## LEADOUT™ LEAD-REMOVAL FILTER

Fits all water coolers. Reduces lead in drinking water below EPA drinking water standards. 500 Gallon or 1 year filter life. Stable flow rate over lifetime of filter. Functions over pH range of 6.5 to 9.5. All components are made of nontoxic materials. Maximum pressure: 125 PSI; maximum flow rate: 0.5 GPM. 10 x 2" filter size, 1/4" tube connector size. Not for use with hot water. Selecto brand (10)

**No. 2P816.** Shpg. wt. 1.0 lbs. List .....$90.78.
Each .....**$56.05**

No. 2P816

# WHOLE HOUSE/COMMERCIAL FILTERS AND DRINKING WATER SYSTEMS



## SINGLE AND DOUBLE HEIGHT STAINLESS STEEL FILTERS

- **For industrial applications, homes, offices, schools, hospitals and high-rise buildings**
- **Easy to install on incoming water lines**
- **Quick cartridge replacement**
- **For high pressure/high temperature applications**
- **Maximum pressure: 300 PSI**

Cast brass head and stainless steel sump for use where unusually high pressures are common to protect hot/cold water appliances. For low flow rates use: single cartridge units, Nos. 1P747 and 2P516. For extra high flow rates use: double cartridge units Nos. 1P748 and 2P517. Can be used with dirt/rust cartridges. Nos. 1P753 and 2P369 or with taste/order cartridge, No. 1P754 (sold separately on page 3093.) See chart for maximum temperature and flow rate. Mounting bracket included. Aqua-Pure brand.

## DRINKING WATER SYSTEM

Remove dirt, rust, lead, cysts, bad taste and odor with this convenient, easy-to-install system. Features an advanced filtration and adsorption system. Pressure tested, high impact plastic design protects against pressure surges and water hammer. Exclusive quick-change cartridge design reduces spills and mess for fast, easy cartridges changes with 1/4 turn. Hardware, faucet and pipe connections included. System tested and certified NSF International. Note: Activated carbon filters are not intended for use where water is microbiologically unsafe or with water of unknown quality without adequate disinfection before or after system. Inlet/outlet size: 1/4". Max. water pressure: 125 psi. Dimensions: 14⅝ H x 3⅝" Dia. Max. water temp.: 100° F. Max. flow rate: 0.6 GPM. Degree of filtration: 0.5 micron. Capacity: 1400 gal. Aqua-Pure brand. (AP-DWS750)

Uses No. 4LW41 replacement cartridge sold on page 3093

## MULTI-CARTRIDGE HIGH FLOW FILTER SUMPS

- **For hotels, offices, schools, restaurants, laundromats, commercial buildings, and industrial applications**
- **Easy to install on incoming water lines**
- **For high pressure/high temperature/high flow rate applications**
- **Filter cartridges available on page 3093**

Low-cost, high-efficiency filtration. Feature stainless steel housings and a single clamp for easy cartridge removal. Internal center rod with locking hand knob for quick cartridge changes. Housing and all internal parts constructed of noncorrosive 304 stainless steel. Rated at 150 PSI maximum water pressure. NSF Listed. See chart for maximum temperature and flow rate. Aqua-Pure brand.

Aqua-Pure WATER FILTERS NSF

Replacement Parts Available 1-800-323-0620

**AQUA-PURE 10 YEAR WARRANTY**

Aqua-Pure warrants all multi-cartridge high flow filter housings for 10 years. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

# WHOLE HOUSE DIRT/RUST FILTERS

## SINGLE AND DOUBLE HEIGHT PLASTIC FILTERS

For use on cold water lines only. Depending on filter cartridges used, filters will reduce rust, silt, sand, and other suspended particles or taste and odor of chlorine, sulphur, and other common chemicals from household or small commercial systems. Nos. 2P275 and 2P276 include one No. 1P753 rust and dirt filter cartridge. For commercial and whole house systems (maximum flow in a home can be from 10 to 12 GPM) two or more of these filters can be installed in a parallel system to increase flow capacity. Meet NSF Standard 42. All units have large 3/4" NPTF inlet and outlet. Aqua-Pure brand.

### VALVE-IN-HEAD

**No. 2P275.** Saves on installation time and eliminates need for expensive shut-off valves. Internally actuated pressure relief valve automatically relieves line pressure to facilitate cartridge replacement. Head constructed of fatigue resistant Celcon plastic; transparent sump is highly break resistant. Aqua-Pure brand (AP101T). Includes one No. 1P753 cartridge.

### BUTTON HEAD PRESSURE RELEASE

**Nos. 2P276 and 2P277.** Fatigue resistant Celcon plastic head is equipped with manually operated pressure release button to relieve internal line pressure and simplify cartridge replacement. No. 2P276 has an opaque sump made of shatter-resistant polypropylene plastic; No. 2P277 has a transparent sump made of San Plastic. Aqua-Pure brand (AP11S; No. 2P276) and (AP12T; No. 2P277). No. 2P276 includes one No. 1P753 cartridge; cartridge for 2P277 sold separately. See page 3093.

- **Install easily on incoming cold water lines**
- **Quick cartridge replacement**
- **Accept various cartridges for specific applications**
- **Rated at 125 PSI and 100°F water temperature**

| Cartridges Required | Max. Flow Rate, GPM with Cartridge 1P753 | 1P754 | Dimensions (In.) H | Dia. | Stock No. | List | Each | Shpg. Wt. |

**Products bearing the NSF seal have been tested and listed under NSF International standards for water treatment claims. Contact your local branch for Product Sales Fact Sheets.**

## HEAVY-DUTY 1" WHOLE HOUSE WATER FILTERS

- **Built-in pressure relief button makes changing cartridges simple**
- **Easy installation**
- **Unrestricted flow design**
- **For use with cold water applications**

Ideal for larger homes and commercial applications, these water filters are made of FDA CFR-21 compliant materials to conform to public health requirements for water purification. Suitable for drinking and cooking water and all food applications. 1"NPT inlet/outlet connections provide high flow rates. Units deliver high filtration efficiency and high sediment capacity. Pressure tested high-impact plastic design protects against pressure surges and water hammer. Aqua-Grip filter wrench and manual included. Note: Cartridges should be replaced every 3-4 months or sooner or when noticeable pressure drop occurs.

Replacement filter available, see page 3093. Aqua-Pure brand.

# REPLACEMENT FILTER CARTRIDGES AND UNDERSINK WATER FILTER

## REPLACEMENT FILTER CARTRIDGES

Filters have 1" center hole. Fit Aqua-Pure and most other filter units. For proper operation, water must be microbiologically safe.

**No. 4LW36 Micron Dirt/Rust Water Filter Cartridge** is rated for long life under extra-heavy dirt loading. Non-fiber-shredding resin bonded construction withstands high pressure drop and stressful conditions. One cartridge can be used for cold and hot water up to 210°F. Manufactured from FDA CFR-21 compliant materials. Conforms to all public health requirements for water purification.

**No. 2P369 Rust and Dirt Economy Filter** of white cellulose fiber. Traps particles of 25 microns and larger. Maximum pressure 125 PSI. Maximum temperature 210°F.

**No. 1P753 Rust and Dirt Filtering Cartridges** made of white cellulose fibers with graded density; collect particles as small as 5 microns (two ten-thousandths of an inch). Lasts for months under normal use. Can be used for either hot or cold water, maximum temp. 210°F.

**No. 4LW37, 4RP82, 4RP83, 4RP84, 4RP88, and 4RP89 Large Diameter Filters** are rated heavy duty for long life. Superior design is unchallenged in dirt holding capacity. Fully ported to handle high flow rates. For use on cold water applications in larger homes and light commercial applications.

**No. 1P754 Double Action Cartridges** for taste/odor; rust/dirt filled with activated carbon. For use on cold water applications only. Max. temp. 100°F.

**4RP86 and 4RP87 Large Diameter, Low Height Filters** for taste/odor and dirt/rust applications. Cartridges are heavy duty for long life and capable of handling large flow rates. For use on cold water applications.

**No. 3P775 Double Action Cartridge** for scale, dirt and rust, uses a scale-inhibiting compound to reduce scale buildup in water heaters, cooling towers, and piping. When installed in a variety of housings on water heater feed line, cartridge traps dirt and rust, as small as 5 microns, in a rigid cellulose prefilter. Water is then channeled through scale-stopping crystals which inhibit the precipitation of scale-causing minerals. Good for high capacity installations. 100 GPH recovery rate at 100°F rise, per cartridge. Maximum temperature: 100°F.

**No. 4LW41 Multi-composite Carbon Filtration Cartridge** filters water slowly through the .5 micron filter. Intricate carbon matrix removes lead, chlorine, cysts, bad taste and odor.

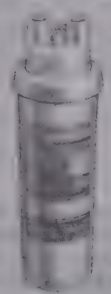
## UNDERSINK POINT-OF-USE WATER FILTER

- **Maximum capacities: 2 GPM flow; 125 PSI pressure; 100°F temperature**
- **Built-in automatic "shut-off" valve makes cartridge changes spill free**
- **Pressure tested, high-impact plastic design protects against stressful conditions**
- **Premium Graded-Density depth pre-filter extends the life of the filter**

Triple action filtration and treatment provides sparkling clear water that ideal for clear ice cubes and fresh tasting water, coffee and beverages. Specially formulated high adsorption activated carbon media provides longer cartridge life and filtration of chlorine and taste/odor. Propietary scale and corrosion system protects equipment and icemakers from scale build-up and damaging corrosion. Manufactured from FDA CFR-21 comoliant materials suitable for drinking and cooking water and all food applications. System tested and certified by NSF International. 2-year limited warranty. Note: Cartridges should be replace every 4-6 months or 2000 gallons (7500 liters). Aqua-Pure brand (AP510).



***New* No. 4LW46.** Shpg. wt. 3.8 List $143.09.
Each ..... **$75.65**

**Cartridges for No. 4LW46** have a rated life of 2000 gallons for chlorine reduction. Rigid cellulose fibers trap microscopic particles while a bed of activated carbon reduces bad tastes and odors. Scale-inhibiting crystal dissolve to reduce buildup of lime scale. Aqua-Pure brand (AP517).

# SCALE FILTERS

## UNDERSINK TRIPLE ACTION FILTER

- **Protects ice machines and other equipment from scale buildup**
- **Built in valve-in-head design for easy maintenance**
- **Reduces dirt, rust, and taste/odor problems**
- **Provides quality drinking water for home, boat, or RV**
- **10 Year warranty. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

Convenient and simple 3-way protection against dirt, rust, bad taste, and odor, plus scale. Valve-in-head design eliminates need for extra shut-off valves. Change cartridges easily by turning and pulling cartridge to automatically shut off water supply; insert and turn replacement cartridge to restore water supply. Includes 1 cartridge; replacement cartridges sold below.

Installs on cold water line with 3/8" NPT female connections. Maximum capacities: 2 GPM flow; 125 PSI pressure; 100°F temperature. 11 1/16 x 3 3/8" maximum diameter. Tested and listed under NSF Standard 42 for reduction of chlorine, taste, and odor (Class II). NOTE: Activated carbon filters should not be used with water that is microbiologically unsafe or of unknown quality. Aqua-pure brand (AP500).

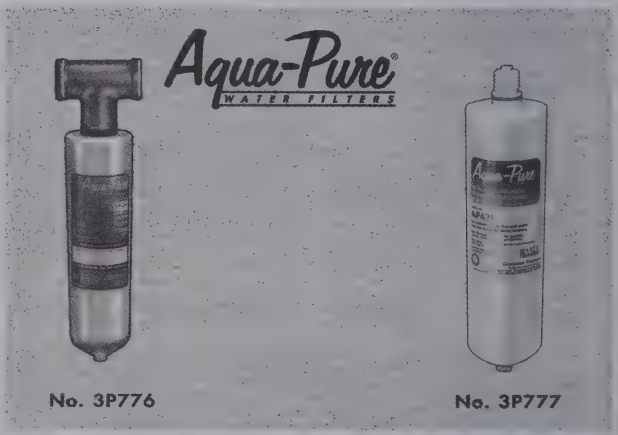
**No. 3P780.** Shpg. wt. 4.0 lbs. List $105.33. Each ..... **$71.95**

**Cartridges for No. 3P780** have a rated life of 2000 gallons for chlorine reduction. Ridgid cellulose fibers trap microscopic particles while a bed of activated carbon reduces bad taste and orders. Scale-inhibiting crystal dissolve to reduce buildup of lime scale. Aqua-Pure brand (AP617).

**No. 3P781.** Shpg. wt. 1.8 lbs. List ..... $44.71. Each ..... **$24.95**

No. 3P780 No. 3P781

## HOT WATER HEATER SCALE INHIBITOR



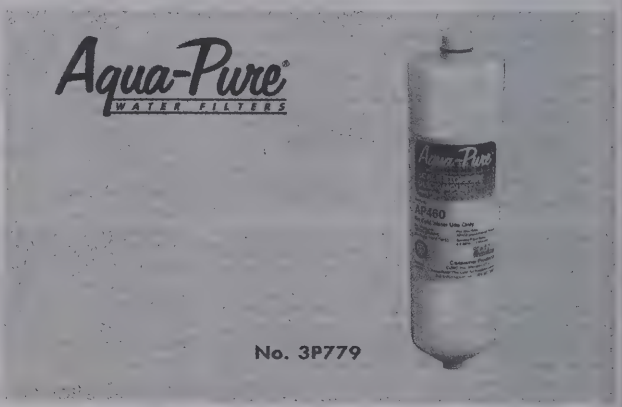
- **Inhibits hard water scale in water heaters and pipes**
- **Works on boiler, tank (gas and electric), and tankless hot water systems**

Hot water system protector uses proprietary scale-inhibiting compound to inhibit scale buildup in residential and small commercial hot water heaters. Crystal compound slowly dissolves inside of water heater. This forms a slick, microscopic coating making it difficult for scale and hardness to attach and build up on water heater walls. Unit is not a softener and does not impart any taste or odor. Easy installation on cold water side of hot water system, using 3/4" female NPT connections. Max. hot water heater size is 50 GPH recovery rate at 100°F rise. Maximum capacities: 6 GPM flow; 125 PSI pressure; 100°F temperature. Includes one cartridge; replacements sold separately below. Aqua-Pure brand (AP430).

**No. 3P776.** Shpg. wt. 2.0 lbs. List $84.51. Each ..... **$56.35**

**Replacement Cartridge for No. 3P776, above.** Easily removed by shutting off water flow and unscrewing old cartridge from head of No. 3P776. Maximum temperature: 100°F. Maximum flow: 6 GPM. 8 13/16H x 2 1/4" Dia. Aqua-Pure brand (AP431).

**No. 3P777.** Shpg. wt. 1.3 lbs. List $34.39. Each ..... **$21.99**



No. 3P776 No. 3P777

## SCALE INHIBITOR CARTRIDGE

**Replacement Cartridge for Aqua-Pure AP450 Scale Inhibitor.** Easily removed from mounting head by simply backing off the thumb screw (after shutting off water supply) and pulling down. Maximum temperature: 100°F. Maximum flow rate: 1/2 GPM. 9 3/4H x 3" Dia. Aqua-Pure brand (AP460).

**No. 3P779.** Shpg. wt. 0.8 lbs. List $56.21. Each ..... **$31.10**

# REVERSE OSMOSIS DRINKING WATER SYSTEM

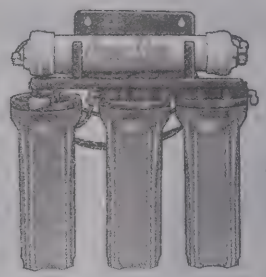
Five-stage unit processes up to 14 gallons per day of high quality drinking water. Uses ordinary tap water and household water pressure for processing—no electricity required. Combines commercial quality 5 micron prefiltration with dechlorination. 0.0005 Micron ultra filtration, reverse osmosis, and final carbon post filtration.

**Specifications:** 9-14 Gallons per day at 50 PSI with 77°F feed water. Requires 40-100 PSI feed water pressure. 40 to 100°F feed water temperature range. Maximum 2000 parts per million of dissolved solids in feed water. Automatic "Full Tank" feed water shut-off valve. Tested at 95% removal of dissolved solids. Maximum 0.1 PPM iron and 0.5 PPM manganese in feed water. Water Quality Association Gold Seal Approved.

**Construction:** 2 Gallon polyethylene water storage tank. Chrome long reach plumbing code approved air gap faucet. Installation parts included.

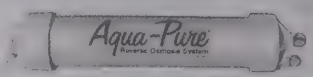
**Replacement parts:** Uses one No. 1P753 and two No. 1P754 as pre and post filters. Yearly replacement is recommended, more often on lower quality feed water. Nos. 1P753 and 1P754 sold on page 3093. No. 3P784 replacement reverse osmosis module cartridges sold below. Replace as indicated by dissolved solids removal test or as indicated by optional percent rejection monitor, sold below. Typical life of module is 2 years on properly maintained system. Aqua-Pure brand (APR05000).

**No. 3P774.** Shpg. wt. 29.0 lbs. List $709.36. Each.....$453.00



**Replacement Membrane for No. 3P774,** above. Reduces dissolved solids in feed water. Tested for guaranteed 95% minimum rejection of dissolved solids. Quick-disconnect fittings allow for rapid service. New check valve and reject water screen built into each module. Aqua-Pure brand.

**No. 3P784.** Shpg. wt. 3.0 lbs. List $151.67. Each .....$96.95



Aqua-Pure WATER FILTERS

# RESIN-BONDED FILTER CARTRIDGES AND HOUSINGS

## RESIN-BONDED CARTRIDGES

CUNO
Water Filter Systems
A unit of Commercial Intertech Corp.

Cuno resin-bonded cartridges are manufactured using quality engineered short fiber technology combined with resin polymerization to produce a high quality, rigid, depth media that resists bypass, channeling, and collapse. This media is excellent for gel removal, while holding a wide range of dirt particles. Structure is rigid and self-supporting; no center core is required for support. This is an advantage in disposal of the spent filter cartridges that are ideally suited for incineration, shredding, and compacting. **Cartridges sold in packages of 2.**

**Applications:** Variety of paints and resins, oils, chemicals, inks, solvents, industrial water.

**Note: Not for use with potable water applications.**

### NOMINAL FLOW IN GPM PER CARTRIDGE @ 5 PSID*

| Cartridge Length | 5 Micron | | | 10 Micron | | | 25 Micron | | | 50 Micron | | | 125 Micron | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | 1 CP† | 50 CP‡ | 100 CP# | 1 CP† | 50 CP‡ | 100 CP# | 1 CP† | 50 CP‡ | 100 CP# | 1 CP† | 50 CP‡ | 100 CP# | 1 CP† | 50 CP‡ | 100 CP# |

## RESIN-BONDED CARTRIDGE HOUSINGS

CUNO
Water Filter Systems
A unit of Commercial Intertech Corp.

No. 3P768

Nos. 3P769, 3P770, 3P771

Cartridge filter housings, constructed of durable, low-cost cast-iron and steel are quality-built housings that satisfy general-purpose industrial and commercial filtration needs. Models feature three-piece housing and center-post construction. Long-lasting stainless steel internal components for quick and easy maintenance.

**Maximum temperature:** 250°F. Maximum pressure: 150 PSI. Models range from a 1-cartridge model rated at 16 GPM to an 18-cartridge model rated at 105 GPM.

**Features:** Fits modular cartridges from 9¾ to 10" for greater flexibility. Recessed gasket grooves prevent shell gaskets from falling off during assembly or reassembly. Easy to clean and maintain, for reduced down time. Cartridges are quick and easy to change. Shoulder seal plates assure alignment and positive seal.

**Filter house sizing:** To determine correct filter housing size, first determine the number of cartridges required to filter liquid at the required system flow rate (GPM).

**Cartridge seal assemblies:** All models (except 3P768) feature spring seal plate assemblies which permit use of cartridges from 9¾ to 10" long and their multiples. For 9¾ and 9⅞" cartridges, use the spring seal plate with spacer. For 10" cartridges, remove spacer.

### ORDERING INFORMATION

# WOUND FILTRATION CARTRIDGES

Parker Filtration

See Cross-Reference Information on page opposite inside back cover.

How To Order Cartridges Guide found on page 3100.

**Fulflo® Honeycomb wound depth cartridges** are made by diagonally winding a precise pattern of carefully selected fibers on a center core. The pattern is designed to create hundreds of identical, tapered, spiral passageways. Fibers are combed across these passageways and locked in place by succeeding layers. Solid particles are removed by entrapment in filter media throughout the depth of entire cartridge.

**Nominal measurements:** 1" inside dia.; 2½" outside dia.

**Applications:** Typically applied in industries such as: plating, printing, printed circuits, well service, pharmaceutical, photographic, oil, gas, process water and laboratories.

**Available in 1, 5, 10, 25, and 50 micron filtration sizes.** Each cartridge is individually wrapped to protect the filtration surface. **Cartridges sold in packages of 6.**

**Note: Cartridge Selection Guide on bottom half of page 3100.**

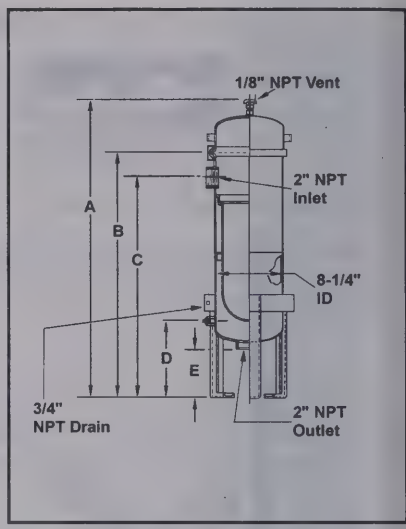
# HIGH FLOW BAG FILTER HOUSINGS

## STANDARD HOUSINGS

- Carbon or stainless steel housings
- Quick open V band clamp for speedy bag filter removal
- Patented safety latch design cover with handles and standard air vent
- Adjustable legs
- 2" NPT side inlet and bottom outlet
- Includes 316 stainless steel bag support

Parker Filtration



**Economical FCB series housings** are for manufacturing, commercial and industrial applications requiring fluid filtration. Units come complete with bag support; use with filter bag (order bags separately on facing page) for attaining varying degrees of filtration. Bag filtration assemblies can be used for filtering water and thick liquids such as coolants, cutting oils, inks, lubricants, paints, resins, solvents, adhesives, and petroleum oils. For use with nonflammable liquids compatible with filter component materials.

**Handle flow rates to 100 GPM** (water), liquid pressures to 100 PSI and liquid temperatures to 200°F.

**Construction:** Carbon or 304 stainless steel housings depending on model. Buna N O-ring cover seal. 316 SS bag support. Check application for chemical compatibility.

**Two housing lengths:** Filter housings for (single) size 1 or (double) size 2 length bags depending on filtering needs and preference.

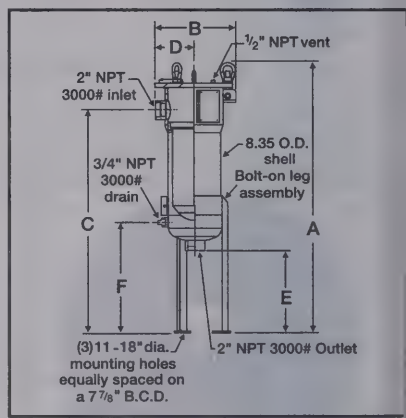
## ASME-CODED HOUSINGS



- ASME Coded (UM Stamp) to meet requirements for boilers and pressure vessels
- Carbon and 304L stainless steel housings
- Welded design provides a smooth interior for easy washout and cleaning
- Swing bolts with eyenuts for fast, easy opening and closing of hinged cover

Parker Fulflo® FB bag filter housings are designed for economical filtration of liquids such as: potable and process water, edible oils, coatings, lubricants, coolants, cutting oils, solvents, and other liquids. Maximum operating pressure is 150 PSI at 250°F.

Single Buna N O-ring seal design assures quick, positive cover seal. Housing also features height adjustable legs, side inlet with bottom outlet and threaded vent and drain connections. Filter housings are available in two lengths for either (single) size 1 or (double) size 2 filter bags.

Manufacturer's ASME Code Data Report (UM) is included with each bag filter housing. Parker Filtration brand.

**See Cross-Reference Information on page opposite inside back cover.**

# PARKER FULFLO® FILTER BAGS

- **Ideal for applications associated with high flow rates and higher viscosities**
- **Bags are fast and easy to replace**
- **Ratings from 5 to 100 microns (5 microns equal 2 ten thousandths of an inch)**
- **Support ring provides a positive seal within vessel**

Fulflo filter bags are for fine straining and filtering of fluids. Bags are made to fit Parker filter housings (sold on facing page) and other manufacturers' filter housings. Bags can also replace other manufacturers' bag models. See cross-reference chart below. Suitable for high viscosity liquids to 10,000 CPS. Additional outer cover prevents filter fibers from migrating downstream. For use with nonflammable liquids compatible with bag materials.

**Operating temperatures:** Polyester bags have a maximum operating temperature of 275°F; polypropylene bags have a maximum operating temperature of 200°F.

**Applications:** Typical filter bag applications include water, inks, petroleum oils, solvents, adhesives, paints, coolants, and resins.

**FDA:** Polyester bags comply with all FDA regulations governing food grade materials.

**Dimensions:**

**Size 1:** 16½" long bag has 7" diameter, 2.0 sq.-ft. surface area, and 2.1 gallon volume.

**Size 2:** 30½" long bag has 7" diameter, 4.4 sq.-ft. surface area, and 4.6 gallon volume.

**Operating pressure differential:** Initial pressure differential across filter bag is less than 0.2 PSI for water. It is recommended that the filter bag be replaced when this differential pressure is approximately 35 PSI for all fluids.

## FILTER COMPATIBILITY*

| Substance | Compatibility Polyester | Polypropylene |
|---|---|---|
| Organic Solvents | Excellent | Excellent |
| Animal, Petroleum, and Vegetable Oils | Excellent | Excellent |
| Micro-organisms | Excellent | Excellent |
| Alkalies | Good | Excellent |
| Organic Acids | Good | Excellent |
| Oxidizing Agents | Good | Good |
| Mineral Acids | Good | Good |

(*) Use chart as a guide only. Chemical compatibility should be checked for specific fluid.

**Check your frequently-ordered product categories for line extensions and new product offerings. Look for the "New Products" header at the top of the page and the "New" designation next to the stock number.**

# PARKER FULFLO® HIGH EFFICIENCY FILTER BAGS

- **Higher efficiency (80–98%) vs. standard bag filters; comparable to cartridge filtration efficiencies**
- **Twice the dirt holding capacity of other high efficiency filter bags**
- **3–Layer polypropylene construction of scrim, microfiber and felt**
- **Complies with all FDA Regulations governing food grade materials**
- **Lifting handle for ease and speed of changing bag**

**For use when dirt holding capacity** of a filter bag and efficiency of a wound cartridge is desired. Bags are scientifically designed series depth filters. Each layer of polypropylene felt and microfiber combine to trap as much particulate in one pass as two or three passes through an ordinary filter bag. Lower filtration costs due to the purchase of fewer bags, less often bag changes and fewer hours spent on maintenance. Maximum flow rates to 44 GPM for single length (size 1) and 80 GPM for double length (size 2) filter bags with a low initial pressure drop. 200°F max. operating temperature. A broad range of chemical compatibility results from an all polypropylene construction. Bags are made to fit most brands of filter housings. Can be used to replace 3M 100 Series and some 500 Series applications. Parker Filtration brand.

**Applications:** Edible oils, solvents, adhesives, machine tool coolants, waste water, bulk chemicals, magnetic coatings, and pharmaceuticals.

## FILTER COMPATIBILITY*

| Substance | Compatibility |
|---|---|
| Organic Solvents | Excellent |
| Animal, Petroleum, and Vegetable Oils | Excellent |
| Micro-organisms | Excellent |
| Alkalies | Excellent |
| Organic Acids | Excellent |
| Oxidizing Agents | Good |
| Mineral Acids | Good |

(*) Use chart as a guide only. Chemical compatibility should be checked for specific fluid.

## DIMENSIONS AND CAPACITY

(*) Flow rate depends on fluid viscosity (thickness), temperature and the amount of contamination. Flow rates listed assume clear water at 70°F and 1 PSI drop across filler. (†) 10 bags per package.

# HOW TO ORDER CARTRIDGES

**(Refer to page 3097 for selection of Parker cartridges)**

First determine whether filtration efficiency or flow rate is the top priority. If filtration efficiency is the top priority, refer to the "Nominal Flow" chart and locate the required filtration level. Read down the column labeled with the proper liquid viscosity to the desired filter length. This number is the flow (in GPM) per cartridge. The number of cartridges required is simply the total flow desired, divided by the flow per cartridge:

**Total Flow** ÷ **Flow per Cartridge** = **Number of Cartridges**

If a high flow rate is required, use a multi-cartridge high-flow sump, or install several single or double-high filter sumps in parallel.

## APPLICATIONS

| Winding/ Core | Max. Temp. | Typical Uses |
|---|---|---|
| **Cotton/ Polypropylene** | 140°F/60°C | Water*, potable liquids, beverages, vegetable oil, organic solvents, dilute acids, petroleum oils. Cartridge materials meet FDA requirements |
| **Cotton/ Tinned Steel** | 250°F/121°C | Organic solvents, dilute acids, petroleum oils |
| **Cotton/ 316SS** | 250°F/121C° | Water*, potable liquids, beverages, vegetable oil, organic solvents, dilute acids, petroleum oils. Cartridge materials meet FDA requirements |
| **Polypropylene/ Polypropylene** | 140°F/60°C | Water, organic acids, alkalies, oxidating and reducing agents |

(*) Water must be bacteria-free.

## NOMINAL FLOW IN GPM PER CARTRIDGE @ 5 PSID*

| Cartridge Length (In.) | 1 Micron 1 CP† | 1 Micron 50 CP‡ | 1 Micron 100 CP# | 5 Micron 1 CP† | 5 Micron 50 CP‡ | 5 Micron 100 CP# | 10 Micron 1 CP† | 10 Micron 50 CP‡ | 10 Micron 100 CP# | 25 Micron 1 CP† | 25 Micron 50 CP‡ | 25 Micron 100 CP# | 50 Micron 1 CP† | 50 Micron 50 CP‡ | 50 Micron 100 CP# |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 10 | 4.5 | 0.18 | 0.11 | 5 | 0.5 | 0.25 | 6 | 1 | 0.5 | 7 | 3 | 1.5 | 8 | 6 | 4 |
| 20 | 9 | 0.38 | 0.22 | 10 | 1.0 | 0.50 | 12 | 2 | 1.0 | 14 | 6 | 3.0 | 16 | 12 | 8 |

(*) Flow decreases as cartridge gets full. Replace when flow is unsatisfactory. PSID is difference in pressure between two points. (†) Water, for example. (‡) Peanut oil, for example. (#) #5 Fuel oil, for example.

## IN-LINE SCREEN FILTERS

**ll-purpose plastic filters** remove particulate natter as small as 22 microns. Suitable for se on small water and hydraulic systems uch as drinking fountains, dishwashers, arden sprinklers, air conditioners, refrigrators, and hydraulic instruments, eters, and gauges.

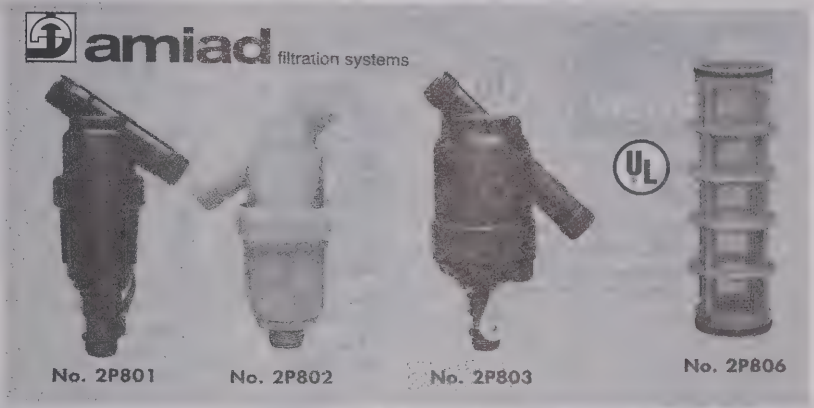
**hemical-resistant units** are suited for photo nd X-ray developers, chemical laboratoies, and other applications with chemicals ompatible with polyester.

**luid flows along longitudinal axis of cylinder,** esulting in minimal pressure drop. iltered particles collect at end of cylinder, where they can be flushed out with a ushing ball valve, without removing filter om system. (Chemical-resistant unit does ot have clean-out valve.)

**igh pressure, noncorrosive, acetal body withands water hammer.**

**op and bottom O-rings** eliminate the possiility of fluid bypass and assure complete uid filtration.

**eusable, color-coded filter screens** come in 55, 200 and 450 mesh sizes, in both stanard and chemical-resistant types. All filer screens are chemical-resistant polyster. Amiad brand.



### PECIFICATIONS

**laximum working temperature:** 140°F

**laximum working pressure:** 150 PSI

**laximum flow rate:** 13 GPM on 3/4" units; 30 PM on 1" units.

**Vetted parts:** polyester, acetal, polyrethane, and neoprene or viton.

## LINE STRAINERS

- 1/4" Through 1¼" NPT ports
- 40 Mesh screen
- Opaque nylon or clear polyamide bowls
- Viton gasket

**Line strainers deliver full liquid flow at low pressure drops,** while filtering foreign matter from pump inlet or discharge lines. Recommended for agricultural spray pumps and turbine pumps to prolong pump life and minimize clogging of spray nozzles. Install at inlet side of most spray pumps, or at the discharge side of centrifugal pumps, depending on pump rating. **Due to the effects of water hammer, not for use with home or domestic water systems.**

**Bowls unscrew from cap for easy cleaning,** without removing the entire strainer from the fluid line. Two styles are available: clear polyamide or opaque type 6 Nylon. (Models with polyamide bowls are not recommended for use with alcohol.) For use with nonflammable liquids compatible with line strainer component materials. Not recommended for strong acids or alkalis.

**All strainers have 40 mesh,** 420 microns, Type 304 stainless steel screen; Viton gasket; and type 6 Nylon caps. Maximum liquid temperature is 125°F. Maximum pressure rating is 150 PSI at 70°F; 100 PSI at 125°F.

*Distance from bottom of sink to center line of disposer outlet. Add 1/2" when stainless steel sinks are used.
**Length of tailpipe from center line of disposer outlet to end of tailpipe.
NOTE: Plumb 1½" waste line to prevent standing water in disposer motor housing.

**In-Sink-Erator residential food waste disposers** grind food scraps, vegetable peelings, fruit rinds, coffee grounds, and other kitchen wastes. Continuous feed operation, no batch-type. Disposers operate quietly and are built for dependable operation. Feature quick-lock mounting system which makes installation easier in either new or replacement service. Fit standard 3 ½" OD sink opening.

All models use Dura-Drive™ split phase induction motors and have permanently lubricated upper and lower bearings for long life. Include two 360° stainless steel swivel swivel impellers, dishwasher drain connection, and stainless steel sink flange. Self-service wrench included. No. 4PL46 features two-way grinding which reduces possibility of jamming. All motors have overload protection and manual reset. Nos. 4PL45 and 4LP44 features a full stainless steel grind system, an extra level of sound insulation, and built-in wrench holder. UL Listed (E17939). In-Sink-Erator brand.

No. 4PL42 Batch Feed Disposer has heavy duty motor to grind toughest food waste. Automatic reversing action for trouble free operation. Stainless steel grind chamber resists corrosion for longer life and corrosions shield protects motor from damage.

### DISPOSER ELBOW

For use with In-Sink-Erator, disposers 8½H x 4¹³⁄₁₆W x 1¹³⁄₁₆"D. PlumbShop brand (PSC482).

**No. 5E512.** Shpg. wt. 0.1 lbs. List .....$3.65.
Each .....**$2.99**

### DISPOSER GASKET

For use with In-Sink-Erator, Busboy and Whirlaway disposers. Rubber construction. 4H x 3W x ⁴⁵⁄₆₄"D. PlumbShop brand (PSC2102).

**No. 5E513.** Shpg. wt. 0.1 lbs. List .....$3.72.
Each .....**$3.03**

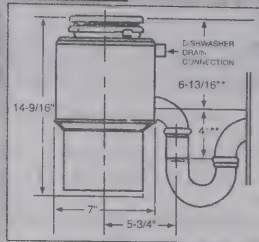
# COMMERCIAL & SEPTIC FOOD WASTE DISPOSERS

## LIGHT COMMERCIAL FOOD WASTE DISPOSER



- **Speeds clean-ups, no more bagging; simply toss down drain**
- **Reduces dumpster pick-up costs**
- **Dependable performance**

Commercial design with the ease and flexibility of a household unit. Ideal for convenience and grocery store delis, fast food restaurants, church and office kitchens, and bed and breakfast inns. Automatic reversing motor for longer life and trouble-free operation. Stainless steel grind chamber. Disposer mounting included. Mounting fits standard 3½-4" sink opening. No welding required. Standard wall switch operates unit. Cast nickel chrome cutting elements. Features 3/4HP, 1725 RPM continuous-duty, single-phase commercial motor; 120VAC, 60 Hz., 6.2 Amps. 1 Year Warranty. ISE brand (LC-50).

**New No. 4PL52.** Shpg. wt. 35.0 lbs. List $578.90.
Each ..... $497.75

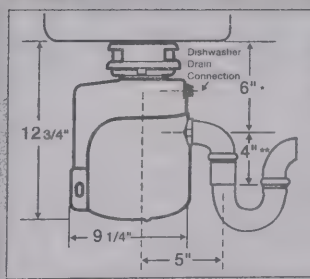
No. 4PL52

IN SINK ERATOR New

*Distance from bottom of sink to center line of disposer outlet. Add 1/2" when stainless steel sinks are used.
**Length of tailpipe from center line of disposer outlet to end of tailpipe.
NOTE: Plumb waste line to prevent standing water in disposer motor housing.

## SEPTIC DISPOSER™

- **Specially designed to work with any size septic system**
- **Bio-Charge™ Enzyme Treatment automatically goes to work**
- **Easy to install — just like a conventional disposer**
- **No increase in pumping frequency needed**

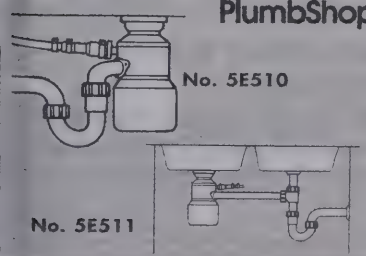


Disposer works with your septic system. Installs and mounts to the sink drain like a conventional disposer. Finely grinds food waste, such as meat, bones, fruit and vegetables, for discharge down the plumbing line. Each time the unit is operated, a measured amount of **Bio-Charge™** Enzyme Treatment is injected to break down food and other household waste. Millions of active aircoorganisms are completely mixed with ground waste inside the disposer. Waste digesting enzyme action begins even before the waste reaches the septic tank and accelerates in the septic tank itself as the enzymes help break down household waste and reduce the accumulation of scum and sludge. Disposer features exclusive Quick-Lock™ mounting for fast, easy installation. One twist locks the dispenser in place. Grind chamber is corrosion-proof for long life, and stainless steel 360° swivel impellers improve grinding efficiency and reduce jamming. Stainless steel shredder ring has super-tough cutting teeth that grind even the toughest waste. Heavy-duty 3/4HP, 120 VAC, 60 HZ, 1725 RPM, 8.1 AMPS, induction motor provides maximum grinding power. Tests show that disposing of food waste with Septic Disposer will not increase septic system loading. It won't harm or add load to the drain field. The high-speed grinding means only small amounts of water are needed to flush waste into the septic system. 3 Year Warranty.

**New No. 4PL53.** Shpg. wt. 19.0 lbs. List $213.93.
Each ..... $184.00

**Bio-Charge™ Refill for No. 4PL53.** Easy-to-replace cartridge equals 4 bottles of other septic treatments. Reduces pipe build-up and controls odors. Lasts up to 4 months.
**No. 4PL47.** Shpg. wt. 1.4 lbs. List $14.60.
Each ..... $12.55

No. 4PL47



IN SINK ERATOR New

*Distance from bottom of sink to center line of disposer outlet. Add 1/2" when stainless steel sinks are used.
**Length of tailpipe from center line of disposer outlet to end of tailpipe.
NOTE: Plumb waste line to prevent standing water in disposer motor housing.

PlumbShop®

### No. 5E510 FOR SINGLE BOWL SINKS WITH WALL DRAIN

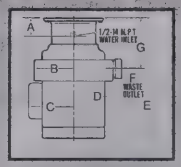
**Kit Contains:**

- **One Rubber Connection Boot, Barbed Adapter & Clamp**
- **One 1½" OD P-Trap**

| Bowl (Sink) Type | PlumbShop Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Single | PS1069 | 5E510 | $15.39 | $12.46 | 0.7 |
| Double | PS1072 | 5E511 | 26.33 | 25.50 | 13.0 |

### No. 5E511 FOR DOUBLE BOWL SINKS WITH WALL DRAIN

**Kit Contains:**



- **One 1½" OD x 6" Flanged Tailpiece**
- **One 1½" OD x 14" Flanged Tailpiece**
- **One 1½" OD x 7" Slip-Joint Waste Arm**
- **One Slip-Joint End Outlet Tee**
- **One 90° Elbow**
- **One Rubber Connection Boot with Barbed Adapter & Clamp**
- **One 1½" OD P-Trap**
- **Five 1½" ID Polyethylene Washers**
- **One Reducing Washer**

# COMMMERCIAL FOOD WASTE DISPOSERS AND DISPOSER INSTALLATION KITS

IN SINK ERATOR

Replacement Parts Available
TM 1-800-323-0620

**Mounting Adapters Available. Call 1-800-323-0620.**

- **Base units only—For new installations, mounting adapter must be ordered**
- **Stainless steel grind chamber is corrosion resistant**
- **Double-tapered Timken roller bearings provide a shock absorbing cushion**
- **Rubber mounting above grind chamber isolates sound and eliminates vibration**
- **Centrifugal moisture shield protects bearings and motor**
- **Controlled power air flow cools motor for longer life**
- **1 year warranty**

**Applications:** For continuous operation in hotels, restaurants, hospitals, cafeterias and snack bars. Quickly and efficiently removes food waste, including steak bones.

**Construction:** Stainless steel and chrome plated finish for lasting sanitation. Triple lip motor seal protects motor from water damage. Secondary spring-loaded oil seal provides double protection against water and loss of grease. Cast-nickel chrome alloy stationary and rotating shredding elements provide long life and corrosion resistance and are designed for reverse action grinding. Choose from 3/4, 1 and 1½ HP models.

## MOUNTING ADAPTER SELECTION GUIDE

1. Disconnect existing disposer from sink bowl or cone.
2. Find matching sink bowl or cone in the pictures shown.
3. Measure A and B dimensions (also C, D and E if indicated).
4. Find area on chart that deals with that type of sink bowl or cone. Then find the dimensions you've measured.
5. Read across to find the adapter number. Call Grainger Parts Operations at 1-800-323-0620 to place your order.

# FLEXIBLE COPPER RISER TUBES AND SPEEDI PLUMB PLUS® BRAIDED CONNECTORS

- For use with potable hot and cold water
- Ideal for sink riser, water closet, dishwasher, and washing machine installations
- Speedi Plumb PLUS® connectors are made from a PVC coated polyester yarn braid over EPDM rubber tube with plated brass end connections. Designed for maximum flexibility and corrosion resistance. No cutting, bending or flaring required. Install without washers, rings, inserts or sleeves.
- Working Pressure: 125 PSI max.
- Operating Temperature: 40 to 180°F
- Speedi Plumb PLUS® is listed with IAPMO (PS74), UL (NSF61), CSA, and several individual city listings including Los Angeles and New York

## SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE

Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.

## DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER

Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.

# RESIDENTIAL FAUCETS

**MOEN LIMITED LIFETIME WARRANTY**
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**Washerless design cartridges** eliminate leaks. Long lasting metal construction with bright chrome, easy-to-clean finish resists chips and rust. Kitchen models mount in installations with 8" drilling centers: lavatory models, 4" drilling centers. All kitchen and lavatory models are equipped with an energy-saving aerator which limits water flow.

**Single handle models** have a single push-pull control to regulate volume and temperature of flow.

**Double handle models** are engineered to respond to a feather touch. Handles never need "cranking".

**Wing handle models** are supplied with two interchangeable sets of handles; clear acrylic and oak wood.

**Valve body has no working parts** and all operating parts are easily removed without disconnecting faucets from fixtures.

**Cartridges for single handle faucets** make back-to-back installations easy because cross-piping is eliminated by simply rotating the cartridge stem 180°.

**Nos. 2P321, 2P324 and 2P421** come equipped with hose and spray attachment.

**Nos. 2P322 and 2P326** come equipped with pop-up drain waste assembly.

**No. 2P314** includes all supplies necessary for installation. Two 20" flexible polybutylene supply tubes equipped with brass connectors are packed with faucet for quick, easy plumbing installations direct to 3/8" compression shut-off valves (not included).

### REPLACEMENT CARTRIDGES FOR ALL MOEN FAUCETS

# TUB/SHOWER VALVES AND SHOWER HEADS

Shower heads have 2.5 GPM at 80 PSI water-saving design. Pressure balance series valves (Nos. 6P899, 6P995 thru 6P999) include stainless steel Scald-Guard® pressure balance valve that maintains a balanced pressure of hot and cold water, even when a valve is turned on or off elsewhere in the system. Nos. 6P995 and 6P997 shower and tub shower valves have separate volume and temperature controls. Nos. 6P998, 6P996, 6P999 and 6P899 have temperature controls only. Nos. 6P996 and 6P999 are heavy-duty commercial products with vandal-resistant handles. All Monitor® valves, Nos. 6P899, 6P995 through 6P999 have a rotational limit stop which can be easily adjusted at installation for proper temperature control. Delta brand.

# INDUSTRIAL FAUCETS

Chicago Faucet bodies and cartridges are mated by compression, greatly reducing the possibility of freezing together. Close with water pressure not against it, providing a consistent seal with less wear. All parts exposed to valve waterway are constructed of Monel, a very hard and corrosion resistant nickel/copper alloy. Standard cartridges are "Quaturn"—for their quarter turn from full close to full open. Every handle, inlet, arm, spout and outlet is interchangeable. All are CSA, and state of California and Wisconsin Approved. Exceed ANSI A112.18.1 for workmanship, materials, and mechanical performance. Certified to ANSI/NSF-61, Section 9..

# SHOWERS AND TOILET TANK REPAIR KITS

## SHOWERS AND ACCESSORIES

**A Hand Shower Full Spray White.** Features energy saving push-button water control and swivel wall mount. Includes flexible 60" Voral hose. 2.0 GPM. Meets Americans with Disabilities Act (ADA) requirements. Alsons brand (410PB PK).

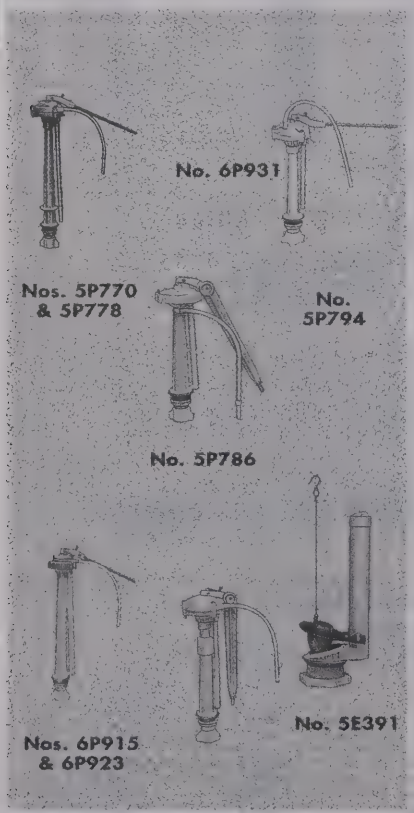
**No. 3P838.** Shpg. wt. 1.0 lbs. List $42.68. Each ..... **$34.25**

**B Massage Hand Shower.** Chrome finished unit offers a choice of stimulating massage spray or a soothing full spray. Arm mount fitting attaches directly to shower arm pipe and holds hand shower in position as a shower head. Simply remove to use as hand-held shower. 60" flexible Voral hose. 2.5 GPM. Meets ADA requirements. Alsons brand (48C-PK).

**No. 3P839.** Shpg. wt. 1.5 lbs. List $53.78. Each ..... **$46.65**

**C Adjustable Spray Shower Head.** Features a polished chrome finish and white trim. Spray adjusts from fine to coarse. 2.5 GPM. Alsons brand (3130CW).

**No. 3P841.** Shpg. wt. 0.3 lbs. List $7.07. Each ..... **$6.11**



**D Massage Shower Head.** All chrome shower head. Spray adjusts from pulsating massage spray to regular spray. 2.5 GPM. Alsons brand (665C PK).

**No. 3P840.** Shpg. wt. 0.7 lbs. List $39.37. Each ..... **$31.55**

**E Ultra Flex Hose With Lifetime Warranty.** 69" hose fits all hand showers. Durable, flexible hose is easy to clean and is soft and gentle to the touch. Constructed of spirals of nylon cord and chrome foil reinforced with polyester cords over PVC liner. Coated with sheath of clear PVC. Alsons brand (490-70-PK)

**No. 3P842.** Shpg. wt. 0.7 lbs. List $21.47. Each ..... **$16.58**

## TOILET CONTROL VALVES

**Ballcocks** have a patented shut-off action for instantaneous shutoff without gurgle.

**Anti-siphon valves** have been approved by all coded areas and by the International Association of Plumbing and Mechanical Officials (IAPMO). They also meet the requirements of the American Society of Sanitary Engineers standards (ASSE1002). Plastic valves resist corrosive and abrasive action of water. Coast brand.

**No. 5P770, 10" and No. 5P778 12" fill valves** have one-piece design with vinyl refill tube. 8" brass float rod and screws. Include locknut, coupling nut, and washers. No. 5P770 for 2-piece water saver toilets. No. 5P778 for 2-piece full flush toilets. Code listed anti-siphon.

**No. 5P786 fill valve** fits any tank. Regular ballcock, positive shutoff. Includes locknut, coupling nut, and all washers. Not for use in coded areas.

**No. 5P794 fill valve** has regular ballcock and fits any tank. Includes rod and refill, locknut, coupling nut, and all washers. Not for use in coded areas.

**No. 6P915, 10¾ and No. 6P923 12" fill valves** have one-piece design with vinyl refil tube. Include locknut, coupling nut, and al washers. No. 6P915 for 2-piece water save toilets. No. 6P923 for 2-piece full flush toi lets. Code listed anti-siphon.

**No. 6P931, 9½ to 13" adjustable fill valve** fit most toilet tanks. Includes locknut, cou pling nut, and all washers. Code listed anti siphon.

**No. 5E391 flush valve** fits most 2-piece toile designs. Features vinyl flapper, stainles steel chain, and hex nut. Includes washe and flange nut.

**No. 5E397 flapper/chain** has vinyl flappe with stainless steel chain.

**No. 5E402 flapper** fits most flush valve with ear attachments or overflow tubes Vinyl with pull strap.

**No. 5E999 repair kit** includes No. 6P931 fil valve, No. 5P794 fill valve, piston, and sea ring. For nos. 5P770, 5P778, 5P794, an 6P931.

**Note: Normal household water pressure ma range from 0.07 MPa (10 to 100 PSI) an plumbing codes mandate that a valve withstan the pressure of 0.86 MPa (125 PSI).**

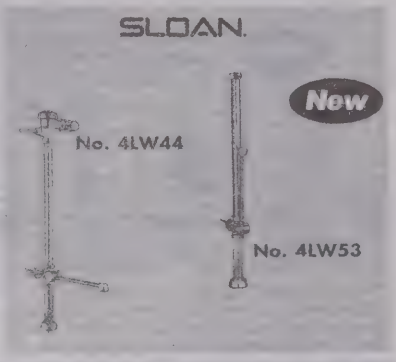
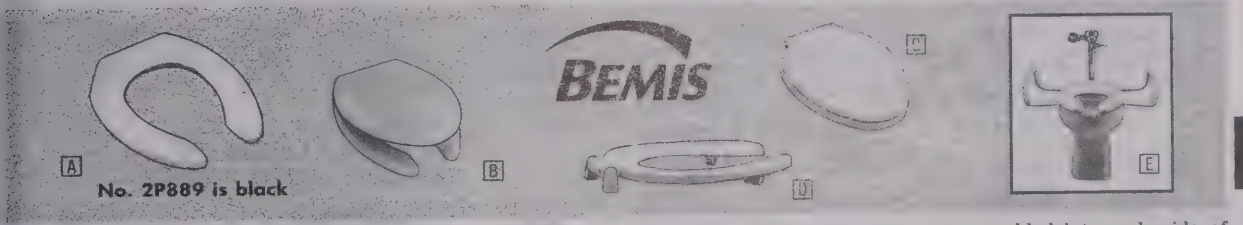
# BEDPAN WASHING SYSTEM AND TOILET SEATS

## SLIM LINE BEDPAN WASHING SYSTEM



- **Spray head offers maximum water force to thoroughly clean bedpans in seconds without splash or after-drip**
- **Fixed spray arm position helps prevent water from spilling on floor**
- **Keeps bedpans clean for same patient, saving on replacement costs**
- **Reduces chances of cross-contamination**

Unique bedpan washing system helps eliminate the need for unsanitary hose that sprays and the additional housekeeping that hoses require. Ideal for hospitals, assisted living facilities and nursing homes. Patented one-piece construction body design maintains spray arm in an upright position. O-ring design of pivot with counter balance spring provides long life and easy maintenance. Valve body, stop body, diverter body and diverter pivot are made from brass casting using semi-red brass for durability and long life. Integral vacuum breaker simplifies water supply rough-in. Sloan brand (Royal BPW 1000).



***New* No. 4LW44.** Shpg. wt. 12.0 lbs. List $411.40. Each.....$337.00

**Slimline Retrofit Diverter Assembly** for use in retrofit installations where Flushometers currently are installed and for replacing older in-line type bedpan washers. Royal brand (DV100).

***New* No. 4LW53.** Shpg. wt. 7.0 lbs. List $266.40. Each.....$218.25

## BEMIS TOILET SEATS

All Bemis plastic toilet seats are manufactured of tough, chemical-resistant Duraloy® and feature integrally molded bumpers. All seats white color, except No. 2P889, which is black. Meet and comply with federal specification WW-P-541/1A.

No. 2P892. Features an integrally molded lift, allowing for an additional 2" of height above the rim of the bowl.

No. 2P893. Medic-aid seat without cover features "Safety-side" stainless steel arms. Finger grooves molded into underside of support arms for added grip security. Eight stainless steel screws hold arms to seat. Fits tank type toilet or flush valve mounted bowl.-

* GPF = Gallons Per Flush

## BATTERY OPERATED RETROFIT FLUSH VALVES

- **Automatic flushing system**
- **No AC hookup needed**

**Optima Plus® Flushometers** turn manual Royal flushometers into automatic, sensor-operated flushing systems. No need for AC hookup. Self-contained systems use just four AA batteries to provide at least three years of operation under normal use. Infrared systems detect the presence of a user and automatically flush after each use. Deliver up to 4000 flushes after low battery indicator light flashes, assuring ample time for battery replacement. Keeps bowl clean with "Sentinel" flushing—24 hours after last flushing cycle. Includes: new cover assembly with sensor operation mounted on top of solenoid and attached to inside cover, four AA batteries, strap wrench, screwdriver, handle opening cover, and decorative stop cap. Optima Plus brand by Sloan.

# FLUSH VALVES, REBUILD KITS, AND INFRARED SENSOR FAUCETS

## HANDLE REPAIR KIT

For part B-32-A used on all Royal, Regal, and Crown flush valves, and Zurn Z6000MK. Sloan brand (B-50-A).

**No. 5E545.** Shpg. wt. 0.1 lbs. List $2.70. Each ..... **$2.13**

## VACUUM BREAKER KIT

For model V-500-A and V-500-AA Royal, Regal, and Crown valves, and Zurn Z6000A and Delany 50. Sloan brand (V-551-A).

**No. 5E546.** Shpg. wt. 0.1 lbs. List $2.39. Each ..... **$1.93**

## WATER-SAVER KITS FOR TOILETS

For toilets other than blowout and large 1¼" top spud urinals. Delivers 3 to 3.5 gallon flush.

**No. 5P213.** Shpg. wt. 0.4 lbs. List $12.83. Each ..... **$10.65**

## ADA RETROFIT TOILET HANDLE

Used to flush on less than 5 lbs. operating pressure with line pressure on 20-80 lbs. Meets ADA specifications. Sloan brand.

**No. 5E544.** Shpg. wt. 0.6 lbs. List $10.84. Each ..... **$9.20**

## CHICAGO URINAL VALVES

**Nos. 5E991 and 5E992**
- **Adjustable MVP slow closing push button**
- **Straight valve**
- **No. 5E991 has 1/2" IPS female inlet and outlet;**

**No. 5E992 has 3/8" IPS female inlet and outlet**
- **Tubular brass handle**

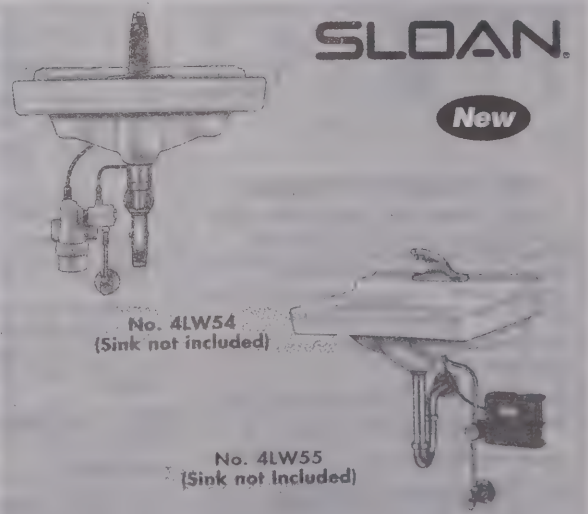
**Nos. 5E990 and 5E993**
- **Adjustable MVP slow closing push button**
- **Angle valve**
- **No. 5E990 has 3/8" IPS female inlet and outlet;**

**No. 5E993 has ½" IPS female inlet and outlet**
- **Tubular brass handle**

| Description | Female Inlet & Outlet Size (In.) | Chicago Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| Straight Valve | 1/2 IPS | 339-669 | **5E991** | $50.11 | **$47.35** | 1.0 |
| Straight Valve | 3/8 | 338-669PSHCP | **5E992** | 63.88 | **49.70** | 1.0 |
| Angle Valve | 3/8 | 388-669PSHCP | **5E990** | 61.80 | **59.95** | 1.0 |
| Angle Valve | 1/2 | 389-669 | **5E993** | 69.75 | **58.10** | 1.0 |

## OPTIMA PLUS® BATTERY OPERATED INFRARED SENSOR FAUCETS

### OPTIMA PLUS® BATTERY OPERATED FIBEROPTIC FAUCET



Revolutionary faucet uses infrared light to sense the presence of user's hands to turn water on and off. An adaptive infrared sensor is linked to the faucet by a fiber optic cable. Faucet features chrome-plated brass spout and integral throat plate. Moisture-proof, electronic module includes self-adaptive detection circuit with audible low-battery indicator and compartment for four C size batteries. Also has latching solenoid valve with self-cleaning bypass and clean-out strainer, and flow controlling aerator with optional back checks. Sloan Valve brand (EBF-85M).

**New No. 4LW54.** Shpg. wt. 7.2 lbs. List $473.70. Each ..... **$388.00**

### OPTIMA PLUS® BATTERY-OPERATED ADA COMPLIANT FAUCET

Automatic operation saves water and reduces maintenance and operation costs while meeting the Americans with Disabilities Act. The battery-powered, sensor-operated 4" centerset electronic hand-washing faucet is designed for use with tempered or hot/cold applications. Ideal in commercial, education, healthcare or institutional settings where there is high traffic and threats of vandalism. Waterproof circuit control module provides long life. Sensor range has adjustment screw for custom settings and the aerator/spray head has pressure compensating flow control. Metal jacket wire protection for sensor lead. Includes four C-size alkaline batteries and all appropriate mounting hardware. Sloan Valve brand (EBF 650M).

**New No. 4LW55.** Shpg. wt. 6.3 lbs. List $357.90. Each ..... **$293.25**

# ALPHA/FRY SOLVENT CEMENTS AND CLEANERS

**All solvents meet the maximum volatile organic compound limits of 450 grams per liter per SCAQMD 1168-316A.**

## ALL PURPOSE CLEANER

- A clear surface cleaner for all size pipes. For use with all cements on this page. Cleans dirt, oil, and grease from plastic pipes and fittings made from PVC, CPVC, ABS, and styrene
- To be applied in temperatures ranging from 40 to 100°F
- Available in 8 and 16 oz. cans

### ALL PURPOSE CLEANER

| Size (Oz.) | Alpha/Fry Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 8 | 72062 | 5E523 | $2.61 | $2.34 | 0.7 |
| 16 | 72061 | 5E524 | 3.36 | 3.10 | 1.3 |

## PRIMER

- A purple surface cleaner for all size pipes. For use with all cements on this page. Cleans and slightly dissolves surface of plastic pipes and fittings made from PVC, CPVC, ABS, and styrene
- To be applied in temperatures ranging from 40 to 100°F
- Available in 8, 16, and 32 oz. cans
- NSF and IAPMO (UPC) Listed
- Meets ASTM F-656

### PRIMER

| Size (Oz.) | Alpha/Fry Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 8 | 72052 | 5E520 | $3.06 | $2.74 | 0.7 |
| 16 | 72051 | 5E521 | 4.90 | 4.35 | 1.3 |
| 32 | 72050 | 5E522 | 8.13 | 7.22 | 2.3 |

## PVC CEMENT, REGULAR

- A clear cement for joining PVC pipes and fittings up to 2" in diameter. Applications include, water pressure pipe (schedule 40), DWV (drain, waste, vent) sewer and gas pipe, irrigation and electrical conduit
- To be applied in temperatures ranging from 40 to 90°F
- Available in 8, 16, and 32 oz. cans
- NSF and IAPMO (UPC) Listed
- Meets ASTM D-2564

### PVC CEMENT, REGULAR

| Size (Oz.) | Alpha/Fry Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 8 | 72012 | 5E525 | $2.83 | $2.53 | 0.7 |
| 16 | 72011 | 5E526 | 5.59 | 4.41 | 1.3 |
| 32 | 72010 | 5E527 | 8.32 | 7.44 | 2.3 |

## PVC CEMENT, HEAVY

- A gray cement for joining PVC pipe and fittings up to 12" in diameter. Applications are the same as PVC Cement, Regular. Can be used for larger pipes and also with schedule 80 pipes and fittings.
- To be applied in temperatures ranging from 40 to 90°F
- Available in 8 and 16 oz. cans
- NSF and IAPMO (UPC) Listed
- Meets ASTM D-2564

### PVC CEMENT, HEAVY

| Size (Oz.) | Alpha/Fry Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 8 | 72003 | 5E528 | $4.28 | $3.75 | 1.3 |
| 16 | 72002 | 5E529 | 7.35 | 6.42 | 1.3 |

## PVC WET/DRY CEMENT

- A blue cement for joining PVC pipes and fittings up to 6" in diameter, when wet conditions exist. Applications are the same as PVC Cement, Regular, but this cement includes schedule 80 pipes and fittings
- To be applied in temperatures ranging from 40 to 90°F
- Available in 8 and 16 oz. cans
- NSF and UPC Listed
- Meets ASTM D-2564

### PVC WET/DRY CEMENT

| Size (Oz.) | Alpha/Fry Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 8 | 72072 | 5E530 | $4.16 | $3.21 | 1.3 |
| 16 | 72071 | 5E531 | 6.54 | 5.29 | 1.3 |

## ALL PURPOSE CEMENT

- A clear cement for joining all types of plastic pipes and fittings (PVC, CPVC, ABS) up to 6" in diameter
- Applications include potable water pressure pipe, hot water up to 180°F, DWV (drain, waste, and vent), sewer and gas pipe, irrigation and electrical conduit
- To be applied in temperatures ranging from 40 to 100°F
- Available in 8, 16, and 32 oz. cans

### ALL PURPOSE CEMENT

| Size (Oz.) | Alpha/Fry Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 8 | 72042 | 5E532 | $3.86 | $3.40 | 1.3 |
| 16 | 72041 | 5E533 | 6.80 | 5.97 | 1.3 |
| 32 | 72040 | 5E534 | 11.50 | 10.25 | 2.3 |

## CPVC REGULAR CEMENT

- An orange cement for joining CPVC pipe and fittings up to 2" in diameter, including schedule 40. Applications include cold and hot water plumbing systems up to 180°F in residential, mobile homes, recreational vehicles, commercial, and industrial piping systems where code allow
- To be applied in temperatures ranging from 40 to 90°F
- Available in 8 and 16 oz. cans
- NSF and IAPMO (UPC) Listed
- Meets ASTM F-493

### CPVC REGULAR CEMENT

| Size (Oz.) | Alpha/Fry Model | Stock No. ❸ | List | Each | Shp Wt |
|---|---|---|---|---|---|
| 8 | 72032 | 5E535 | $4.41 | $3.85 | 1.1 |
| 16 | 72031 | 5E536 | 8.06 | 6.73 | 1.3 |

## ABS CEMENT

- A black cement for joining ABS pipe and fittings up to 6" in diameter. Applications include DWV (drain, waste, vent), sewer pipes, irrigation and electrical conduit; also includes schedule 40 and 60 pipes and fitting
- To be applied in temperatures ranging from 40 to 90°F
- Available in 8 and 16 oz. cans
- NSF and IAPMO (UPC) Listed
- Meets ASTM D-2235

### ABS CEMENT

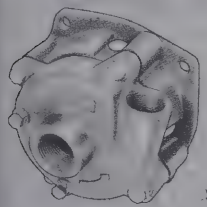
| Size (Oz.) | Alpha/Fry Model | Stock No. ❸ | List | Each | Shp Wt |
|---|---|---|---|---|---|
| 8 | 72022 | 5E537 | $2.87 | $2.57 | 0.6 |
| 16 | 72021 | 5E538 | 4.31 | 3.89 | 1.3 |

**WARNING: PRODUCTS ON THIS PAGE ARE EXTREMELY FLAMMABLE, HANDLE/USE IN ACCORDANCE WITH MANUFACTURER'S INSTRUCTIONS.**

❸ These products are covered by OSHA Hazard Communication Standard, and the Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# 1/3 TO 3 HP STRAIGHT CENTRIFUGAL PUMPS

- Up to 168 gallons per minute
- 1/3 to 3 HP, single or 3-phase motors



Replacement Parts Available 1-800-323-0620

TEEL®

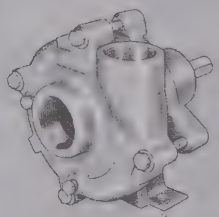
PUMP PEDESTALS FOR THESE PUMP HEADS FOUND ON PAGE 3124

New



1/3 HP-1 HP Cast Iron, Bronze or Stainless Steel

No. 4RH56

1/3 HP-3 HP Cast Iron, Bronze or Stainless Steel

No. 4RH65

1/3 HP-3 HP Bronze or Stainless Steel

No. 4RH92

- High performance, low pressure pumps
- Directly replaces TEEL cast Iron pumps 1P831 through 1P837. Bronze Pumps 1P787 through 1P793 and Stainless Steel Pumps 1V258, 1V277, 1V275, 1V267,1V265, 1V279, 1V269. Also pump heads only Cast Iron 2P501 through 2P503, Bronze 2P498 through 2P500 and Stainless Steel 1V263,1V283, 1V273.
- Type 21 mechanical seals and o-ring static seal for booster applications
- Pumps mounted on single and 3-phase motors. Pump heads only or Pedestal style also offered.
- Cast iron, bronze, and 300 stainless steel construction for a wide variety of fluid applications
- Temperatures from -20° to 210°F

### Pump Selection Guide

Read down the Head in Feet column (total of system head plus desired discharge head to the desired GPM. Read over to the Stock No. or the required pump or pump head.

Multiply horsepower by specific gravity of liquid to obtain minimum motor HP.

Select Dayton base-mounted jet pump motor with horsepower rating greater than the minimum required.

**Description:** Pump continuously at low pressure in situations that do not require self-priming. Discharge port rotates 360° in 90° increments. For use with nonflammable and nonabrasive liquids that are compatible with pump component materials.

**Maintenance-free ball bearings.** Easily accessible front drain plug for draining liquid. All units handle inlet pressures to 100 PSI for booster applications.

**Construction:** Cast iron, bronze or stainless steel pump and impeller. Buna-N and o-ring seals for cast iron and bronze models. (Viton seal and o-ring on stainless steel models.) Seals are carbon/ceramic banded seat and stainless steel spring. 303 stainless steel shaft.

**Driver:** Dayton 3450 RPM, 60 Hz, single- or three-phase motor with shielded ball bearings. NEMA 56J frame with threaded shaft. Automatic overload protection on single-phase units. Nos. 4RH42, 4RH46, 4RH50, 4RH56, 4RH60, 4RH64, 4RH79, 4RH83, 4RH87 are pump less motor. Refer to the pump selection guide and motor selection chart for specific applications. The pedestal models may be ordered separately or with the proper motor. For direct mounting of pumps, choose at least one 5/8" coupling body from Page 357. See page 3124 for mounting base.

To be used in chemical processing, utility, boiler feed, general transfer, filtration, cooling towers, condensate return, marine applications, fountains and boosters.

Higher performance and maximum features at a good price.

Made in USA

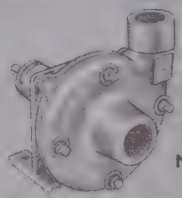
# 1/2 TO 3 HP STAINLESS STEEL HIGH HEAD STRAIGHT CENTRIFUGAL PUMPS



No. 1V300

TEEL®

Replacement Parts Available 1-800-323-0620

- Enclosed impellers
- Delivers pressures to over 60 PSI
- 1¼ x 1" & 1½ x 1¼" NPT
- All 316 stainless steel two piece construction
- Type 21 mechanical seal with carbon/ceramic, Viton, and stainless steel parts

No. 1V312

Pedestal Pump

Repair Service Available Contact Your Local Branch

- **Single and three-phase ODP 3450 RPM motors**
- **All units with motors are close-coupled designs**
- **Viton O-ring casing seal with 302 stainless steel spring**
- **Front drain plugs**
- **Discharge port rotates in 90° increments**
- **Permanently lubricated and sealed ball bearings**

**or continuous-duty high pressure** applications. Uses include liquid transfer, cooling, ressure boosting and circulating. 'edestal pumps are for direct or belt drive rom 3/4" diameter 303 stainless steel haft. Shaft key dimensions: 3/16 x 3/16 x ".

**esigned for use with** nonflammable liquids /hich are compatible with pump compoent materials.

**emperature range** is 40° to 200°F. laximum casing pressure is 150 PSI. Units re not self-priming. Teel brand.

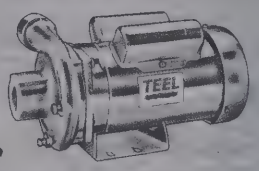
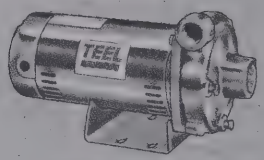
# 1/2 TO 3 HP CAST IRON HIGH HEAD STRAIGHT CENTRIFUGAL PUMPS

TEEL®

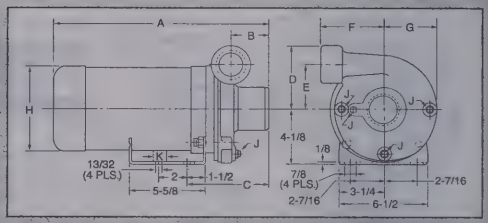


New

E61535 LR47013



Nos. 4RJ58, 4RJ60, 4RJ62, 4RJ64, 4RJ70, 4RJ72, 4RJ74, and 4RJ76 only



No. 4RH33

No. 4RJ79

No. 4RJ74

- Close-grained cast iron body and seal plate
- Pressures to over 60 PSI
- Close-coupled design
- Easy access drain plugs
- Discharge port rotates in 90° increments
- Heavy gauge motor base
- Available with silicon brass or Noryl® plastic impellers

Designed for continuous duty applications. Use includes liquid transfer, cooling, pressure boosting, and circulating. Pumps with Noryl® impellers are abrasion-resistant for normal applications with working temperatures to 140°F. Pumps with silicon brass impellers are rated for temperatures to 225°F. Maximum working pressure is 125 PSI. Units with single and three-phase motors available. Permanently lubricated and sealed ball bearings. Designed for use with nonflammable liquids which are compatible with pump components.

- High flow or high head units
- Naval bronze or bronze fitted cast iron construction
- Self-cleaning semi-open bronze impellers

FREE DELIVERY on orders of $900 or more
See Freight Policy

**Description:** Industrial close-coupled pumps are suited for liquid transfer, heating and cooling, recirculation, booster service, and other industrial applications. Naval bronze units are suited for salt water handling and sized for salt water (specific gravity 1.03). Semi-open impeller features self-cleaning ability that makes the unit useful in applications involving muddy or dirty liquids, as well as clean, clear fluids. Discharge position can be adjusted in 90° increments, with vent and drain plugs for all positions. Maximum case pressure 100 PSI; temperature range 40 to 160°F. For use with nonflammable liquids compatible with pump component materials. Pumps are not self priming, and require flooded suction.

**Construction:** Dual volute casing on all pumps except No. 4P939. Large peripheral chamber permits ample circulation around the seal faces. Built-in seal wash on naval bronze units retards salt crystallization on seal faces. Cast iron or naval bronze casing and adapter, bronze impeller. Mechanical seal has stainless steel and Buna N parts; carbon/ceramic faces.

**Driver:** NEMA JM shaft integral motors. TEFC 3600 RPM, 3-phase, 230/460V, 60 Hz (190/380V, 50 Hz). See table below for HP. Teel brand.

(*) Operation of pumps out of performance ranges indicated will result in reduced pump life and/or motor damage.
(**) Shut-off; to convert to PSI, divide by 2.31. (‡) NPSHR: Net Positive Suction Head Required by pump in feet of water at GPM indicated, under flooded suction conditions. Insufficient NPSH can cause pump cavitation, resulting in a noisy pump and reduced pump life.

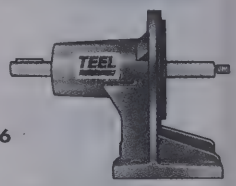
# PUMP PEDESTALS AND MOUNTING BASES

## TEEL PUMP PEDESTALS

- **Sealed-for-life ball bearings**
- **Epoxy paint**



Attaches to pump heads to form pumps which may by belt- or direct-driven. Pump head not included; order separately. Speed may be varied up to 4000 RPM using belt/pulley combinations or adjustable speed drives. Provides greater flexibility in matching horsepower available to motor HP required for fluid flow, total head, viscosity and specific gravity of liquid. Cast iron housing and adapter. Steel shaft. Epoxy paint protection for excellent corrosion resistance. Sealed double heavy duty ball bearings; 3/4" shaft. 9⅜L x 6W x 6⅞"H OC shaft height.

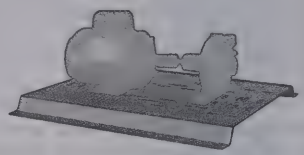
**No. 2P486** has threaded stainless steel shaft and mounting dimensions of NEMA 56J jet pump motors for easy attachment to these pump heads: Nos. 1P947-1P949, 2P393 and 2P394, 2P498-2P500, 2P501-2P503, 1V263, 1V273 and 1V283..

**No. 2P422** keyed shaft and mounting dimensions of NEMA 56C face motors for easy attachment to pump heads and other C-face equipment.

| Shaft | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| Keyed | 2P422 | $131.74 | **$88.80** | 10.0 |
| Threaded | 2P486 | 154.40 | **103.70** | 10.0 |

**Replacement Parts Available**
**1-800-323-0620**

No. 2P486



**Repair Service Available**

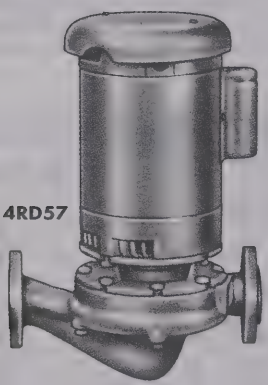
## MOUNTING BASE

- **Heavy 10-gauge (9/64") steel**
- **For direct drive/pulley drive installations**

Sturdy, stamped steel construction. Bed dimensions: 22L x 18W (14½" surface) x 1⅜" H. Includes 1" flange at each side (see picture). Wide combination of predrilled holes for many pump/motor combinations. Additional holes can be drilled if needed. Metallic gray finish.



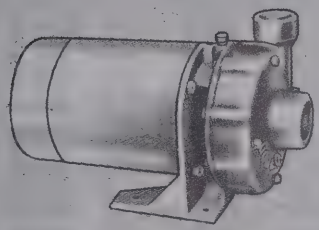
**No. 1P675.** Shpg. wt. 17.0 lbs. List $47.31.
Each ..... **$35.75**

No. 1P675

Bell & Gossett

## IN-LINE CENTRIFUGAL PUMPS

No. 4RD57

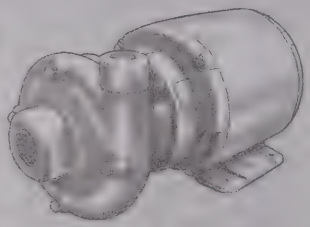


- **Internally self-flushing Buna/Carbon-Ceramic mechanical seal allows a maximum 225°F and 175 PSI working pressure**
- **Vertical and horizontal in-line mounting saves space and alleviates the need for special mounting pads or foundations**
- **Wide hydraulic coverage for a large range of pumping requirements**
- **Bronze fitted construction with open drip proof motors**
- **Companion flanges supplied**
- **Gauge, drain and vent tappings to accommodate any installed position**
- **Applications: Hydronic heating & cooling systems, general service, refrigeration and cooling towers**

FOR COMPLETE SPECIFICATIONS AND ORDERING DATA, SEE PAGE 3267.

NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

**Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.**



# CLOSE-COUPLED CENTRIFUGAL PUMPS

No. 1N521

GOULDS PUMPS, INC.
WATER TECHNOLOGIES GROUP

Replacement Parts Available
1-800-323-0620

No. 1N487

- Cast iron construction; bronze impeller
- 1/3 to 20 HP single and three-phase models
- Continuous-duty operation
- Capacities to 570 GPM, heads to 280 feet
- Back pull-out close-coupled pump design for ease of maintenance
- 1/3 to 2 HP discharge can be rotated 360° in 45° increments
- 3 to 20 HP discharge can be rotated 360° in 90° increments
- Vent and drain plugs in all positions
- Piping is female pipe thread (NPT), except Nos. 1N456 thru 1N460 which are ANSI flat-faced flanges

**Description:** For medium to high volume liquid transfer, water circulation, booster service, irrigation, spraying systems, jockey pump service and other general purpose pumping. 1/3 to 2 HP units have 125 PSIG maximum case working pressure. 3 to 20 HP units have 175 PSIG (12 bars) maximum case working pressure, maximum suction pressure is 100 PSIG (7 bars). Maximum fluid temperature: 212°F (100°C). Goulds brand.

**Driver:** 1/3—2 HP single and three-phase units are NEMA 56J frame, 3500 RPM, open dripproof or TEFC, and have Type 303 stainless steel shaft and sleeve. Single-phase units are 115/230V or 230V only. Three-phase units are 208-230/460V, except Nos. 1N462 and 1N467 which are 230/460V only.

Overload protection not supplied on three-phase units and must be provided in starter units. Pump control box must be ordered separately, see page 3234.

**Construction:** Cast iron casings, bronze impeller, mechanical shaft seal with stainless steel, Buna N carbon/ceramic parts. 300 Series stainless steel shaft and sleeve. Renewable bronze wear ring on 3—20 HP models only. Blue baked-on electro-coat paint.

*) Operation of pump in this range may result in reduced pump life and/or motor damage. (‡) Units have 12516 ANSI flat-faced flanges.

## BARNES PUMPS, INC.

No. 2P536

E81854

Replacement Parts Available
1-800-323-0620

## SUBMERSIBLE FOUNTAIN PUMPS

**Description:** Installs in horizontal position, no need for pump pit. Discharge rotates 360°, in 90° increments. Handles liquid temperatures to 145°F. UL Listed (E81854). Barnes Pumps Inc. brand.

**Construction:** Heavy-duty wrap-around stainless steel. Corrosion-resistant materials. Special suction chamber draws water from top of unit (when installed in horizontal position), keeping motor 2/3 submerged for cool operation. 12 ft. three-wire cable (plug not included).

All pump parts are bronze, brass, silicon-bronze, and stainless steel. Mechanical seal has Buna N, stainless steel and carbon/ceramic parts.

**Driver:** PSC permanent split-capacitor, oil-filled motor has diaphragm pressure equalizer and automatic current and thermal overload protection.

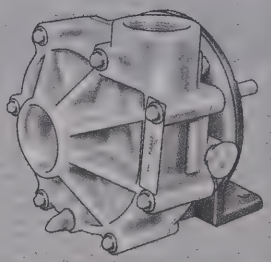
# POLYPROPYLENE AND NORYL STRAIGHT CENTRIFUGAL PUMPS

TEEL®



New

No. 2P691

- No metal contact with fluid
- Water flush seal

No. 4RJ04

Replacement Parts Available
1-800-323-0620

**Description:** Designed for continuous medium pressure circulation and transfer of aggressive liquids, and other applications where no suction lift is required. Pumps produce high flow rates under moderate head conditions. Maximum liquid temperature: 190°F. No metal contact with fluid. Maximum inlet pressure: 30 PSI. For use with nonflammable liquids compatible with pump component materials. 1½" NPT inlet and outlet ports. Teel brand.

**Construction:** Polypropylene or Noryl construction offers resistance to most acids, alkalis, and inorganic solvents. Internal design isolates motor shaft from fluid. Noncorrosive thermoplastic mechanical stationary shaft seal isolates all metal parts from liquid contact. Stainless steel components are sealed in polypropylene. Unique seal guarantees reliability through simplicity and balance of design. Water flush seal: a seal flush port is provided for the decontamination of chemicals on the seal, and seat elastomers.

Polypropylene body, housing, and impeller, and mechanical seal with carbon/ceramic seal/seat faces with Viton elastomer. Viton seal seat, and o-ring. Pedestal mount models feature a 5/8", Carpenter 20, stainless steel solid shaft, a corrosion resistant coated cast iron bearing housing and a double row of sealed ball bearings.

**Driver:** Motor mounted pumps use either 56J, TEFC design, 3-phase or 56J ODP single-phase motors. Pedestal pumps may be either long-coupled or pulley-driven with any base-mounted motor such as open dripproof, totally enclosed fan-cooled (TEFC) or washdown motors.

Made in USA.

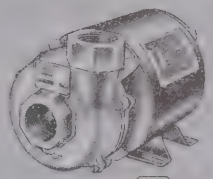
*If we don't have a pump for it, chances are it can't be pumped.*

# GENERAL PURPOSE AND CHEMICAL-RESISTANT PUMPS



## 1/4 HP GENERAL PURPOSE CENTRIFUGAL PUMP

**Description:** Manually operated. For gravity-feed pumping operations specially suited for laundry water needs to move from tub to overhead sewer areas. Required by regulations in many local areas. Mounts below laundry tub with motor shaft in vertical or horizontal position. 1¼" NPT discharge port rotates in 90° steps. For use with non-flammable liquids compatible with pump component materials. Not self-priming. Pump will work with suction lifts up to 4 feet with foot value and suction piping completely filled. Maximum liquid temperature 120°F. 10½L x 6½W x 6½"H.

**Construction:** 1¼" NPT suction, discharge. Pump materials selected specifically for laundry applications. Cast aluminum casing, impeller, and adapter. Mechanical seal has stainless steel, Buna N parts, and carbon/ceramic seats. **Driver:** 1/4 HP Dayton, 1725 RPM, 115V, 60 Hz split phase motor. NEMA 56Z frame, nonstandard 1/2" diameter shaft with flat.

## 1/2 TO 3 HP STRAIGHT CENTRIFUGAL CHEMICAL-RESISTANT PUMPS

**Description:** Chemical transfer or booster pumps for nonflammable, nonabrasive fluids compatible with pump component materials. Not recommended for trichloroethylene. Available with or without motors. Pumps without motors require NEMA 56J motor, or 56J pump pedestal with appropriate motor. Develop limited suction lift; approximately 15 ft. with foot valve. Handle solids to 1/4" diameter. Maximum liquid temperatures: 180°F.

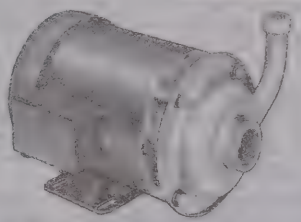
**Construction:** Deep-drawn from stainless steel sheet. Surfaces are smoother than those of cast pumps, and have superior corrosion resistance to casting of comparable material. All pumps have closed impellers, except No. 1P799, which has a semi-open impeller. All pumps 125 PSI working pressure except No. 1P799 which is 20 PSI. Type 304 stainless steel housing, impeller, shaft sleeve/impeller, bolts and extenders. Viton O-ring. Mechanical seal has 316 stainless steel, Viton, carbon and ceramic parts.

**Driver:** Single-phase, 115/230V motors are capacitor-start, open dripproof type with automatic reset thermal protection and 303 stainless steel shaft. 3-Phase, 208-220/440 VAC motors are TEFC with 416 stainless steel shaft. All motors are 3450 RPM, NEMA 56J frame with base.

### PUMP HEAD SELECTION GUIDE

Read down the HEAD IN FEET column total of system head plus desired discharge head) to desired GPM. Read over to stock number of required pump or pump head. Multiply horsepower by specific gravity of liquid to obtain minimum motor HP. Divide 15 ft. (maximum suction lift) by specific gravity of liquid to obtain maximum suction lift with foot valve. Select Dayton base-mounted jet pump motor with HP rating greater than the minimum required. Or, use No. 2P486 pump pedestal, direct coupled or belt driven, with appropriate horsepower motor.

### VITON SEAL AND GASKET KIT



Viton seals are recommended for certain mild acids or other liquids compatible with Viton. Fit pumps Nos. 1P701, 1P702, 1P800, 1P801, 1P802, 1P803, 2P391, 2P392 and unassembled pumps No. 1P947, 1P948, 1P949, 2P393, 2P394. Kit includes Viton seal seat, cartridge, and Teflon® O-ring.

**No. 1R267.** Shpg. wt. 0.2 lbs. List ..... $0.00.
Each ..... **$0.00**

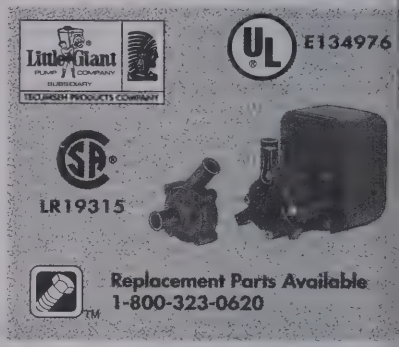
# EPOXY-ENCAPSULATED AND NAVAL BRONZE SALTWATER PUMPS

## EPOXY-ENCAPSULATED MAGNETIC DRIVEN SALTWATER PUMP

- **Designed to be saltwater compatible**
- **For submerged or in-line use**
- **UL Listed (E134976); CSA Certified (LR19315)**



**Description:** Compact, corrosion resistant sealed pump usable for submerged or in-line applications. Suitable for mild chemicals at moderate temperatures. Pumps handle mild acids and mild alkalies plus saltwater. For liquids from 32 to 150°F and pH ranges from 5 to 9. For use with nonflammable liquids compatible with pump component materials. 1/2" ID hose inlet and outlet. 3⅝H x 4³⁄₁₆L x 3⅝"W.

**Construction:** Epoxy-encapsulated motor housing. Removable volutes for easy cleaning. Includes 2 volutes: one standard screened volute is mounted to pump; one converts pump to an in-line intake (included). 1/2" OD connections. Pumps supplied with 18/3, 6 ft. SJT cord with 3-prong plug.

Glass-filled polypropylene pump heads, ceramic magnet and spindle shaft, Rulon J thrust washers, Nitrile O-ring, 316 stainless steel hardware. Little Giant (1-EUAA-MD).

**No. 2P875.** Shpg. wt. 3.0 lbs. List $85.40. Each **$72.60;** Lots 3 ..... **$68.94**

## 1/8 HP NAVAL BRONZE STRAIGHT CENTRIFUGAL PUMP

- **All naval bronze wetted parts**

**Description:** Straight centrifugal low pressure pump with semi-open impeller **designed for saltwater** recirculating and wash down applications in aquaculture and general marine settings. Pump sized for saltwater (specific gravity 1.03). For use with nonflammable liquids compatible with pump component materials. Temperature range 40 to 160°F. Includes On/Off switch and line cord.

**Construction:** Pull-from-the-rear design with O-ring seal. Built-in seal wash capability. Front drain plug. Permanently lubricated sealed bearings. 3/4" suction x 1/2" NPT discharge ports. Overall dimensions: 10¹⁄₁₆L x 8W x 5½"H. Naval bronze casing, adapter, and impeller. Stainless steel hardware. Mechanical seal has stainless steel and Buna N parts. Ceramic seat.

**Driver:** Totally enclosed fan cooled (TEFC) 1/8 HP capacitor start induction motor with ball bearings, splash protected, 4-pole, 1800 RPM, 115V. Stainless steel shaft. Standard plug/cord end.

**No. 3P736.** Shpg. wt. 21.0 lbs. List $234.69. Each ..... **$209.25**

And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.**

## 1, 2, AND 3-STAGE HIGH VOLUME PRESSURE BOOSTER PUMPS

**Description:** For continuous-duty high flow, pressure boosting applications such as increasing water pressure from city mains or private water systems. Units are not self-priming but will lift water up to 25 ft. with foot valve and pump suction piping filled with water. Important for proper operation of water softeners and filtration equipment in high-rise buildings and multi-family dwellings. Balanced impellers do not restrict flow when pump is not operating. Maximum case pressure: 100 PSI on Nos. 2PC24-2PC29; 160 PSI on other models. Maximum fluid temperature: 200°F.

**Construction:** Two-piece design with pump coupled to double ball bearing motors. Normal wearing parts are easily removed for service and replacement. 1½" NPT suction ports and 1¼" NPT discharge ports.

Heavy-duty cast-iron body, brass impellers, and mechanical seal with stainless steel, Buna N and carbon/ceramic parts.

**Driver:** Dayton 3450 RPM, single or 3-phase continuous duty motor with shielded ball bearings and NEMA 56J frame with threaded shaft.

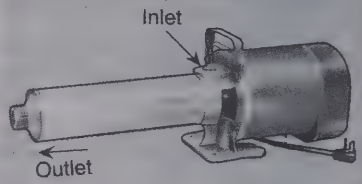
# MULTI-STAGE PRESSURE BOOSTER PUMPS

**Description:** Teel booster pumps increase water pressure from city mains or private water systems. Especially important for proper operation of water softeners and filtration equipment. Units pump water from cisterns, tanks, or ponds, with suction lifts up to 10 ft., with foot valve and pump suction piping completely filled with water. Applications include: providing high water pressure for washing buildings, dairy walls or floors, hog parlors, poultry houses, rinsing or spray cooling equipment; lawn sprinkling; fire protection; and insecticide spraying. Stainless steel models can handle saltwater and contaminated water in reverse osmosis filters and other aggressive water applications. Maximum casing working pressure: 300 PSI. Maximum fluid temperature: 180°F. For use with nonflammable liquids compatible with pump component materials.

**Construction:** 6 to 16-stage replaceable impeller and diffuser cartridge assemblies. Radial bearing is incorporated into each diffuser cup. 3/4 or 1" NPT inlet and discharge ports.



Noryl and Delrin impeller and diffuser, 304 stainless steel radial bearing, 304 stainless steel housing. Standard pumps have cast iron suction and discharge housings, and mechanical seal with stainless steel, Buna N, and carbon/ceramic parts. Stainless steel models have 316 stainless steel suction and discharge housings and mechanical seal has stainless steel, Viton, and carbon/ceramic parts.

**Driver:** Dayton 3450 RPM, single or 3-phase, open drip-proof, 65° C rise, continuous duty motor with shielded ball bearings and NEMA 56J frame with threaded shaft. **Single Phase:** 1/3-2 HP, 115/230V; 3 HP, 230V only. Built-in overload with automatic reset, capacitor type. 1/3, 1/2 and 3/4 HP models are wired for 115V with 8 foot, 16/3 cord and plug, but can easily be rewired for 230V. 1 to 3 HP models have no cord and must be field wired. **3-Phase:** 3/4 to 3 HP, 230/460V, 50/60 Hz models must be field wired.

(†) To convert to feet of head, multiply by 2.31. (‡) Operable on 230/460V, 50 Hz @ 5/6 of 60 Hz flow and 7/10 of 60 Hz pressure.
(*) Operation of pump in this range may result in reduced pump life and/or motor damage.

### BOOSTER PUMP SELECTION GUIDE

1) Determine pressure boost required above existing pressure.
2) Determine GPM needed to be pumped.
3) Read across top of specification column for pressure boost required.
4) Read down column to GPM required.

**Example: You have 20 PSI supply. You require 40 PSI at 10 GPM. Your boost requirement is 20 PSI. Read across pressure boost column to 20 PSI. Read down vertical column to gallons required (10 GPM) or next larger size. Correct pumps are Nos. 2P019, 2P423, 2PC43 and 2PC44.**

*If we don't have a pump for it, chances are it can't be pumped.*

# 1/3 TO 1 HP SELF-PRIMING CENTRIFUGAL PUMPS

**Description:** Designed for dewatering, circulating, booster, and dozens of other applications in commerce and industry. Units are provided with large peripheral circulation areas around the mechanical seal which provide cooling and constant cleaning of the seal faces. Self-primes to 15 feet; handle fluids from 40 to 160°F. Deliver flows to 4900 GPH or 70 feet of head. Choose a close-coupled model or pump head only. For use with nonflammable liquids compatible with pump component materials.

**Construction:** Casing incorporates self-priming dual volute; impeller is semi-open design, threaded to a stainless steel shaft (close-coupled units only). Cast iron mounting base has 7/16" mounting holes 6" OC. Casing is sealed by O-ring. Close-coupled units have convenient carrying handle for portability.

Cast iron casing, impeller and adapter; stainless steel shaft. Mechanical seal has stainless steel and Buna N parts, carbon/ceramic seat.

**Driver:** Dayton 1/3, 1/2, 3/4, or 1 HP 3450 RPM, NEMA 56J, continuous duty motors. Automatic reset thermal protection and shielded ball bearings locked onto shaft end. 3-Phase units have open drip-proof 230/460V, 50/60 Hz motors with double sealed ball bearings locked on both ends.

**No. 1P884 Pump Head Only.** For direct or belt drive from 5/8" diameter carbon steel shaft with 3/16 x 3/32" keyway. Shaft height 3 9/16". 1¼" NPT inlet and outlet ports. 3/8" Mounting slots are 3½" OC. Adapts to universal pump mounting base No. 1P675 (see Index). Maximum suction lift 20 ft. at 3450 RPM maximum speed. Teel brand.

# 1" SELF-PRIMING CENTRIFUGAL UTILITY PUMP

**Description:** Medium volume general purpose pump for a wide variety of applications including irrigation, dewatering, and general water transfer. Handles clear nonflammable liquids compatible with pump component materials, and liquids that contain some sediment and/or solids up to 1/8" diameter. Self-primes to 6 feet. Handles fluids from 40 to 180°F. Measures 13¾L x 7½W x 8¾" H. Teel brand.

**Construction:** Center line discharge resists vapor binding. Unit has 1" suction and discharge connections. Closed impeller becomes with two 1" NPT x 3/4" brass garden hose adapters.

Cast aluminum casing, adapter, and impeller. Mechanical seal has stainless steel, Buna N parts, and carbon/ceramic seats.

**Driver:** Dayton 1/2 HP continuous-duty 3450 RPM, NEMA 56J, 115 VAC, 60 Hz, automatic reset thermal overload protection, split phase motor with 303 stainless steel shaft and 8 ft., 16/3 cord and plug.

**No. 2P390.** Shpg. wt. 19.0 lbs. List $236.74. Each **$174.25**; Lots 3.....$165.28

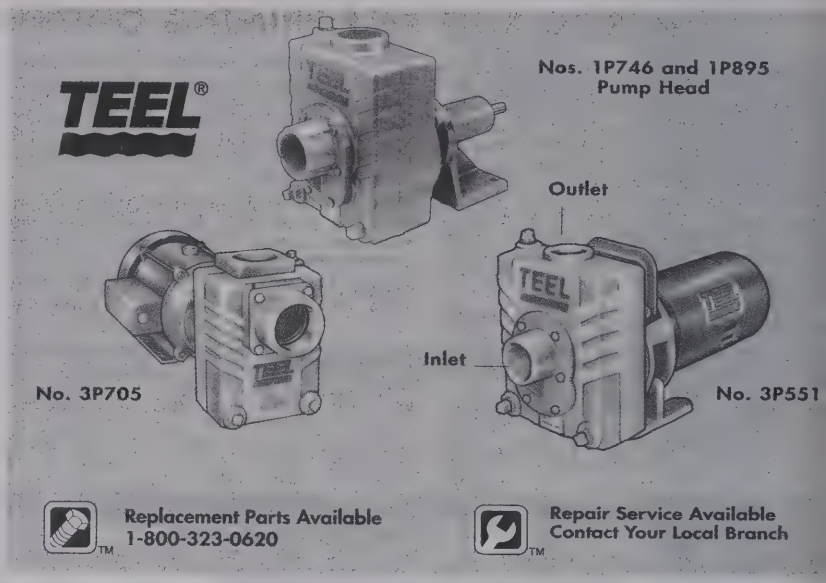
# SELF-PRIMING CENTRIFUGAL HIGH-VOLUME LIQUID TRANSFER PUMPS

- Single and three-phase motors
- 1½ to 3" NPT suction and discharge
- 1/2 to 7½ HP
- Cast-iron construction
- Semi-open clog-resistant impeller
- Built-in check valve

**Description:** For high-volume applications in commerce and industry. Pumps clear semi-solids in suspension to 3/8" diameter. Self-prime to 20 feet; handle fluids from 40 to 160°F. Casing working pressure to 100 PSI. Choose single or three-phase motor, or order the pump head only. For use with nonflammable liquids compatible with pump component materials. Teel brand.

**Construction:** Self-priming dual volute; clog-resistant impeller and built-in check valve. Close-coupled units have carrying handle. Cast iron mounting base has 3/8" mounting slots 3⅛ x 4½" OC.



Cast iron casing, impeller and adapter (except Nos. 3P705, 3P706, and 3P707, which have bronze impeller); stainless steel shaft or shaft sleeve on close-coupled models; carbon steel protected shaft on pump heads. Mechanical seal has stainless steel, Buna N and carbon ceramic parts.

**Driver:** Single phase units have Dayton capacitor-start, 3450 RPM, 115/230V, 60 Hz NEMA 56J, continuous duty motors with automatic reset thermal protection. Sealed ball bearings at both ends of motors. 3-phase motors have double-sealed ball bearings locked on both ends. Open drip-proof construction, 230/460V, 50/60 Hz. 3, 5, and 7½ HP motors are 184JM frame, 3450 RPM, TEFC, with 1.0 service factor.

**Pump heads only:**

**No. 1P746:** 1½" NPT suction and discharge, 5/8" diameter carbon steel shaft with 3/16 x 3/32" keyway. 4½" shaft height. Mounting slots 4½" C.

**No. 1P895:** 2" suction and discharge ports, 3/4" double sealed ball bearings. 3/4" carbon steel shaft with stainless steel shaft sleeve and 3/16 x 3/32" keyway. 4⅝" shaft height. Four mounting holes 3¾"C, 2½" front to rear.

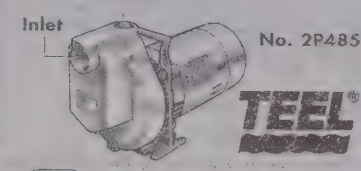
# 1/3 AND 1½ HP STAINLESS STEEL TRANSFER PUMP

- **For compatible chemicals with specific gravity up to and including 1.6-perchloroethylene (PCE)**



**Description:** Type 316 stainless steel, self-priming centrifugal pump for transferring perchloroethylene and other nonflammable solvents from drums and storage tanks. Pump should be used ONLY with nonflammable liquids compatible with pump component materials. **Not recommended for trichloroethylene.** Pump will lift liquid 6 feet without a foot valve. Fluid temperature range: 40 to 200°F.

**Construction:** 1" NPT inlet and outlet. Centerline discharge and self-priming casing minimize gas entrapment problems. Semi-open impeller resists clogging. Rear type disassembly makes it easy to clean without disassembly. Casing is sealed with Viton O-ring.

Stainless steel casing, casing cover, and impeller. Cast iron motor adapter. Mechanical seal has Viton, stainless steel parts and carbon/ceramic seats.

**Driver:** 1/3 and 1½ HP, 3450 RPM, Dayton motor with ball bearings. NEMA 56J mounting face. Open, dripproof construction. Automatic reset thermal protection. Stainless steel motor shaft. Single-phase units are 115/230 VAC, 60 Hz motors. Three-phase unit is 230/260 VAC, 50/60 Hz motor.

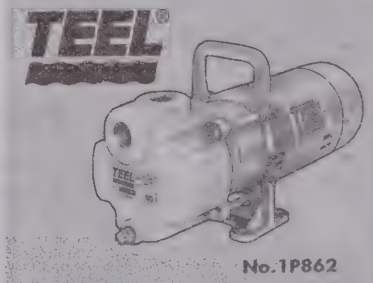
) Open Dripproof.

# ALUMINUM TRANSFER PUMP

**escription:** Lightweight aluminum self-riming pump for general purpose chemi-al transfer from drums or storage tanks. ump should be used ONLY with nonflam-able liquids compatible with pump com-onent materials. **Not recommended for per-loroethylene or trichloroethylene.** Pump ill lift liquid 10 feet without a foot valve. uid temperature range 40° to 200°F. easures: 6W x 9¼H x 16⅝"L.



**onstruction:** 1" NPT inlet and outlet. enterline discharge and self-priming cas-g minimize gas entrapment problems. emi-open impeller resists clogging. Rear pe disassembly makes it easy to clean without disassembly. Casing is sealed with Viton O-ring.

Aluminum casing, adapter, and impeller. Mechanical seal has Viton, stainless steel parts and carbon/ceramic seats.

**Driver:** 1/3 HP, 3450 RPM, 115/230V, 60 Hz Dayton motor with ball bearings. NEMA 56J mounting face. Open dripproof construction. Automatic reset thermal protection. Stainless steel motor shaft.

**No. 1P862.** Shpg. wt. 25.0 lbs. List ..... $429.24.
Each ..... **$275.50**

- **Capacities to 137 GPM**
- **Heads to 135 ft.**
- **Casing design prevents the seal from running dry**
- **Back pull out design for ease of maintenance**
- **Continuous-duty**

**Description:** Designed for lawn sprinkling, irrigation, air conditioning systems, heat pump and water transfer. Once primed, pump stays primed. Pump handles temperatures to 160°F (71°C). **For use with nonflammable liquids which are compatible with pump component materials.** Goulds brand.

**Construction:**

A Cast iron with blue baked-on electrocoat paint. Cast iron casing. Enclosed impeller is 20% glass-filled Noryl on 3/4-3 HP models. Mechanical shaft seal has stainless steel, Buna N carbon/ceramic parts.

B Cast Iron Casings, Bronze Impeller and 300 series stainless steel sleeve. Blue baked-on electro-coat paint. Mechanical shaft seal has stainless steel Buna N, carbon/ceramic parts.

**Driver:** 3500 RPM stainless steel shaft. **Single-phase:** 3/4-5 HP, Built-in overload with automatic reset. Capacitor type. **Three-phase:** 2 and 5 HP, Overload protection must be provided in starter unit. Starter and heaters must be ordered separately. See page 3234 for complete pump control boxes.

(*) Does not include pressure losses in suction and discharge piping. (†) To convert PSI to head in feet of water, multiply by 2.31

**Description:** Designed for both lawn sprinkling and booster applications. Once primed, pump stays primed. Self-primes to 25 ft. Multi-staged models can handle multi-head sprinkler applications. Handles fluids from 40° to 160°F. For use with non-flammable liquids compatible with pump component materials.

**Construction:** Easy clean-out design. Removable and replaceable volute/diffusers. Front drain plug. Carrying handles on 3/4 HP-2 HP single stage pumps.

Cast-iron casing, volute/diffusers and adapter with 316SS enclosed impellers.

Buna N O-ring casing seal. Type 21 mechanical seal has stainless steel, Buna N and ceramic parts.

**Driver:** Single-phase motors are 3450 RPM capacitor-start, with automatic reset thermal protection, 40°C rise, and continuous-duty open drip-proof construction. 5 HP and 7½ HP three-phase motors are (TEFC) totally enclosed, fan-cooled 3450 RPM with double shielded pre-lubricated ball bearings; 40°C rise and continuous-duty range. Teel brand.

# SELF-PRIMING CENTRIFUGAL PUMPS

- **Heavy-duty 3/4 - 2½ HP TEFC motors**
- **Continuous duty**
- **Corrosion-resistant thermoplastic construction**
- **Stainless steel fasteners and inserts**
- **Viton® fitted mechanical shaft seal**
- **Capacities to 92 GPM**

Use for water transfer, dewatering, and lawn sprinkling applications. Specially fitted to be resistant to brine or salt water. Fiberglass reinforced thermoplastic pump body has ribs for added strength. Noryl® impeller and stainless steel shaft. Residential or commercial use. 3/4 - 1½ HP, 115/230V, 60 Hz capacitor start motor, factory wired for 230V. 2 - 2½ HP models are 230V only. Maximum operating temperature is 140°. Seal has ceramic seat, carbon head, stainless steel springs, and Viton elastomers.

No. 4RJ44

TEEL®

New

**Description:** These close-coupled pumps are designed to handle specific gravities up to 1.3 (See Performance Data). Clog resistant impellers handle solids to 3/8" diameter. Pumps self prime to 6 feet and handle liquids with entrapped gases. Maximum viscosity is 100 SSU. Maximum casing working pressure is 75 PSI. Bronze units handle temperatures to 200°F; stainless steel units handle temperatures to 250°F. For use with non-flammable liquids compatible with pump component materials. Teel brand.

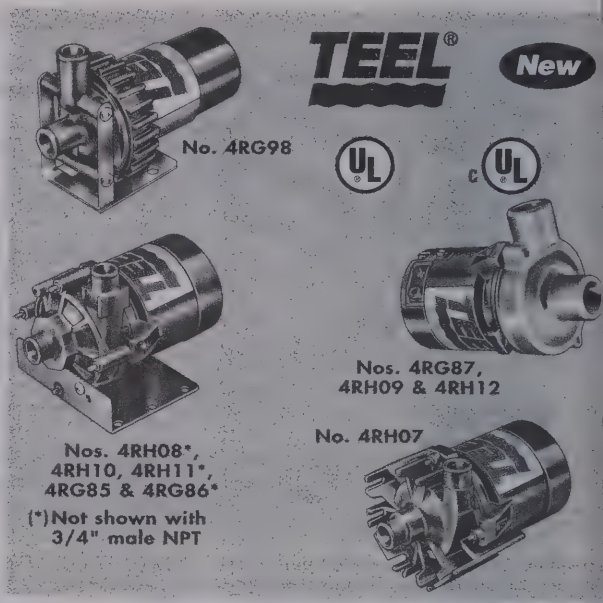
PUMPS: CANNED MOTORS



# SEALLESS CENTRIFUGAL CANNED MOTOR PUMPS

- **Compact**
- **Gravity fed**
- **Whisper quiet**
- **Self-lubricating**
- **Fluid temperatures to 230°F**

**Applications:**
Suitable for a variety of water and chemical circulation or transfer services handling fluids up to 140°F and line pressures up to 50 PSI on Noryl plastic housing models, and fluids to 230°F and 150 PSI line pressures on stainless steel housing models. Suitable for specific gravities to 1.5 and viscosities to 30 CPS.

**Construction:**
Pump and motor are built into one integral unit with fluid-wetted parts consisting of Noryl plastic or 316 stainless steel pump housing. Noryl impeller, carbon graphite/ceramic bearing system, EPDM gasket and all other parts of 316 stainless steel. Motors are 115VAC, 1 Phase, 60 cycle. Motors are weather-resistant design. Pumps have 6 ft. 18/3 cord with 3-prong grounded plug. Housing connections provided: 3/4" hose barb and 3/4" Male NPT on Noryl housing models, and 3/4" female NPT on stainless steel housing models. Mounting bracket is provided on all plastic housing pump models.

Sealless, leakproof centrifugal canned motor pumps eliminate problem shafts, seals and bearings common to conventional mechanically-sealed and magnetic drive pumps. Spherical rotor shaft-less design results in a pump that is simple, compact, lightweight and quiet. All units are UL and C-UL Listed.

Replacement Parts Available
1-800-323-0620

**Drive magnet is separated from impeller magnet,** preventing fluids from contacting the motor drive shaft, and allowing the motor to drive the impeller without a mechanical shaft seal. Eliminates seal-caused friction loss, wear, contamination, and leakage. Encapsulated impeller magnet handles corrosives and magnetic (ferrous) solutions. Gravity-feed design requires the pump inlet to be lower than liquid level. Mount pumps in the horizontal position. Volute rotates in 90° intervals, except No. 2P044, which rotates at 60° intervals.

UL Recognized under the Component Recognition Program. CSA Component certified. For use with nonflammable liquids compatible with pump component materials. Maximum specific gravity; 1.1 Maximum viscosity; 100 SSU.

## MD SERIES PUMPS

**Description:** Pumps can handle photographic and plating solutions, mild acids, mild alkalies, and other nonflammable liquids compatible with pump component materials. Maximum operating pressure, 50 PSI.

**Construction:** Glass-filled polypropylene pump head and impeller. Rigid aluminum pump mounting bracket, Buna-N O-ring, titanium spindle shaft (except No. 2P037, which has 316 stainless steel shaft) Viton O" ring, Rulon "J" thrust washers, and thrust washers, 300-series stainless steel hardware. Volute can be easily rotated at 90° intervals. 6-ft., 3-conductor SJO cord, except No. 2P037 which has 3 ft. strip. 18/3 wire leads. Pump can be easily dismantled for cleaning, without tools. Parts are field replaceable.

**Driver:** Heavy-duty, fan-cooled 1/50 or 1/25 HP, 115V, 60 Hz. motor with automatic reset thermal protection.

## MD-SC SERIES PUMPS

**Description:** For mild chemicals at moderate temperatures (32 to 150°F) or pressures to 50 PSI‡. Pumps handle mild acids, mild alkalis, and salt water.

**Construction:** Polypropylene pump housing, impeller. Epoxy encapsulated ceramic magnet. Ceramic shaft and thrust bearings. Nitrile O-ring gasket. 316 Stainless steel hardware.

**Driver:** Open and open fan-cooled motors. Motors have 6 ft., 3 conductor SJO cord with 3-prong plug.

## MD-HC SERIES PUMPS

**Description:** For highly corrosive chemicals (pH 3 to 11) at temperatures from 32 to 200°F or pressures to 60 PSI‡. Handle photographic and plating solutions, acids, alkalies, brines, and distilled water.

**Construction:** Ryton pump housing, impeller, and encapsulated ceramic magnet. Ceramic shaft and thrust bearings. Viton O-ring gasket, 316 stainless steel hardware. Carbon bushings.

**Driver:** Open fan-cooled and totally enclosed fan-cooled motors. Motors have 6 ft., 3-conductor SJO cord with 3-prong plug, except No. 2P044 which must be field wired.

(‡) Pump cannot operate at maximum temperature and pressure simultaneously. See MAXIMUM TEMPERATURE VS SYSTEM PRESSURE table on this page.

# WATER GARDEN PUMPS

## ABOVE GROUND POND KITS

Attractive kiln dried redwood frame unit with glazed ceramic tiles. Includes a durable 20 mil PVC flexible Liner, 1/40 HP, 115V, 60Hz 100 GPH submersible pump and a 6' power cord. Convenient built-in flow control system, plus fountain Nozzle with telescoping stem. Nozzle has a waterbell and tulip spray pattern. Water surface area of 4.8 cubic feet. UL/CSA listed pump. Ideal for use on porches, patios, terraces, and decks. No. 4RL12 is an octagonal shape and No. 4RL13 is an elongated decagonal shape.

## 115V, 60Hz RECIRCULATING POND AND FOUNTAIN PUMPS

### A No. 4RK99 COMPACT FOUNTAIN PUMP

Submersible energy efficient, compact design for areas where the use of smaller units is critical. Built-in, adjustable flow control. Bottom intake. UL Listed and Canada UL Listed. Ideal for use in statuary fountains.

### B No. 4RL01 1/160 HP RECIRCULATING PUMP

Fully submersible pump with 1/4" MNPT discharge. Resilient nylon housing protects unit. Impedance protected. Includes a 15' power cord. UL Listed. Ideal for use in recirculatiing water and mild fluids, aerating bait tanks, statuary, and waterfalls.

### C No. 4RK97 1/125 HP RECIRCULATING PUMP

Fully submersible, epoxy-encapsulated pump with a corrosion resistant polyester housing. 1/4" MNPT discharge and 1/8" MNPT outlet with 3/5" barb. Includes a 15' power cord. Unit is impedance protected plus includes a snap-off inlet screen. UL Listed. Ideal for use in recirculating liquid, statuary and waterfall applications, and also to recirculate and aerate bait tanks.

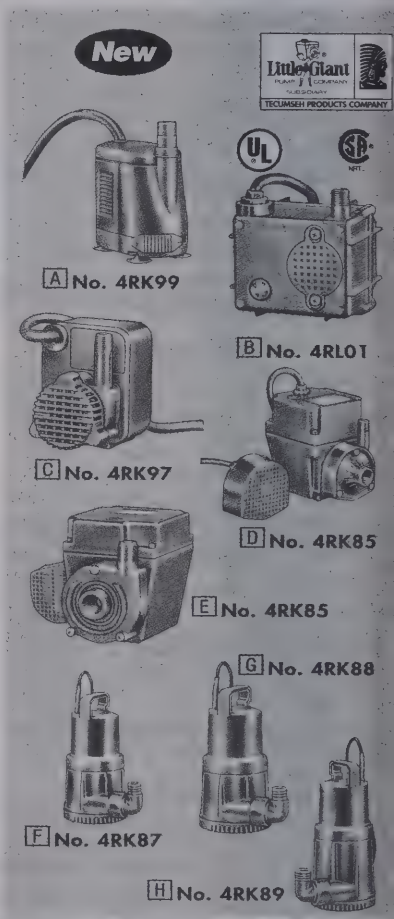
### D No. 4RK85 1/40 HP RECIRCULATING PUMP

This dual purpose pump can be used as submersible or in-line. Sturdy cast aluminum housing protects motor. 3/8" FNPT intake and 1/4" MNPT discharge. Includes 15' power cord and is thermally protected. UL Listed. Ideal for the circulation and aeration of bait tanks, statuary and waterfall applications, recirculation of mild soaps, and liquid transfer.

### E No. 4RK86 1/15 HP RECIRCULATING PUMP

Dual purpose, submersible or in line pump has 1/15 HP motor. Cast aluminum housing protects motor. 1/2" FNPT intake and 1/2" MNPT discharge. 15' power cord. Thermally protected. UL Listed. Ideal for the circulation and aeration of bait tanks, statuary and waterfall applications, recirculation of mild soaps, and liquid transfer.

### F No. 4RK87 1/8 HP RECIRCULATING PUMPS



Completely oil-free construction and corrosion resistant-body. Energy efficient unit is environmentally safe and fully submersible. 1¼" FNPT discharge equipped with 1" barbed elbow. Includes 16' power cord. CSA and NRTL/C Listed. Ideal for use in waterfall and stream applications.

### G No. 4RK88 1/4 HP RECIRCULATING PUMP

Completely oil-free construction and corrosion resistant-body. Energy efficient, 1/4 HP unit is environmentally safe and fully submersible. 1¼" FNPT discharge equipped with 1" barbed elbow. Includes 16' power cord. CSA and NRTL/C listed. Ideal for use in waterfall and stream applications.

### H No. 4RK89 5/8 HP RECIRCULATING PUMP

Completely oil-free construction and corrosion resistant-body. Energy efficient, 5/8 HP unit is environmentally safe and fully submersible. 1¼" FNPT discharge equipped with 1" barbed elbow. 16' power cord. CSA and NRTL/C listed. Ideal for use in waterfall and stream applications.

## WATER GARDEN STARTER KIT

Completely equipped with everything you need to build your own water garden. This thermally protected pump kit includes 300 GPH 1/40 HP epoxy encapsulated pump, 15' power cord, 8' x 10', 45 mil EDPM liner, 2-way diverter valve, mechanical pond filter, 3-tier fountain nozzle and 15' of 1/2" ID black tubing. UL and CSA Listed.

*If we don't have a pump for it, chances are it can't be pumped.*

# WATER GARDEN PUMP, FILTER AND ACCESSORIES

## POND FILTRATION SYSTEM

System includes 1120 GPH 1/6 HP submersible pump, 15' power cord, garden hose adapter, and sacrifical anode. Filter basin has 1" NFPT discharge. UL/CSA listed. For filtration of ponds 2,200 gallons or less.

| GPH at Total Head Ft. 1 | 5 | 10 | Shut-off (Ft.) | Little Giant Model | Stock No. | List | Each | Shpg. Wt. |

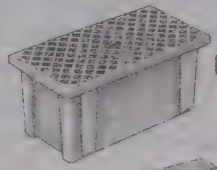
## PUMP FILTERS

### A No. 4RL23 MECHANICAL WATER GARDENING FILTER

This high volume mechanical filter is submersible, has a corrosion-resistant body and is very easy to install. Compact design allows this unit to be installed in areas of restricted space. Prevents debris from clogging pump and fountain nozzle. Recommended for Nos. 4RK87, 4RK88, and 4RK89. Little Giant brand (FB-40).

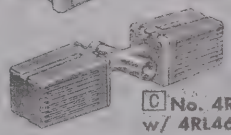


***New*No. 4RL23.** Mechanical Filter. Shpg. wt. 5.5 lbs. List $84.23. Each ..... **$73.25**

### B SUBMERSIBLE MECHANICAL FILTER BOX

Provides filtration of pumps and waterfalls. Includes a fine and coarse filter pad and easy to remove snap action screen. Features power cord strain relief. Filter can be used with PE-A, PE-2, PE-2.5, PE-300, PES-500. Little Giant brand (FB).

***New*No. 4RL21.** Shpg. wt. 1.3 lbs. List $34.44. Each ..... **$29.95**



### C PUMP INLET FILTER AND KIT

Filter No.4RL46 has an ABS plastic case and urethane filter material. Fits existing Grainger pumps: 2P495, 3P374 and 1P374. Little Giant brand. No. 4RL22 filter kit is designed to press onto the outside diameter of the pump intake. Additional filters can be added as needed. Kit No.4RL22 includes adapter cap and 4RL46 pump filters. Nos. 4RL46 and 4RL22 offer filtration of dirt and debris from the pump inlet.

***New*No. 4RL46.** Inlet Filter. Shpg. wt. 0.3 lbs. List $14.42. Each ..... **$12.54**

***New*No. 4RL22.** Inlet Filter Kit. Shpg. wt. 1.0 lbs. List $28.34. Each ..... **$24.65**

## SUBMERSIBLE LIGHT KIT

20 watt submersible lighting for waterfalls or statuary fountains. Kit is UL/CSA listed. Weatherproof transformer with automatic on/off timer is UL listed. Includes 4 snap-in colored lenses, 1 each: red, yellow, blue & green and brackets with 4 mounting options. Little Giant brand (LVLT).

**Replacement light.** Includes 20W submersible light, 20' power cord, quartz halogen lamp, 4 colored lenses(red, yellow, blue, & green), 20 ft. power cord. Little Giant brand (LVL).

***New*No. 4RL17. Light Kit.** Shpg. wt. 8.0 lbs. List $134.20. Each ..... **$116.70**

***New*No. 4RL18.** Replacement Light. Shpg. wt. 2.2 lbs. List $63.99. Each ..... **$55.65**

## POND LINERS

Tough, puncture-resistant liners require no underlayment. Ideal for aquatic life. Embossed surface doubles area for bacteria colonizing. Minimum depth is 18". 20 mil thick. 20 year warranty. Little Giant brand.

| Liner Size (Ft.) | Fits Finished Pond (Ft.) | Capacity (Gals.) | Little Giant Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **8 x 10** | 4 x 6 | 270 | PLS-810 | ***New*4RL28** | $87.05 | **$75.70** | 13.0 |

## FLEXIBLE BLACK TUBING

Black Flexible Tubing. For use with finished ponds, waterfalls and fountains. Invisible in water. Ideal for applications where convenient pre-cut tubing lengths are required. 3/8" ID tubing. 20 ft. long. Little Giant brand (T-3/8-20-BK)

***New*No. 4RL43.** Shpg. wt. 1.0 lbs. List $10.25. Each ..... **$8.92**

Flexible Black Corrugated Tubing. Includes 24 ft. of tubing, two stainless steel clamps, and two 1¼" MNPT x 1¼ barbed adapters. Little Giant brand (WGWF-114).

***New*No. 4RL45.** Shpg. wt. 5.0 lbs. List $22.57. Each ..... **$19.63**

## TUBING CLAMP

Metal clamp restricts flow through tubing. Easy threaded adjustment. Will not slip from postition. Fits tubing 3/8" ID x 1/2" OD & 1/2" ID x 5/8" OD. Little Giant brand (C-2)

**New No. 4RL49.** Shpg. wt. 0.1 lbs. List $5.31. Each ..... $4.62

## CORROSION BAR

4" magnesium bar easily adapts to all aluminum body pumps to protect from galvanic corrosion. Little Giant brand (SA-1).

**New No. 4RL48.** Shpg. wt. 0.2 lbs. List $14.38. Each ..... $12.51

## FOUNTAIN NOZZLES

A Telescoping 3-tier Fountain Nozzle. 8" high retracted, extends to 12½" high. Fountain head fits pumps No. 2P495, 3P374, 1P323, 1P372, 2P017, 4RK86, 4RK85, 4RL01, and 4RK97. Little Giant brand (FHT-1090).

**New No. 4RL14.** Shpg. wt. 0.3 lbs. List $21.52. Each ..... $18.72

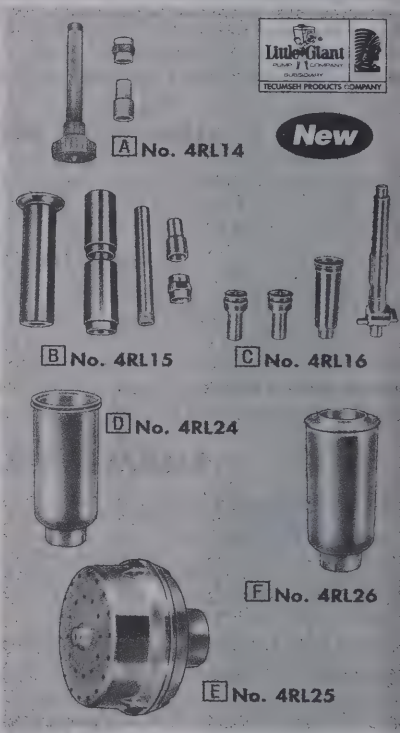
B Mushroom Spray Fountain Head. Fits pumps with 120 to 500 GPH flow capacity. 1/2" NPT stem. Fits pump Nos. 2P495, 3P374, 1P323, 1P372, 2P017, 4RK86, 4RK85, 4RL01, and 4RK97. Little Giant brand (FH-1280).

**New No. 4RL15.** Shpg. wt. 0.6 lbs. List $32.14. Each ..... $27.95

C 3 Fountain Nozzle Kit. Includes nozzles for daisy, waterbell, and tulip spray patterns. Telescoping stem has built-in flow control valve. Extends from 6" to 12"H. Also has an extra outlet for use with 3/8" ID waterfall tubing. Fits pump Nos. 2P495 , 3P374, 4RL01, and 4RK97. Little Giant brand (FHK-1).

**New No. 4RL16.** Shpg. wt. 0.2 lbs. List $14.32. Each ..... $12.46

D Water Tulip Spray Pattern Fountain Nozzle. Quick couple connection. Requires No. 4RL27 nozzle stem and diverter valve for hookup to pumps. Fits pump Nos. 4RK87, 4RK88, and 4RK89. Little Giant brand (FH-20).



**New No. 4RL24.** Shpg. wt. 0.3 lbs. List $35.36. Each ..... $30.75

E Three-tier Fountain Nozzle. Quick couple connection. Requires No. 4RL27 nozzle stem and diverter valve to fit to pumps. Use with pump Nos. 4RK87, 4RK88, and 4RK89. Little Giant brand (FH-21).

**New No. 4RL25.** Shpg. wt. 0.4 lbs. List $35.36. Each ..... $30.75

F Foaming Fountain Nozzle. Quick couple connection. Requires No. 4RL27 nozzle stem and diverter valve (sold separately) to fit to pumps. Fits pump nos. 4RK87, 4RK88, and 4RK89. Little Giant brand (FH-23).

**New No. 4RL26.** Shpg. wt. 0.3 lbs. List $35.36. Each ..... $30.75

## FLOW CONTROL AND DIVERTER VALVES

G Flow Control and Diverter Valve. Valve inlet: 1/2" MNPT with 1/2" FNPT adapter. Valve outlet: 1/2" FNPT. Diverter connection: 1/2" MNPT, 1/2" NPT pipe. Little Giant brand (FHV-2549).

**New No. 4RL29.** Shpg. wt. 0.2 lbs. List $20.97. Each ..... $18.24

H Flow Control Valve. Fits pumps with 1/4" MNPT discharge. Accepts 3/8" or 1/2" ID tubing. Little Giant brand (FC-1/4).

**New No. 4RL47.** Shpg. wt. 0.2 lbs. List $5.80. Each ..... $5.05

I Telescoping Nozzle Stem and Diverter Valve. Telescoping stem extends 7½" to 11"H. Built-in adjustable diverter valve. Use with 1" ID vinyl tubing. Adapts to 1¼" FNPT outlets. Fits pump Nos. 4RK87, 4RK88, and 4RK89. Little Giant brand (FHTV-35).

**New No. 4RL27.** Shpg. wt. 0.6 lbs. List $39.27. Each ..... $34.15

*If we don't have a pump for it, chances are it can't be pumped.*

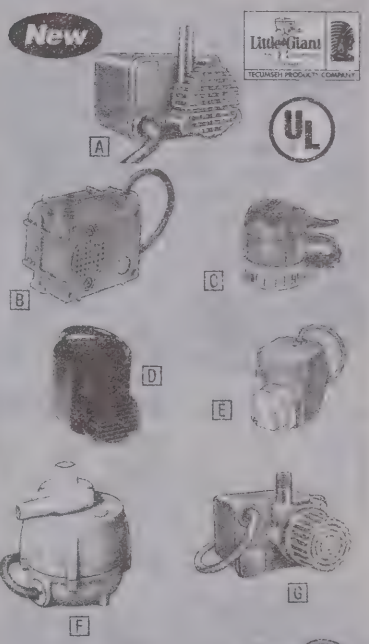
# COMPACT SUBMERSIBLE CENTRIFUGAL PUMPS

## LITTLE GIANT COMPACT SUBMERSIBLE CENTRIFUGAL PUMPS

**Description:** Low-pressure, high-volume centrifugal pumps for evaporative coolers, fountains, water gardens, and coolant systems. Not recommended for salt water. Pumps handle liquids from 30 to 120°F. Nos. 1P372, 1P323, and 3P733 can be run submerged or in open air. For use with nonflammable liquids compatible with pump component materials. UL Listed (E81811N) except No. 1P553.

**Construction:** Epoxy-coated die-cast aluminum motor housings (except No. 2P495, which has nylon housing and No. 3P734 which has epoxy encapsulated motor and polyester case). Removable volutes for cleaning. Pumps have 6-ft., 3-conductor, oil-resistant cords (except No. 1P553, which comes with 3-ft. cord). Nos. 3P734, 4RK92, 4RK93, and 4RK94 have removable inlet screens. No. 4RK94 has an adapter for use with 1/2" NPT fountain nozzle.

All pumps are die-cast aluminum (except No. 2P495, which is nylon, and Nos. 3P734, 4RK92, 4RK93, and 4RK94 which are polyester). Nylon volute and impeller (except Nos. 2P495, 1P322, and 1P323, which have a glass-filled nylon head, and impeller). No. 2P495 has glass-filled nylon screen; Nos. 1P322 and 1P323 have polypropylene screen. No. 1P553 has polypropylene head and impeller and polyethylene screen. Nos. 1P939 and 3P734 have polypropylene impeller and screen. Nos. 2P495, 1P553, 1P939, and 3P734 have single-lip Nitrile seals. Nos. 1P321, 3P372, and 1P372 have double-lip Nitrile seals. Nos. 1P322 and 1P323 have double-lip Viton seals.



**Driver:** 1/250 to 1/12 HP, 115V, 60 Hz, oil-filled motor with stainless steel shaft.

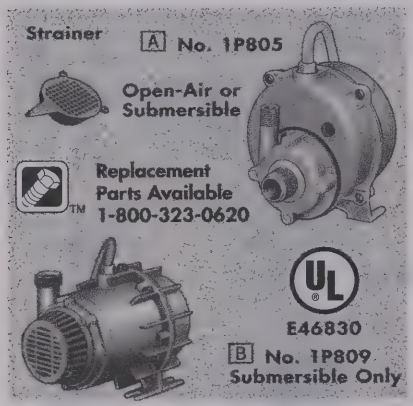
**A 300 GPH Mild Acid Pump.** Noncorrosive, nontoxic centrifugal pump designed for circulating or dispensing fruit juices, beverages or other mildly acidic liquids with a pH range of 6 to 7; cleaning solution, photo processing solutions, machine coolants, etc., at 30 to 120°F. **Nonsubmersible;** For in-line use only. Liquid may be piped through pump head. Pump head and impeller of acid-resistant nylon. Stainless steel backplate and 2 double-lip Viton seals on stainless steel motor shaft, die-cast aluminum motor housing. 1/40 HP, 115V, 60 Hz motor operates in oil, is hermetically sealed in die-cast aluminum housing. Epoxy coated with double prime base coats. 6 ft., 3-conductor SJTOW-A cord set. 3/8" FPT inlet, plus adapter to accept 1/2" ID vinyl tubing. 1/4" MPT outlet. Overall dimensions, 4⅝H x 3½W x 5½"L (less adapter). For use with nonflammable liquids compatible with pump component materials.



**B No-Korode Submersible Chemical Pumps.** Operate horizontally or vertically fully submerged in mild acids and alkalis, machine tool coolants up to 100 SSU and other nonflammable liquids compatible with pump component materials. Pumps are highly resistant to corrosion; motor housing is glass-filled nylon; impeller, pumping head and removable screen are nylon. Viton shaft seal. 1/4" male NPT discharge. 115V, 60 Hz thermal overload protected motor. Pumps come with 6 ft., 3-conductor cord set. 4 9⁄16H x 5 1⁄16W x 5½"L. Handles pH range from 5 to 9.

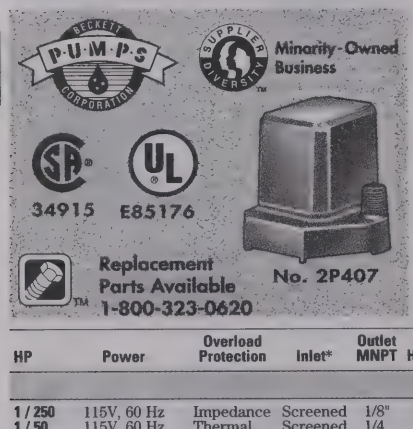
# SUBMERSIBLE CENTRIFUGAL PUMPS

## TEEL COMPACT SUBMERSIBLE CENTRIFUGAL PUMPS

- **Heavy-duty zinc alloy housing with epoxy-coated finish**
- **All pumps include strainer/filter**

Hermetically sealed, high output, centrifugal pumps suitable for use in countless home and industrial uses including fountains, vaporizers, condensate removal, and machine coolant recirculation; for use with nonflammable liquids compatible with pump component materials. Thermal protected shaded pole motors, hermetically sealed in oil for permanent lubrication. Encased in die cast zinc alloy (Zamac No. 3) housing, double coated with epoxy finish to assure maximum protection against corrosion. Pumps operate on 115V, 60 Hz, 6 ft. UL Listed, water and oil resistant, 3-conductor SJTO cord set.



A Type 440 stainless steel shaft and Nitrile lip seal for trouble-free service. Pump volute and impeller of hi-impact Celcon compound for added strength. Polypropylene strainer can be used to mount pump vertically. Max. temp 160°F. Will operate in any position, submerged or in open air as long as inlet is located below liquid level. Delivery may be resisted at discharge without damage to motor. Meets Los Angeles Dept. of Bldg. and Safety Codes. All units are UL-Listed.

B High capacity submersible pump has same features as above units but with Type 416 stainless steel shaft. Maximum temperature 120°F. Thermal protected 1/10 HP, 115V, 60 Hz style motor and ball type thrust bearing. Also, has detachable strainer and 3/4" garden hose threaded outlet. Impeller of die-cast Zamac No. 3. **For submersible use only.**

## EPOXY-ENCAPSULATED SUBMERSIBLE CENTRIFUGAL PUMPS

**Description:** Compact black submersible pumps are designed for many applications such as water fountains, displays, fresh water aquariums, and fluid transfer. For submerged operation only (except Nos. 2P396, 2P397, and 2P398, which are suitable for submerged and/or open air). Liquid temperature range: 40 to 120°F. Maximum viscosity: 100 SSU. 115V models are UL Listed for water applications only. For use with nonflammable liquids compatible with pump component materials.

**Construction:** Corrosion-resistant epoxy-encapsulated motor with removable plastic pump parts, designed for convenient cleaning. 115V models come with 6-ft., 18/3 SJTOW-A UL Listed cord and plug. No. 2P403 has 20 ft. cord. 230V units do not have plug. Nos. 2P398 through 2P402 have 3/8" MNPT fitting at cord outlet, for pipe or conduit (not included) connection to protect cord.

Stainless steel shaft and screws; acetal plastic pump parts. Viton or Rulon lip seal (depending on model). Rulon seals are single-lip design with nickel-plated brass retainer. Viton seals are double-lip design.

**Driver:** Shaded-pole design fractional horsepower motors with impedance or thermal protection and moisture-proof windings. Nos. 2P406-2P408 are for intermittent-duty, others for continuous duty.

# 1" ENGINE-DRIVEN UTILITY PUMP

TEEL®

Replacement Parts Available 1-800-323-0620

Repair Service Available Contact Your Local Branch

- Tecumseh 2-cycle engine fueled by 24:1 gasoline/oil mixture
- Chrome-plated piston and electronic ignition for longer engine life
- Spark arrester screened muffler
- Pump has sand cast aluminum body, volute and impeller
- Carbon/ceramic, Buna N/stainless steel shaft seal
- Includes two 1 x 3/4" hex brass garden hose adapters, 8 oz. 2-cycle oil
- Self-primes to 15 feet

**Applications:** Dewatering excavations, sump pits, ditches, pools, and boats. Can also be used for lawn sprinkling, washing cars and buildings. For use wherever electrical power is not readily available. For use with nonflammable liquids compatible with pump materials. Teel Brand.

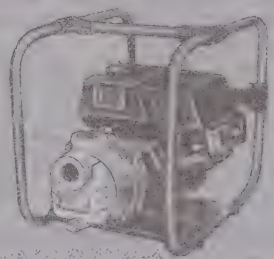
# 1½" PORTABLE 2-STAGE SPRAYER/HIGH PRESSURE PUMP

- 2-Stage centrifugal
- Pump is cast iron construction
- 4 Cycle Kohler Command 6 HP OHV engine (4000 RPM)
- High efficiency enclosed stainless steel impellers
- Removable/replaceable diffusers
- Self-primes to 20 ft.
- O-ring casing seal
- 40 to 160°F liquid handling range
- Two cast-iron hex nipples included
- Tubular steel roll frame
- Type 21 mechanical seal is carbon/ceramic, Buna N and stainless steel



For spraying, pressure boosting and high head dewatering applications. For use with nonflammable liquids which are compatible with pump component materials. Use of a check valve will reduce time required for self-priming.

6 HP Kohler Command Engine: Overhead valve design with electronic ignition and automatic decompression. Aluminum block with cast iron sleeve. Recoil start. Quiet muffler and low oil sensor. Teel brand.

# CAST IRON AND ALUMINUM ENGINE-DRIVEN PUMPS

## 3.5 HP CAST IRON ENGINE-DRIVEN PUMPS

- Engine-driven pumps can be used where electrical power is not available
- Powerful 4-cycle engine
- Self primes to 20 Ft.
- Rugged cat iron body and impeller
- 40 to 160°F liquid handling capability
- Close-coupled or frame-mounted

For liquid transfer applications, including clear and sediment-laden liquids. Use with non-flammable liquids which are compatable with pump component materials. No. 4RJ32 has pump and engine close-coupled on all steel base. No. 4RJ33 has pump and engine frame-mounted on all-steel base. Semi-open impeller.

## 5 HP ALUMINUM HIGH PRESSURE/LAWN SPRINKLER PUMP

- Self-priming to 20 Ft.
- Inlet Port 1½" NPT
- Multiport discharge (1, 1½, and 2" NPT)
- Die-cast aluminum body and impeller
- Built-in check valve
- 40 to 160°F liquid handling
- High pressure applications

For water transfer, high pressure and lawn sprinkling applications. Pump is lightweight for portability, with sturdy carrying handle. Use for continuous, trouble-free clean and dirty water operation. Closed impeller. Use with nonflammable liquids which are compatible with pump component materials.

# 1 1/2 INCH SELF-PRIMING ENGINE-DRIVEN PUMPS

## 3.5 HP CAST IRON GENERAL PURPOSE PUMP

- Integral dual volute casing
- Self-primes to 20 ft.
- O-ring casing seal
- 40 to 160°F liquid handling range
- Two cast iron hex nipples included
- Tubular steel roll frame

For liquid transfer applications including clear, semi-solid and sediment laden liquids.

For use with nonflammable liquids which are compatible with pump component materials. Fits Wheel Kits Nos. 2P514 and 2P515.

### SPECIFICATIONS DATA

| Model | HP | GPH of Water at Total Feet of Head 10 Ft. | 20 Ft. | 30 Ft. | 50 Ft. | 60 Ft. | 70 Ft. | Max. Head* |

## 3.5 HP SOLIDS HANDLING PUMPS

- Cast iron and aluminum construction
- Removable volute/easy cleanout
- Self-primes to 20 ft.
- O-ring casing seal
- 40 to 160°F liquid handling range
- Two cast iron hex nipples included
- Tubular steel roll frame

For liquid transfer applications requiring 3/8" solids handling capability.

For use with nonflammable liquids which are compatible with pump component materials. Fits Wheel Kits Nos. 2P514 and 2P515 (see page 3152).

### SPECIFICATIONS DATA

* Shut-off; to convert to PSI, divide by 2.31.

## 3.5 AND 5 HP ALUMINUM HIGH PRESSURE/ LAWN SPRINKLER PUMPS

- 3.5 HP and 5 HP engines
- Cast aluminum construction
- Removable cast iron volute
- Self-primes to 20 ft.
- O-ring casing seal
- 40 to 160°F liquid handling range
- Two cast iron hex nipples included
- Tubular steel roll frame

For high head dewatering, lawn sprinkling and muddy water removal.

For use with nonflammable liquids which are compatible with pump component materials. Fits Wheel Kits Nos. 2P514 and 2P515 (see page 3152).

(†) Use 3450 RPM motor, direct drive or belt drive. (#) Use 3600 RPM motor, belt drive only. (**) Minimum motor HP required at indicated speed to drive pump head. (*) Shut-off; to convert to PSI, divide by 2.31.

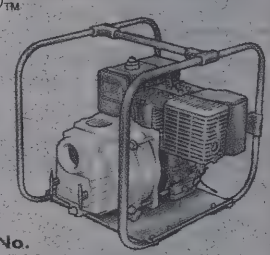
## WHEEL MOUNTING KITS

Many Teel engine driven pumps have been redesigned with rectangular frames for easier transportation and greater protection than non-rectangular frames.



**Wheel kits fit these pumps with rectangular frames only:** 1P855, 1P868A, 1P869, 1P869A, 1P950, 1P950A, 1P986, 2P007, 2P008, 2P333, 3P525C, 3P526B, 3P582E, 3P600B, 3P601B, 3P655, 3P656, 3P712, 3P956, 3P957, 3P958. They cannot be used on pumps without tubular frames.

No. 2P514 has 10" semi-pneumatic for lighter weight pumps; No. 2P515 has 16" pneumatic wheels for the heavier trash pumps.

| Wheels (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| **10** | **2P514** | $129.62 | **$94.70** | 22.0 |
| **16** | **2P515** | 175.95 | **128.50** | 26.0 |

No. 3P682
Electric Motor

No. 3P681
Air Motor

- **Pumps mud and thick liquids**
- **Rugged nylon-reinforced diaphragm**
- **Rigid cast plunger**
- **Triple reduction high strength steel spur gears**
- **Extra heavy-duty precision bearings**
- **Cast aluminum guard covers moving parts**
- **40 to 160°F liquid handling range**

**escription:** For pumping thick mud, slurries, sewage and liquids with solids up to /8" diameter. Can be used to pump out onds, excavations, septic tanks, and ccumulated seepage in trenches. Choose n engine, electric, or air motor driven odel. For use with nonflammable liquids ompatible with pump component materials.

**onstruction:** Aluminum suction and discharge castings with extra heavy-duty flapper type check valves are connected to the sand-cast aluminum pump well. Nodular iron crank casting. Includes suction line strainer and 3" NPT suction and discharge hex nipples. 22" tubular handle and two 10" semi-pneumatic wheels.

Nylon reinforced neoprene diaphragm and polyurethane flappers. Aluminum suction and discharge castings, aluminum pump well.

**Driver: No. 3P613.** 3.5 HP Briggs & Stratton I/P engine with cast-iron cylinder sleeves, magnetron electronic ignition (points not required). Stellite exhaust valves, dual air cleaner, spark arresting Lo-Tone muffler, 3-qt. fuel tank and recoil starter.

**Driver: No. 3P682.** 1½ HP Dayton 1725 RPM, 115/230V, 60 Hz single phase NEMA 56C, keyed shaft, TEFC, capacitor-start, capacitor-run, ball bearing motor with manual reset overload protection. 20 ft. cord and weatherproof On/Off switch mounted on conduit box.

**Driver: No. 3P681.** 1¾ HP Air Motor, 56C frame flange mount. Provides 6.5 to 57 in.-lbs. torque and 300 to 3000 RPM speed through the use of an air regulator valve placed between air source and motor (not included) No. 1Z696 air regulator is recommended. Self-sealing and self-adjusting vanes.

# 4 INCH SELF-PRIMING ENGINE-DRIVEN PUMPS

## 11 HP CAST ALUMINUM SOLIDS HANDLING PUMP

- Integral dual volute design
- Removable cast iron volute
- Self-primes to 20 ft.
- O-ring casing seal
- 40 to 160°F liquid handling range
- Two cast iron hex nipples and suction strainer included
- Discharge manifold
- Wheeled transport dolly

For liquid transfer applications requiring 2" solids handling capability. For use with non-flammable liquids which are compatible with pump component materials. Transport dolly equipped with 16" pneumatic ball bearing wheels and swing down brake feet. Driver: 11 HP Briggs & Stratton I/P engine with recoil starter; aluminum block with cast iron cylinder sleeve. Low oil shutdown. 1.5 gallon fuel tank.

Engine features exhaust valves and exhaust rotators for long wear. Furnished with Magnetron electronic ignition; dual element air cleaner, and spark-arresting Lo-Tone muffler.

## 13 AND 16 HP CAST ALUMINUM TRASH PUMPS

- Briggs & Stratton and Kohler Command overhead valve engines
- Silicon carbide seal
- Integral dual volute design
- Removable cast iron volute and wear plate
- Suction cleanout cover with quick release handles
- Self-primes to 20 ft.
- O-ring casing seal
- 40 to 160°F liquid handling range
- Two cast iron hex nipples and suction strainer included
- Discharge manifold
- Wheeled transport dolly

For pumping water containing stones, sticks, mud, and other solids up to 2" in diameter (up to 25% by volume). For use with non-flammable liquids which are compatible with pump component materials. Transport dolly equipped with 16" pneumatic ball bearing wheels and swing down brake feet.

No. 3P955

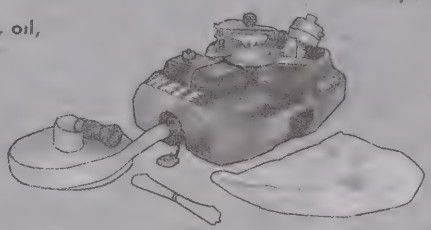
# PORTABLE FIRE PUMPS AND LIQUID STORAGE TANKS

## 1½" PORTABLE FIRE PUMP

**Description:** Portable, floating fire pump is particularly useful in pool and marine applications. Pumps up to 140 GPM at 25 PSI. Weighs just 49 pounds, and can be handled by one person. Carrying weight with full tank and accessories: 79 lbs. Exclusive auto-prime system immediately removes entrapped air to ensure instant and complete prime once engine is started and pump is launched. For use with non-flammable liquids compatible with pump component materials. 28H x 20W x 16"L. U.S.D.A. Forest Service Approved. Hale brand (20FV-C8).



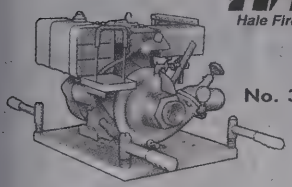
**Construction:** Pump has lightweight, corrosion-resistant aluminum alloy body bolted directly to the engine. Compact polyethylene float includes dual carrying handles and splash-suppression collar for engine protection in water. 2" nonthreaded suction has easily removable oversized screen. 1½" (M)NST discharge port accepts 1½" NHT fire hose.

Aluminum alloy volute, bronze impeller, and bronze clearance rings. Mechanical seal with Buna N, stainless steel, and carbon/ceramic parts.

- **Lightweight (pump weighs only 49 lbs.)**
- **Floats on pond, pool or stream**
- **Auto prime system**
- **Includes hose, nozzle, tool kit, oil, tether rope, and carrying bag**
- **8 HP 2-cycle engine**

FREE DELIVERY on orders of $900 or more
See Freight Policy

HALE
Hale Fire Pumps



**Driver:** Force Marine 2-cycle, pull-start, air-cooled, single cylinder engine with solid-state ignition; rated 8 HP at 7000 RPM. 6-quart fuel tank provides up to 1½ hours of continuous operation. Automatic engine speed control and electrically operated overspeed control.

**Stowaway accessory package** (included) contains an adjustable nozzle, 100 ft. of 1½" hose, 20 ft. of 1/4" tether rope, tune-up kit, and 2-cycle oil, in a canvas carry bag.

**No. 2P395.** Shpg. wt. 70.0 lbs. List.....$2222.00.
Each.....$1852.00

## 2½" PORTABLE FIRE PUMP

HALE
Hale Fire Pumps

No. 3P636

- **Manual and 12V electric start**
- **Semi-automatic priming**
- **Rugged steel base**

FREE DELIVERY on orders of $900 or more
See Freight Policy

**Description:** Centrifugal fire pump supplements fire-fighting equipment in forest service, fire departments, industrial parks, and lumber yards. Fast, reliable semi-automatic exhaust primer. Lockable check valve prevents loss of prime Compound gauge measures 30" Hg vacuum to 300 PSI. 2½" NST suction and discharge ports. Suction port converts to 3" NPT by unscrewing reducing adapter. 3" NPT pipe nipple included. Carrying weight with battery and full gas tank: 146 lbs., 21½W x 18⅜H x 22"L. Red enamel finish. Hale brand (25FB-B25).

**Construction:** Lightweight aluminum alloy body, mounted on a steel base with 3-position lock-type carrying handles. 6-quart gas tank allows up to 1½ hours of continuous operation. 5⁹⁄₁₆ x 4⅝ x 7" high battery holder takes 14 amp-hour, UASA Type B64-12 battery (not included).

Aluminum alloy body and head, bronze impeller and clearance rings. Mechanical seal with Buna N, carbon/ceramic, and stainless steel parts.

**Driver:** 11 HP Briggs & Stratton I/C gasoline engine. Comes with both manual recoil starter and 12V electric starter with starter button..

**No. 3P636.** Shpg. wt. 130.0 lbs. List $3665.00.
Each.....$3053.00

| GPM* | PSI | Equivalent Ft. of Head |
|---|---|---|
| 25 | 115 | 266 |
| 100 | 90 | 208 |
| 200 | 45 | 104 |
| 240 | 30 | 69 |

(*) Flow rate of water at 10 ft. suction lift. Maximum suction lift is 22 ft. at which point flow rate is reduced by 5%.

## LIQUID STORAGE TANKS

**I/C coated nylon water tanks** provide a safe, conomical way to transport liquids to ywhere water sources are scarce. Used r hauling water and other liquids. Also ed for storing drinking water. Ideal for atering livestock and storage of gray ater.

**eets FDA 21CFR121.2514** of subpart F of e Food Additive Regulation, making em safe for drinking water for human nsumption.

**sists chemical contamination, mildew, rot, and solar heat exposure.**

**Fills and empties in minutes** with a centrifugal force pump, or drains by gravity. Comes complete with 10" fill sleeve and a 1½" gate valve on an 8" extension pipe.

**Fits pickups, many standard wagon boxes, and is self-supporting.**

**Available in storage capacities of 275, 525, and 1340 gallons.** All units collapse and fold for storage into an 18 cubic inch carton. Burch brand.

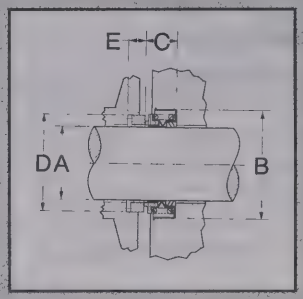
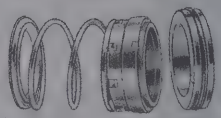
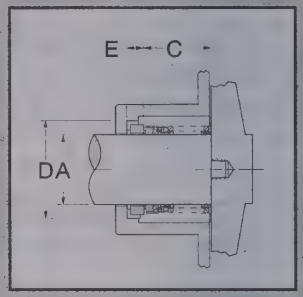
# JOHN CRANE PUMP SHAFT SEALS

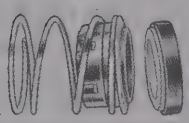


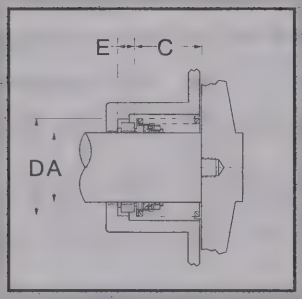
**Type 6**



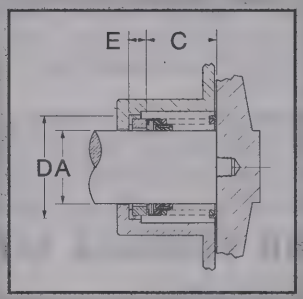


**Type 6A**

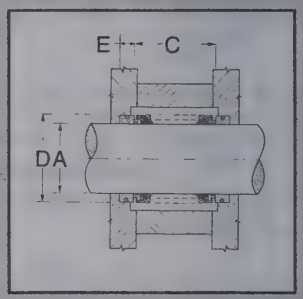




**Type 1 O-Ring Design**



**Type 2**



**Type 21**

**Type 21 Dbl**

**Type 6**—Elastomer bellows seal designed for use in small centrifugal water pumps, deep and shallow well jet pumps, and other positive displacement pumps. Full convolution elastomer bellows provide maximum flexibility in compensating for shaft movement and wear. Pressures: Up to 75 PSIG. Speeds: Up to 1000 FPM or 3600 RPM.

**Type 6A**—Elastomer bellow seal for use in low pressure, small diameter rotary shaft applications. One piece construction allows for fast, easy production line installation by press fitting seal in equipment housing bore.

**Type 1**—Designed for use in pumps, mixers, blenders and other rotary shaft equipment. Can handle pressures to 425 PSIG. Can be field repaired to minimize costs, downtime, and lost revenue.

**Type 2**—Designed for confined space requirements and limited gland depth in pumps, mixers, and other rotary shaft equipment. Can handle pressures up to 425 PSIG.

**Type 21**—General purpose seal made of stainless steel. Can handle pressures up to 150 PSIG.

**Type 21, Double Seal**—Recommended where corrosives, sewerage type or abrasive liquids are being pumped. Liquid is circulated at 5 to 20 PSI pressure above the pressure against the inboard seal to create a sealing barrier.

**TEMPERATURE RATINGS:** Buna Seals: -40 to 225°F
Viton Seals: -20 to 350°F

1=STAINLESS STEEL

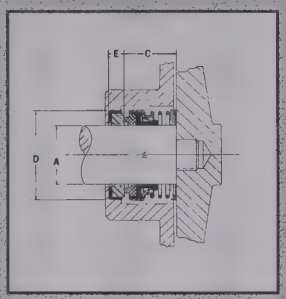
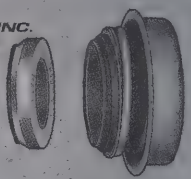
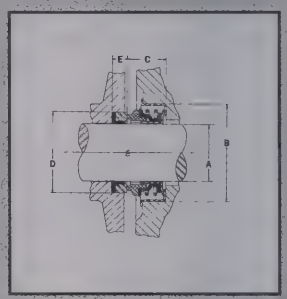
# REPLACEMENT PUMP SHAFT SEALS

PAC-SEAL INC. INTERNATIONAL





Type 16



Type 21

Type 68

Pac-Seal mechanical shaft seals are designed for replacement and OEM use on self-priming and straight centrifugal pumps, fertilizer and chemical pumps, trash pumps, pressure booster pumps, home water systems and sump pumps.

Seal components are locked together by a crimped outer shell which provides a unitized construction for the diaphragm and drive gasket preventing reverse thrusts from dislodging the seal components. This mechanical lock eliminates the need for bonding adhesives and prevents leakage between the seal ring and the diaphragm. All springs and spring retainers are Type 302 stainless steel. Packed individually in protective plastic containers. Pac-Seal brand.

**Type 16**—For fluid sealing up to 100 PSI. Type 302 stainless steel spring coils provide equal load distribution for even seal ring wear. Interlocking hex shaped outer shell transmits torque over metal-to-metal contact to eliminate strain on the diaphragm.

**Type 21**—Designed for dependable sealing in mechanical pumps where liquids reach pressures up to 250 PSI. Hex shaped outer shell reduces stress on seal components.

**Type 68**—A press fit, face-type seal for working pressures up to 75 PSI. Spring and spring retainers are Type 302 stainless steel. All seal components are mechanically locked together. Designed to accommodate shaft sleeves.

## MATERIAL CODE FOR PAC-SEAL REPLACEMENT SEALS

**ELASTOMER (1st LETTER)**
B = Buna
V = Viton

**SEAL RING (2nd LETTER)**
C = Carbon
P = Molded Plastic
X = Silicon Carbide

**SHELL (3rd LETTER)**
D = Brass
R = Stainless Steel

**SEAT (4th LETTER)**
H = Ceramic
G = Bronze
S = Stainless Steel
X = Silicon Carbide

# LOC-LINE® MODULAR FLEXIBLE HOSE SYSTEMS

- Fully hand adjustable hose for coolants, air, or vacuum
- No springback. Creep due to machine vibration is eliminated
- Ball and socket design allows full use of inside diameter when bent
- Constructed of premium grade acetal copolymer for durability
- Design completely eliminates kinking
- Most coolants, petroleum products, and chemicals handled easily (check compatibility)
- Max. operating temperature: 170°F

**LINE PRESSURE AND FLOW RATES**

| System | PSI | Gal./ Hour |
|---|---|---|
| 1/4" | 30-50 | 250 |
| 1/2 | 20-30 | 478 |
| 3/4 | 10-20 | 1140 |

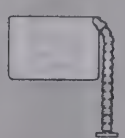
## CIRCLE FLOW SYSTEMS

**LOC-LINE®**



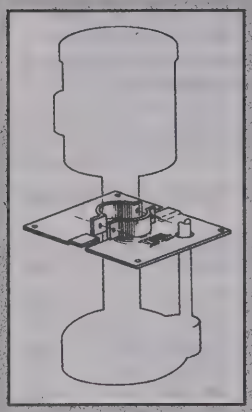
Circle flow system kits include 15 side flow nozzles and 1 end cap. Choose from 1/4" or 1/2" systems.

| System (In.) | Loc-Line Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **1/4** | 41479 | **3P834** | $17.54 | **$16.66** | 0.3 |
| **1/2** | 51837 | **3P835** | 19.74 | **18.75** | 0.4 |

## LOC-LINE® QUICK-SET SHIELD KITS

**LOC-LINE®**

**No. 6Y721**



Shields adjust quickly and easily in both position and length to provide additional protection from chips and splashing fluids. Includes 2 mounting options: a movable magnetic base or direct mount. Rotates full 360°. 1/8" thick, durable polycarbonate shield. Filled magnetic base prevents chip entrapment. Loc-Line brand.

# UNIVERSAL INDUSTRIAL COOLANT PUMPS

TEEL®

Repair Service Available
Contact Your Local Branch

- Universal mounting to fit most existing tanks
- All cast-iron construction with bronze impellers
- Pump liquids with viscosities up to 500 SSU
- Handle dirty, abrasive liquids, no bottom bearing to wear out
- Dual volute on larger units for hydraulic balance
- 4-Pole TEFC motors
- Maximum fluid temperature: 200°F

No. 3P949

Mounting Brackets

Replacement Parts Available
1-800-323-0620

**Description:** Units drop into existing tank using universal mounting brackets (liste below). Pumps can be used with dirty, er sive coolant fluids commonly used fo machining lubricants and cooling, flush ing, cleaning, and circulation. For no flammable liquids compatible with pum component materials.

**Construction:** Vertical all cast-iron constru tion. Self-cleaning impeller has back van to balance pressure and eliminate need fo mechanical seal. All models except No 3P949 and 3P950 (which have extende motor shafts) are provided with a prec sion aligning rigid coupling between sha and motor which is mounted on a cast co umn concentrically machined at both end Two-piece casing with dual volute to elir inate all radial thrust and need for botto bearing (single volute on Nos. 3P949 a 3P950).

Cast-iron casing and column; bron impeller; stainless steel shaft. Casing bo ed together with stainless bolts and parc ment gasket to minimize any problem liquid compatibility with pump materials

**Drivers:** All drivers are TEFC. Single pha model No. 3P949 is shaded pole type. A other single phase units are standard face keyed shaft 110/220 volt, 1750 RP Three phase units are 230/460, 1750 RP (except No. 3P950 is 208/230 volt).

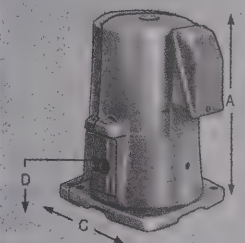
# OIL COOLANT PUMPS

**Fuji Oil Coolant Pumps** deliver superior reliability for the machine tool industry.

**Construction:** All have cast-iron bodies, carbon steel shafts, and cast bronze impellers (except Nos. 3P726 and 3P744 with plastic impellers). Self-priming models have ceramic stationary seal face, carbon graphite rotating seal face, Buna-N elastomers, and steel springs.

**Nos. 3P726, 3P727, 3P728, 3P741, 3P742, 3P743.** Self-priming models with mechanical seals are for the circulation of coolant and spraying of cutting oil in all types of machines, except grinders. Maximum recommended viscosity*: 800 at 50 Hz.; 300 at 60 Hz. Max. liquid temperature: 104°F.



**Nos. 3P744 through 3P749 and 4PC73 through 4PC76.** Self-venting immersion-style pumps with no mechanical seals. For circulation of coolant and spraying of cutting oil in all machines, including grinders and applications with higher temperatures. Used with nonflammable fluids that are compatible with pump construction materials. Maximum recommended viscosity*: 1200 at 50 Hz; 600 at 60 Hz. Maximum liquid temperature: 104°F.

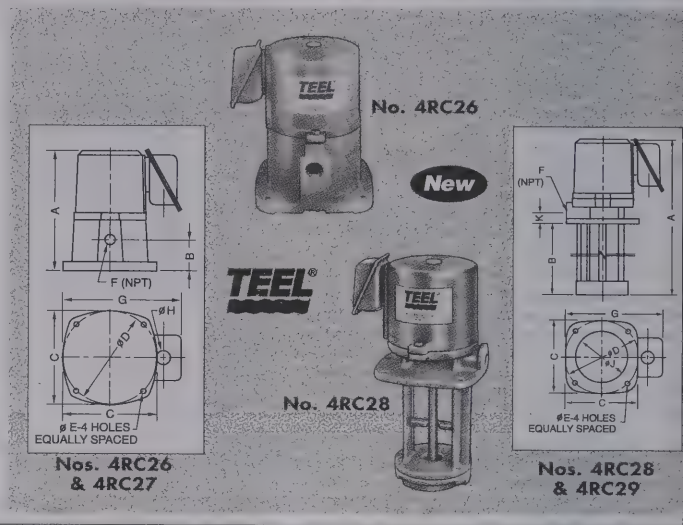
# OIL COOLANT AND COOLANT PUMPS



## STANDARD SUCTION AND IMMERSION OIL COOLANT PUMPS

**Construction:** All units have cast iron pump bodies and volutes, stainless steel impellers, and carbon steel shafts. Suction pumps include a carbon/ceramic shaft seal with Buna-N elastomers. Pumps are equipped with a 3450 RPM motor with sealed, permanently lubricated bearings.

**Nos. 4RC28 and 4RC29:** Immersion-type pumps require no bearings, seals, or packing, ideally suiting them for pumping liquids containing fine contaminants. For circulation of coolant and spraying if cutting oil in all machines, including grinders and applications with higher temperatures.

**Nos. 4RC26 and 4RC27:** Suction-type pumps may be mounted above the liquid level as well as other remote locations, featuring a 2 ft. maximum suction lift. For circulating coolant and spraying cutting oil in all types of machines, except grinders.

**Maximum recommended viscosity:** 500 SSU. Maximum liquid temperature: 180°F. For use with nonflammable liquids compatible with pump component materials.

## A 1/25 HP BRONZE COOLANT PUMPS

**Description:** For industrial and commercial applications where longer-life is needed. Deliver up to 500 GPH. 3/8" FNPT outlet. 3 foot 3-conductor cord. 6" dia. x 12½"H. For use with nonflammable liquids compatible with pump component materials.

**Construction:** All bronze/brass components consist of tubular shaft, direct-connected to cast bronze impeller. Bronze casing, casing cover, motor plate. Tubular brass column. No bottom bearing—allows handling of erosive liquids. All cast bronze/brass.

**Driver:** Dayton 1/25 HP TEFC, 115V or 230V, 60 Hz motor with oil reservoirs for long bearing life.

## B 1/25 HP AUTOMATIC COOLANT PUMP

**500 GPH Pump with Automatic Float Switch.** Easily adaptable as sump, bilge or condensate disposal pump. For use with nonflammable liquids compatible with pump component materials. Float controlled On/Off switch. Delivers 500 GPH at 1-ft. head; 210 GPH at 8-ft. head. Brass tube, bronze impeller and base. 3/8" FNPT outlet. Powered by 1/25 HP totally-enclosed, fan cooled 115V, 60 Hz Dayton motor.

Float, microswitch and bracket packed separately with instructions for easy assembly. Rust resistant metal parts. 10 amp microswitch. 8 ft. cord. 14" high. Teel brand.

**No. 7P008.** Shpg. wt. 10.0 lbs. List .....$203.00. Each .....**$142.90**

# COOLANT PUMPS

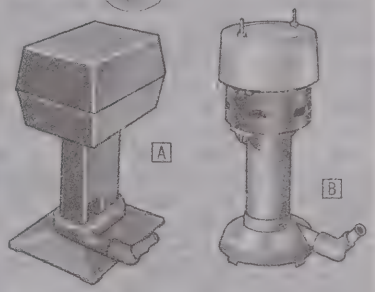
## COIL CLEANING KIT

or residential or commercial use in boiling out coils. Ideal for compressor urnouts. Applications include water eaters, steam converters, shell and tube eat exchangers, vessel heating, fin tube oils, pool heaters, unit heater cleaning, ar wash heaters, oil supply lines to fuel il heaters, A/C coils, sea water distillaion, and outboard motor flushing. )elivers 310 GPH @ 1 ft. head; 300 GPH @ 2 ft. head; 285 GPH @ 3 ft. head; 230 GPH @ 6 ft. head. 1/25HP, 115V, 60 Hz, 1.43A motor. Magnetic drive pump with mounting bracket, 18" of 1/2" dia. Tygon® tubing, 5 gal. polyethylene tank, cover, baffle, and 6 ft, 3-cond. power cord. Dimensions: 8H x 16½W x 11"L. Little Giant brand (GKPK-SC).

***New* No. 4RL09.** Coil Cleaning Kit.
Shpg. wt. 11.0 lbs. List $239.48. Each...**$208.25**

## COOLANT AND RECIRCULATING PUMPS

For recirculating applications as replacements in original equipment. Evaporative coolers, displays, laboratories, water transfer, and other applications. Use with nonflammable liquids compatible with pump component materials. One-piece steel motor shaft; heavy-duty, fan-cooled motor with moisture-proof windings and oversize sleeve bearings; snap-out base; snap-on hose adapters; and large oil reservoir for motor bearing.



**No. 2P531.** is for light-duty evaporative cooler applications up to 5000 CFM. 45° elbow. C-frame shaded-pole motor. 3-ft. power cord without plug.

**No. 2P532.** For applications up to 4500 CFM. 45° elbow. 3.3" diameter motor. 3-ft. power cord without plug.

**No. 2P533.** For applications up to 6500 CFM. 45° elbow. 3.3" diameter motor. 3-ft. power cord without plug.

**No. 2P534.** Same as No. 2P533, with 4-ft. power cord and 3-prong molded plug. 3.3" diameter motor. Thermally protected.

**No. 2P535.** For applications up to 11,000 CFM. 90° elbow. 3.3" diameter motor. 3-ft. power cord without plug.

## C AUTOMATIC COOLANT PUMP KIT

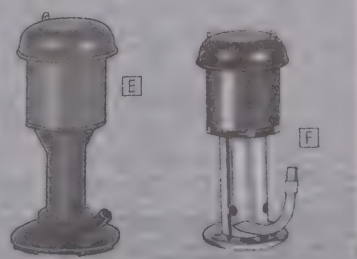
For fountains, condensate removal, air conditioners, dehumidifiers. High-impact polystyrene pump highly resistant to corrosive effects of salt water, alkali, etc. Use with nonflammable liquids compatible with pump component materials. Delivers 340 GPH at 1-ft. head; 40 GPH at 10-ft. head. Two vane impeller, 1/70 HP, 115V, 60 Hz, fan cooled motor with 10 amp. microswitch. 8 ft. 18/3 cord. Spring-mounted actuator discs on 11" brass float rod set the differential in pumping cycle. 6" aluminum mounting bracket. Copper float. 100 ft. of 3/8" O.D. plastic tubing. Shipped unassembled..

**No. 7P022.** Shpg. wt. 6.6 lbs. List .....$109.50.
Each .....**$79.25**

## COOLANT AND RECIRCULATING PUMPS

For evaporative coolers, coolants, laboratories, decorative fountains, etc. Brass or high-impact polystyrene. Resistant to mildly corrosive liquids. Use with nonflammable liquids compatible with pump component materials. Adaptable discharge ports (3/8 and 1/2" OD). Impeller mounted on steel shaft. 3 ft., 3-conductor 18-ga. SJ cord with leads. No. 2P370 has 6-foot cord. Beckett brand.

D **No. 2P370.** 1/100 HP, 115V, 60 Hz, encapsulated motor. Polystyrene construction. 8½H x 4½ x 5¾" base. Removable bottom plate. UL Listed (E85176).



E **No. 1P618.** 1/70 HP, 115V, 60 Hz, fan-cooled motor. Polystyrene construction. 9"H, 4½" diameter base. Removable bottom plate.

E **No. 1P632.** 1/70 HP, 230V, 60 Hz, fan-cooled motor. Polystyrene construction. 9"H, 4½" diameter base. Removable bottom plate.

F **No. 1P928.** 1/70 HP, 115V, 60 Hz, 3000 RPM motor. Solid brass body. Rust resistant. 9⅛H x 3¾" diameter base.

F **No. 2P371.** 1/70 HP, 230V, 60 Hz, 3000 RPM motor. Solid brass body. Rust resistant. 9½H x 3¾" Dia. base.

# PARTS WASHER PUMPS AND MACHINE TOOL COOLANT PUMPS

## SUBMERSIBLE PARTS WASHER PUMPS

**Description:** Specially designed centrifugal pumps for submerged use in parts washers. Suitable for circulating unheated Stoddard solvent, deodorized kerosenes and other UL Classified parts-cleaning solutions. Caution: The low flash point of these solutions presents a potential fire hazard; the entire pump must be submerged while operating. For use with non-flammable liquids compatible with pump component materials. UL Recognized Component (MH14261). Little Giant brand.

**Construction:** Nos. 4RK95 and 4RK96 have corrosion-resistant polyester housings and fully submersible epoxy-encapsulated pumps. Nos. 1P929 and 4RK84 have unpainted, die-cast aluminum motor housing. All have 6-ft., 3-conductor SJTO cord with 1/2" MPT builders fitting and cord outlet. Metal stand pipe or conduit (not included) must be attached to builders fitting to protect cord from solvent attack or damage. Nylon pumping head with 1/4" MNPT outlet. Double-lip Viton seal on stainless steel motor shaft.

Nylon volute and impeller, polyethylene integral strainer. Viton seals, stainless steel motor shaft and hardware.

**Driver:** 115, 60Hz thermally protected, oil-filled motor.

## MACHINE TOOL COOLANT PUMPS

**Machine tool coolant pumps** are available without tanks, or in any of eight pump/tank combinations. Coolant flow can be regulated to a desired amount, or completely shut off without harming the pump. Flexible discharge hose has flow-control valve. Submersible centrifugal pumps are used in all units except No. 2P343, which has an upright centrifugal pump. Screen and chip collector remove easily for fast cleaning.

**Tanks are described below.** For complete pump description see main pump listing. (Consult Stock Number/ Page Number Guide at rear of Catalog.)

### COOLANT TANKS

**No. 2P344 5-gallon tank** for use on single-spindle drill presses, bench mills, tool grinders, single-spindle tapping, machines, cut off saws, small lathes using water soluble or light cutting oil. Includes 5 gallon polyethylene tank, metal chip collector basket, baffle, 6 ft. plastic hose, flex nozzle and brass control valve. Pump not included. 8H x 10 15/16W x 16 9/16"L. Little Giant brand (MCT-5P).

**No. 2P344.** Shpg. wt. 5.1 lbs. List .....$128.10.
Each .....**$105.15**

**No. 2P345 10-gallon tank** for use on medium size lathes, grinders, and drills that use water soluble or light cutting oil. 10 gallon painted metal tank with baffle provides more settling capacity and coolant volume. 4 ft. neoprene hose with brass nuts. Flex nozzle and brass control valve. Removable chip collector tray and splash deflector. For use with cutting oils up to 300 SSU viscosity. Pump not included. 11 3/8H x 10W x 24"L. Little Giant brand (MCT-10).

**No. 2P345.** Shpg. wt. 31.0 lbs. List .....$298.41
Each .....**$248.75**

**SYNTHETIC COOLANT AVAILABLE**
**See Index under "Coolant, Synthetic"**

# BRONZE AND CAST-IRON ROTARY GEAR PUMP HEADS

## BRONZE PUMP HEADS

**escription:** Bronze rotary gear pumps for recirculating, pressure oosting, filtering, spraying, or general transfer in medium pressure applications. Limited self-priming capability with gears wetted. Temperature range: -40 to 210°F. Maximum pressure: 100 PSI. 'or use with nonflammable liquids compatible with pump component materials. Not suitable for pumping suspended solids.

**onstruction:** Bronze body and cover with precision-machined spur ears. Available in three variations: bronze bearings; carbon raphite bearings; and carbon graphite bearings with adjustable elief valves. Bronze bearing models (intermittent duty only) have ;erk-type grease fittings requiring periodic lubrication. Carbon raphite bearings are self-lubricating. Adjustable relief valve nodels are designed for occasional pressure relief of up to 1 ninute. If blockage can be expected longer than one minute or on regular basis, an external relief valve is required.

Bronze gears, 303 stainless steel shafts, carbon bearings (depending on model), Kevlar packing.

**Driver:** Not included. Pump heads can be directly coupled to a notor or power take-off; use of ball bearing pillow block recommended if pump is belt driven.

## CAST-IRON PUMP HEADS

**Description:** Pedestal mount rotary gear pumps for fluid transfer, recirculation, lubrication, and chemical handling of nonabrasive, nonflammable liquids compatible with pump component materials. Limited self-priming capability. 1725 RPM maximum speed. Maximum flow, 24 GPM. Maximum pressure, 100 PSI. Nos. 1P825 through 1P830 can be operated from -40 to 210°F; Nos. 2P295 through 2P299 from -40 to 350°F. Teel brand. Not suitable for pumping suspended solids.

**Not recommended for intermittent water pumping service.** A suitable relief valve must be installed if there is any restriction or closing of the discharge while the pump is operating. See Index under "Relief Valves".

**Construction:** All cast-iron body and cover, carbon steel shafts and gears. Nos. 1P825 through 1P830 have Buna N lip seal. Nos. 2P295 through 2P299 have Kevlar packing and Zerk fittings for grease lubrication.

**Driver:** Not included. Pump heads can be directly coupled to a motor or power take-off; use of ball bearing pillow block recommended if pump is belt driven.

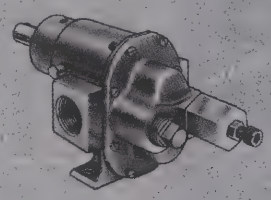
(†) Pumps were originally 1/8" ports. They have been resized to 1/4" but still perform at 1/8" pump flow rates.

# BRONZE AND CAST-IRON PEDESTAL-MOUNT HEAVY-DUTY GEAR PUMPS

- **Available with or without relief valve**
- **Capacity to 24 GPM and 125 PSI**
- **Sealed ball bearing**
- **Mechanical shaft seal**
- **Pumps in either direction**
- **Bronze units have Ryton gears for quiet operation; cast-iron units have steel gears**

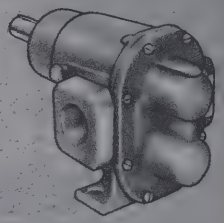
**Description:** Self-priming (see suction lift data), positive displacement, external spur gear pumps are recommended for non-abrasive, nonflammable liquids compatible with pump components. Ball bearing supported drive shaft allows for direct pulley drive without additional shaft and pillow block assemblies. For pumping viscous fluids where motor speed needs to be reduced for specific flow requirements (flow proportional to speed). Temperature range: -40 to 210°F. Pump shaft can be rotated in either direction.



**Applications:** Liquid circulation or lubrication, pressure boosting, filtering, medium pressure spraying, tank and barrel filling or draining, and general fluid transfer. Bronze material should be selected for water based fluids. Cast-iron construction should be selected for some caustics and oil based fluids. Check compatibility before using. Not suitable for pumping suspended solids.

**Construction:** The pump consists of a bronze or cast-iron body and cover assembly, spur gears. Sealed ball bearing supports drive shaft for direct pulley drive applications. Other features include oversized bearing surfaces for increased longevity, and mechanical shaft seal with flush chamber. Pre-filling the seal chamber is recommended for use with viscous fluids which have difficulty lubricating the seal chamber during initial startup and operation.

Bronze models have 303 stainless steel shafts, carbon graphite bushings, and Ryton carbon fiber gears. Cast-iron models have carbon steel shafts, cast-iron bushings, and steel gears. All pumps have Type 21 Nitrile mechanical shaft seals with stainless steel, Buna N, and carbon/ceramic parts.



Adjustable Relief Valve Pumps: designed for internal pressure relief of up to one minute. If blockage is expected longer than one minute or on a regular basis, continuous external relief plumbing is required. Relief valve can be ported either externally or internally for regulated continuous or intermittent pressure control.

**Driver:** The driver is not included. The pump can be either pulley driven or direct driven at motor speed. See the performance chart for recommended horsepower. Pump shims are included with pump for proper motor shaft alignment in direct drive applications. Teel brand.

- **Close-coupled pump and motor**
- **Bronze units have Ryton gears for quiet operation; cast-iron units have steel gears**

**escription:** Self-priming (see Suction Lift ata), positive displacement, external spur ear pumps are recommended for clear, on-abrasive, nonflammable liquids com- atible with pump components. Pump can e rotated in either direction. Temperature ange: -40 to 210°F. Close-coupled design ermits direct coupling to standard elec- ic motors, eliminating the cost associat- d with belts, pulleys, or external gear box rive systems.

**pplications:** Liquid circulation or lubrica- on, pressure boosting, filtering, medium ressure spraying, tank and barrel filling r draining, and general fluid transfer. ronze material should be selected for ater-based fluids. Cast-iron construction hould be selected for some caustics and il-based fluids. Check compatibility efore using. Not suitable for pumping sus- ended solids.

**onstruction:** The pump consists of a bronze r cast-iron body and cover assembly, spur ears, over-sized self-lubricating bearing urfaces for increased longevity and echanical shaft seal with flush chamber. re-filling the seal chamber is recommend- d for use with viscous fluids which have ifficulty lubricating the seal chamber dur- ng initial startup and operation. Pumps ome with a four bolt cast-iron mounting racket with spline coupling for easy ssembly.

ronze pumps have 303 stainless steel hafts, carbon graphite bushings, Ryton arbon fiber gears. Cast-iron pumps have arbon steel shafts, cast-iron bushings, teel gears. All come with Type 21 Nitrile echanical seal with stainless steel, Buna- , and carbon/ceramic parts.

**djustable Relief Valve:** Designed for inter- al pressure relief of up to one minute. If lockage is expected longer than one inute or on a regular basis, continuous xternal relief plumbing is required. Relief alve can be ported either externally or nternally for regulated continuous or ntermittent pressure control.

**river:** Motor not included. Pumps can be lose coupled to five different motor frame izes (1725 RPM max.). See performance hart for recommended horsepower. Teel rand.

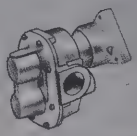
# 316 STAINLESS STEEL GEAR PUMPS



No. 1V458

FREE DELIVERY on orders of $900 or more

See Freight Policy

Replacement Parts Available
1-800-323-0620

TEEL®

No. 1V408

- Capacity to 24 GPM and 125 PSI
- Corrosive chemical compatibility
- Mechanical shaft seal with flush ports
- Pedestal-mount or motor-mount pumps
- Ryton carbon fiber gears for quiet operation

**Description:** Positive displacement, external spur gear pumps are recommended for nonabrasive, nonflammable liquids compatible with pump component materials. Temperature range: -40 to 210°F. Pumps can be rotated in either direction. Pumps have limited, self-priming capability (See Performance Chart).

Pedestal-mounted version with ball bearing supported drive shaft allows for direct pulley drive without additional shaft and pillow block assemblies. Ideal for pumping viscous fluids where speed needs to be reduced for specific flow requirements (flow proportional to speed). Pedestal-mounted pumps can be rotated in either direction.

Close coupled motor mounted version permits direct coupling to standard electric motors, eliminating the cost associated with belts, pulleys, or external gear box drive systems. Design allows flexibility where space is limited.

**Applications:** Liquid circulation or lubrication, pressure boosting, filtering, medium pressure spraying, sump draining, drum and vat filling, and general fluid transfer of acids and organic and inorganic chemicals. Not suitable for pumping suspended solids.

**Construction:** Body and cover assembly, spur gears, oversized bushings, mechanical shaft seal with flush chamber. Flush chamber enables the seal to be flushed, extending seal life in corrosive applications. Pre-filling the chamber is recommended for use with viscous fluids which have difficulty lubricating the seal during initial startup and operation.

316 stainless steel body, cover, and shaft; Ryton gears for reduced operational noise; and carbon graphite bushings. Come with Type 21 mechanical seal with stainless steel, Viton, carbon/ceramic parts.

**Driver:** The driver is not included. The pedestal-mounted pumps can be either pulley driven or direct driven at motor speed. Close-coupled motor-mounted pumps can be mounted to three different motor frame sizes. Pump model 1V408 is supplied with 56C motor frame coupling. Order one 4X192 coupling half to adapt model 1V408 to 143TC-145TC motor frame size. Order one 182TC-184TC flange kit from Grainger Parts Operations to adapt model 1V408 to 182TC-184TC motor frame size. Teel brand.

## GEAR PUMP SELECTION GUIDE

1. Select the port size, GPM, pressure and RPM required (for close-coupled pumps, Nos. 1V404, 1V406, and 1V408, use 1725 RPM only) from the "Pump Performance and Motor HP Required" chart. For example: 1/2" port size, 9.5 GPM, 50 PSI and 1725 RPM.

2. Select the corresponding pump. For the example given above, the pump is No 1V406.

3. Read necessary HP required. The example above requires a 3/4 HP.

4. Read "Recommended Motors For Close Coupled Gear Pumps Heads" chart. Fo 3/4 HP, the motor would be No. 1K084 o 1K081.

ext of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

## GPM OF WATER AT TOTAL PSI

| ipe ize | Req'd HP | Free Flow | 20 PSI | 40 PSI | 60 PSI | 90 PSI | 100 PSI |
|---|---|---|---|---|---|---|---|
| /4" | 1/3 | 2.2 | 2.1 | 1.9 | 1.7 | 1.5 | 1.3 |
| /8 | 1/3 | 4.4 | 4.1 | — | — | — | — |
| /8 | 1/2 | 4.4 | 4.1 | 3.8 | 3.5 | 3.3 | 3.0 |

**Description:** Rotary gear pumps for intermittent duty in medium pressure pump applications. For oil, water, brine, viscous liquids, and nonabrasive, nonflammable liquids compatible with pump component materials. Designed for recirculating, pressure boosting, filtering, spraying, and general transfer applications. Limited self-priming capability with gears wetted (up to 5 feet). Max. liquid temperature: 210°F. max. system pressure: 100 PSI (including pump discharge). Max. RPM: 1750. Not suitable for pumping suspended solids.

**Construction:** Two-piece cast bronze body and cover with precision machined spur gears. Self-lubricating carbon bearings for heavy-duty pump operation. Available with or without adjustable relief valves; relief valve permits internal recirculation of liquid at reduced pressure to avoid damage to pump when blockage of discharge line occurs for less than one minute. If blockage lasts longer, external relief valve is required.

Bronze gears, 303 stainless steel shafts, and carbon bearings. Buna N lip seal.

**Driver:** Overload protected, 1725 RPM. 1/3 HP, split phase or 1/2 HP capacitor run motors in NEMA 48 or 56 frame. (No. 4X177 coupling body required for 56 frame motors; order separately.) Maximum RPM 1800.

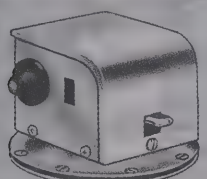

Table shows pump performance when pumping abrasive-free water at 60 to 90°F, through piping of the same size as pump inlet and discharge ports. Deliveries shown are for 1725 pump RPM; at lower speeds, GPM and RPM are proportional. For performance with other materials or different conditions, see "Pump Selection/Feature Guide" below.

## GEAR PUMP & PUMP/MOTOR COMBINATIONS—WITH OR WITHOUT RELIEF VALVE

(*) Includes pump head, NEMA 48 and 56 frame motor mounting hardware, and instructions.
(†) 1/2 HP motor is capacitor start, all others are split phase. All motors are NEMA 48 frame.

# VACUUM-ON SWITCH

No. 1V346

**Vacuum-On Switch** is a control device which automatically shuts off the electric motor when the liquid source is depleted or vacuum/suction drops. Switch protects pump and motor from dry running operation.

**Switch is mounted on suction side of pump** so it can sense a loss of vacuum. For temperatures up to 140°F. Switch is not explosion-proof. Wetted parts are constructed with 300 series stainless steel and Buna-N rubber components. If used in corrosive environment, switch may be subject to attack by chemicals and corrosive fumes.

**Designed to operate on a minimum vacuum** of 1½ inches of mercury. The switch, or pump, whichever is closer to the liquid, must be mounted at least 21" above the liquid supply.

**Can be used with either AC or DC motors** in the following ratings: DC (32-115-230V): up to 1/2 HP; Single phase at 110V: up to 1½; at 220V, 3 HP.

**No. 1V346.** Shpg. wt. 1.3 lbs. List.....$43.16.
Each.....**$33.45**

# ROTARY GEAR PUMPS AND FAT FRYER FILTER PUMPS

## CARBONATOR-MOUNT ROTARY GEAR PUMPS

TEEL®

Replacement Parts Available
1-800-323-0620

No. 7P086

**6 Month Dayton Limited Warranty**

Text of warranty available on request. See "Manufacturer's Warranties" on page opposite inside back cover.

**Many Brands of Carbonator Motors Available—See Page 170**

### NEMA HUB DIMENSIONS FOR CARBONATOR PUMP MOTORS

| Ref. | Dimensions | Ref. | Dimensions |
|---|---|---|---|
| A | .286/.276" | E | 1.640/1.685" Dia. |
| B | .155/.145" | F | 1.862/1.870" Dia. |
| C | 1.43" Min. Dia. | G | .52" Minimum |
| D | 1.504/1.507" Dia. | H | .14" Minimum |

(*) REFERENCE IN DRAWING: Dayton and GE motors meet NEMA standard of .09" dia. hole centered in bottom of undercut. Westinghouse motors are non-NEMA with .187" dia. hole centered .43" from end of hub.

**Description:** For self-priming, intermittent-duty service, medium- to high-pressure pump requirements. Excellent for water, oil, brine, and other nonabrasive, nonflammable liquids compatible with pump component materials. Designed for recirculating, pressure boosting, filtering, spraying, or general transfer applications. Handles liquid temperatures from –40 to 210°F.

**Construction:** Two-piece cast body and cover of bronze or cast-iron with precision machined spur gears. Available with or without adjustable relief valves. Relief valve permits internal recirculation of liquid at reduced pressure to avoid damage to pump when blockage of discharge line occurs for less than one minute. If blockage lasts longer, external relief valve is required.

Bronze models have bronze gears and 303 stainless steel shafts; cast iron models have steel gears and steel shafts. All models have Type 21 mechanical seals and Buna-N O-rings.

**Driver:** Included only on Stock Nos. beginning with 7P. These models include split-phase, open dripproof, 1725 RPM, NEMA 48 YZ frame motor with 1.0 service factor 40°C ambient. Rated for continuous operation. 1/3 HP motor is 115V, 60 Hz. 1/2 HP motor is 115/230V, 60 Hz.

### PUMP PERFORMANCE AND REQUIRED MOTOR HP

Table below shows pump performance when pumping abrasive-free water at 60 to 90°F thru piping of same size as pump inlet and discharge ports. Maximum pump RPM is 1725 for which deliveries are shown; at lower speeds, GPM and RPM are approximately proportional. For performance with other materials or different conditions, see "Pump Selection" information given in "Terminology Section."

| GPM @ Total PSI (72° Water) | | | | | | | |
|---|---|---|---|---|---|---|---|
| Pipe Size | Req'd. HP | Free Flow | 20 PSI | 40 PSI | 60 PSI | 90 PSI | 10 PS |
| 1/4" | 1/3* | 2.2 | 2.1 | 1.9 | 1.7 | 1.5 | 1.3 |
| 3/8 | 1/3 | 4.4 | 4.1 | — | — | — | — |
| 3/8 | 1/2 | 4.4 | 4.1 | 3.8 | 3.5 | 3.3 | 3.0 |

(*) 1/4 HP motor (6K160) may be used for pumping water at free flow to 40 PSI.

(*) Not recommended for intermittant water pumping service.

## FAT FRYER FILTER PUMPS

**Description:** Designed for commercial fat fryer filtering applications. Pump heads are available to fit both carbonator-mount motors and Y48Y frame motors used with Viking pumps. No. 1V412 with adapter will replace Viking pumps. No. 7P098 is a carbonator-mount pump/motor combination and can be used to replace pump on major manufacturer's fat fryer filtering equipment. Nos. 2P398 and 1V410 are carbonator motor mount, pumps only. Pump and components are accepted by the National Sanitation Foundation (NSF) for fat fryer filter applications. For use with non-flammable liquids compatible with pump component materials.

**Construction:** Two-piece cast-iron body and cover with precision machined spur gears. Body and cover are coated with NSF accepted VHT white paint. Steel gears, hardened 303 stainless steel shafts, and NSF accepted shaft seal and O-ring for hot oil use to 375°F.

**Driver:** (No. 7P098) Split-phase, open dripproof, 1725 RPM, NEMA 48 YZ frame motor with 1.0 service factor. 40°C ambient. Rated for continuous 115V, 60 Hz operation. Pump only is NSF listed.

No. 1V410

*If we don't have a pump for it, chances are it can't be pumped.*

# ROTARY GEAR PUMPS

- Herringbone gears provide smooth, quiet reversible operation
- Between-the-bearing design for low shaft deflection and longer life
- Self-priming design
- Can handle liquids up to 5,000 SSU and 200 PSI
- Models with pressure relief valve available; see table below
- Should not be used for water, gasoline, kerosene, No. 1 fuel oil, and other explosive or flammable fluids
- Cast iron construction
- Temperature range: -20 to 240°F
- Fitted with mechanical seals (carbon vs. Ni-resist faces, Buna elastomers)
- Replaceable carbon sleeve bearings
- Belt or direct drive

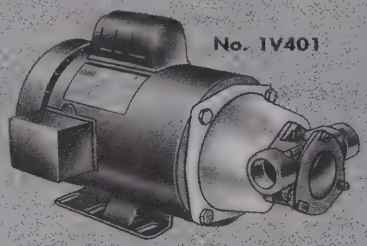
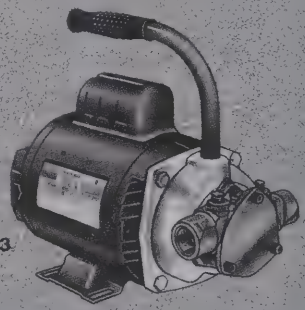
# BRONZE AND 316 STAINLESS STEEL MOTOR-MOUNTED FLEXIBLE IMPELLER PUMPS

- **Self-priming, Nitrile flexible impeller pump**
- **Capacity to 20.6 GPM and 26 PSI continuous**
- **For liquids that are non-lubricating, lubricating or liquids that have suspended particles**
- **Carrying handle for portability (Nos. 1V393, 1V395, 1V391)**



**Description:** Positive displacement pumping action without metal-to-metal contact. Pumps self-prime with wet impeller up to 10 ft.; up to 15 ft. with foot valve and pumps flooded. Not to be operated in a dry condition. Recommended for liquids that are non-lubricating, lubricating, or have suspended particles. For use with non-flammable liquids compatible with pump component materials. Liquid temperature range: 40 to 120°F.

**Applications:** Bronze models are recommended for fluid transfer and circulation, lawn and garden watering, additive injection, salt or brackish water handling, copper line de-scaling, low pressure spraying, tank or drum emptying, and numerous plant utility uses, including oils and mild sludges. Stainless steel models are for use with mild to medium corrosive chemicals in the above applications. Check compatibility before use.



**Construction:** Bronze models have bronze housing with stainless steel cover and wear plates, nitrile impeller (neoprene replacement impeller available), 303 stainless steel shaft, and nitrile lip seal and O-rings. Stainless steel models have Teflon coated 316 stainless steel housing and wear plates, nitrile impeller with 316 stainless steel insert, 316 stainless steel shaft, Viton mechanical seal and O-rings.

**Driver:** Motor-mounted pumps are close coupled on 56C face motors. Bronze models feature carrying handle. **Note:** To prevent dry running, a vacuum switch, No. 1V346, is available, see page 3171. **Motors are included. 115/230 Volt, 60 Hz, 1-phase.**

# SELF-PRIMING FLEXIBLE IMPELLER PUMPS

## SELF-PRIMING FLEXIBLE IMPELLER PUMPS

**Description:** For intermittent service in fluid transfer, filter systems, spraying, chemical injection, plus lawn and garden applications. Pumps self-prime with wet impeller up to 15 feet; with foot valve and pumps flooded, up to 20 feet. Not to be run dry. Liquid temperature range: 40 to 120°F. For use with nonflammable liquids compatible with pump component materials.

**Construction:** Pumping action is a continuous, uniform flow of liquid. Since there is no metal-to-metal contact in the pumps, they are suitable for nonlubricating liquids.

**Housing:** Bronze/brass housing and cover, neoprene impeller (nitrile impeller available), and 303 stainless steel shaft. Nos. 1P816, 1P817, and 1P818 are constructed with Buna N lip seal and bronze shaft bearings lubricated through a zerk fitting. Nos. 1P817 and 1P818 include a graphite bushing on the end cover. Nos. 1P816, 1P817, and 1P818 are recommended for intermittent duty in direct drive applications at a maximum 1750 RPM.

Nos. 4UN81, 4UN82, and 4UN80 are designed with mechanical seals, carbon bushing wet end shafts support, and ball bearing drive end shaft support for continuous duty with either direct or belted drive at speeds of 1750 PRM and 3500 RPM.

**Driver:** Driver not included. Pumps can be directly coupled or belt driven. Ball bearing pillow block is recommended for all belt drives. Capacitor-start electric motors with sufficient starting torque must be used to power flexible impeller pumps; see recommendations in chart.

### NITRILE REPLACEMENT IMPELLERS

## SELF-PRIMING FLEXIBLE IMPELLER UTILITY PUMPS

**Nos. 4UL29 and 4UL40 Bronze Flexible Impeller Pumps** - General liquid transfer, circulation and processing; filling and circulating machine tool coolants. Empty pools, tubs, aquariums and basements. Fill and empty drums, vats, tanks. Fill tractor tires, empty silo pits and transfer liquid fertilizer. All brass/stainless steel pump head. Open drip-proof motors. All nitrile impellers and lip seals. Dry primes to 10 ft. Wet suction lift to 22 ft. Pressures up to 20 PSI. Temp. range 50 to 180°F.

**No. 4UL34 Epoxy Flexible Impeller Pumps** - General liquid transfer, circulation, filtration, processing, filling and pumping pure solutions. No metal parts to contaminate photochemcials, plating solutions, cosmetics, dyes, insecticides, fertilizers, acids and alkalis. Fill and empty vats and drums. Collect spills and waste. All glass-filled epoxy pump parts. TEFC motor with all-nitrile impeller. 1/2" NPT ports. Carbon-on-ceramic mechanical seal. Pressures up to 20 PSI. Temp. ranges: 50 to 180°F.

**Nos. 4UL37 and 4UL38.** Immediate self-priming and handles wide viscosity range. Able to transfer fluids with solids. Dry primes to 10 ft. of lift, wet suction lift to 22 ft. Shipped with neoprene impeller, optional nitrile, viton, and EPDM impellers are available. Highly chemically resistant epoxy pump head with no metal parts in contact with pumped fluid. Close-coupled to TEFC motors. Use to circulate and transfer corrosive liquids. Return spilled liquids to process. Transfer foaming liquids (soap, detergents). Easily handles pure solutions, acids, alkalis. Excellent for dyes, waxes, gels, solutions with suspended solids and emulsions.

# CARBONATOR-MOUNT ROTARY VANE PUMPS

**Description:** Rotary vane displacement pumps run quietly and require no maintenance. For clean fluids at low flows and high pressures. Brass pumps are designed for pumping water and moderately aggressive liquids. 316 Stainless steel pumps are designed for pumping water and aggressive liquids. Both pumps are superior for nonabrasive and nonflammable liquids that are compatible with pump component materials. 150° F Max. temperature.

**Applications:** Carbonated water for beverage dispensers, ultra-filtration, deionized water, reverse osmosis systems, espresso coffee machines, lubrication spraying, insecticide spraying, soap dispensing, distilled water, fire resistant fluids, hydraulic oil, steam cleaning machines with clean water, cooling circulation, pressure booster, atomizing/misting humidification systems, laboratory pumps, pilot plants, boiler feeds, textile machines, carwash machines, water purification, and fire jockey pumps.

**Construction:** Two piece brass or 316 stainless steel bodies, carbon graphite pump chamber and vanes. Available with and without built-in cleanable strainer. 71 Mesh filter. 316 Stainless steel shaft. Carbonator clamp style mounting on all except Nos. 4RM69 through 4RM74. Four bolt mounting on Nos. 4RM69-4RM74—requires mounting kit (sold separately on page 3177).

NEMA hub dimensions for carborator pump motors. Adapter Kits available for mounting NEMA 56C, 143TC and 145TC frame motors.

Carbon rotating seal, ceramic stationary seal with Buna N bellows and stainless steel spring. Built-in relief valves on all units except Nos. 4MR65 through 4MR74. Unit without relief valves require an external relief valve. Nos. 3P751, 3P753, 3P755 and 3P757 have built-in strainers. Buna N seals and O-ring and sealed isolated ball bearing. Pressure relief valve is factory set at 170 PSI and is adjustable through the full range of the pump. Teel brand.

## MOTOR ADAPTER AND COUPLING KIT

No. 4P945

New

No. 4RM60

TEEL®

Consists of coupler, adapter and motor bolts and washers. **For rotary vane pumps only.**

When using adapter and pump as noted with ODP motors, use horsepower listed in chart on page 3176. When using TEFC, TENF, and explosion-proof enclosed motors, multiply the above HP rating by 1.15 to compensate for the difference in service factors.

### MOTOR ADAPTER AND COUPLING KIT ORERING DATA

# PROGRESSING CAVITY PUMPS

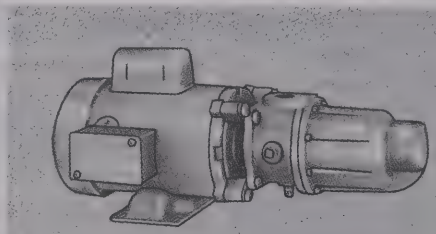
## CLOSE-COUPLED PUMPS

**Description:** For high-pressure needs up to 70 PSI, or low-pressure, high volume to 14.5 GPM. For nonflammable coolants, nonabrasive solids in suspension, or oil base inks. Also for transfer jobs handling nonflammable liquids compatible with pump component materials. Pumps self-prime to 25 feet with wetted rotor and stator. Feature quiet operation and minimum turbulence, non-aerating, with constant pressure. Max. liquid temperature: 160°F. Do not run dry.

**Construction:** Cast iron housing and adapter with nitrile stator and chrome-plated stainless steel rotor. Nitrile seals are spring-loaded stainless steel with carbon and ceramic faces. Stainless steel motor shaft.

**Driver:** 1/2 HP 1725 RPM, 115/230V 60 Hz capacitor-start, totally enclosed, fan-cooled motor with automatic thermal protection.

## PUMPS ONLY

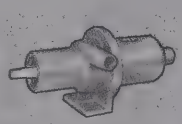


**Description:** For moderate capacity and pressure applications, popular for non-pulsating, metered flow. Pumps nonflammable liquids and abrasive slurries.

**Applications:** Shallow wells, spraying, lawn sprinkling, feed additives, liquid manure, lubricants, anti-freeze, machine tool coolant, EDM dielectric fluids and applying metered amounts of glue or ink.

**Construction:** No. 1P898 has cast iron body, No. 1P610 has aluminum body. Both come with nitrile stator, chrome-plated stainless steel rotor. Spring loaded mechanical seal has carbon rotating face, nitrile, and ceramic parts. Pre-lubricated ball bearings and stainless steel shaft. Clockwise rotation as seen facing pump shaft.

**Driver:** Not included. Pumps 1P610 and 1P898 are base-mounted and may be direct-coupled to an electric motor of appropriate RPM and horsepower or may be belt driven at any speed above 200 RPM. No. 1P610 has 2" OC shaft height and 1/2" OD shaft dimensions. No. 1P898 has 2¾" OC shaft height and 5/8" OD shaft.



**Pump Selection Hints:** As fluid viscosity increases, pump RPM must be reduced. For fluids with viscosity over 200 CP (1000 SSU), pump capacity is reduced by 20%. Both pump speed and pressure should be reduced when handling abrasive fluids to ensure maximum pump life. (Refer to Table 1).

B No. 1P610

C No. 1P898

**Proportionate Flow Example:** Pumps were designed to be either direct driven or belt driven. Speeds can range from 200-1800 RPM and flow will vary proportionately. Example from "Pump Head Only" chart Key B: At 900 RPM free flow, GPM = 2.6 therefore at 300 RPM free flow, GPM = .87 (300/900 = .87/2.6).

### TABLE 1, PUMP SPEEDS FOR VISCOUS & ABRASIVE FLUIDS

| Viscosity (CP) | 100 to 300 | 300 to 500 | 500 to 1000 | 1000 to 2000 | 2000 to 5000 | 5000 to 10,000 | 10,000 to 20,000 |
|---|---|---|---|---|---|---|---|
| Max. RPM | 1400 | 1200 | 950 | 700 | 350 | 180 | 100 |
| Abrasion | Light | | Medium | | | Heavy | |

## REPLACEMENT NITRILE RUBBER STATORS AND NITRILE SEALS FOR ABOVE PUMPS

Under proper use, pumps will provide long service. Pump's performance, after normal wear, is generally renewed by easy replacement of seal or stator. **For pumping liquid temperatures to 260°F, order Viton stator from Grainger Parts Operations, 1-800-323-0620.**

# PROGRESSIVE CAVITY PUMPS AND ROTARY GEAR PUMP SELECTION GUIDE

## PROGRESSIVE-CAVITY PUMPS

- **Pressures to 175 PSI**
- **Reversible**

**Applications:** Uses including, but not limited to, the following industries: waste water treatment, chemical and petrochemical, paper, soap and fat, ceramics, agriculture, and construction.

**Features:** Reversible progressive cavity pump is positive displacement and self-priming. Can handle neutral or corrosive liquids, uncontaminated or abrasive liquids, liquids containing gases or that tend to froth, and liquids of high or low viscosity containing fibrous materials. Operates with liquids up to 300°F. Cannot be run dry.

**Construction:** Spring loaded mechanical seal has carbon rotating face, nitrile, and ceramic parts. 316 stainless steel rotors. Buna N stator (optional viton stator available thru Grainger Parts).

## ROTARY GEAR & ROTARY SCREW PUMP SELECTION INFORMATION

**How to determine total pump discharge pressure:** Add suction lift (in feet) to discharge elevation in feet; divide total by 2.31. To this figure add the discharge pressure required, in PSI. This sum is the total pump pressure needed. Select pump and motor HP delivering GPM required, at or above Total PSI figure calculated.

$$\frac{\text{Suction Lift (Ft.)} + \text{Discharge Elev. (Ft.)}}{2.31} + \text{Discharge PSI Req'd.} = \text{Total Pump PSI Req'd.}$$

**Viscous liquids:** The viscosity/temperature of liquid pumped will affect the pump speed (RPM). Where the viscosity/temperature SSU (Saybolt Seconds Universal) is greater than 500 SSU, recommended pump RPM is given below.

**PERFORMANCE FOR VISCOUS MATERIALS**

| Viscosity SSU | Recommended Pump RPM | Viscosity SSU | Recommended Pump RPM |
|---|---|---|---|
| 50 to 500 | 1725 | 6000 to 9000 | 900 |
| 600 to 5000 | 1200 | 10,000 to 40,000 | 650 |

**Specific gravity:** Specific gravity of fluid pumped will affect horsepower requirements. Where specific gravity of the liquid is **below** 1.0 (specific gravity of water), the motor HP recommendation in Pump Performance Table for Water should be used. Where specific gravity of the fluid is **greater** than 1.0, multiply specific gravity of the liquid times the recommended horsepower in Pump Performance Table for water; the result is the motor HP required.

**Liquid compatibility:** Liquids being pumped must be compatible with pump construction. See individual listings of pumps for the specific materials used in the construction of the pump. These pumps are not intended for use with flammable liquids unless stated otherwise in the description of a particular model.

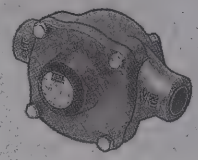
If in doubt, refer the application to the nearest Grainger location, including information as to the liquid being pumped, temperature, viscosity, specific gravity, GPM required, and total pump PSI required.

**NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE**

**Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.**

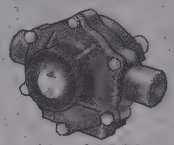
# ROLLER SPRAY PUMPS

**Description:** Self-priming roller pumps are commonly used in agricultural and lawn/garden chemical spraying and various chemical transfer applications. For use with nonflammable liquids such as liquid fertilizers, insecticides, herbicides, and soil fumigants up to a maximum temperature of 140°F.



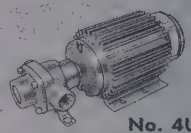
**Construction:** Housings in cast iron, Ni-Resist, or SilverCast™. Cast iron is an economical housing. Ni-Resist is a high nickel-content alloy for better corrosion resistance. Silver cast is a custom alloy that provides corrosion resistance when used with corrosive chemicals, such as the herbicide Roundup®. All pumps are built standard with Super Rollers, Viton shaft seals, and double sealed heavy-duty ball bearings. Super Rollers can be used with water soluble chemicals, abrasive wettable powders, and emulsifiable concentrates. Super Rollers do not swell in water and maintain their performance when exposed to chemical carriers such as xylene. A scoopless rotor design provides improved priming with more volume at higher pressures, while prolonging roller life.

**Driver:** 4-roller models only are coupled to a 12VDC motor. Drivers not included for 6- and 8-roller models. 6- and 8-roller models easily adapt to tractor power take-offs, matching their speeds of 540 - 1200 RPM while running efficiently. Optional tractor PTO quick couplers listed below (order separately). Pump rotation is counter-clockwise facing pump shaft. Rotation is easily reversed for gas engine drivers by turning rotor assembly end for end without changing rotor position on shaft (gas engines must be gear reduced or belt driven down to desired pump speed). 3/4" FNPT inlet and outlet side ports. Teel brand.



TEEL®

New



- 4, 6 & 8-Roller units
- Cast iron, Ni-Resist or SilverCast™ construction
- Flow to 22.5 GPM
- SilverCast™ pumps can pump Roundup®
- For Agricultural or lawn and garden applications

## PUMP INLET FILTERS

SUPPLIER DIVERSITY™ Minority-Owned Business

Replacement Parts Available 1-800-323-0620

BECKETT P·U·M·P·S CORPORATION

No. 2P011

**Installs at pump inlet** to prevent particles from clogging impeller and restricting flow. Can be used on centrifugal, rotary gear, rotary screw, flexible impeller, and piston type pumps. For pumping water, coolants, liquid detergents, lubricants, etc. For use with nonflammable liquids compatible with filter component materials. Filter constructed of 20 mesh Type 304 stainless steel with molded polypropylene plastic retainers secured by three stainless steel nuts and bolts. Easily disassembles for cleaning. Maximum pressure drop across filter at full flow is 1/4 PSI. Maximum liquid temperature, 180°F. Beckett brand.

| Port Size (In.) | Capacity* | Diameter (In.) | Width (In.) | Beckett Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **3/8 FNPT** | 300 GPH | 3 | 1 | | **2P011** | $18.37 | **$12.81** | 0.2 |
| **1/2** | 300 | 3 | 1 | 77-12 | **2P012** | 18.37 | **12.78** | 0.3 |

(*) Two or more filters may be connected with tee fittings to double filter capacity.

*If we don't have a pump for it, chances are it can't be pumped.*

# HIGH-PRESSURE PISTON PUMPS PLUNGER PUMPS AND ACCESSORIES

## TWIN PISTON HIGH PRESSURE PUMPS

**Description:** Twin piston positive displacement pumps for low volume, high pressure industrial and commercial spraying of water, soap, detergent, and other nonflammable liquids compatible with pump component materials. Max. liquid temperature: 140°F for all pumps (Nos. 2P338, 2P339, and 2P341 180°F max.). and operate direct-drive in either direction. 1800 RPM maximum pump speed. A safety relief device such as a pressure relief valve (order separately) must be used to protect pump and system when a shut-off gun is used, or from discharge shut-off.

**Solid shaft models** Nos. 2P336 and 2P339 include a steel base with 1 13/16 x 4 1/4" on center 5/16" bolt holes. 3 1/2" shaft height.

**Hollow shaft models** make flotation motor mounting easy and quick. Torque arm makes shimming unnecessary and alignment automatic.

**Pumps with liquid injector** feed solutions such as liquid soaps, detergents, or waxes into pump's water output. Adjustable, calibrated needle regulates amount of solution fed into the pump. Cast-iron injector body is one of the cylinder heads. Pumps require pressure regulator valves to ensure inlet pressure to 20 PSI or less (order No. 2A645 pressure reducing valve separately). Injector includes 1/8" FNPT inlet port. Brass 1/8" MNPT x 1/4" hose barb fitting included. Features are same as twin piston positive displacement pumps listed above.

**Construction:** Machined cast-iron body and cylinder heads, replaceable NiResist cylinder sleeves. 5/8" ID hollow or 5/8" OD solid Melonite-protected steel shaft design. Spring loaded check valves of unitized construction with stainless steel spring, seal, and poppets. Piston assembly has Buna-impregnated fabric piston cups and Teflon seal rings. Double precision heavy-duty main bearing supports shaft against side loads. Inlet and outlet ports are 1/2" NPT. Teel brand.

A No. 1P987 Twin Piston Pump

B No. 2P334 Pump with Liquid Injector

(*) Hollow shaft is 7/8" long x 5/8" ID. Torque arm included—solid shaft is 1 1/4" long x 5/8" OD. Steel base included 1 13/16" x 4 1/4" OC with four 5/16" bolt holes.

**Piston pump repair kits Nos. 1R322, 1R323, 1R432, 1R433 and 1R321 are available from Grainger Parts Operations (1-800-323-0620)**

## THREE PLUNGER PUMP

For use in car wash, truck wash, industrial cleaning, sewer jetting, hydrostatic testing, and other applications using pressurized water for cleaning. Precision-machined, stainless steel valve and seats resists chemicals. Reciprocating double lip seals, hardened stainless steel lower plungers, single replaceable cartridge. Stainless steel plunger rods, forged brass heads, 100% ceramic plungers. Easy-to-service pin and clip connecting rod assembly. Remove pump head to service crankcase oil seals and all wet end seals. No. 4UN22 has a graphite piston guide and standard base.

## DUPLEX AND TRIPLEX HIGH PRESSURE PLUNGER PUMPS

**Description:** Couple directly to standard U.S. manufactured motors having a 5/8" output shaft. For car wash, pressure washer, agriculture, and other applications where durability, dependability and long life are essential. Feature sight gauge and dipstick, brass manifolds, dual 1/2" inlet, 3/8" outlet ports, ceramic plungers. Duplex model mates to any 56 frame motor. Triplex model mounts directly to a NEMA 56 "C" face motor. Hollow shafted pumps eliminate complicated belt and pulley problems. Includes: mounting flange (triplex), rubber cushion foot assembly (duplex), crankcase oil, key, and operating manual. crankcase, noncorrosive brass pump head, complete oil bath crankcase lubrication. Buna N seals capable of water temperatures to 160°F. Externally accessible stainless steel check valve assemblies, ceramic plunger sleeves, brass pump head.

**Driver:** 56 Frame "C" face or standard electric motor with 5/8" shaft—1725 RPM.

# POSITIVE DISPLACEMENT DIRECT MOUNT PLUNGER PUMPS

TEEL®

No. 2P417

- Pressures to 3600 PSI
- Flow rates: 2.2 to 7.1 GPM
- Bronze heads
- Ceramic plungers

Replacement Parts Available 1-800-323-0620™

**Description:** Duplex (2 plunger) and triplex (3 plunger) positive displacement plunger pumps for pressure wash, car wash, hydrostatic testing of tanks and pipes, and other cleaning applications. Pump water, soap, detergent, and other nonflammable liquids compatible with pump component materials. Max. liquid temperature, 160°F for all models.

**Construction and Wetted Parts:** Oil bath crankcase, forged bronze head, polished ceramic plungers, stainless steel unitized valves, high-temperature self-loading Buna N seals and one-piece connecting rods. Single, replaceable cartridge for easy oil seal replacement. Forged steel crankshaft with double heavy-duty needle bearings. Shaft rotation is in either direction.

**Driver:** Not included. Pumps may be belt driven from an electric motor or gasoline engine. Pumps can also be directly driven from 1740 RPM electric motor or directly mounted to gasoline engines using an appropriate gear reduction kit. Nos. 2P411, 2P414, 2P415, 2P416, and 2P417 will direct drive off 3-5 HP engines using a 2:1 reducing gearbox No. 183-2683 on 5 HP Briggs & Stratton engines (Nos. 4Z683 or 4Z685). Nos. 3P965 and 3P964 will direct drive on 8-18 HP gas engines with 1" engine shaft using a 1.8:1 reducing gearbox No. 269 9479 or use gearbox 8000-0015 for Kohler engines 5Z006 and 5Z008. All pumps have 1/2" (F) NPT inlet ports, 3/8" (F) NPT outlet ports, and 3/4" solid shafts, except Nos 3P965 and 3P964 have 3/4" (F) NPT inlet, 1/2" (F) NPT outlet, and 1" solid shaft.

**Note:** A safety relief device, such as No 2P591 unloader valve or No. 2P590 safety valve, should be used to protect pump and system from sudden blockage in the pump discharge while pump power source is still operating. The unloader valve must be installed when shut-off spray guns are used, or when discharge line can be blocked or closed.

TEEL®

No. 5P251

No. 5P247

No. 5P249

- For mounting to gasoline engines or electric motors
- Pressure to 3500 PSI
- Flow rates: 2.0 to 4.0 GPM
- Triplex ceramic plungers
- Brass head (except No. 5P247 which is aluminum head)

Replacement Parts Available 1-800-323-0620™

## DIRECT MOUNT PLUNGER PUMPS

**Description:** Industrial designed, direct-mount, plunger pumps are equipped with flanges and hollow shafts for easy coupling to 56C-face electric motors or gasoline engines to eliminate the cost of belts, pulleys, gearbox drive systems, and potential alignment problems.

**Construction:** Forged brass heads (except No. 5P247 which is aluminum) with 1/2" FNPT inlet and 3/8" FNPT outlet ports. Aluminum, anodized and hardened crankcase features large oil capacity and cooling fins for high duty cycles. Separation between crankcase and pump head helps prevent crankcase contamination. All pumps have forged steel hardened crankshafts. Industrial strength ball bearings used in Nos. 5P247, 5P248, and 5P249 taper roller bearings in Nos. 5P250 and 5P251. Extra large alloyed aluminum connecting rods used up to 1600 PSI, bronze used over 1600 PSI. Interlock bore between crankcase and pump head for superior piston concentricity and longer packing life. Ceramic plungers and compression loaded nitrile/Buna N packing assembly with state-of-the-art low and high pressure packing design. Max. temperature: 165°F. Pumps factory tested shipped with break-in oil.

**Note:** Same safety procedures should be followed as stated above.

### ELECTRIC MOTOR DRIVEN

| Max. Pressure | Max. GPM | RPM | Shaft Size (In.) | Dimensions (In.) H | W | L | HP | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|---|

(*) This is the only pump with aluminum head. All others feature brass head.

*If we don't have a pump for it, chances are it can't be pumped.*

# BELT-DRIVE PLUNGER PUMPS

**Description:** General/InterPump belt-drive uplex (2-plunger) and triplex (3-plunger) ositive displacement pumps are built for igh-pressure cleaning systems, car washrs, spraying equipment, water curtain pray booths and hydrostatic tank and ipe pressure testing. For pumping water, oap, detergent, and other nonflammable quids compatible with pump component aterials.

upplied with keys, mounting rails, and rankcase oil. Self-priming to 8"H and 125 SI maximum inlet pressure. All pumps ave two 1/2" inlets and two 3/8" discharge orts. Maximum liquid temperature; 165°F.

**onstruction:** Precision-forged and mached brass manifold. Case-hardened forged teel crankshaft with heavy-duty ball or apered roller bearings. The crankcase has il bath lubrication with convenient oil ight gauge, dip stick and drain plug.

ronze manifold, corrosion-resistant eramic plungers, stainless steel valves, alve seats and springs, Buna N seals, -rings, oversized aluminum alloy conecting rods and anodized aluminum rankcase.

**river:** Not included. Pumps have 24 mm hafts, and can be belt-driven by electric otor or gas engine. Shaft rotates in either irection. Order belts and pulleys sepaately; refer to index for page listings. Use o. 5A021 split taper bushing for Browning eaves.

**Note:** A safety relief device, such as No. 2P591 unloader valve or No. 2P590 relief valve should be used to protect pump and system from sudden blockage in the discharge while power source is still operating. This device must be installed when shut-off spray guns are used, or discharge line can be blocked or closed.

**escription:** General/InterPump EZ Mount umps feature flanged crankcases and hol-w crankshafts that permit direct cou-ing to standard electric motors with 5/8" utput shafts or gasoline engines with 3/4" 1" output shafts. These pumps eliminate osts associated with complicated belt and lley or external gear box drive systems. eal for portable high pressure cleaning stems where durability and dependabili-are essential.

**Construction:** Precision forged and machined brass manifolds. Hardened forged steel crankshafts with heavy-duty bearing system. Corrosion resistant ceramic plungers, externally accessible stainless steel valve assemblies, self-loading Buna N packings and O-rings, oversized aluminum alloy connecting rods and large oil bath anodized aluminum crankcases with convenient oil sight gauge, dip stick and drain plug. Dual symmetrical inlet and discharge ports. Maximum inlet pressure 125 PSI. Maximum fluid temperature: 165°F. Pumps shipped with break-in oil.

**Note:** A safety relief device, such as Nos. 5P243 or 5P244 pressure regulating unloader valve or No. 2P590 relief valve should be used to protect pump and system from sudden blockage in discharge while power source is still operating. This device must be installed when shut-off spray guns are used, or discharge line can be blocked or closed.

# SPRAY GUNS FOR HIGH-PRESSURE PLUNGER PUMPS

## SHUT-OFF SPRAY GUNS AND WANDS

**All guns feature** sturdy pistol-grip for secure and comfortable control of high pressure water flow. They are designed for handling water and other nonflammable liquids compatible with the forged brass body and stainless steel plunger, spring, and seat. Durable plastic handle remains cool even when operated at maximum fluid temperature of 212°F. Spray gun will automatically shut off if accidentally dropped. Low force trigger and balanced design reduces operator fatigue. All spray guns feature 3/8" NPT inlet and 1/4" NPT outlet.

**No. 2P592 Front-Entry Gun and Lance.** 8 GPM, 2200 PSI, 212°F with 24" lance, insulated handle, 1/4" female nozzle bushing and rubber nozzle protector.

**No. 2P592.** General Pump brand (YGL2200). Shpg. wt. 2.6 lbs. List $64.88. Each.....**$43.15**

**No. 2P593 Rear Entry Gun.**10 GPM, 4000 PSI, 300°F.

**No. 2P593.** General Pump brand (YG4000). Shpg. wt. 1.8 lbs. List $55.08. Each.....**$34.30**

**No. 2P594 59" Extension Wand.** 1/4" steel with insulated handle, and 1/4" female nozzle steel bushing and nozzle protector, 3500 PSI, 220°F.

**No. 2P594.** General Pump brand (ZZ15). Shpg. wt. 3.2 lbs. List $52.53. Each.....**$37.15**

**No. 2P595 40" Double Lance.** 1/4" Stainless steel with insulated handle, two 1/8" stainless steel extension with 1/4" female nozzle bushings, stainless steel valve with chromeplated brass body, side grip. Maximum temperature, 220°F. 4000 PSI; 15GPM.

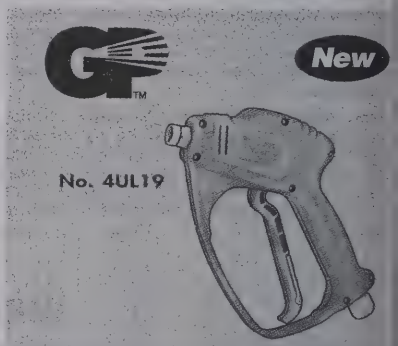
**No. 2P595.** General Pump brand (YDL4155). Shpg. wt. 2.9 lbs. List $76.08. Each.....**$51.60**

## SHUT-OFF SPRAY GUNS

- **Stainless steel ball and seat**
- **Ergonomic design**
- **Sturdy pistol grip for greater control**
- **3/8" NPT (F) Inlet, 1/4" NPT (F) Outlet**
- **Locking trigger for safe operation**

Designed for handling water and other nonflammable liquids compatible with forged brass body and stainless steel plunger, spring and seat. Low force trigger and balanced design reduce operator fatigue. The best choice for effective equipment cleaning.

**No. 4UL19 Spray Gun** 9.0 GPM, 3600 PSI, 160°F Max, 3/8" NPT-F inlet, 1/4" NPT-F outlet.



***New* No. 4UL19.** General Pump brand (YG3600). Shpg. wt. 2.5 lbs. List $31.95. Each.....**$26.35**

**No. 4UL20 Rear Inlet Spray Gun** 10.5 GPM, 3650 PSI, 320°F Max, 3/8" NPT-F inlet, 1/4" NPT-F outlet.

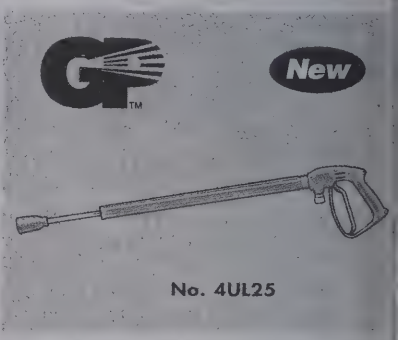
***New* No. 4UL20.** General Pump brand (YG4001). Shpg. wt. 3.0 lbs. List $39.40. Each.....**$32.50**

**No. 4UL26 Spray Gun** 13.2 GPM, 3650 PSI, 320°F Max, 3/8" BSPP-F inlet and outlet.

***New* No. 4UL26.** General Pump brand (YRL50). Shpg. wt. 3.3 lbs. List $70.00. Each.....**$57.25**

## SHUT-OFF SPRAY GUNS AND LANCE

- **Stainless steel ball and seat**
- **Ergonomic Design**
- **Sturdy pistol grip for greater control**
- **3/8" NPT (F) Inlet, 1/4" NPT (F) Outlet**
- **Trigger lock for safety**
- **320°F maximum**
- **Insulated wand**

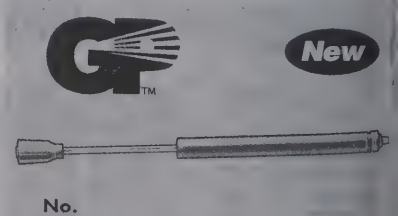


Designed for handling water and other nonflammable liquids compatible with forged brass body and stainless steel plunger, spring and seat. Low force trigger and balanced design reduce operator fatigue. The best choice for effective equipment cleaning.

**No. 4UL25 Spray Gun** with insulated 20" lance. 8 GPM, 2900 PSI, 320°F Max. 3/8" NPT-F inlet, 1/4" NPT-F outlet.

***New* No. 4UL25.** General Pump brand (YRL20L). Shpg. wt. 2.5 lbs. List $39.00. Each .....**$32.60**

**No. 4UL27 Rear Inlet Spray Gun** with lance. 7.8 GPM 5100 PSI, 320°F Max. 3/8" BSPP-F inlet, 1/4" BSPP-F outlet.



***New* No. 4UL27.** General Pump brand (YRL55L). Shpg. wt. 4.0 lbs. List $130.00. Each .....**$112.65**

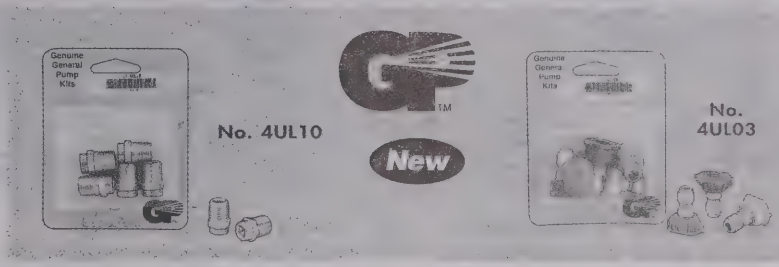
## INSULATED EXTENSION LANCES

- **Insulated handle protects against burning due to hot water**
- **Nozzle protector**
- **3000 PSI rated**
- **1/4" NPT (M) Inlet, 1/4" NPT (F) Outlet**
- **320°F maximum**
- **Corrosion resistant**
- **Lances available in straight or bent styles and a variety of lengths**

| Description | Length (In.) | General Pump Model | *New!* Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Straight Lance** | 20 | YL 20 PNS | **4UL21** | $18.00 | **$15.13** | 2.8 |
| **Straight Lance** | 35 | YL 35 PNS | **4UL22** | 20.10 | **16.97** | 3.5 |
| **Straight Lance** | 36 | YL 36 B | **4UL23** | 19.85 | **16.77** | 3.5 |
| **Bent Lance** | 59 | YL 59 PNB | **4UL24** | 27.55 | **17.77** | 4.0 |

*If we don't have a pump for it, chances are it can't be pumped.*

# SPRAY NOZZLES AND FLEXIBLE METAL HOSE



## HIGH PRESSURE SPRAY TIPS

### HIGH PRESSURE SPRAY TIPS—1/4" MALE CONNECTION

- 1/4" NPT male, 15° spray pattern
- Operating pressure up to 5000 PSI
- Through hardened stainless steel
- Resistant to most chemicals
- Laser engraved part numbers
- Package includes 5 individual 15" nozzles

### HIGH PRESSURE SPRAY TIPS—1/4" ST QUICK CONNECTION

- 0, 15, 25, 40° and soap injector nozzle
- Operating pressure up to 5000 PSI
- Through hardened stainless steel
- Resistant to most chemicals
- Laser engraved part numbers
- Large color-coded ring on Q-type nozzle permits rapid identification of fan angle. Red 0° yellow 15°, green 25°, white 40°

## FLEXIBLE METAL HOSE

**scription:** Pump connectors give flexibili- to piping systems. Provide thermal wth absorption, misalignment compen- ion, vibration isolation, and noise luction. Connectors also minimize ess forces on pump and compressor usings.

**plications:** For use with air compressors, uid pumps, and vacuum pumps.

**nstruction:** Hose and braid constructed of ) series stainless steel. Carbon steel fit- gs and flanges are standard.

**cifications:** Fittings: Schedule 40 carbon el or stainless steel male NPT. Flanges: el plate flanges drilled 150 lbs. A.S.A.

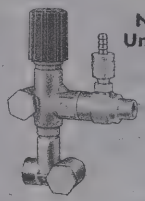
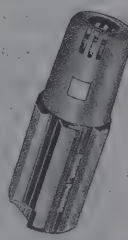
# PLUNGER PUMP ACCESSORIES

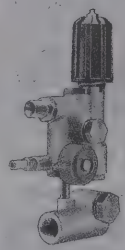


No. 2P596 In-Line Chemical Injector

No. 2P590 Safety Pressure Valve



No. 2P591 Regulating Unloader Valve



Nos. 4UL28 Unloader with Injector

New

No. 5P252 Rotating Nozzle

No. 5P244 Control set Unloader with Injector

Nos. 5P245 & 5P246 Pump Saver

## IN-LINE CHEMICAL INJECTOR

Injector is mounted after pressure pump and regulating unloader valve, for metering of liquid detergents or cleaning agents downstream at low pressure. Use in conjunction with a double lance or roll-over nozzle so when chemical is required, pressure can be reduced from full high pressure to 125 PSI or less. A chemical metering adjusting knob allows you to regulate chemical usage. Constructed of brass and stainless steel to withstand corrosion. Rated for 2.5 to 4 GPM pumps. Pressure to 3000 PSI, 3/8" male inlet and discharge ports. Chemical pickup line hose barb 5/16". Weight: 10 oz. Measures 1 x 2¾ x 3¼". General Pump brand (YAINJ21).

**No. 2P596.** Shpg. wt. 0.6 lbs. List.....$30.09
Each.....**$21.33**

## SAFETY PRESSURE VALVE

For use as a back-up safety valve or for open gun pressure wash applications when an unloader valve is not used to protect system components from over-pressure conditions. Brass and stainless steel construction. Fully adjustable for pressure ranges of 100-3000 PSI. (Use at flows from 1.3 to 10 GPM.) 3/8" MNPT inlet port and 1/4" MNPT discharge port. Temperature rating: 285°F. 1¼" HEX by 4¾" height. General Pump brand (ZKSR).

**No. 2P590.** Shpg. wt. 1.0 lbs. List.....$58.20
Each.....**$40.95**

## CONTROL SET UNLOADERS

Designed and built to mount directly to the manifold of a pump. These adjustable pressure regulating unloaders are complete with an internal by-pass system and built-in adjustable chemical injector that eliminates need for an external by-pass hose, separate chemical injector and related fittings.

Built to by-pass pump flow at low pressure to tank or pump inlet when discharge pressure exceeds valve pressure setting. This pressure sensitive feature permits low pressure by-pass, and reduces horsepower while permitting a wide range of flow adjustments. High pressure maintained in discharge line allows instant return to operating pressure following by-pass. Unloader valve is required for protection of pumps and system components from damaging pressure surges caused by trigger gun shutoff. Units are built to handle water and other nonflammable liquids compatible with their forged brass bodies, stainless steel plungers and internal parts. Maximum fluid temperature: No. 5P244, 165°F; No. 4UL28, 195°F. Maximum pressure (PSI): No. 4UL28 is 2600 PSI and No. 5P244 is 3000 PSI. General Pump brand.

| GPM Range | Ports (In.) Inlet | Ports (In.) Discharge | Chemical Discharge (In.) * | For Use with Pumps, Nos. | General Pump Model | | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|
| 6.5 | 3/8 | 3/8 | 5/16 | 5P237 - 5P240 | YVB135KDMI18 | *New* | **4UL28** | $80.30 | **$66.60** | 2.5 |
| 2.9-4.5 | 1/2 | 3/8 | 5/16 | 5P241 and 5P242 | ZKW2 | | **5P244** | 108.42 | **103.00** | 4.0 |

(*) Hose barb.

## PUMP SAVERS

Thermal pump protectors provide double protection for the pump. Protects against damage due to heat buildup while pump is operating in the by-pass mode, by maintaining maximum water temperature of 145°F. Protects against excessive inlet water pressure. Mounts easily to the pump inlet water port or by-pass plumbing loop. General Pump brand.

| Mounts to Pumps, Nos. | Thread Size (In.) | General Pump Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **5P237-5P240** | **3/8 NPT** | 100513 | **5P245** | $19.00 | **$18.10** | 0.3 |

## ROTOMAX ROTATING NOZZLES

Designed to improve cleaning efficiency of high pressure washers. Adjustable high speed rotating spray provides blasting power of zero degree nozzle over a greatly expanded cleaning stream area. 1/4" BSPP-F. **Not recommended for washing cars or other flat metal surfaces.** General Pump brand.

| GPM Range | Max. Pressure (PSI) | For Use with Pumps, Nos. | General Pump Model | | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|

## REGULATING UNLOADER VALVE

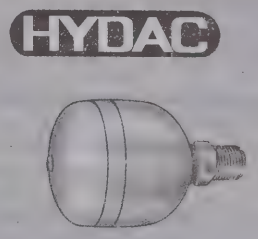
Adjustable pressure-regulating unloade valve is built to by-pass pump flow at lo pressure to tank or pump inlet when dis charge pressure exceed the valve pressur setting. This pressure sensitive featur permits low pressure by-pass and reduce horsepower while permitting a wide rang of flows. The high pressure maintained i the discharge line allows instant return t operating pressure following by-pass.

An unloader valve is required for protec tion of pumps and system component from damage from surge shocks caused b high-pressure shut-off of spray guns.

This unloader is built to handle water an other nonflammable liquids compatibl with brass body, stainless steel plunge and spring. Maximum fluid temperature 165°F. Built for maximum flow of 8 GPM and 3000 PSI maximum pressure, thi unloader features a lockable pressur adjustment, one 3/8" FNPT inlet port, on 3/8" FNPT discharge, and one 3/8" FNPT by-pass port. General Pump bran (YU831RK).

**No. 2P591.** Shpg. wt. 1.7 lbs. List.....$73.4
Each.....**$51.1**

*If we don't have a pump for it, chances are it can't be pumped.*



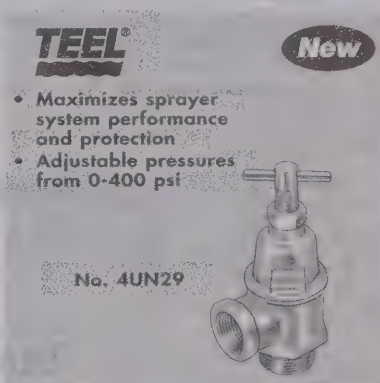
# HIGH PRESSURE PUMP ACCESSORIES

## HYDAC PULSATION DAMPENERS

Pulsation dampeners mount in pump discharge line to reduce pressure pulses and noise in high pressure systems where plunger, piston, gear, diaphragm and other positive displacement pumps are used. Reduce wear and increase life of all pump system components. Pressure pulses are absorbed by 10 cu.-in. diaphragm accumulator. Diaphragm is precharged with nitrogen gas (see chart below) and factory sealed with welded steel plug. Construction: Dampeners have carbon steel body, zinc internal coating, and 1/2" MNPT port. Buna N diaphragm. Not suitable for salt water service.

Handle system flows up to 10 GPM. Maximum temperature: 200°F. 3" Diameter, 4¾" high. Hydac brand.

NOTE: Not to be used in aircraft applications.



No. 4P928

## PRESSURE RELIEF VALVES

Permit pressure in spray boom to build up to preselected point, then it bypasses liquid back to supply tank while maintaining set pressure. Prevents damage to positive displacement type pumps (piston, gear, roller, etc.) where discharge blockage or shut-off can occur during pumping operation. Brass models handle nonflammable liquids compatible with brass body and seat, stainless steel spring. Maximum temperature of liquid is 180°F. All models feature free-floating seat and extra-large valve passage to handle full flow from supply line. Pressure setting securely locks in place with locknut. Can be operated in any position. Not for hot water heaters, boilers, or steam service.For users of positive displacement pumps. Install only on pressure side of pump to regulate pressure. Made in the USA.

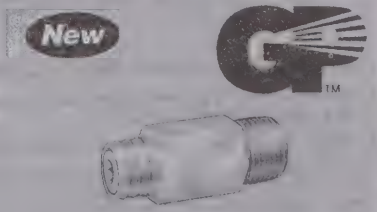
## LIQUID INJECTOR HEAD



Liquid injector head is designed to feed water solutions containing liquid soaps, detergents, chemicals, or waxes into twin piston pumps, mixing the solution with the pump's regular output. Adjustable brass needle valve with calibrated control knob regulates amount of solution fed into the pump. Cast iron injector body replaces one of the cylinder heads on 500 PSI Teel Pumps Nos. 1P987, 1P988, 2P334, 2P335, and Hypro Series 5300. 500 PSI maximum pressure. Pumps require pressure regulating or reducing valve at inlet if inlet pressure exceeds 20 PSI, see index under Valves, Water Reducing for No. 2A645. 1/8" FNPT inlet port. Brass 1/8" x 1/4" MNPT hose barb fitting included..

## SAFETY RELIEF VALVES

This fully adjustable valve is designed as a safety relief valve to protect the pump and system from over-pressurization. PSI can be adjusted from 1000-3600. Intended to be a secondary safety device; should always be used in conjunction with a pressure regulator or unloader. Available in 1/4, 3/8, and 1/2" NPT (M). Maximum flow rate is 6 GPM. Maximum temperature of 180°F. 1/2" Hose barb - discharge.

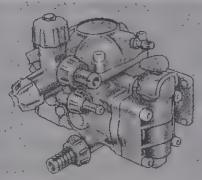
# DIAPHRAGM PUMPS AND ACCESSORIES

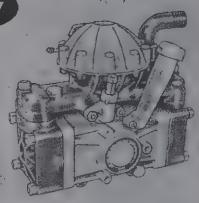


## DIAPHRAGM PUMPS

- **Built with two desmopan diaphragms for long life and reliability**
- **Epoxy-coat, anodized aluminum or stainless steel on all wetted parts**
- **Wide chemical compatibility range**
- **Low cost; minimum maintenance**

Introducing a new line of Shur-Flow® heavy-duty, positive displacement, self-priming diaphragm pumps that are best used in spraying applications for the industrial, agricultural, horticulture, lawn and turf care, and pest control markets. Pumps can be run dry. Handles pressures of up to 550 PSI, flow rates to 14 gpm and a maximum fluid temperature of 140°F. Control units include high pressure adjustable relief valves and quick change pressure release knobs. No. 4UN73 includes a pulsation dampener. All models have a visual oil-level sight glass. These pumps are adaptable for 3⅜" male splined shaft, 1⅜" female splined shaft, 1" solid shaft, or gear reduction drive options.

Perfect for spraying herbicides, pesticides, liquid fertilizers and hard-to-handle fluids.



Durable, low cost, low maintenance pumps can be powered by a PTO or gas engine.

# AGRICULTURAL SPRAY GUNS AND PLASTIC LINE STRAINERS

## SPRAY GUNS

### A 4UN46 & B 4UN47 Heavy-Duty Spray Guns

**Maximum capacity of 11 GPM**
**Port—NPT: 3/8" - 1/2" hose barb**
**Standard 2.3 mm spray tip**

p-drip shut-off mechanism at the nozzle id trigger locks for both safety lock-off id spray angle adjustments. Aluminum rrel. Spray angle adjusts from a straight ream to a wide cone. Hose barb fits both 3/8" and 1/2" hoses. Simply remove the hose barb for 1/2" NPT (M) inlet.

For spraying shrubs, trees, pests, greenhouses, landscaping, and a variety of similar applications.

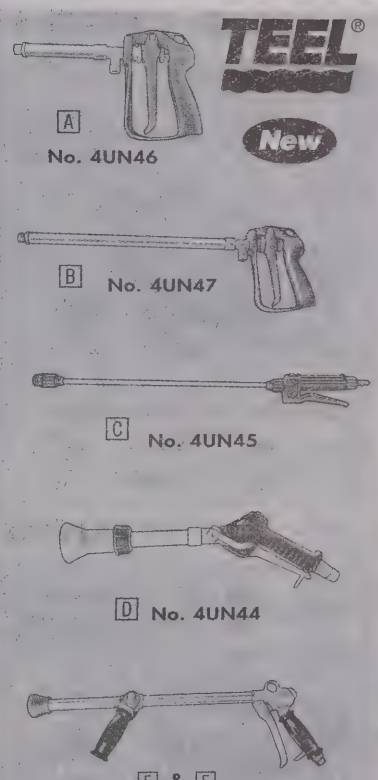
### C No. 4UN45 Spot Spray Gun with Adjustable Fan Spray Nozzle

**Maximum capacity of 78 oz.**
**Port—NPT: 3/8" - 1/2" hose barb**

or use in agricultural and industrial mar- ts to spray weed killers, insecticides, fungicides, fertilizers and other liquids. Lightweight and easy to use.

### D No. 4UN44 Turbo Spray Gun

**Long-lasting, rugged design allows for easy spraying of ag chemicals**
**Maximum capacity of 10 GPM**
**Port—NPT: 1/2: inlet (M)**



ray pattern and flow requires only one nd operation. Creates an ideal chemical ist or fog for complete and even foliage verage. Constructed of stainless steel, uminum, brass and nylon. Has one 3.0 m diameter cone spray tip, hand lock clip and 1/2" hose barb inlet. For use in agricultural and industrial applications. Particularly effective for spraying vineyards, vegetables and other items where uniform coverage is desired.

### E and F No. 4UN42 and No. 4UN43 Long-Range Spray Guns

**Versatile gun with long-range capabilities**
**Port—NPT: 1/2: inlet (M)**
**Maximum capacity for No. 4UN42 is 25 GPM and No. 4UN43 is 30 GPM**

ecision-built, lightweight design for rability and operator comfort. ljustable pattern for maximum performance. Formed dual handles permit easier n control with less fatigue. No. 4UN42 comes with a 3 mm spray tip; No. 4UN43 comes with a 4mm spray tip. Used in agricultural and industrial applications for tree and shrub spraying, fire fighting, deicing, and similar spraying applications.

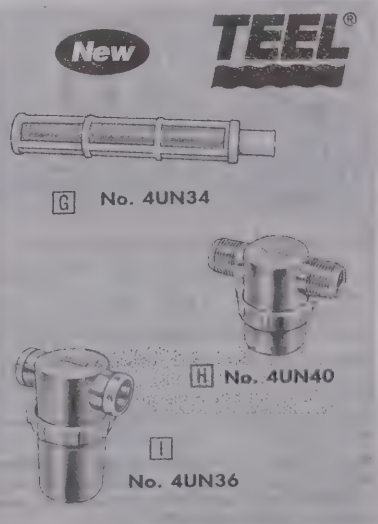
## POLYPROPYLENE AND NYLON LINE STRAINERS

### G Nos. 4UN34 and No. 4UN38 3/4" Suction Strainers

**For use with wettable powders and other liquids with small particles**
**50 mesh screen for spray nozzle screens**
**Nylon construction; 7⅛" long**
**Model No. 4UN34 has 3/4" hose barb and Model No. 4UN38 has 3/4" MNPT threads**

vents solid materials from passing through mps. Used in agricultural and industrial plications with spray pump systems. Adds to life of this strainer.

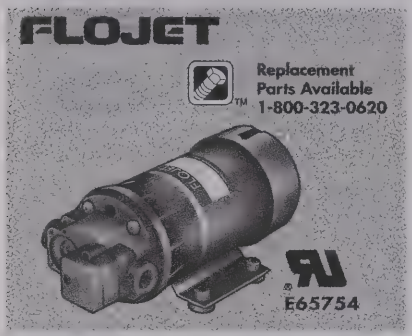
*New* **No. 4UN34.** Shpg. wt. 0.3 lbs. List.....$8.45. Each .....**$6.50**



*New* **No. 4UN38.** Shpg. wt. 0.3 lbs. List...$10.72. Each .....**$8.25**

### H and I Low-Profile, Polypropylene Strainers

**Both 1/4" NPT internal and 1/2" NPT external threads on 4UN40**
**Screen is 50 mesh stainless steel**
**EPDM gasket**
**Ratings: 80 PSI at 70°F**



Optimum protection for your pumps, valves, and nozzles from foreign particles. Used in agricultural and industrial markets where liquids being pumped contain sediment. Captures sediment to keep nozzles and orifices from clogging or plugging.

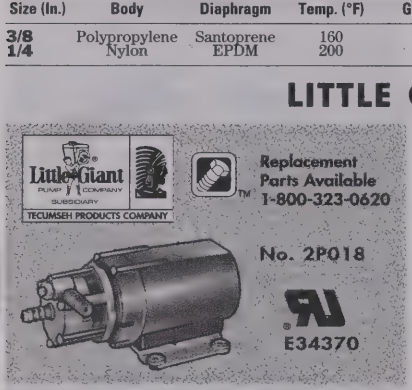
# CARPET EXTRACTOR/SPRAYING/DISPENSING AND ICE MACHINE PUMPS

## FLOJET CARPET EXTRACTOR/SPRAYING/DISPENSING PUMPS

- **For direct replacement of most carpet cleaner pumps, spraying and dispensing system pumps**
- **Runs dry without damage**
- **Operates quietly**
- **Pressure switch operates on demand**
- **Recognized by UL under Component Recognition Program (E65754)**
- **Sealless design prevents leakage for longer motor life**



**Description:** Industrial demand diaphragm pumps used as direct replacement in carpet cleaners, spraying systems, and dispensing systems. Sealless design eliminates the troublesome shaft seal an potential fluid leakage into the moto Pumps operate on 115V, 50/60 Hz and sel prime to 6 ft. Operating pressure must b at least 10 PSI below the switch (Off) se ting. For nonflammable liquids compat ble with pump component material Flojet brand.

**Construction:** No. 2P795 has polypropylen housing, santoprene diaphragm and Vito check valves with 304 SS springs. N 2P796 has reinforced nylon housin EPDM diaphragm and Viton check valve with 304 SS springs. Pump housings (po locations) can be rotated in 90° incr ments for ease of installation.

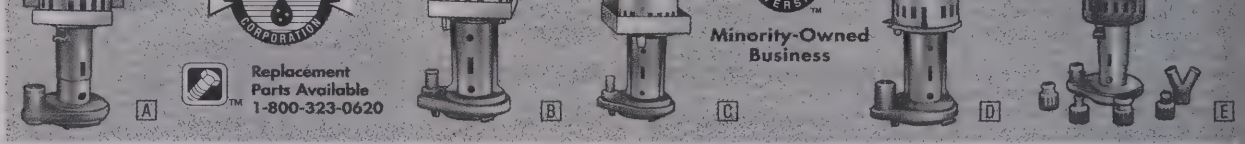
## LITTLE GIANT CARPET CLEANER PUMP



**For Carpet Cleaners, Displays, and Pressure Washers**

Compact medium-pressure pump for mild detergents, hot water (190°F), and nonflammable liquids compatible with pump component materials. Used in carpet cleaners, pressure washers, displays, etc. Glass-filled nylon pumping head. Glass reinforced Ryton impeller. 3/8" barbed intake and discharge ports. 1/8" barbed bypass port. Carbon ceramic mechanical seal. 1/11 HP, 9000 RPM, 115V, 1.25 amps, 60 Hz double insulated motor (no ground wires required). Thermoplastic moto housing with 94-V-O rating. Two 24" lea wires. Recognized by UL under th Component Recognition Progra (E34370). Size 6⅞L x 4W x 2⅞"H. Litt Giant brand (35-OM).

## ICE MACHINE PUMPS

**Exact original replacement pumps** meet or exceed the rigid specifications of original equipment manufacturers including Crystal Tips, Ice-O-Matic, Manitowoc, and Scotsman. Beckett recirculating pumps meet all OEM performance specifications.

**Motors have dual ball bearings,** stainless steel shaft and thermal overload protection. Cord connections and lengths are as specified by the original equipment manufacturers.

**No. 2P794** is a dual-voltage universal replacement pump with discharge adapters and impellers for use in most commercial ice makers.

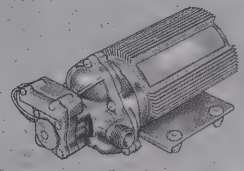
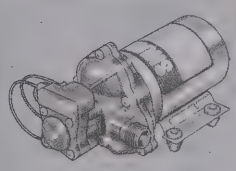
# GENERAL INDUSTRIAL TRANSFER PUMPS & ACCESSORIES



## CARPET EXTRACTORS / AGRICULTURAL SPRAYING / CHEMICAL TRANSFER

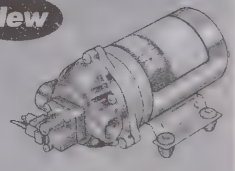
**SHURflo®**



UL E65846

CSA LR80359

Replacement Parts Available 1-800-323-0620



No. 4UN18

Nos. 4UN19/20

New

Nos. 4UN54/55/56

**Diaphragm pumps for** commercial carpet cleaners, agricultural spraying equipment, and general purpose chemical transfer applications. Widely used in 115VAC carpet extractors and on ATV or tractor-mounted 12 VDC agricultural spraying systems.

**Three chamber positive displacement diaphragm** design allows pump to self-prime, run dry without damage. No rotating seals to wear or leak. Pressure demand switch automatically turns pump off when outlet is closed. Built-in outlet check valve prevents supply tank form draining through the pump when the pump is mounted up to 4 ft. below tank liquid level (Nos 4UN55 and 4UN56).

**For use with** nonflammable liquids compatible with materials of pump construction. Maximum allowable liquid temperature is 140°F for polypropylene models and 160°F for nylon models. To extend pump life, flush pump after chemical use. Purge pump prior to exposure to freezing temperatures. Not for use in potable water systems. Not for use with gasoline.

**Motors are thermally protected** (except No. 4UN20). No. 4UN18 has heavy-duty heat sink for continuous duty operation. 115VAC 50/60 Hz models are UL and CSA recognized components. Please refer to pump label for fuse size and type. Use 15A fuse for 12V models. 12" motor leads. Baseplate fits all standard carpet cleaning and agricultural pump brands of this type.

Nos. 4UN54-4UN56 pumps have 3/8" NPT(F) inlet and outlet ports. 2088 Series ports fit SHURflo brand fittings only. Nos. 4UN18-4UN20 pumps come with 1/2" straight barb swivel fitting, and one 1/2" 90° elbow barb swivel fitting.

For other barb fitting sizes, call Grainger Parts Operation at 1-800-323-0620.

## REPLACEMENT PARTS AND ACCESSORIES

**In-Line Strainer.** Heavy-duty strainer No. 4UN23 with patented ultra-flow design drops only 1 PSI at 5.5 GPM. Up to three times more straining capacity than standard strainers. Protects pumps from dirt or debris. Clear, easy-open cover for inspection and cleaning. Locking tab prevents accidental opening. 50 mesh stainless steel screen, 7 sq-in. area. UV and vibration resistant. Mount on suction side of pump only. 1/2" NPT(F) ports. Kit includes two 1/4" nylon hose barb adapters.

**Twist-On Water Strainer.** Twist-on strainer mounts directly to pump inlet for debris protection. Adapter included for 8000 series pumps. 50 mesh stainless steel screen, 1.5 sq-in. area. EPDM O-ring. No. 4UN17 has 1/2" NPT(M) inlet. No. 4UN16 has 1/2" barb inlet.

**Diaphragm Kits.** Nos. 4UN71 and 4UN72 include Santoprene diaphragm, replacement pistons and hardware. No. 4UN67 is for 2088 Series pumps and include the complete diaphragm/drive assembly.

**Valve Kits.** Includes complete Viton valve assembly.

INGERSOLL-RAND FLUID PRODUCTS

Replacement Parts Ava 1-800-323-0620

No. 5U680

- **Twin diaphragm design, double acting**
- **No-stall air motor design**
- **Self-priming 15 ft. wet; 10 ft. dry**
- **For pumping water, solvents, slurries, waste oils, paints, and adhesives compatible with pump component materials**

Flow rate depends on air pressure and fluid viscosity. Max flow rates are achieved at 100 PSI for 1/2" pumps and 120 PSI for others. Verify materials of construction with Chemical Resistance Chart, listed in the Terminology section.

**NonMetallic Pumps:**

Polypropylene (Polypro) pumps offer wide material compatibility (acids, alkalis, stabilizers, aliphatic solutions, polar substances, etc.), high fatigue endurance and superior abrasion resistance. Maximum temperature 150°F.

- **Twin diaphragm design, double acting**
- **No-stall air motor design**
- **Self-priming 15 ft. wet; 10 ft. dry**
- **For pumping water, solvents, slurries, waste oils, paints, and adhesives compatible with pump component materials**

Flow rate depends on air pressure and fluid viscosity. Max flow rates are achieved at 100 PSI for 1/2" pumps and 120 PSI for others. Verify materials of construction with Chemical Resistance Chart in the Terminology and Technical Data section.

**METALLIC PUMPS:** High strength, heat-treated aluminum alloy pumps offer high impact strength and good abrasion resistance. Aluminum pumps are the pump of choice in general industrial applications. **WARNING: ALUMINUM IS NOT COMPATIBLE WITH HALOGENATED HYDROCARBON SOLVENTS.** Stainless steel pumps offer high impact strength along with good corrosion resistance, making them a wise choice for use in marine or washdown operations, as well as areas where highly caustic or corrosive materials are in use. Max. temperature 150°F for aluminum pumps, 90°F for stainless steel, and 190°F for cast iron.

# 1/4" LOW-FLOW, AIR-OPERATED DIAPHRAGM TRANSFER PUMPS

- **360° Mounting**
- **No-stall air valve**
- **No-lube air valve**
- **Pump solvents or lubricants**
- **Sealless design**
- **20 Ft. suction lift with water**

**Description:** ARO low-flow air operated diaphragm pumps are self-priming and portable. Designed for pumping water, solvents, acids, and other liquids compatible with pump component materials. Acetal models can also be used with solvents. Patented unstallable air valve. Unlimited mounting flexibility make these pumps exceptionally versatile.

**Max. Temperature:** 150°F for polypropylene; 180°F for acetal.

**Flow Rate:** 3 GPM at 70 PSI with 32 PSI fluid back pressure. 2 GPM at 50 PSI with 30 PSI fluid back pressure.

**Driver:** Driven by compressed air. Air inlets are 1/4" FNPT. Maximum operating pressure: 100 PSI.

**Dimensions:** 5⅝H x 7½W x 5½"D.

ARO® INGERSOLL-RAND FLUID PRODUCTS

UL MH13434

Replacement Parts Available 1-800-323-0620™

# UL LISTED, AIR-OPERATED DIAPHRAGM FUEL PUMP

- **Meets UL Specification 79, by limiting dispensing pressure to 50 PSI**
- **Handles: gasoline, aviation and diesel fuel, fuel oil and kerosene**
- **Relief valve (can be plumbed to return bleed off to supply)**
- **Reversible ball seats (double their service life/keep maintenance costs down)**
- **Air inlet 1/4" FNPT**
- **Fluid ports 1" FNPT**
- **Portable, lightweight design**
- **High volume delivery**

Flow rate (fuel) at 50 PSI (air inlet pressure) with 15 PSI (fluid back pressure) is 19 GPM Maximum flow (water) at 50 PSI (air inlet pressure) with 0 PSI (fluid back pressure, 1 ft. discharge hose) is 29 GPM Maximum air inlet pressure is 50 PSI; 30 CFM Max. Maximum suspended solids: 1/8 dia., flow is reduced.

**Construction:** Aluminum pump with Kyna seats, acetal balls, Viton diaphragms and O-rings. Identical inlet/outlet manifolds allow variable, interchangeable and reversible installation options. ARO brand

**No. 3P785.** (650717-C). Shpg. wt. 18.0 lbs. List $879.64. Each ..... **$809.00**

# AIR-OPERATED FLUID TRANSFER PUMPS

## DRUM, WALL, CART-MOUNTED FLUID TRANSFER PUMPS

### A 1:1 OIL DRUM PUMPS Nos. 2P529 AND 3P960

- **For use with: motor oil, gear oil,and transmission fluid**
- **Up to 9 GPM max. flow rate**
- **Fits 2" bung opening**

**lo. 2P529.** Delivers up to 9 gallons of oil and other low-viscosity liquids) per ninute. Includes basic pump, bung dapter, air line coupler/connector, needle alve. 1:1 pressure ratio between inlet and utlet. Carbon steel plunger and suction ube with a cast iron foot valve. Carbon teel and Buna N wetted parts. Buna N acking. 2" Air motor. Aluminum outlet asting.

**lo. 3P960.** Same as No. 2P529 above, xcept has Teflon packing for greater ompatibility with fluids such as anti-reeze. Will handle fluids up to 200 cen-ipoise.

### B 2:1 STAINLESS STEEL PUMP No. 2P687

- **For use with: anti-freeze, solvents**
- **Fits 4.0 GPM max. flow rate**
- **2" Bung openings**

or high-volume, short-run delivery of low iscosity materials compatible with 316 tainless steel. For adhesives, food addi-ves, lacquers, solvents, varnishes, water nd water-base fluids. Abrasive-resistant ardened stainless steel cylinder and tube. eflon packing. 2:1 pressure ratio between ılet and outlet. 2" Diameter air motor ith 6" stroke. Delivers 8.0 cubic inches er cycle. 2" Bung opening. Will pump liq-ids up to 1000 centipoise.

### C 4:1 CARBON STEEL TRANSFER PUMP No. 3P961

- **For use with: lubricants, adhesives, paints, sealers, lacquers, and resins**
- **6 GPM max. flow flow rate**
- **Fits 2" bung opening**

or delivery of medium-viscosity fluids (to )00 cps) direct from containers. Also sed to transfer low-viscosity fluids rough long piping runs such as hose els in central piping systems. Stub style mp can be wall-mounted or used with -gallon drum with suction tube (includ-l). Carbon steel construction, and Teflon cking. 3" Diameter air motor with 2¾" roke delivers 6.2 cubic inches per cycle.

### D 2:1 STUB (WALL-MOUNTED), 55-GALLON DRUM PUMPS Nos. 4RN20 AND 4RN19

- **For use with paints, stains, varnishes, coatings, solvents**
- **Up to 4 GPM maximum flow rate**

**. 4RN20** features stainless steel con-ruction with Teflon packings. Can be all-mounted (use No. 4RM91 bracket).

**. 4RN19** carbon steel-constructed pump atures Teflon packings. Mounts directly 55-gallon drum.

### E 4:1 STUB (WALL MOUNT), 55-GALLON DRUM PUMPS, STAINLESS STEEL CONSTRUCTION Nos. 4RN35 AND 4RN36

- **Stainless steel construction for use in corrosive environments, with fluids that include water-based paints and coatings**
- **4.2 GPM maximum flow rate**

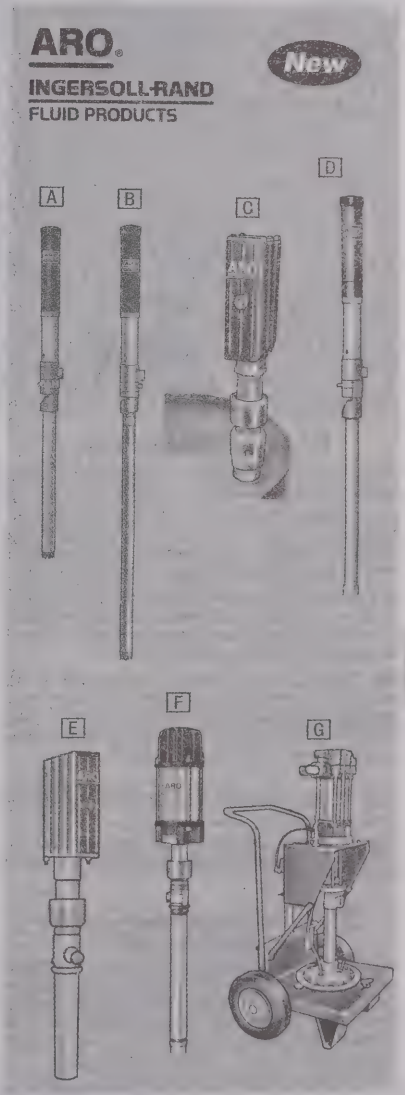
**No. 4RN35** features glass-filled Teflon packings for high fluid compatibility. Mounts to wall using No. 4RM91 wall mounting bracket.

**No. 4RN36** 55-gallon pump mounts directly on drum. Features glass-filled Teflon packings for water-based fluid compatibility.

### F 9:1 STUB (WALL MOUNT), 55 GALLON DRUM PUMPS, STAINLESS STEEL CONSTRUCTION Nos. 4RN21 AND 4RN22

- **Higher ration for higher outlet pressure demand; 1,000 PSI at 100 PSI air inlet**
- **4.0 GPM maximum flow rate**

**No. 4RN21** stub-type mounts to wall using No. 4RM91 wall mounting bracket. Features Teflon packings for wide fluid compatibility, including water-based.

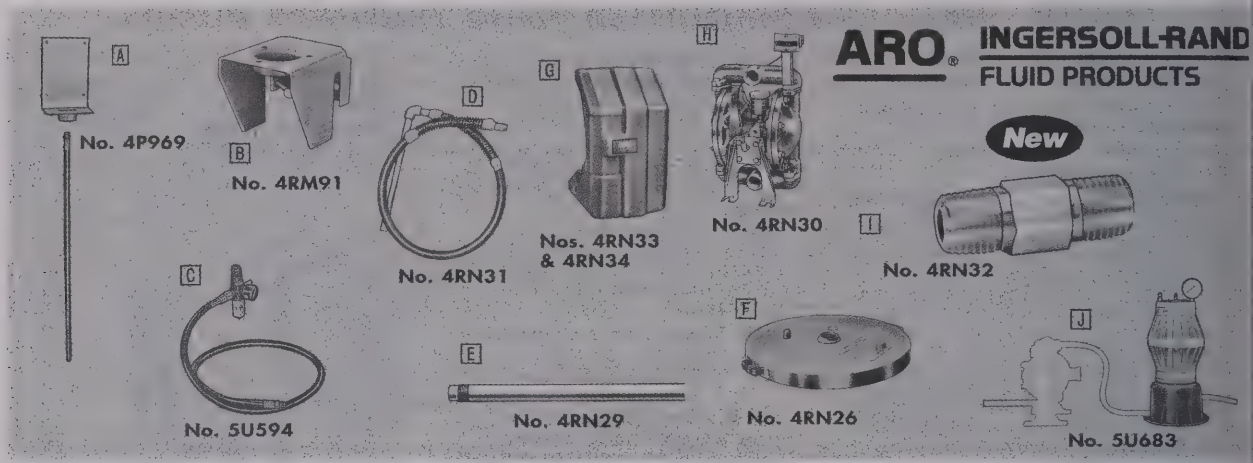


**No. 4RN22** 55-gallon pump mounts directly on drum. Teflon packings for wide material compatibility.

### G 43:1 CART-MOUNTED, 5-GALLON EXTRUSION PUMPS Nos. 4RN23 AND 4RN24

- **High ratio/pressure pumps used for supply of high-viscosity materials: caulk, RTV, adhesives, sealants**
- **0.85 GPM maximum flow rate**

**No. 4RN23** carbon steel-constructed pump features abrasion-resistant UHMW-PE packings. Unit shipped assembled with pump, air regulator, cart, follower.



**No. 4RN24** stainless steel-constructed pump offers maximum corrosion resistance with abrasive-resistant UHME-PE packings. Unit shipped complete/assembled with pump, air regulator, cart, and follower.

# PUMP ACCESSORIES

### A DRUM KIT ASSEMBLIES

Kits come with down tube sized for 55-gallon drum. Can be cut to length.

**No. 4P969.** For any 1/4" (port) pump. Stainless steel L-shaped bracket with bung adapter built-in and Teflon suction tube with pump inlet fittings.

**No. 4P968.** For mounting any 1/2" (port) pump. Kit features stainless steel flat plate bracket with bung adapter built-in and stainless steel tube and fittings.

**No. 2P601.** PVC siphon tube with bung adapter converts No. 2P597 to drum type pump. 37.65" Long 1/2" PVC pipe with 90° elbow glued to pipe and threaded on other end of elbow and bung adapter.

### B WALL-MOUNT BRACKET No. 4RM91

Has 2" NPT(F) opening to accept "stub"-type pumps. Bracket can be mounted on wall or can be slipped over rim of open head drum.

### C DIAPHRAGM PUMP AIR LINE CONNECTION KITS

Air line kits include air line filter/regulator with gauge (0-160 PSI), FNPT air coupler, MNPT air connector, pipe nipple and 5-foot section of air hose MNPT at both ends. ARO brand.

### D 55-GALLON SIPHON KIT No. 4RN31

Stainless steel tube for 55-gallon containers includes 16" wand and 5 ft. of 3/4" I.D. hose.

### E PVC EXTENSION TUBE No. 4RN29

Adapts "stub"-type pumps to direct 55-gallon drum transfer capacity.

### F 55-GALLON DRUM COVER No. 4RN26

For direct mounting of "drum"-style pumps. Cover includes hinged access covers, 2" NPT(F) bung opening. Can accept material agitator.

### G HIGH FLOW DIAPHRAGM PUMP MUFFLERS Nos. 4RN33 AND 4RN34

Mufflers help reduce pump sound levels and ice-up. No. 4RN33 recommended for continuous duty, No. 4RN34 recommended for intermittent operations.

### H DIAPHRAGM PUMP CYCLE COUNTER KIT No. 4RN30

Easy-to-install counter records up to 999,999 pump cycles. Kit comes complete with installation hardware. Perfect for fluid inventory, preventative maintenance and fluid metering.

### I PRESSURE RELIEF VALVE No. 4RN32

Relief valve is preset to 125 PSI (±10 PSI) to be used in systems where thermal expansion or excess back pressure can develop in fluid lines. Valve should be installed in a piping tee located near the outlet of the pump. Tubing or hose will be required to return bleed-off to fluid container. Valve is 1/4-1/8(M) inlet/outlet threaded.

### J DIAPHRAGM (1" PORTS OR SMALLER) PUMP PULSATION DAMPENERS Nos. 5U683 AND 5U684

Patented, modular dampener design permits either manual or automatic fluid pulsation reduction (up to 90%) with the same unit. Mounting base hardware included. For plumbing dampener to pipe 1" (NPT) pipe or larger, use order No. 4RN25 base.

### K PULSATION DAMPENER BASE No. 4RN25

For plumbing No. 5U683 or 5U684 pulsation dampeners to 1" (NPT) or larger pipe.

# CAR WASH, SOAP DISPENSING AND CHEMICAL TRANSFER PUMPS

## CHEMICAL TRANSFER, SOAP DISPENSING, LIQUID FERTILIZER INJECTION PUMPS

SHURflo® CE

New

Nos. 4UN12, 4UN13, 4UN14, & 4UN15

Air-driven pump has two-chamber double diaphragm design and patented fast action switching mechanism to provide smooth flow and consistent pressure. For chemical transfer, soap dispensing, liquid fertilizer injection and agricultural spraying where a compressed gas source is available. Santoprene and EPDM models are NSF listed.

Diaphragm design allows pump to self prime and run dry without damage. Pump operates when supplied with clean, dry compressed air, $CO_2$ or Nitrogen. Pumping begins when liquid outlet port is opened, and stops automatically when liquid outlet port is closed. Pump consumes .5 CFM of 60 psi supply air when delivering .45 gpm. Performance varies with liquid viscosity. For maximum life, flow rate should not exceed 1 gpm. Liquid inlet and outlet ports are 3/8" barb type. Air inlet is 1/4" barb type.

**Pump body and shaft** are constructed of chemically resistant Polypropylene. Internal materials include choice of Viton, Buna, EPDM or Santoprene elastomers. Can be used with caustic or acidic fluids which are compatible with materials of construction.

**LIQUID OUTLET PRESSURE**

| Flow GPM | Air Inlet Pressure 20 PSI | 40 PSI | 60 PSI |

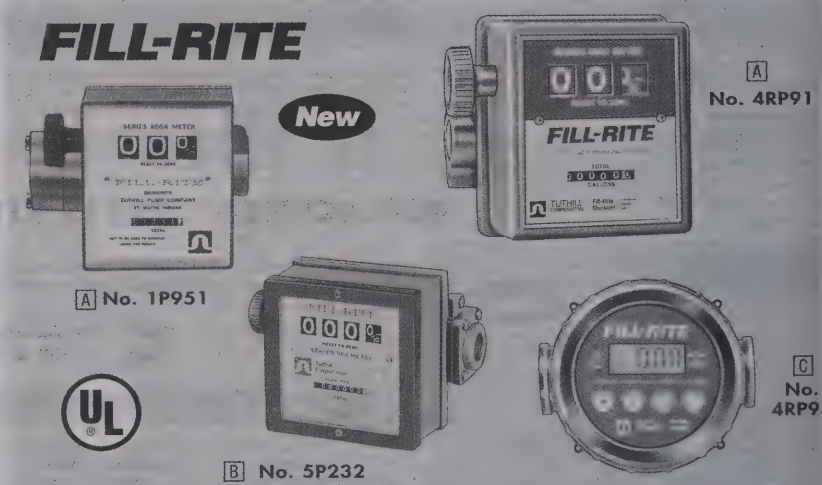
When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.

# DIAPHRAGM PUMP AND FLOWMETERS

## 12V DIAPHRAGM PUMP

- Reciprocating spring-driven, patented dual diaphragm design (patent pending) optimizes flow rate
- Transfers fluid viscosities up to 1000+ cps (SAE 80-90 oil at 31°F)
- Can also transfer particulate fluids to 1/10"
- Polypropylene, stainless steel and Zircon® wetted parts allow safe transfer of compatible industrial fluids and chemicals
- Outlet ports can be easily oriented for installation flexibility
- Self-priming
- Explosion-proof UL Listed 1/4 HP motor
- Heavy-duty switch, thermal overload protection and junction box
- 3-Wire battery cable
- Pump may be padlocked
- 13 GPM flow rate with water



For transferring heavy fluids such as lube and gear oils. Dual diaphragm design counters internal load pressures to optimize flow rate while drawing only 18 amps of current under normal operating loads. Includes 1" x 12 ft. Buna hose, 1" manual nozzle and telescoping suction pipe. Not for use with gasoline or low flash point fluids. Fill-Rite brand (410).

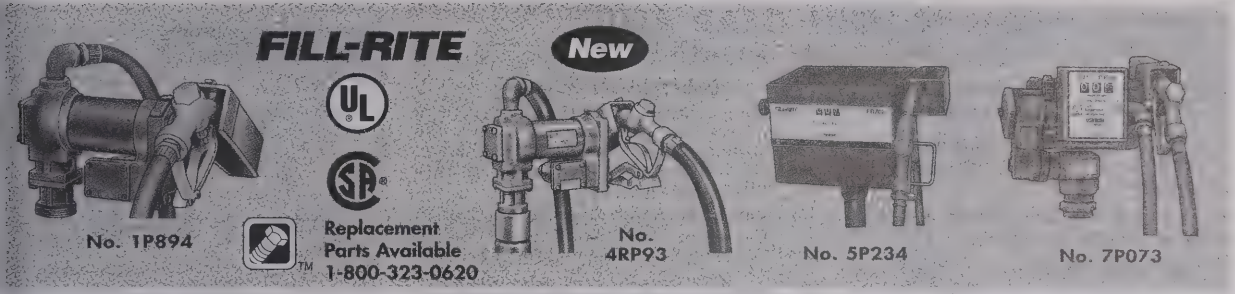
**No. 5P233.** Shpg. wt. 35.0 lbs. List .....$710.67.
Each .....**$600.00**

## LIQUID FLOWMETERS

- Nos. 1P951 and 5P232 are economical, accurate meters for fuel dispensing pumps and industrial flow measurement. Construction materials include nickel-plated aluminum housing, 40% glass-filled polyester chamber, viton seal and Type 416 stainless steel shaft. Handles petroleum products, water, liquid feed and compatible chemicals. Not for resale measuring use.
- Nos. 4RP91 and 4RP92 have corrosion-resistant aluminum housings. Not to be used with water applications.
- Mechanical register with large easy-to-read numbers and convenient reset knob with a positive, zero stop
- Meter can be completely disassembled without disturbing piping. Ports can be rotated in 90° increments for installation flexibility
- Measures flow in liquids up to SAE 30 at 70°F

A **Nos. 4RP91 and 1P951.** Resettable counter measures flow to 100 U.S. gallons in 1/10 gallon increments; ±1% accuracy. 5-20 GPM flow range to 150°F; 50 PSI max. pressure. 100,000 gallon non-resettable totalizer shows cumulative use. No. 4RP91 has non-nickel plated aluminum housing and should not be used to handle water. UL Listed (MH8290).

B **Nos. 4RP92 and 5P232.** Operates at 6 to 40 GPM with accuracy to ±2%. Measures liquid flow to 1000 gallons. The non-resettable master totalizer registers up to 1,000,000 gallons. 50 PSI maximum pressure, to 150°F. No. 4RP92 has non-nickel plated aluminum housing and should not be used to handle water. UL Listed (MH8290).



C **No. 4RP95.** Digital flow meter can be calibrated without dispensing fluids. Easy to read LCD display, can be calibrated to measure ounces, pints, quarts, liters and gallons. Resettable 1000 gallon counter Accurate to ±0.5%. Unit has 1" NP inlet/outlet ports adjustable for horizonta or vertical mounting. Flow range is 2-2( GPM. Glass filled polypropylene Weatherproof construction with Ryton an 302 stainless steel chanmber, and fluorcar bon seal. Operates on two alkaline batter ies (included). Fill-Rite brand (FR820).

### FLOWMETER ORDERING DATA

| Key | Flow (Gal.) | Port Size/ No. Ports | Dimensions (In.) L | W | H | Fill-Rite Model | Stock No. | List | Each | Shpg. Wt. |

(*) For up to 50 PSI system pressure. Should be installed after valve or nonpressurized side of system to prevent water hammer and shock damage.

# TRANSFER PUMPS

**ugged, direct drive transfer pumps** for dispensing gasoline, erosene, and diesel fuel. Includes 12 ft. x 3/4" hose with static round wire and aluminum nozzle. Positive displacement rotary esign has carbon/ceramic seal and Viton O-rings. All units iclude carbon vanes. Heavy-duty switch, thermal overload pro-ection, permanently lubricated ball bearings and junction box for easy power source connection. Self-priming with built-in check valve and strainer. Easily mounts to standard 2" NPT opening. Pump inlet is 1" NPT. Corrosion-resistant construction with fully weatherized, sealed motor compartment. Pumps may be padlocked. Pump liquids compatible with pump component materials. Not intended for pumping water.

### No. 1P894 12VDC FUEL TRANSFER PUMP

elivers up to 13 GPM. Driven by 1/4 HP, 8-20 amp, 12 VDC explosion-proof, permanent magnet motor. Includes heavy-uty 15 ft. power cable and adjustable (22 › 40") suction tube for installation on tank r drum with 2" NPT opening. Operates up › 30 minutes continuously. UL Listed MH7817).

### No. 4RP93 12VDC TRANSFER PUMP

elivers up to 20 GPM. Driven by 1/4 HP, 2 amp, 12 VDC explosion-proof, permanent magnet motor. Includes hose, nozzle, able and adjustable suction tube for stallation on tank or drum with 2" NPT pening. UL and C-UL Listed.

### No. 4RP94 115VAC FUEL TRANSFER PUMP

For dispensing fuel into any vehicle and/or fuel-powered equipment. Delivers up to 14 GPM. Driven by 1/4 HP. 115V, 60 Hz, explosion-proof motor. Thermal overload protection. Self-priming with check valve. Compatible with gas, diesel, and kerosene. Includes hose, nozzle, and suction tube. UL and C-UL Listed.

### No. 2P279 115VAC UTILITY PUMP

Delivers up to 18 GPM. Driven by 1/3 HP, 115V, 60 Hz, 1725 RPM explosion-proof motor. For installation on underground or above ground tank systems. Does not include suction tube. Order No. 2P094 suction tube separately. UL Listed (MH5329).

### No. 5P234 115VAC COMPACT CABINET PUMP

Delivers up to 18 GPM in a reliable, direct drive cabinet unit. Pump has a 2" NPT threaded opening. Specifically designed for direct mounting with above ground tank systems; can also be used with underground tanks. Driven by 1/3 HP, 115V, 60 Hz, 1725 RPM explosion-proof motor. Includes a U.S. gallon register which measures flow to 100 gallons in 1/10 gallon increments and has a non-resettable totalizer to 100,000 gallons. Convenient, large reset knob has positive, zero stop. Does not include suction pipe. Order No. 2P094 suction tube separately. Not for resale measuring use. Includes manual nozzle with standard spout for unleaded gasoline. UL Listed (MH5329).

### No. 7P073 115VAC METERED FUEL TRANSFER PUMP

Pump consists of No. 1P951 flowmeter and No. 2P279, 115VAC fuel transfer pump. Includes 12' hose and unleaded aluminum nozzle. Not for resale measuring use.

## ROTARY TRANSFER PUMP

**For gasoline, diesel, oils up to SAE 40, and antifreeze**
**Provides smooth, continuous transfer up to 10 gallons per 100 revolutions**

or compatible medium viscosity liquids. icludes built-in check valve and strainer. perating mechanism easily accessible for ervice by removing face plate. Buna N eals.

icludes 22 to 40" telescoping suction pe, 2" bung adapter, 8 ft. hose and non-sparking nozzle. Pump can be padlocked. Pump body has 1" inlet and 3/4" outlet. Pump alone measures 12¾L x 6½W x 7¼H. Fill-Rite brand (122).

**No. 1P893.** Shpg. wt. 17.0 lbs. List .....$127.72.
Each.....**$109.85**

## PISTON HAND TRANSFER PUMP

**Ideal for gasoline, diesel fuel, oil, and kerosene**
**Compact, dual-action design delivers up to 20 gallons per 100 strokes**

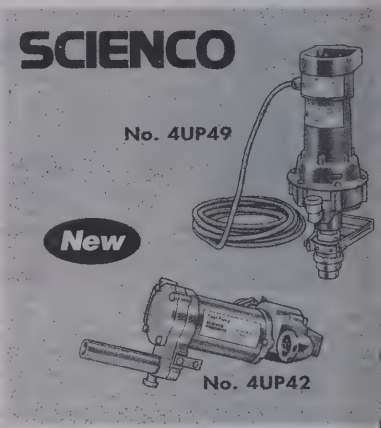
low can be reversed by rotating piston 2 turn. Self priming. Rugged design feares stainless steel inner liner, cast aluinum body, steel faceplate, and zinc-plat-l, built-in strainer. Buna N seals. icludes 22 to 40" telescoping suction pe, 2" bung adapter, 8 ft. hose and non-sparking nozzle. Pump can be padlocked. Pump body has 1" inlet and 3/4" outlet. Pump alone meaures 19L x 6½W x 8" H. Fill-rite brand (FR162).

**No. 1P892.** Shpg. wt. 15.0 lbs. List .....$130.57.
Each.....**$110.00**

## HIGH TORQUE GEAR AND DIAPHRAGM PUMPS

- 12 Volt DC pumps available individually or in convenient Caddy systems
- Transfer concentrated non-flammable agricultural chemicals to secondary containers
- 1" diameter suction tube and 2" NPT bung adapter included
- Flow rates from 4 to 14 U.S. GPM

### GEAR PUMP



**No. 4UP42.** High-torque, horizontally mounted gear pump is ideal for the transfer of low to medium viscosity pesticides, herbicides and industrial chemicals.

### DIAPHRAGM PUMPS

Positive-displacement, self-priming pumps mount vertically or horizontally. Suitable for stationary or portable usage. Simple, no-seal design allows pumps to operate dry without damage.

**No. 4UP48.** Discharge pressure rating of 25 PSI; this pump handles even the thickest pesticides, down to temperatures as low as 40°F (4°C).

**No. 4UP49.** Handles various viscosities, from light liquids to heavy flowable pesticides. Automatic pressure-relief valve operates at 19 psi for internal bypass. Includes 1/2" x 12", 2-braid, 4-ply EPDM discharge hose and 1" 4-bolt ball valve and spout with reducer.

### GEAR/DIAPHRAGM PUMPS SPECIFICATIONS AND ORDERING DATA

### FLOW METERS AND BATCH/FLOW METERS

| Description | Scienco Model No. | New! Stock No. | List | Each | Shpg Wt. |
|---|---|---|---|---|---|
| **Totalizing flow meter up to 30GPM.** | SEM-20 | **4UP43** | $215.77 | **$205.50** | 4.0 |
| **Totalizing flow meter up to 30GPM. Three calibration modes, operates to 100 psi. Includes 4AA batteries.** | SEM-30 | **4UP44** | 342.03 | **325.75** | 4.0 |
| **Electronic batch/flow meter. Similar to 4UP44, with batch electronics and air sensor designed to shut down the system if air is detected in the meter.** | SEM-30B | **4UP45** | 762.82 | **726.50** | 6.0 |
| **Two-inch flow meter assembly. Includes paddle-wheel flow sensor, electronic LCD flow monitor with three totalizers, 10-foot sensor and power cables, and pipe-mounting kit for 2" PVC installation. Flow rate to 150 GPM.** | SEM-40 | **4UP46** | 901.95 | **859.00** | 6.0 |
| **Two-inch batch/flow meter assembly. Same as 4UP46 with built-in batch electronics.** | SEM-40B | **4UP47** | 1360.80 | **1296.00** | 6.0 |

# DRUM AND BARREL PUMPS AND FUEL FILTER AND CARTRIDGE

## A QUART STROKE PUMP

- **For accurate quart dispensing of oils and other non-corrosive liquids**
- **May also be adjusted for liter measurement.**

urable, rugged design for tough applicaons. Discharge spout has small tube for extra convenience in bottle filling. Includes swing return drain, threaded base (for 2" drum openings) and telescoping suction pipe to fit 15 to 55 gallon drums. Fill-Rite brand (31).

**No. 2P530.** Shpg. wt. 17.0 lbs. List .....$91.05. Each .....**$87.75**

## B VOLUMETRIC HAND PUMP

- **Safe, accurate and economical**
- **Visual, volumetric accuracy**
- **Piston design works like a syringe**
- **Mount directly on drum, container, or tank**
- **Self priming**
- **No switches or levers make it very easy to use**

This ready-to-use pump is equipped with 2" NPS threaded inlet, telescoping suction tube, hose, ball valve, and anti-drip spout. Wetted materials are polypropylene, flourocarbon, with Barex (BP™) chamber. Large viewing window allows customer to monitor the amount of fluid dispensed right down to an ounce. Made in the USA. Fill-Rite brand (381).

***New* No. 4RP90.** Shpg. wt. 8.0 lbs. List....$217.50. Each .....**$208.50**

## C OIL PUMP AND D SUCTION TUBE

- **10 GPM**
- **Rotary hand crank**
- **Installs on barrels, tanks, drums, etc.**

ast iron constructed for dispensing and ansfer pumping fuel oil, lubricating oil, asoline, antifreeze (ethylene glycol) and her non-corrosive liquids. Not for use ith water. Sliding vane type design has rbon vanes. Self-priming. Easy turning nd crank. Delivers 10 GPM at 135 RPM. NPT inlet and 3/4" NPT discharge port. ung adapter included. Buna N seals. equires 1" NPT pipe suction tube (not pplied) or No. 2P094 adjustable suction be listed on this page. Teel brand.

**o. 2P093.** Oil Pump. Shpg. wt. 10.0 lbs. List 9.21. Each .....**$58.10**

### D NPT SUCTION TUBE

Adjusts 22 to 40". Steel construction. For use on Teel Nos. 2P093 and 2P363; Fill-Rite models 1210, 112, F152, FR700B fuel transfer pumps, and other pumps having 1" NPT inlet ports. Teel brand.

**No. 2P094.** Suction Tube. Shpg. wt. 2.8 lbs. List $22.06. Each .....**$16.33**

#### PUMP AND SUCTION TUBE

Includes No. 2P093 oil pump and No. 2P094 suction tube listed above. Packed in separate cartons.

**No. 7P071.** Pump and Tube. Shpg. wt. 12.8 lbs. List $95.60. Each .....**$70.60**

## E POLYPROPYLENE ROTARY PUMP

olypropylene Rotary Pump for dispensing nd transferring chemicals such as alkalis, etergents, mild acids, waxes and water sed chemicals. Self-priming with easy rning hand crank. Lightweight and easy transfer from drum to drum. 1" OD port ze. Delivers 8 GPM @ 135 RPM. Includes bung adapter and 1⅛" OD x 40" long 3-piece polypropylene suction tube. Wetted components; Viton, Teflon, Ryton and 304SS. Ideal for 15, 30 and 55 gallon drums. 4 Ft. pump hose accessory kit can be ordered separately, PVC Hose Kit No. 1N415. See page 3202. Teel brand.

**No. 1N417.** Polypropylene Rotary Pump. Shpg. wt. 4.0 lbs. List $84.50. Each.....**$75.00**

## F FUEL FILTER AND G CARTRIDGE

uel filters remove sediment and other purities to ensure clean fuel for proper eration of machinery. Designed for use ith gasoline, kerosene and diesel fuel, as ell as oils up to 10-weight. Thoroughly lters impurities down to 20 microns and ndles flows up to 15 GPM. Max. pressre of 150 PSI. Cast-iron head and domed eel shell offer sturdy construction and akproof performance. For connection -line to 3/4" NPT ports. Convenient drain ug releases water and sediment settled bottom of cavity. Cartridge can be placed with fuel filter in-line. Filters come with one cartridge. Order replacement cartridges below. 12⅞L x 4⁵⁄₁₆W x 3⅝" Dia.

**No. 2P695.** Fuel Filter and Cartridge. Shpg. wt. 5.7 lbs. List $91.18. Each .....**$79.60**

#### REPLACEMENT CARTRIDGES

Pleated 20 micron paper replacement cartridges are impregnated with a phenolic resin, formed around a tin steel core. Buna N gasket provides a positive seal between inlet and outlet ports.

**No. 2P696.** Replacement Cartridge. Shpg. wt. 0.4 lbs. List $9.64. Each .....**$8.70**

# DRUM AND BARREL PUMPS

## [A] RYTON® ROTARY DRUM PUMP

Ryton constructed pump for dispensing and transfer-pumping chemicals such as esters, bases and hydrocarbons compatible with Ryton and Viton. Self-priming. Delivers 7.5 GPM at 135 RPM. 1" OD stainless steel discharge tube. 1¼ OD x 40" long. 3-piece stainless steel suction tube. 2" Chemical resistant Epoxy® coated bung adapter. Ryton® vanes. Viton® lip seal and O-rings. Teel brand.

**No. 4P908.** Ryton Rotary Drum Pump. Shpg. wt. 8.0 lbs. List.....$147.93.
Each.....**$134.05**

## [B] STAINLESS STEEL ROTARY DRUM PUMP

An investment cast stainless steel construction with Teflon O-rings and seals make it ideal for use in dispensing and transferring chemicals and liquids including acids, acetones, alcohols, trichloroethylene, solvents, photographic chemicals, etc. compatible with stainless steel and Teflon. Carbon vanes and a cast rotary hand crank provide smooth operation and deliver 10 GPM at 135 RPM. Unit includes 3/4" NPT stainless steel discharge spout, 1" NPT x 40"L stainless steel suction tube and bung adapter for easy adaptation to barrels and drum.

***New*** **No. 4RC45.** Stainless Steel Rotary Drum Pump. Shpg. wt. 16.0 lbs. List.....$888.17.
Each.....**$711.00**

## [C] HIGH FLOW OIL DRUM PUMP

Rugged cast-iron construction with Buna seals for dispensing and transfer of fuel oil, lubricating oil, gasoline, antifreeze (ethylene glycol), vegetable oil and other noncorrosive liquids. Carbon vanes and cast rotary crank handle provide smooth operation and deliver 15 GPM at 135 RPM. Unit includes 1" NPT discharge spout, 1" NPT x 40"L suction tube and bung adapter for easy adaptation to barrels and drums.

***New*** **No. 4RC46.** High Flow Iron Rotary Drum Pump. Shpg. wt. 18.0 lbs. List.....$97.07.
Each.....**$77.70**

## [D] HIGH FLOW DRUM PUMP

- **27 GPM @ 120 strokes per minute**

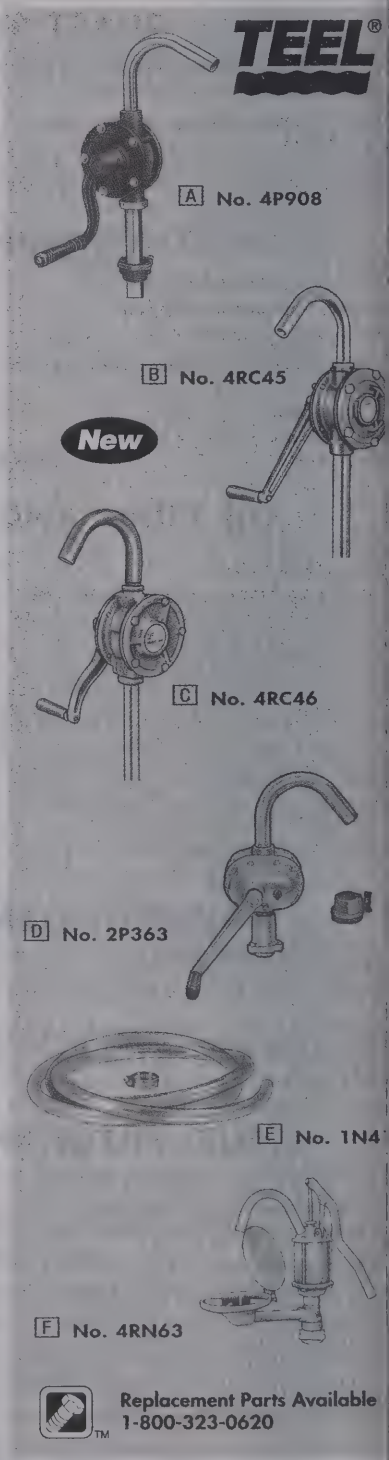
Die cast aluminum pump for dispensing and transfering fuel oil, kerosene, gasoline, anti-freeze (ethylene glycol), and other non-corrosive liquids compatible with pump materials of construction. Not for use with water. Has highly machined steel rotors and separate gear box. Easy turning hand crank. Self-priming. Has 1" NPT cast iron inlet adapter with #60 mesh polyethylene suction strainer. 1" NPT discharge port. Requires 1" NPT pipe suction tube (not included) or No. 2P094 adjustable suction tube, listed separately. Buna N seals. Teel brand.

**No. 7P085.** Pump and Tube. Shpg. wt. 16.8 lbs. List $220.60. Each.....**$177.25**
**No. 2P363.** High Flow Drum Pump. Shpg. wt. 14.0 lbs. List $218.22. Each.....**$177.00**

## [E] PVC HOSE KIT

PVC tubing with a 1" ID x 4 feet long. 1¼" OD. For use with waxes, detergents, solvents and other liquids compatible with PVC. Comes with a hose clamp to fit tubing. For use with Nos. 1N417, 2P093, 2P363, 4P908, and 1N423.

**No. 1N415.** PVC Hose Kit. Shpg. wt. 1.2 lbs. List.....$21.50.
Each.....**$15.73**



## [F] CAST-IRON LEVER ACTION PUMP

Durable pump comes complete with covered drip tray which returns spills back to drum. 1 pint per stroke fits 2" NPT bung. For motor oils, gear oils, and many other viscous liquids up to 2000 CPS. Teel brand.

***New*** **No. 4RN63.** Lever Action Pump. Shpg. wt. 14.0 lbs. List.....$138.55.
Each.....**$117.80**

# LEVER ACTION PUMP AND BARREL PUMPS

## HIGH VISCOSITY LEVER ACTION PUMP

TEEL®

No. 1N419

elivers 32 ounces per stroke. Comes with telescoping intake tube, 2" bung adapter, elrin piston, die cast pump body, neorene and ethylene propylene seals, high ngle discharge spout with screen and a ormal curved discharge spout. Can be used for pumping paraffin, motor oil, gear oil, cutting oils, and many other viscous lubricants. Teel brand.

**No. 1N419.** High Viscosity Lever Action Pump. Shpg. wt. 7.0 lbs. List $74.50. Each.....**$65.55**

## BLACKMER BARREL PUMPS

ast-iron constructed pump designed for ransferring or dispensing oils, solvents nd other non-corrosive liquids. This self-riming pump is designed for installation n barrels, drums or tanks.

**M Approved General Duty Transfer Pumps**

ransfer model is offered with a 3/4" x 8' nti-static hose, spout, non-sparkling alu-inum nozzle, flame arresting baffle and acuum breaker. FM model includes a tele-coping suction pipe with strainer basket.

**eneral-duty Transfer Pump.** These rugged nodels have earned a world-wide reputa-ion for durability and longevity. Typical pplications include dispensing of light to nedium weight cutting oils, solvents and uels.

**leavy-duty Transfer Pumps.** These larger eavy-duty models offer increased outputs nd are generally used for rapid transfer of uel, lube oils, and non-corrosive industri-l process fluids.

**leavy-duty High Volume Transfer Pumps.** eature gear drive for fast, high volume utput of light liquids. Commonly used for efueling construction equipment and off-oad vehicles from mobile supply tanks.

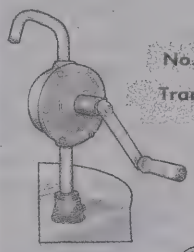
**Applications:**

**FM Approved Pumps (No. 4RN53):** Handle Class 1 and Class 2 flammable and combustible liquids like, naphtha, solvents and thinners.

**Dispensing Type Pumps (Nos. 1P667, 4RN54, 4RN56):** Liquid dispensing-pumping petroleum products, solvents, coolants or curing agents from barrels or drums into smaller containers for convenient handling, sales, or small quantity use.

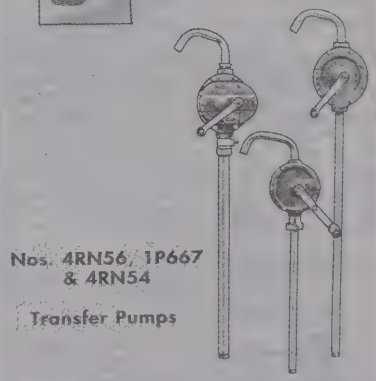
**Transfer Type Pumps (Nos. 4RN52, 4RN55, 4RN57):** Liquid transfer-moving fuels, solvents, commercial and process liquids from drums to other large tanks with hose and nozzle, as in refueling diesel or gasoline powered vehicles or equipment.

**FM Approved General-duty Transfer Pump** No. 4RN53 includes pump, grip, 40" pipe, bung adapter, and spout.



**Dispensing-type Pumps** Nos. 1P667, 4RN54, and 4RN56 include pump, grip, crank, 40" pipe, bung adapter, and spout.

**Heavy-duty Transfer Pumps** Nos. 4RN52, 4RN55, and 4RN57 include pump, grip, crank, 40" pipe, bung adapter, spout, and 8" rubber hose.



**Repair Kits.** Nos. 4RN47, 4RN48, and 4RN49 include vanes, springs, gaskets, packing, and nut.

**Drip Pan Kits** Nos. 4RN50 and 4RN51 hold container during dispensing and include built-in bung adapter and drain return to barrel.

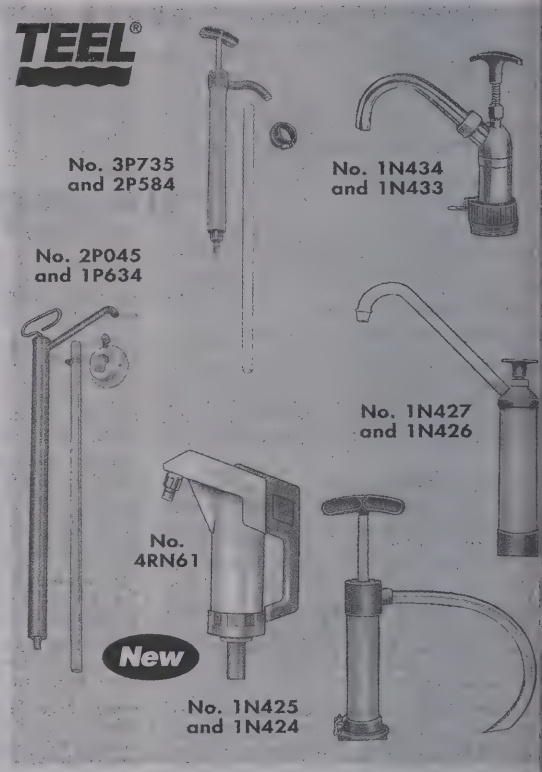
# PAIL, DRUM AND BARREL PUMPS, ADAPTERS AND LOCK KIT

**Hand operated piston pumps** are for industrial use, farm, shop, anywhere liquids need to be transferred out of 5, 15, 30, and 55 gallon drums. All pumps come standard with a 2" bung adapter. Teel brand.

**Steel Pumps, Nos. 1P634 and 1N433.** For use with degreasers, waxes, light detergents and other chemicals compatible with polyethylene and steel. No. 1P634 comes with a 22" long polyethylene extension tube and pumps 8 oz. per stroke. No. 1N433 comes with a full length pump body and pumps 16 oz. per stroke.



**Stainless Steel Pumps, No. 2P045 and 1N434.** For use with many acids such as acetone, toluol, trichloroethylene, solvents, photographic chemicals, etc. compatible with 316 stainless steel and Teflon. No. 2P045 comes with a 22" long Teflon extension tube and pumps 8 oz. per stroke. No. 1N434 comes with a full length pump body and pumps 16 oz. per stroke.

**PVC Acid Pumps, No. 2P584 and 3P735.** Can be used with water, chlorine, solvents, degreasers, anti-freeze and other chemicals compatible with pump components. No. 2P584 drip-resistant design ideal for light acids; pumps 8 oz. per stroke and also fits a 3/4" thread. No. 2P584 comes with a polyethylene extension tube. No. 3P735 is an all PVC 38" long body and delivers 22 oz. per stroke.

**PVC Maintenance Pumps, Nos. 1N424 and 1N425.** Ideal for pumping into other containers and can be used with waxes, degreasers, floor cleaners, glass cleaners, chlorines and many other chemicals compatible with pump component materials. No. 1N424 delivers 8 oz. per stroke and fits a 3/4" thread; comes standard with a 0.621 OD x 22" PVC discharge hose and a polyethylene extension tube. No. 1N425 has an all PVC 38" long body and comes standard with a 0.621 OD x 36" PVC hose; pumps 22 oz. per stroke.

**Polypropylene Lever Pump, No. 4RN61.** A reliable, durable lightweight pump with high chemical resistence. Delivers one pint per stroke. Fits 15,30, and 55 gallon drums with standard 2" NPT. Viton seal PE piston. No-drip discharge nozzle. Self-priming. For oils, detergents, lubricants, water, antifreeze and many others.

**Polypropylene/PE Pumps, Nos. 1N426 and 1N427.** Polypropylene body, polyethylene internal parts and extension tube. Spout can be rotated to prevent dripping. Comes standard to fit 3/4" and 2" IPS drum openings. Also includes adapters to adjust stroke depending on unit from 2, 4, 6, 8, 12, or 16 ounces. Fits 5, 15, 30 and 55 gallon drums. Flexspout for 5 gallon pails included. No. 1N426 pumps 8 oz. per stroke. No. 1N427 pumps 16 oz. per stroke.

## DRUM AND PAIL ADAPTERS

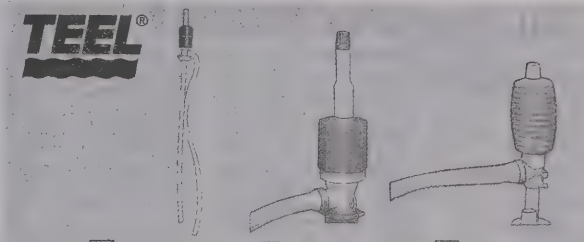
Drum adapter No. 1N418 converts 2" Buttress drums to accept 2" IPS bung adapters, commonly supplied with pumps. Pail adapters are for use with the following barrel pumps: Nos. 1P634 and 2P045, above. No. 4P071 permits use on 5 gallon pails with 1¾ " male threaded opening. No. 4P072 permits use on 2⅝" flexspout openings. No. 1N416 permits use on 2⅝" flexspout openings to be used with pump Nos. 2P584, 1N424.

| Adapter Type | Permits Use On | For Pumps | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Pail** | 2⅝" Flexspout openings | 2P584 & 1N424 | **1N416** | $10.75 | **$5.62** | 0.5 |
| **Drum** | 2" Buttress drums using 2" IPS bung adapters | | **1N418** | 16.00 | **13.36** | 0.5 |
| **Pail** | 5 Gallon pails with 1¾" male threads | 1P634 & 2P045 | **4P071** | 7.00 | **6.60** | 0.3 |
| **Pail** | 2⅝" Flexspout openings | 1P634 & 2P045 | **4P072** | 7.00 | **5.97** | 0.1 |

## PUMP LOCK KIT

Pump Lock Kit can be used on Stock Nos. 1P634 and 2P045 to prevent unauthorized use of pump while it is still in the drum. Installs in just seconds. To be used with Lock No. 4T085.

**No. 1N432.** Shpg. wt. 0.2 lbs. List $15.00. Each ..... **$12.51**



*If we don't have a pump for it, chances are it can't be pumped.*

# SIPHON AND DRUM PUMPS

## POLYETHYLENE SIPHON PUMPS

ellows action allows for quick and easy transferring or empty-ıg of 5, 15, 30 and 55 gallon drums. Can be used for water based uids, mild corrosives, detergents, waxes, soaps, antifreeze and ther liquids compatible with polyethylene. Pumps to higher lev-ls, siphons to lower levels. Nos. 1N420 and 1N421 (for use on rums) come with a standard 2" IPS bung adapter. No. 1N422 omes with a standard adapter to fit 5 gallon pails with plastic ull out spouts. Teel brand.

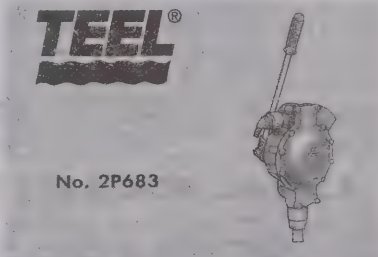
| y | Max. GPM | For use on | Discharge Tube Size (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| A | 5 | 15, 30 & 55 gal. drums | 46 | **1N420** | $13.75 | **$8.97** | 1.0 |
| B | 7 | 15, 30 & 55 gal. drums | 46 | **1N421** | 19.90 | **16.89** | 1.0 |
| C | 2 | 5 gal. pails | 22 | **1N422** | 5.26 | **3.69** | 0.5 |

## PVC HEAVY-DUTY SIPHON PUMP

**and operated,** only a few strokes starts the phoning action. Delivers 7 GPM. Pumps phill and siphons downhill. Can be used ith chemicals compatible with PVC, educing the possibility for corrosion or rust. Comes with a 2" PVC bung adapter and 4 feet of PVC discharge tubing. Fits 15, 30 and 55 gallon drums. Teel brand.

**No. 1N423.** Shpg. wt. 3.0 lbs. List $55.75.
Each ..... **$44.60**

## THERMOPLASTIC HAND DRUM PUMPS



**ouble-action, self-priming piston type drum umps** deliver up to 17 gallons per 100 rokes.

**vailable in glass-filled red nylon and glass-lled black polypropylene pump bodies.** Nylon ump is resistant to most lubricants, oils, etergents, and aromatic materials. olypropylene pump is resistant to most rganic acids, plating solutions, alcohols, id water soluble inorganic chemicals.

**emicals being pumped must be compatible ith pump component materials.** No. 2P683 as nylon, stainless steel, Viton, Teflon and Nitrile parts with stainless steel hardware. No. 2P684 has polypropylene, stainless steel, Viton, Teflon, and nitrile parts with stainless steel hardware.

**Pumps come complete with** 3/4" discharge port, 5/8" eight-foot hose (No. 2P683 has nylon hose; No. 2P684 polyethylene hose) and no-lead style nozzles. 2" bung adapter and 40" suction tube included. Teel brand.

| Material | pH Range | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Nylon | 7-9 | 2P683 | $165.73 | **$106.20** | 11.0 |
| Polypropylene | 4-11 | 2P684 | 165.75 | **106.25** | 7.0 |

## HEAVY-DUTY DRUM PUMPS

**mp tubes and motors are separate and inter-angeable.** Easy to assemble, and disas-mble for maintenance and service. Pump be has fewer parts than other drum mps. Sealless design allows pump to run y up to 30 minutes.

**terchangeable electric and air motors.** eavy-duty 115VAC electric motor has eather-protected cover, 16 ft. power rd. Rotary air motor has exhaust muf-er. 1/8" Air inlet.

**lypropylene, stainless steel pump, or Kynar bes.** Polypropylene tube has Tefzel mpeller, Viton vapor barrier, and arpenter 20 shaft. Stainless steel tube has efzel impeller, Teflon vapor barrier, and 6 stainless steel shaft. Kynar tube has efzel impeller, PTFE vapor barrier, and astelloy shaft. All pump tubes have 1" ip on hose discharge port.

For complete pump assembly, select a pump tube and motor that fit your application.

**For use with nonflammable liquids compatible with pump component materials.**

# OIL TRANSFER AND POLYETHYLENE AND LIQUID VACUUM PUMPS

## OIL TRANSFER FLEXIBLE IMPELLER PUMPS

Versatile flexible impeller pumps can be used for many applications including oil and transmission fluid transfer in cars, trucks, farm equipment and center pivot irrigation systems, and water pumping. Pump primes itself to 7.5 vertical feet. Maximum flow is 3.8 gpm. Maximum head is 40 feet (17 psi). Buna-N impeller and lip seal, stainless steel shaft. Dual port design allows inlet and outlet to connect to 3/8" NPT(M) or 3/4" female garden hose fittings. Runs smoothly with a thermally protected motor. 4UN25 has 6' cord. 4UN24 has 12" leads. 4UN26 includes an 8 ft. cable with battery clips and on/off/reverse switch enable pump to be used to fill or empty tank without moving hoses. Liquid temperature range is 40°F to 185°F. Use with liquids compatible with the materials of construction. Not for use with gasoline or other flammable liquids. Do not use in a flammable environment. Not for potable water systems. SHURflo brand.

| Voltage | Prime (Ft.) | Flow Rate in GPM 0 Ft. | 11 Ft. | 23 Ft. | Description | Shurflo Model | New! Stock No. | List | Each | Shpg. Wt. |

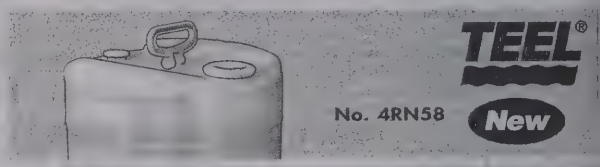
## OIL CHANGE PUMP SYSTEM

Makes a messy job clean and easy. Install oil probe in the engine oil dipstick tube, attach the battery clips, and flip a switch. Oil is safely removed and stored in the easy to carry 3.5 gallon container. Includes flexible impeller pump with thermal protection, Buna-N impeller and seals, suction and discharge hose, on/off/reverse switch, and 8 ft. cable with battery clips.

Do not use with gasoline or other flammable liquids. Do not use in flammable environment. 20 psi maximum pressure. SHURflo brand.



| Voltage | Prime (Ft.) | Shurflo Model | New! Stock No. | List | Each | Shpg. Wt. |

# TRANSFER PUMPS

## TRANSFER PUMPS

- Heavy-duty pumps handle many non-flammable fluids compatible with pump component materials: some acids, alkalies, chlorines, and photographic chemicals. Check chemical compatibility before using. Handles fluids up to 500 SSU. Not for gasoline, kerosene, and diesel fuel
- 5 ft. discharge tubing included; ready to use
- Pump intake tube is 35½" long and fits standard 2" drum/barrel bung adapter
- Electric pumps (Nos. 3P652, 3P680, 1N429 & 1N431) include an 8 ft. SJT 16/3 power cord. Intermittent-duty, except No. 3P680 which is continuous-duty
- Air drive units include No. 4Z411 Gast air motor, operate at 20 to 80 PSI inlet pressure, and require lubricated/filtered air supply. No. 7P072 includes pump, air motor, filter, regulator and lubricator. When installed in accordance with applicable codes and practices, air driven pumps can be used with flammable fluids

## AIR-OPERATED FLUID TRANSFER PUMPS

- Very low air consumption.
- Extremely efficient and reliable
- Low noise levels
- No lubrication required
- 2" Bung adapter included
- Lightweight design

Teel Oil Pumps are designed for use with motor oil, gear oil, hydraulic oil, transmission fluids and many other oils. Carbon steel shafts with zinc foot valve and stainless steel ball valve. **No. 4RN59 is a 1:1 Ratio Pump.** It delivers 10.6 GPM and is ideal for direct liquid transfers up to 1000 centipoise. **No. 4RN64 is a 3:1 Ratio Pump** which delivers 5.6 GPM and is ideal for central piping systems with long or short runs and also for direct transfer of fluids up to 2500 centipoise.

**1:1 Stainless Steel Fluid Pump**

**No. 4RN60** is designed to handle antifreeze, mild solvents, water-based fluids and varnishes. It is ideal for high volume short runs and delivers 10.6 GPM and comes complete for use in 55 gallon drums, or it can be wall or tank mounted.

# SUBMERSIBLE UTILITY PUMPS

## 1/4 HP SUBMERSIBLE UTILITY PUMPS

This commercial quality pump has a non-clogging Vortex impeller that passes 1/2" solids such as leaves, pebbles and other debris. The 3/4" adjustable discharge connects to a standard garden hose, while 1¼" discharge allows large volumes of water removal. Pump drains water down to 1/8" of surface. Features a 1/4 HP, 115V, 60Hz, single phase, oil-filled motor with overload protection. Built-in handle makes pump easy to carry.

## SUBMERSIBLE UTILITY PUMPS

TEEL®

New

47013 E85176

No. 4RJ35

Submersible utility pumps designed for intermittent dewatering of shallow flooded areas such as basements, boats, ponds, stock tanks, window wells etc. Removes standing water down to 3/16" depth. For use with nonflammable liquids compatible with materials of construction. Easily converted to automatic operation with use of No. 4RK04 mechanical float switch. Bottom suction design has screened inlet that prevents debris from entering pump.

Water jacket design cools motor as wate passes by to 1" NPT discharge por Includes 3/4" nylon garden hose adapte ABS corrosion-resistant plastic shell an bottom with nylon top. Noryl impelle Die-cast zinc motor housing, 416 stainles steel shaft, Buna-N lip and O-ring seals.

115V, 60Hz, single-phase, oil-filled moto with overload protection and 8-foot, prong plug-in grounded power cord. 9⅛ x 5⅞" dia. Teel brand.

## 1/2 HP PORTABLE SELF-PRIMING PUMP

TEEL®

Replacement Parts Available 1-800-323-0620

**Teel 1/2 HP portable self-priming pump** can be used anywhere there is 115V AC/DC power. For filling swimming pools, watering livestock, boat bailing, watering lawns, high pressure washing, pumping out flooded basements. Capable of boosting waterline pressure by 40 PSI. Max. water temp: 120°F. Pump housing is solid one-piece aluminum, with priming port in handle. Rustproof Valox® 420 impeller, heatproof shaft seal and volute seal of Buna N. Cold rolled steel motor shaft, permanently lubricated and shielded ball bearings, 115V AC/DC series wound motor. Max. amp 8.0, external brush holders, three rubbe mounting feet. 9½L x 8H x 5¾"W. Inl and outlet ports 3/4" NPT. Comes with tw 3/4" garden hose adapters, plastic inl strainer and 8 ft. 18/3 SJTO cord wi 3-prong grounding plug. For intermitte use with nonflammable liquids compatib with pump component materials. Te brand.

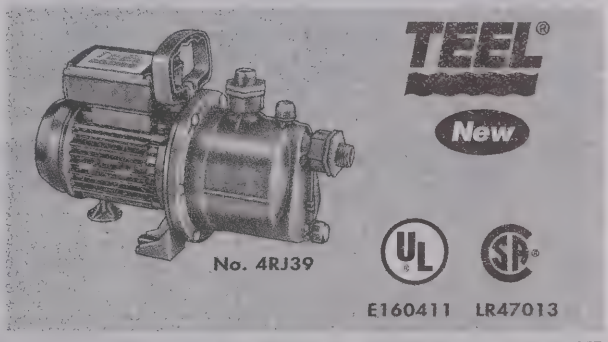
# DRAIN PUMP AND UTILITY PUMP KITS AND SUMP PUMP

## DRAIN PUMP KIT

Drain pump kit removes water from laundry trays, sinks, wet bars, or where gravity drainage is impractical. Compact kit installs easily. Maximum fluid temperature: 130°F. Includes No. 2P547 UL Listed cast-iron pump (see above), with special cord seal; 8 gallon capacity, 16" Dia. x 15½"H sealed polyethylene basin and lid, internal 1½" discharge pipe to lid, and check valve. Nonclogging vortex impeller passes solids 1/2" in diameter and requires no screen on inlet pipe. Comes complete with 1¼" or 1½" slip x slip union full flow check valve. Passes 10 ft. stack test. APMO Approved. Zoeller brand (105).

**No. 2P778.** Shpg. wt. 31.0 lbs. List .....$242.00.
Each .....**$208.75**



## 1/2 HP PORTABLE SPRINKLER/UTILITY PUMP

Self-priming pump ideal for lawn sprinkling. Draw from city water or from lakes, ponds and streams. Can boost city water pressure up to 30 PSI for washing cars, boats, and farm equipment. Corrosion-resistant thermoplastic pump housing. 1" BSP threaded discharge and suction. On-off switch, convenient carrying handle, and 2 garden hose adapters included. 1/2 HP TEFC motor, 115V 60Hz, single-phase, overload protection, and 6-ft. grounded power cord. Dimensions: 14 L x 8.2 H x 6.5" W. UL listed (E160411). CSA (LR47013). Teel brand.

**New No. 4RJ39.** Shpg. wt. 16.0 lbs. List .....$205.38.

## GARDEN HOSE UTILITY PUMP KIT

Puddle Gulper™ suction strainer pumps down to 1/8" standing water. Threaded fitting connects strainer to garden hose. Includes pump, 6-ft. suction hose, and suction strainer. Ideal for emptying waterbeds, aquariums, pool covers, sinks, etc. Extra impeller, cam ring, and o-ring included for quick repairs. For use with nonflammable liquids compatible with pump component materials. Do not use in flammable or explosive atmospheres. Self-priming pump has corrosion-resistant body. Pump is not submersible. Ports have 3/4" OD threaded fittings for garden hose. Air-cooled, enclosed brush-style motor has thermal overload protection and 6-ft. grounded power cord. UL listed (E61535) and CSA approved (LR47013). Teel brand.

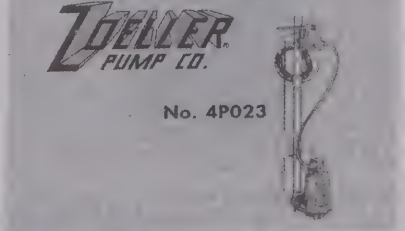
## AUTOMATIC HIGH TEMPERATURE SUMP PUMP

Check valve, conduit, cable, motor windings, gaskets and thermal overload meet NEC requirements for 200°F service. Heavy duty cast iron construction. 1½NTP discharge, check valve included. Float-operated mechanical switch does not contact water. 15 ft. electrical cord. 3 ft. conduit length.



**Applications:** Dewatering with up to 1/2" diameter solids near boiler dump valves and other commercial industrial uses. Features stainless steel screws, guards, handles, control arm and seal assemblies.

**NOTE:** Basin material must be designed for the elevated temperatures anticipated.

**Driver:** 1/2 HP, 115V, 60 Hz. Single phase. 9.4 Amp oil filled PSC motor. Max. "On" point: 24"; "Off" point: 3". Measures: 12H x 10¼"W. Zoeller brand (M3098).

**No. 4P023.** Shpg. wt. 62.0 lbs. List .....$639.10.

## DRILL-DRIVEN PUMP KIT

**Powered by user's 1/4 or 3/8" electric drill—** drains oil from auto, marine and garden equipment engines, removes water from aquariums, washers, sinks, pool covers, window wells, etc., transfers chemical solutions compatible with pump materials. For use with nonflammable liquids compatible with materials of pump construction. Selfprimes 8 to 10 ft. Delivers up to 200 GPH at 2000 RPM. Maximum pressure 20 PSI. Liquid temperature 40 to 120°F. Phenolic plastic body, Buna N impeller, seal, and O-ring, 1/4" diameter shaft. 3/4" male hose thread inlet & outlet. Kit includes pump, 30" oil probe tube, and 36" discharge hose. Drill not included.

**No. 1P866.** Shpg. wt. 1.2 lbs. List .....$16.52.
Each .....**$11.36**

# RESIDENTIAL AUTOMATIC UPRIGHT SUMP PUMPS

- For intermittent-duty, residential applications
- Top screened inlet reduces clogging
- Thermoplastic, cast iron or cast bronze construction
- Motor not submersible in water
- Fit 18" diameter x 24" deep or larger sump pits
- Automatic adjustable float operation
- UL Listed (E85176); CSA Certified (45237)

**Applications:** For emptying residential sump pits, laundry drainage, and dewatering flooded areas. Intended for use with nonflammable liquids compatible with materials of construction. Maximum liquid temperature should not exceed 140°F (120°F for No. 3P611). Pumps come ready-to-install, completely assembled except for float rod and float which are packed in carton with pump.

**Driver:** Split phase, NEMA 48K frame, 115VAC, 60 Hz, single phase sump pump motors. Automatic thermal overload protection. 3 Prong, 18/3 grounded power cords. Pump bearing is bronze, oil impregnated. 2-Pole switch provides positive on-off action. On-Off levels are fully adjustable. Teel brand.

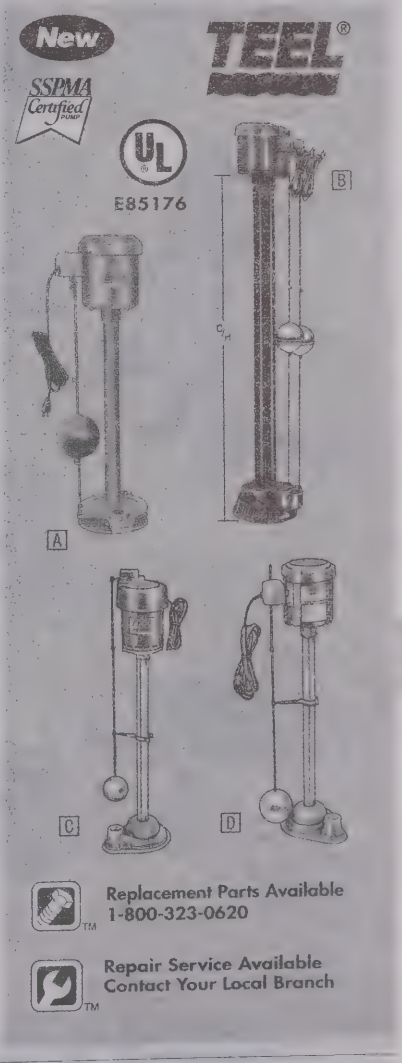
## SUMP PUMP SWITCH

**Replacement switch** for Teel upright sump pumps Nos. 3P610B, 3P611B, C, D, & E, 3P612B & C, 4P899, 4P900, 4P901 and 4P902. Corrosion resistant plastic body with nylon operating lever. Rated 5 Amps 250 VAC; 10 Amps, 125 VAC, 1/2 HP, 12 VAC. UL Listed, CSA Certified.

**No. 1R363.** Shpg. wt. 0.2 lbs. List .....$31.00. Each **$16.35;** Lots 12.....**$13.27**

*If we don't have a pump for it, chances are it can't be pumped.*



# HEAVY-DUTY UPRIGHT SUMP PUMPS

## STAINLESS STEEL, BRONZE, AND CAST IRON SUMP PUMPS

- 1¼, 1½ and 2" NPT discharge
- Suitable for hot water applications to 200°F
- All metal construction
- Automatic operation
- Clog resistant semi-open impellers
- Heavy-duty Square D switch with TEFC motor models.
- Nos. 4RC20 and 4RC21 have open drip-proof motors
- Stainless steel shaft, journal and hardware

**Applications:** For pumping clear water or effluent from wet pits, loading docks, boiler dump pits, below ground vaults, elevator pits, and other residential, commercial, and industrial applications. Clog resistant semi-open impellers. 2" NPT models handle 3/4" solids. For use with nonflammable liquids compatible with pump component materials. Sump pit of not less than 18" diameter and 24" deep. 7" Minimum cut-in depth. Check valve recommended. SSPMA Certified; UL Listed (E85176).

**Driver:** 1/3 or 1/2 HP Dayton 1725 RPM, open dripproof or TEFC continuous duty motors, 115V, 60 Hz, split phase, automatic reset thermal overload. Includes 8 ft. 16/3 cord. Double-shielded ball bearings at both ends.

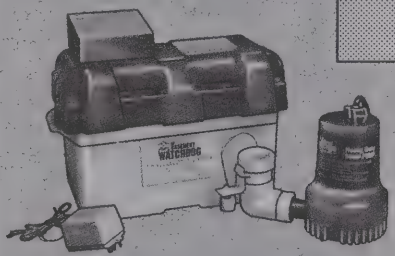
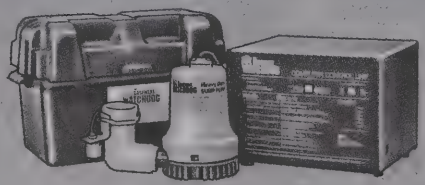
# BATTERY BACK-UP SUMP PUMPS



New

THE BASEMENT WATCHDOG



No. 4RC50
Basement Watchdog
Emergency Sump Pump

No. 4P050
Basement
Watchdog
Special

No. 4RC49
Basement Watchdog
Computer-Controlled
AC/DC Sump Pump

Back-up sump pumps are battery-powered 12VDC sump pumps with battery chargers. Provide emergency back-up service when an electrical interruption or mechanical failure prevents main sump pump from operating, or when water inflow exceeds main pump capacity. All units are for use with nonflammable liquids compatible with pump component materials.

## BASEMENT WATCHDOG EMERGENCY SUMP PUMP SYSTEM

- **Pumps 1000 GPH @ 10′ lift to empty the sump pit rapidly**
- **Compact pump fits even in small or narrow sump pits**
- **User-friendly control panel lights up with a warning and describes what to do for easy maintenance**
- **Easy to install**

**No. 4RC50 Emergency Sump Pump System** monitors battery, power and pump activity and sounds an alarm when it detects the following situations: the battery power is low, the battery fluid is low, the pump was activated, the AC power was interrupted. Includes an independently-mounted micro reed float switch which only needs to move 1/4" to activate the pump. Requires No. 4RC47 Emergency Standby Sump Pump Battery for up to 6 hours of continuous pumping power (sold separately).

## BASEMENT WATCHDOG SPECIAL

- **1.6 Amp maintenance charger. Controller indicates when pump is activated or blocked, power is interrupted, battery is discharged, or fluid is low**
- **Integral battery case with cover (battery not included)**
- **2300 GPH submersible pump (1730 GPH @ 10 ft. total head draws 10 amps)**

**General: No. 4P050** requires No. 4P052, 95 amp deep cycle battery or better. Includes battery fluid level sensor, adjustable micro reed float switch, and battery cable. Safety fuse protects pump if clogged.

Pump materials: Plastic pump with stainless steel pump shaft, Rulon seals, and heavy-duty 12VDC permanent magnet motor. 1½" FNPT PVC outlet. Basement Watchdog Special brand (BWS-12A).

## BASEMENT WATCHDOG COMPUTER-CONTROLLED AC/DC SUMP PUMP

- **20 amp charge computer-operated controller tests battery and pump automatically everyday**
- **Indicates with audible and visual alarm when battery fluid is low, battery is discharged or defective, power failure, pump failure, pump was activated, battery hooked up in reverse, or safety fuse has blown**
- **Indicates number of hours of pumping energy remaining in battery**
- **3500 GPH submersible pump (2200 GPH @ 10 ft. total head draws 12 amps)**

**General: No. 4RC49** has a computerized controller and sensor to battery cell that accurately determines battery and pump conditions. Adjustable micro reed float switch. Requires No. 4P051 7.5 hr. standby deep cycle battery (sold separately on page 3213).

Pump materials: Plastic pump with stainless steel pump shaft, Rulon seals, and heavy-duty 12VDC permanent magnet motor. 1½" FNPT PVC outlet. Basement Watchdog brand (BWD12-120).

# BATTERY BACK-UP SUMP PUMPS

## BASEMENT WATCHDOG WATER ALARM

- **Solid state circuitry is extremely sensitive and reliable**
- **Detects water only 1/32" deep when the alarm is placed on the floor**
- **Sensor has a 6 ft. wire so it can be extended into a sump pit, or mounted on a wall and stretched to another location (100+ ft. of wire may be added to the sensor)**
- **Loud 110dB alarm can be heard throughout the house**
- **Battery-saver feature keeps batteries fresh longer from 24 to 48 months**

inimize the risk of water damage with this early warning sys-m. For installation in sump pits or near areas requiring water onitoring like hot water heaters, air conditioners, near washers under sinks. Requires a 9V alkaline battery (not included).

**ewNo. 4RC48.** Shpg. wt. 0.3 lbs. List $20.00. Each.....**$12.95▲**

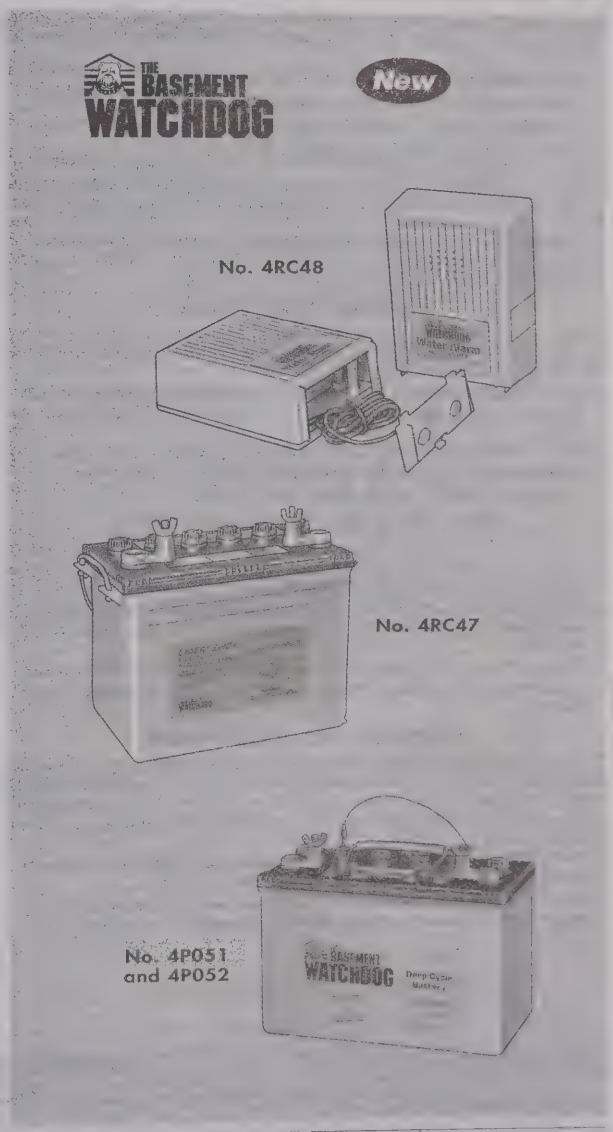
## EMERGENCY SUMP PUMP BATTERY

his is the matching battery for the No. 4RC50 emergency sump mp system, and is not recommended for use in other Basement atchdog pump systems. It accommodates the battery cap pro-ded in the Emergency Sump Pump to measure the fluid level of e battery. Deep cycle plates provide power for 6 continuous ours of pumping time. Standby construction allows 5 to 7 years service. Threaded marine terminals for easy hookup. 11.34L x 85W x 10"H. Rope carrying handles. One year free replacement arranty, Requires 4.2 qts. of battery acid (not included).

**ewNo. 4RC47.** Shpg. wt. 25.0 lbs. List $78.00. Each.....**$67.00▲**

## BASEMENT WATCHDOG STAND-BY DEEP CYCLE BATTERIES

**pplications:** For powering battery-powered 12VDC back-up sump mps. Excellent operating and charging characteristics. May so be used for running RV and marine accessories, trolling otors or for starting gasoline and diesel engines. And used in any uninterruptible power supply (UPS) systems.



**onstruction:** Thick, dense lead plates with fiberglass mat separa-rs. Polypropylene container with heavy-duty dual purpose arine terminals and convenient carrying handle. Screw-type ll caps match Basement Watchdog sump pump fluid sensor. OTE: These batteries are shipped with completely dry, hermet-ally sealed cells. Safe and UPS shippable. User must supply cor-ct battery acid, available locally at most automotive supply ops. Basement Watchdog brand.

**o. 4P052.** Features 520 cold cranking amps at 0°F, 95 amp hours id a reserve capacity of 140 minutes. Requires 4.2 qts. of battery id (not included). Battery Council International (BCI) dimen-on group size No. 24. 10¾L x 6¾W x 10"H. Basement Watchdog and. (M24-6)

**o. 4P052.** Shpg. wt. 28.0 lbs. List $101.30. Each.....**$82.35▲**

**o. 4P051.** Features 680 cold cranking amps at 0°F, 140 amp ours and a reserve capacity of 180 minutes. Requires 6.0 qts. of ttery acid (not included). BCI No. 30H, 13L x 6¾W x 10"H. asement Watchdog brand (30HDC140S).

# RESIDENTIAL SUBMERSIBLE SUMP PUMPS

Submersible sump pumps are ideal for emptying residential sump pits, swimming pools, laundry facilities and dewatering flooded areas.

- **For intermittent-duty, residential applications**
- **Top screened inlet reduces clogging**
- **Maximum liquid temperature: 120°F**
- **Use with nonflammable liquids only**

Driver: Shaded pole 115 VAC, 60 Hz, single-phase motors, oil-filled and sealed for cooler running and improved lubrication. Carbon steel shaft, Buna-N lip seal and O-ring or Buna-N, carbon/ceramic shaft seal. Permanently lubricated sleeve bearings, automatic thermal overload protection, 3-prong, 18/3 grounded power cords. Motor amp draw: 1/6 HP - 5 amps, 1/3 HP - 8 amps (except No. 2P088 - 10 amps), 1/2 HP - 10 amps.

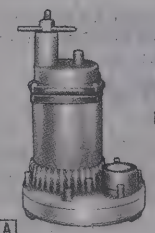
## ECONOMY SUMP PUMPS

An economical solution for residential applications. constructed of glass-filled thermoplastic or polypropylene housing and base that will not rust or corrode.

- **Nos. 2P088, 4P903 and 4P904 have tethered float switch for automatic operation. Fits into sump pit 14" diameter or larger.**
- **Nos. 2P087 and 2P556 are manual operation. Can be converted to automatic operation with the use of No. 4RK15 or 4RK29 mechanical float switch.**

## HEAVY-DUTY CAST IRON SUMP PUMPS

Teel heavy-duty sump pumps feature a cast iron base and steel motor housing for long life and quiet operation. Available with a tethered float switch or mechanical float switch.



- **Nos. 4P905 and 4P906 have tethered float switch for automatic operation. Fits into sump pit 14" diameter or larger.**
- **Nos. 4PM20 and 4PM21 have mechanical float switch for automatic operation. Fits into sump pit 11" diameter or larger.**

## STAINLESS STEEL SUMP PUMPS

Teel stainless steel sump pumps offer the ultimate in corrosion resistance. These premium pumps have 304 series stainless steel motor housing and a thermoplastic base that will not rust or corrode. Available with a tethered float switch or a mechanical float switch.

- **No. 4PM22 has tethered float switch for automatic operation. Fits into sump pit 14" diameter or larger.**
- **No. 4PM23 has mechanical float switch for automatic operation. Fits into sump pit 11" diameter or larger.**

(*) 3/4" Garden hose adapter included. (†) Nylon 1½ x 1¼" reducer included. (#) Manual, will pump water down to 3/16" from surface being drained (within 2" for No. 2P556). For extended manual operation (longer than 15 minutes). pump should be in 4" of water for proper cooling.

*If we don't have a pump for it, chances are it can't be pumped.*

# RESIDENTIAL SUBMERSIBLE SUMP PUMPS AND SINK PUMP SYSTEM

## RESIDENTIAL SUBMERSIBLE SUMP PUMPS

- Shaded-pole motors; no starting switches or relays required
- Automatic internal overloads for motor protection
- Heavy-duty cast iron or aluminum motor housing
- Corrosion-resistant polypropylene or thermoplastic motor cap, discharge base and impeller
- Available in automatic models with built-in or piggy-back mercury-free mechanical float switch
- Oil-filled motor for superior cooling and continuous lubrication of bearings
- Mechanical shaft seal with Buna N and stainless steel parts, carbon/ceramic seats
- UL Listed; CSA Certified; SSPMA Certified

**Applications:** For emptying residential sump pits, laundry drainage and dewatering flooded areas. For use with nonflammable liquids compatible with materials of construction with an intermittent maximum liquid temperature of 140°F.

**Driver:** Shaded-pole, oil-filled, 115VAC 60 Hz motor. Automatic thermal overload protection. 10 ft. or 20 ft., 3-prong, 16/3 SJTW/SJTW-A power cord. Myers brand.

Replacement Parts Available 1-800-323-0620

For draining flooded excavations, basements, construction sites, swimming pools. Come with 3-conductor cord. Do not run dry. Use with nonflammable liquids compatible with pump component materials. Manual pumps convert to automatic with No. 2P353 switch below.

**A and B 3/10 & 4/10 HP Sump Pumps**—Epoxy coated cast iron or corrosion resistant bronze housings, polypropylene bases with intake screen, polycarbonate tops and glass-filled polypropylene impellers. Steel motor shafts never touch water. Automatic pumps with preset diaphragm switch cut-in at approximately 7-10" and cut-out at 1-3" from bottom of pump. Manual pumps start and run continuously. 1½" NPT discharge.* No. 3P640 is equipped with a 3/4" garden hose adapter. 3/10 and 4/10 HP, 1500 RPM, 115VAC, 60 Hz single phase thermally protected motors sealed in oil for cool running. Sleeve bearings.

**C 1/2 HP Sump Pump**—Automatic pump with preset diaphragm switch which cuts-in at 8½-12" and cuts-out at 1½-4" from pump base. Epoxy coated cast iron housing and base with intake screen and glass-filled nylon impeller. Steel motor shaft never touches water. 1½" NPT discharge.* 1/2 HP, 1500 RPM, 115VAC, 60 Hz shaded pole motor with ball bearings, permanently lubricated and thermally protected.

**D and E Manual/Automatic Effluent Pumps**—set for manual or automatic operation. Handle liquids and solid waste to 3/4" diameter. Automatic operation: 4/10 HP No. 4RK90 cuts in at 9-14" and cuts out at 2 to 6"; 1/2HP No. 4RK91 cuts in at 11-15 and cuts out at 5-9". Both models feature cast iron epoxy coated pump housing for corrosion and rust resistance. Stainless steel screws, bolts, handle and seal assembly. Mechanical seals—stainless steel spring, nitrile parts, carbons and ceramic faces. Oil-filled motor housing provides lifetime lubrication and heat dissipation. 1½" NPT discharge. 115VAC, 60Hz, thermally-protected motors. 15-ft. power cord.

(*) Plastic adapter included to convert to 1¼" discharge.

## AUTOMATIC SWITCH

Converts manual Little Giant pumps as large as 1/2 HP to automatic operation. Has ties for attaching to discharge pipe of other sump pumps for automatic operation. Switch has an On/Off differential of approximately 6 inches. Cut in at approximately 6-10"; cut out at approximately 1-4". 10 amp, 115V, switch comes with an 18 ft., 18/2 SJTW-A cord and piggy back 3-prong grounding plug/receptacle. Not for use with split-phase, capacitor start or 3-phase motors. 110°F Max. temperature. Little Giant brand (RS-5-18).

**No. 2P353.** Shpg. wt. 1.8 lbs. List .....$49.20. Each .....**$38.00**

LR19315

E81811N

## LOW LEVEL AUTOMATIC SWITCH

Pressure activated diaphragm switch converts any manual pump through 1/3 HP to automatic operation. Useful for pool covers, roof drainage or any area requiring a low "On" level for minimum standing water. On lever: 2 to 3" deep. Off level 0.5 to 1.5" deep. 115V, 10 amp switch. 18-ft. power cord. Switch dimensions: 4¾ H x 1¾ x 3" L. Little Giant brand (RS-5-LL).

***New*** **No. 4RL50.** Shpg. wt. 1.7 lbs. List $53.70. Each .....**$46.70**

No. 4RL50

*If we don't have a pump for it, chances are it can't be pumped.*

# RESIDENTIAL SUMP PUMPS

## RESIDENTIAL CAST-IRON SUBMERSIBLE SUMP PUMPS

- **Rugged cast-iron construction with tapped 1½" NPT discharge and screened bottom inlet. Plastic adapter included for conversion to 1¼" discharge.**
- **Automatic models have a piggyback, mercury-free mechanical float switch to provide switch overriding capability for manual pump operation**
- **Manual pumps start and run continuously**
- **Shaded pole motors with automatic overload protection, oil-filled for superior cooling and continuous bearing lubrication**

For draining flooded excavations, construction sites, and basements. DO NOT run pump dry. 3/10 and 4/10 HP models have cast iron pump body with bottom inlet screen to screen loose debris, and Noryl® impeller. Automatic pumps with tethered float switch have 13.0" ON and 5.0" OFF settings. No. 4RJ19 includes a 3/4" garden hose adapter. Manual pumps are easily converted to automatic operations by using switch No. 4RK15.

Single phase, thermally-protected, oil-cooled, shaded pole motors have sleeve/sleeve bearing construction.

Maximum liquid temperature is 130°F. All pumps come with UL/CSA approved 3-prong grounded cord. For use with nonflammable liquids compatible with materials of construction. UL listed (E61535); CSA and SSPMA certified. Teel brand.

## RESIDENTIAL SUBMERSIBLE SUMP PUMPS

- **Complete stainless steel motor housing/composite construction with screen bottom inlet**
- **Compact design with vertical style piggyback switch allowing automatic or manual operation**
- **Long service life from stainless steel shaft with ceramic-sleeve wear surface and two double lip seals**
- **1¼" NPT discharge with check valve**
- **Fits in sump pits as small as 10" diameter**

For draining flooded basements, excavations, and construction sites of rain, and clear or dirty water. These highly energy-efficient pumps can be operated automatically or manually. All pumps have glass-filled polypropylene housing and base. Non-clogging composite impeller and two Buna-N lip seals with ceramic shaft sleeve. Vertical float switch turns on at 7-9" and off at 1-2". Has 11/4" NPT discharge. The single-phase, permanent split capacitor motor has permanently lubricated ball bearings and automatic thermal overload protection. 304 stainless steel motor casing, shaft, and external hardware. 10-ft., three-prong grounded cord. For use with nonflammable liquids compatible with pump components. Maximum liquid temperature, 77°F. UL listed (E160411) and CSA certified (LR47013). Teel brand.

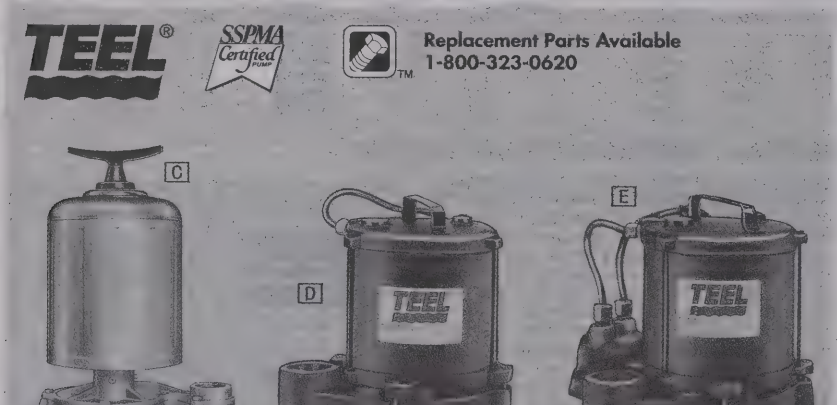
# SUBMERSIBLE COMMERCIAL SUMP PUMPS

TEEL®

SSPMA Certified PUMP

**Replacement Parts Available**
**1-800-323-0620**

Use for wastewater removal from residential and commercial sump pits, draining ground water from excavations and coffer dams. Use with nonflammable liquids compatible with materials of construction. Liquid temperature 130°F. Maximum 1/2" spherical solids handling capability.



**Heavy-duty, cast iron construction.** Tethered piggyback float switch allows automatic or manual operation. Operates in 18" diameter x 24" deep or larger sump pits.

**Single phase, 115 VAC, 60 Hz oil-filled motors** with automatic reset thermal overload protection and class B insulation. Pumps have mechanical shaft seal with Buna-N and stainless steel parts, carbon/ceramic seat. Lifetime ball-bearing lubrication. Hermetically sealed motors are continuously cooled and lubricated. UL Listed/CSA approved 3-prong 16/3 grounded power cords.

TEEL®

SSPMA Certified PUMP

**Replacement Parts Available**
**1-800-323-0620**

For emptying residential, motel, school, commercial, underground utility vault, and industrial sump pits. Draining ground water from excavations and coffer dams. For use with nonflammable liquids compatible with materials of construction. Maximum temperature of liquid being pumped should not exceed 120° F. Maximum diameter of solids is 1/2".

**Heavy-duty cast iron or cast bronze construction.** Higher flow and head than standard sump pumps. Lifetime lubricated ball bearings. Diaphragm automatic, Franklin submatic or manual operation. Fit 18" diameter x 24" deep or larger sump pits.

**Split phase 115 VAC, 60 Hz, 1725 RPM, single phase motors.** Nos. 3P576 and 3P530 have Franklin Submatic 1/3 HP motors and automatic switch totally enclosed in corrosion resistant Type 304 stainless steel housing which acts as a float and controls pump. Pumps have mechanical shaft seal with Buna N and stainless steel parts, carbon/ceramic seat. Motors have Type 416 stainless steel shaft, automatic reset thermal overload protection, and 3-prong 18/3 grounded power cords, except Nos. 1P861 and 3P579 which have 16/3 power cords. Nos. 3P511 and 3P579 have air operated diaphragm switch. Manual pumps Nos. 1P861 and 3P512 convert to automatic operation with use of No. 4RK04 mechanical float switch. Teel brand.

**Replacement Pressure Switch.** Fits pumps Nos. 3P511 and 3P579. Automatically starts motor when water level is 2" above pump, shuts off when water level drops to 5" above pump base. O-ring included. Robertshaw Controls brand.

**No. 1R235.** Shpg. wt. 0.2 lbs. List.....$21.00
Each.....**$16.40**

*If we don't have a pump for it, chances are it can't be pumped.*

# SUBMERSIBLE SUMP/EFFLUENT PUMPS

ZOELLER PUMP CO.

New

E80793 LR40384

Replacement Parts Available 1-800-323-0620

For residential, commercial, and intermittent-duty industrial applications. Designed to pump either clear water or effluent. Can be used in elevator pits, home sumps, loading docks, or in other areas where conventional sump pumps would clog or freeze-up due to the accumulation of light debris. Unique vertical-path float switch allows pumps to be mounted in narrow pits (12" minimum width with check valve installed) where a conventional arc-path switch would be inoperable. 1½" NPT discharge.

**Snap-action switch** automatically turns pump on and off at factory-preset fluid depths (automatic models only). Maximum fluid temperature: 130°F.

**Pumps come with the following features:** A non-clogging screenless suction inlet. Auto operation models have automatic-reset thermal overload protection. Hermatically sealed, oil-filled, with single-phase motors. Has a mechanical seal with stainless steel, Buna N, and carbon/ceramic parts.

# SUBMERSIBLE SUMP/EFFLUENT PUMPS

## SUBMERSIBLE SUMP/EFFLUENT PUMPS

- **High-efficiency oil-filled motor with heavy-duty ball bearings**
- **Large 2" NPT discharge port passes solid up to 3/4"diameter**
- **Automatic-reset thermal overload protector on single-phase units**
- **Mechanical seal with stainless steel, Buna N and carbon/ceramic parts**

Heavy-duty submersible sump/effluent pumps are designed to pump either clear water or effluent. Can be use in elevator pits, homes, sumps, loading docks, or in other areas where conventional sump pumps could clog or seize up due to accumulation of light debris. Cast iron impellers, except for Nos. 4RK55, 4RK56 and 4RK59, which have Noryl impellers. Single phase models have capacitor-run motor. Automatic models come with a heavy-duty mechanical float switch. For residential and commercial applications. Handle spherical solids up to 3/4" dia. 115V single phase pumps have 3 prong grounded power cord. For use with nonflammable liquids compatible with pump construction. Maximum fluid temperature 130°F.

## SUBMERSIBLE EFFLUENT PUMPS

- **Produce higher heads than standard effluent pumps**
- **PSC high efficient ball bearing motor provides longer life**
- **Designed to handle 3/4" spherical solids**

Two-vane bronze non-clogging impellers with pump out vanes on back side. Mechanical seal has stainless hardware. Buna N elastomers, carbon (rotating) and ceramic (stationary) faces which are oil lubricated to ensure long life. Seal assembly is located inboard in an oil-filled reservoir with a secondary exclusion seal for maximum long life service. Pump shaft is Type 416 stainless steel.

**Description:** Can be installed on the discharge side of septic tanks to pump tank effluent to gravity interceptors, lagoons or remote leach fields. Pumps are to be used only with nonflammable liquids that are compatible with pump component materials. Operating temperature range: 35 to 104°F.

**Construction:** All cast-iron construction with corrosion-resistant stainless steel fasteners and Buna N elastomers, ensure maintenance free operation and long life.

**Driver:** 3450 RPM capacitor start motor with thermal overload protection and automatic reset and are oil-filled for superior heat dissipation. Motors have oil lubricated, ball type thrust bearing. 15 ft. 3-prong 14/3 water and oil resistant grounded SJTOW-A/SJTOW power cords.

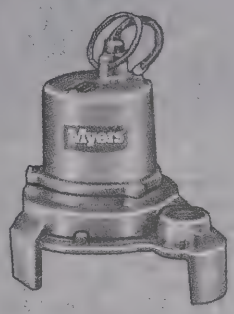
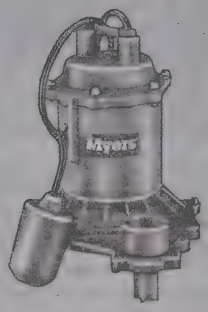
(*) Operation at these heads or below will result in motor overload, reduced pump life and/or motor failure/damage.



*If we don't have a pump for it, chances are it can't be pumped.*

# SUBMERSIBLE EFFLUENT PUMPS



- Cast iron motor housing, single, carbon and ceramic seal plus stainless steel hardware
- Oil-filled motor (Class A insulation for Nos. 1N189-1N192, 1N205 and 1N206; all other pumps have Class B insulation) for superior cooling and continuous lubrication of bearings
- Capacitor-start motor for high starting torque (single-phase models except Nos. 1N205, 1N206, 1N191, 1N189, 1N192 and 1N190 which have shaded-pole motors)
- Automatic-reset built-in overload to protect motor (single-phase models)
- High-efficiency enclosed two-vane impellers (except Nos. 1N205 and 1N206 which have recessed vortex)
- 3/4" solids handling
- Heavy-duty lower ball bearing (except Nos. 1N205, 1N206, 1N191, 1N189, 1N192, and 1N190)
- Mechanical carbon-ceramic shaft seal
- 20' SJOW/SJOW-A cord, 16/3 on 1/3 thru 1/2 HP, 14/3 on others
- Standard 1½ and 2" NPT discharge ports
- Manual models can be used with control panel and level controls (3 for simplex, 4 for duplex) for proper operation (see pages 3234 and 3235).
- All pumps are UL Listed and SSPMA Certified; Nos. 1N189, 1N191-1N200 and 1N205 are also CSA Certified

Submersible effluent pumps are designed for reliable pumping of either clear water or septic tank effluent with suspended solids up to 3/4" in diameter. Nos. 1N205 and 1N206 have vortex, thermoplastic impeller; all others have enclosed, thermoplastic impeller. Nos. 1N189-1N192 have thermoplastic volute; all others have cast iron volute. Ideal for residential or light commercial applications to pump septic tank effluent to gravity interceptors, pressure dosing fields or leach fields. Intermittent max. fluid temperature: 140°F. Myers brand.

# SUBMERSIBLE SEWAGE PUMPS AND PACKAGED SIMPLEX SEWAGE SYSTEMS

For residential and commercial sewage, effluent, and wastewater removal and transfer. Also used for sump drainage, dewatering, and flood control. For use only with nonflammable liquids, compatible with pump component materials.

**Construction:** All cast iron construction with corrosion resistant stainless steel fasteners and Buna-N elastomers, ensure maintenance free operation and long life. Cast iron non-clogging vortex or open-vane type impellers. Nos. 4RK64, 4RK65, and 4RK66 have Noryl impellers. Mechanical seal has stainless hardware. Buna-N elastomers, oil-lubricated carbon (rotating) ceramic (stationary) faces for long life. Pump shaft is stainless steel.

**Driver:** Single phase models utilize high-efficiency permanent split capacitor motor (except No. 4KR64 which has a shaded pole motor) with thermal protection and automatic reset. Three-phase models require appropriate control box with built-in thermal protection. All drivers have oil lubricated, ball type thrus bearings and are oil-filled for superio heat dissipation. 115 Volt pumps have 3 prong, grounded power cords.

**General:** 115V, automatic operatio requires 4RK17 wide angle on/off leve control float switch. 230V single phas units (1/2 and 1 HP) require No. 4RK1 float switch; other pumps need appropri ate control box with float switch No 4RK31 (remove series plug). Teel brand.

# SIMPLEX SEWAGE PACKAGE SYSTEM

**Systems Include:**

**Heavy-Duty Sewage Pump** with rugged cast-iron body. 4/10 HP No. 4HX01 has a molded impeller; 1/2 HP Nos. 4NX02 and 4NX03 have cast iron impellers.

**Level Control mercury switch** molded inside of waterproof float. Single control turns pump On and Off automatically.

**Polyethylene Basin,** 18" dia. x 30"D, with 4" inlet.

**Flexible Pipe Fitting Inlet** with tough sanoprene construction.

**Vertical Check Valve** with hose adaptors and clamps.

**Nos. 4NX01 and 4NX02** have a steel cover with 2" vent and 2" discharge. 14/3 SJTOW-A cord.

**No. 4NX03** has a steel cover with black powder coating, 2" vent and 2" discharge, and cord openings. 14/3 SJTOW-A cord.

**For residences and small industrial sewage** or sump applications. Designed to handle wastes from lavatories, laundry tubs, floor drains, water closets. Pumps push the water from below ground up to where normal drainage will handle it. Nos. 4NX01 and 4NX02 are unassembled; No. 4NX03 comes preassembled. Teel brand.

# SUBMERSIBLE SEWAGE & GRINDER PUMPS

- Cast-iron motor housing and volute plus stainless steel hardware
- Single, carbon and ceramic mechanical seal
- Oil-filled motor for superior cooling and continuous lubrication of bearings
- Capacitor-start motor for high starting torque (single-phase models except Nos. 1N354 and 1N355 which have shaded-pole motors)
- Automatic-reset, built-in overload to protect motor (single-phase models)
- High-efficiency impellers
- 2" solids handling
- Heavy-duty ball bearings for long life except Nos. 1N354, 1N355, 1N341 and 1N342 which have ball/sleeve bearings
- Mechanical shaft seal with Buna N and stainless steel parts, carbon/ceramic seat
- 20' 16/3 SJOW/SJOW-A cord
- Standard 2" NPT discharge port
- Manual operation, can easily be made automatic using float switch, order separately.
- Control panels and level controls available if required. (3 for simplex, 4 for duplex) See pages 3234 and 3235.
- All pumps UL Listed; all pumps CSA Certified except Nos. 1N342, 1N350-1N353 and 1N355; Nos. 1N354 and 1N355 are SSPMA Approved

) Operation at these heads or below will result in motor overload, reduced pump life and/or motor failure/damage.

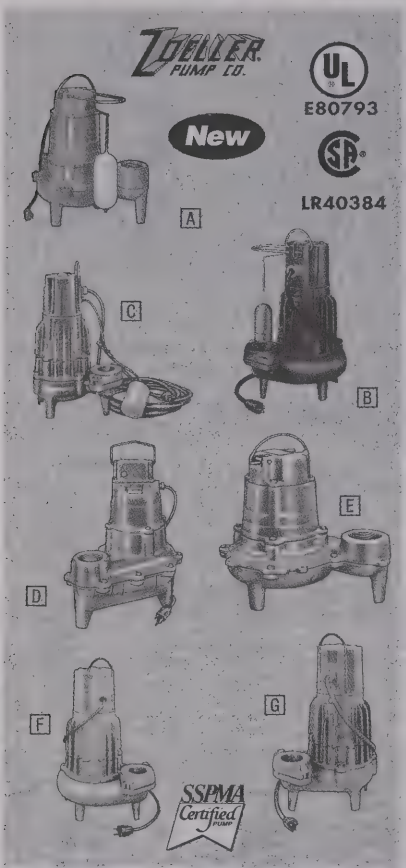
## SUBMERSIBLE GRINDER PUMPS

No. 1N216

Myers®

- Heavy-duty cast-iron pump, motor housings, volute, and recessed impeller
- Include leg kit and 15 ft. SOW/SOW-A cable
- 2 HP
- 3450 RPM

Grinder pumps macerate solids contained in normal sewage into a fine slurry which is pumped through the discharge pipe. Ideal for residential applications and also commercial applications such as motels, shopping centers, schools, office buildings. 1¼" NPT discharge.



Shredding ring, radial cutter, and hardware are Type 440 stainless steel. Double mechanical seal has stainless steel, Buna N and carbon/ceramic parts, and "seal-leak" sensor to detect moisture in seal cavity. Motor is oil-filled, Class B insulation for superior cooling and continuous lubrication of bearing. Myers brand.

Pumps require control panel and level controls (3 for simplex, 4 for duplex) for proper operation (See pages 3230, 3234, and 3235).

(*) Single phase pump comes with appropriate start and run capacitor and starting relay for easy installation into capacitor control box. Order control box separately.
(†) 3-phase pump requires appropriate control box and heater coils, order separately.

# SUBMERSIBLE SEWAGE PUMPS

- Cast-iron construction with stainless steel hardware and accessories
- Automatic units have 2-pole float-operated submersible NEMA 6 mechanical switch
- Large 2 or 3" NPT discharge (depending on model) and a full 2" inlet
- Nonclogging vortex impeller which passes 2" spherical solids
- Automatic-reset thermal overload protection (single-phase motors only)
- Hermetically sealed, oil-filled motors
- Mechanical seal with stainless steel, Buna N, and carbon/ceramic parts

Handle solids-laden waste water without clogging. Ready to operate. Automatic units have a snap-action float switch that permits automatic On/Off operation at preset fluid levels. Float switch follows straight vertical path, allowing pump to be positioned in narrow pits (18" minimum width with check valve installed). No. 4TR67 has an adjustable integral float switch (9-22" range). Cast-iron base on all units except Nos. 4NW06, 4NW07, 4NW08, and 4NW14 which have engineered plastic base. For residential, commercial, and industrial applications. Maximum fluid temperature: 130°F.

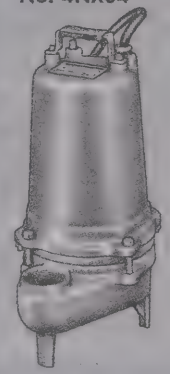
*If we don't have a pump for it, chances are it can't be pumped.*

# SEWAGE AND AGRICULTURAL SUBMERSIBLE PUMPS

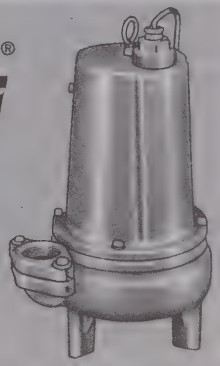
## SUBMERSIBLE NON-CLOGGING SEWAGE PUMPS



**Efficiently pump residential and industrial sewage**
**PSC high efficiency ball bearing motor provides longer life**
**No. 4NX04 has an inboard seal design that keeps seal rotating surface from coming into contact with sewage**
**Heavy-duty class 30 cast-iron construction**
**Stainless steel shaft**
**2" solids handling**

All cast-iron construction with corrosion-resistant stainless steel fasteners and Buna N elastomers, ensure maintenance-free operation and long life.

Two-vane open impellers with pump out vanes on back side. Mechanical seal has Buna N elastomers, carbon (rotating) and ceramic (stationary) faces which are oil lubricated to ensure long life. Pump shaft is Type 416 stainless steel.



1750 RPM capacitor start motor has thermal overload protection and automatic reset and is oil-filled for superior heat dissipation. Motors have oil lubricated ball bearings. 15 ft. 3-prong 14/3 water and oil-resistant grounded SJTOW-A power cords with pressure grommet for sealing and strain relief. Teel brand.

## HIGH HEAD AGRICULTURAL PUMPS

ZOELLER PUMP CO.

No. 4NW34

New

SSPMA Certified PUMP

- **Designed specifically for lagoon or sump pit applications**
- **Submersible**
- **Rugged cast-iron construction with stainless steel screws and handle**
- **Motor is oil-filled, hermetically sealed and has thermal overload protection with automatic reset**
- **Double shaft seals, carbon and ceramic**
- **50 ft. UL Listed neoprene jacketed power cable**

Handle up to 1½" spherical solids. Non-clogging vortex impeller. Neoprene gaskets and seals. Maximum operating temperature is 130°F (54°C). Pump and hose floats are available. Zoeller brand.

## PUMP AND HOSE FLOATS FOR AGRICULTURAL PUMPS

### AGRICULTURAL PUMP FLOAT

Properly suspends pump in a lagoon beneath the water. Float maintains pump in an upright and vertical position thereby ensuring proper lubrication and cooling of pump. Designed for 2" discharge conduit/hose. Zoeller brand.

**New No. 4NV95.** Shpg. wt. 36.0 lbs. List $254.00. Each .....$213.75

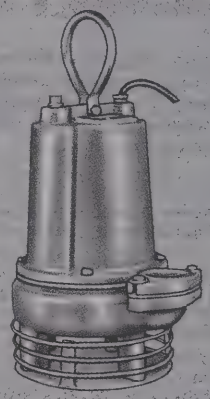
### AGRICULTURAL HOSE FLOAT

Suspends discharge pipe/hose on top of water to prevent it from sinking in hog lagoon applications. Includes four polyethylene floats with nylon straps. Zoeller brand.

***New* No. 4NV96.** Shpg. wt. 4.0 lbs. List $50.00. .....Each $41.55

**OUR PRODUCT SELECTION IS BIGGER AND BETTER THAN EVER!**

**In addition to our new product listings from the leading brand names, Grainger now offers you more than 78,000 products to meet your maintenance, repair, or operation supply needs.**



# DEWATERING PUMPS

Submersible dewatering pumps are compact, lightweight units. Portable design for easy transport and use. No priming, suction hose or foot valves required. Cast-iron units may be totally submerged in the site to be dewatered. 140°F max. temperature.

Single phase pumps feature permanent split capacitor (PSC) high efficient ball bearing motors for long life. Cast iron housing and impeller. All units feature inboard seal design for longer seal life. Buna-N seals with carbon/ceramic faces. For use at construction sites, ponds, dump sites, underground vaults and truck docks. Electrically operated, must be properly installed per national electrical codes. 2" discharge. Dimensions: 17.22 H x 12.88" W. Prosser brand.

## COMMERCIAL STAINLESS STEEL SUMP PUMPS

GRUNDFOS®

New

No. 4PD14

- **Submersible to 26 ft. for pumping waste water**
- **Flow up to 54 gallons per minute at 3350 RPM for quick liquid removal**
- **Can be used to fill tanks, or pump solids up to 3/8"**
- **Built-in motor overload protection and stainless steel construction provide extra durability for heavy-duty use**

Grundfos stainless steel sump pumps are perfect for draining clear or dirty water from pools and ponds, pits and tanks, dewatering construction sites, as well as extracting water from fountains or flooded basements. Temperature ranges from 32° to 122°F. Single phase, 115V, 60 Hz operation.

**Construction:** 304 stainless steel strainer, pump housing, impeller, fasteners, stator housing, wear plate, locknut and washer. 431 stainless steel shaft. Compounded carbon bearings. Neoprene power cord jacket.

**NOTE:** Not recommended for sewage and flammable or highly corrosive liquids.

# AUTOMATIC TOILET INSTALLATION AND SEPTIC TANK FILTER

## AUTOMATIC TOILET INSTALLATION/SEWAGE SYSTEM

- **Includes 30 gallon tank, UL Listed pump, float switch, and hardware**
- **Nonclogging vortex impeller passes up to 2" solids**
- **Maximum temperature: 130°F**
- **Allows a bathroom to be installed almost anywhere**
- **Can be free-standing or built-in which eliminates destroying concrete floor and reduces construction costs**

**Applications:** Easy installation of toilets in new homes, basements, commercial buildings, industrial plants, workshops, pool house, etc. Accommodates toilet, lavatory, and bathtub/shower.

**Construction:** Polyethylene tank measures 42$^{3}/_{16}$L x 17H x 24½"W. Tank has lid, gasket with 2" discharge, 3" vent and adapt-a-flex seals for additional fixtures. Includes float switch, 2" check valve, discharge pipe thru lid, floor flange, seal extender kit, and hardware pack.

**Driver:** 1/2 HP, 115V, 60 Hz, single phase, 10.4 Amp split phase motor within cast-iron sewage pump. Zoeller Qwik Jon brand (102).

**No. 4P024.** . Shpg. wt. 89.0 lbs. List..... $831.20.
Each..... **$718.00**

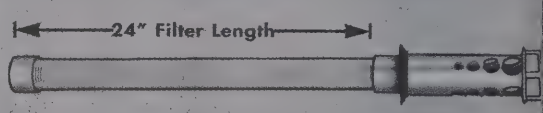
ZOELLER PUMP CO.

BOCA ES™



## RESIDENTIAL SEPTIC TANK FILTER

- **Filter area: 61 linear feet**
- **Flow rate: 850 GPD**

The Zoeller septic tank filter will improve the performance of septic systems and protect lateral fields from clogging. The filter removes solids larger than 1/16" from the effluent, helps control surges, allows only clear effluent to pass to the drain field, saves maintenance costs and allows monitoring of tank condition. Septic tank filter fits inside any 4" sanitary tee. Zoeller brand (170-0023).

***New* No. 4NW03.** Shpg. wt. 3.0 lbs. List $39.95.
Each..... **$33.15**

ZOELLER PUMP CO.

) These units have special flange to accept either No. 4RK34 flexible 4" fitting or No. 4RK35 cast-iron 4" caulking hub, shown below.

## 4" FLEXIBLE FITTING

olymer fitting seals against flat or curved surfaces. Weather-ight and gas-tight. Fits all basins shown above, and most other asins. No tools or sealants are required.

*New* **No. 4RK34.** Shpg. wt. 1.0 lbs. List ..... $18.76.
ach ..... **$15.02**

## 4" CAST-IRON CAULKING HUB

Cast-iron hub bolts to basin for installations where 4" inlet pipe is required. For cast iron, plastic or ductile iron pipe. Fits all basins shown above, and most other basins.

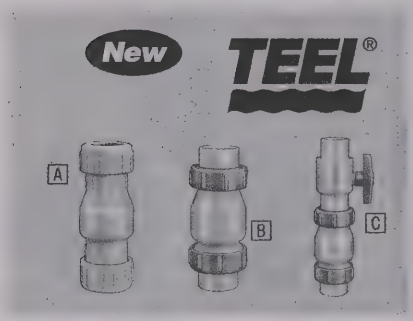
*New* **No. 4RK35.** Shpg. wt. 5.0 lbs. List ..... $38.37.
Each ..... **$30.70**

## RADON SUMP BASIN

**elps prevent radon gas from entering dwelling.**

**18 x 22" heavy-duty polyethylene basin.**

**Metal lid, gasket, 3" vent and 1½" discharge pipe seals.**



deal for residential, commercial and industrial applications. One-piece, seam-free basin omes ready to install and includes necessary sealing hardware and flanges. olyethylene sewage pump basin is IAPMO approved, includes non-sealed polyethylene id. Zoeller brand (31-0973).

*New* **No. 4NW29.** Shpg. wt. 16.0 lbs. List $57.00. Each ..... **$49.40**

# PUMP ACCESSORIES

## WASTE WATER CHECK VALVES

Compression swing, true union swing, and ball valve/check valve combinations are for use in preventing backflow of sump disposal lines, waste water lines, sewage lift stations or ejector systems. Corrosion-resistant PVC thermoplastic construction. Full flow design. Angle seat and weighted flapper for low-pressure seal. Can be used horizontally or vertically. Compression swing check valve end can be used a union connections. True union swin check valve is designed for easy remova of body for regular inspections or clean ing. Ball valve/check valve for application requiring in-line ball and check valve design allows for easy removal for clean ing or repairs. Maximum pressure: 125 PS @ 72°F. Teel brand.

| Key | Type | Inlet (In.) | Outlet (In.) | *New!* Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **A** | Check (Swing) | 1½ comp. | 1½ comp. | **4RG88** | $28.93 | **$23.14** | 1.0 |

## SUMP PUMP CHECK VALVES

These thermoplastic rubber check valves adapt to fit either 1¼ or 1½" O.D. cast-iron, galvanized, or plastic pipe. Valve construction eliminates metal to metal contact, cushioning the pipe to minimize clatter, reduce vibration, and prevent electrolysis. Valves are designed to operate in a vertical position. Avoid more than 10 ft. static head above the check valve. Teel brand.

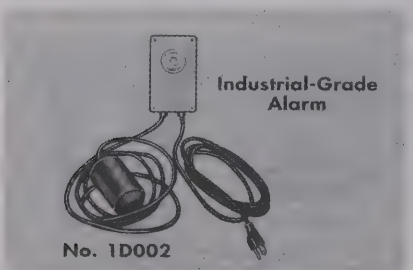
**No. 4UN78 Screw-in Check Valve** has one reversible rubber pipe adapter which fits 1¼ or 1½" O.D. pipe and molded body with male threads to fit sump pumps with 1¼" discharge. Sealed thermoplastic and rubber body prevents metal corrosion inside sump pit. Two steel hose clamps included.

**No. 4UN79 In-Line Check Valve** has a thermoplastic molded body with two reversible rubber pipe adapters which fit 1¼ or 1½" pipe. Four steel hose clamps included.

| Check Valve | *New!* Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| **Screw-In** | **4UN78** | $10.70 | **$8.56** | 0.6 |
| **In-Line** | **4UN79** | 13.22 | **10.58** | 0.6 |

## MECHANICAL PUMP SWITCHES

- **Heavy-duty construction**
- **Air pressure operated switch provides automatic 115VAC or 230VAC operation**
- **Mounts in narrow (4 x 4") space**
- **Contains no mercury**



**Applications:** Controls On-Off operation of submersible or upright sump, sewage and grinder pumps. Easily installed in sump and sewage basins or wet pits using bolt holes or installed to stand pipe (up to 3¼" dia.) using stainless steel clamps provided. For use with nonflammable liquids compatible with cast iron "cow-bell" and Nylon air tubing. Maximum liquid temperature: 180°F.

**Construction:** Cast iron "cow-bell" air chamber is submerged in liquid and connected to heavy-duty UL Listed air pressure switch, single-pole type. On/Off level is determined by adjustment of air pressure switch. On point: 18-28"; Off point: 3-18". Mounted in corrosion-resistant control box which may be mounted up to 10 ft. from "cow-bell" via Nylon tubing. 1½ HP @ 115VAC max. 2 HP @ 230VAC, 60 Hz. Inrush current not to exceed 65 amps or 20 amps running current. Features 10 ft. 16/3 neoprene power cord with 3-prong grounded piggyback plug. Teel brand.

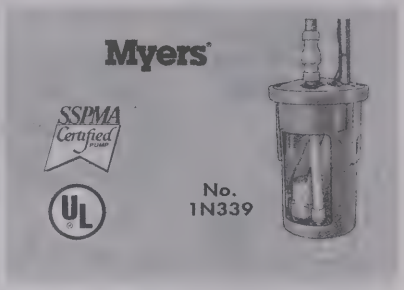
| HP | Volts AC | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **1½** | 115 | **5P217** | $103.00 | **$79.35** | 4.0 |
| **2** | 230 | **5P218** | 103.00 | **79.35** | 4.3 |

## HIGH WATER ALARM

Self-contained unit with metallic enclosure. For installation in sump pits or areas requiring high water monitoring. Operates on 120VAC and uses a weighted float mechanism (10' float switch cable assembly). Installer sets pre-determined height of float. Alarm gives a loud (80 dbA @ 10 ft.) audible sound in the event of risin water. Also provides a 10 Amp, 230VA contact for switching remote alarms o telephone dialing equipment. 6 ft. molde cord plug.

| Type | Dimensions (In.) H | W | D | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **120VAC** | 6½ | 3½ | 2⅝ | **1D002** | $100.82 | **$63.00** | 2.5 |

## PACKAGED SIMPLEX SEWAGE SYSTEMS



**Ideal for new basement toilet installations and removing sewage from basements and other remote locations**

**Includes everything except PVC pipe for ease of installation**

ckage includes: No. 1N354 Sewage mp (shown on page 3223) with automat- piggy-back mechanical float switch and cords (2" solids handling), 18 x 30" lythylene basin (30 gallon capacity), d 4" plastic slip-type inlet fitting. No. 340 features solid steel cover; No. 339, plastic cover. Both systems have a 2" discharge fitting, 2" and 3" vent fittings, cable sealing grommets, and PVC swing-type compression type check valve. Systems must be properly vented. Pump motor is 4/10 HP, 115V, 12 amps, 1 phase, 60 Hz, 12.0 amps. UL Listed; SSPMA Certified; No. 1N340 is also IAPMO Approved. Myers brand.

**ORDERING DATA**

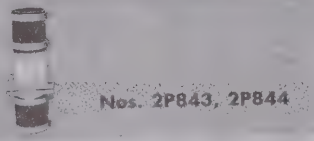
| IAPMO Approval | Model No. | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| No | SR1830 | **1N339** | $632.04 | **$360.00** | 71.0 |
| Yes | SR1830I | **1N340** | 690.22 | **400.00** | 71.0 |

## SUMP PUMP CHECK VALVES

Sump pump check valves have molded ABS plastic bodies and reversible rubber adapters which fit either 1¼ or 1½" OD cast iron, galvanized, or plastic pipe. The rubber adapters separate metal to metal contact, cushion the pipes to minimize clatter, reduce vibration, and prevent electrolysis. Valves are designed to operate in a vertical position. Rated at 4.3 PSI at 130°F. Avoid more than 10 ft. static head above the check valve.

A **Screw-In Check Valve** comes with one reversible rubber pipe adapter which fits 1¼ or 1½" OD pipe and has male threads which fit 1¼" discharge pumps. Electronically sealed plastic body has no metal parts to corrode inside sump pit; hole prevents air lock. Two stainless steel hose clamps included.

**No. 1P994.** Shpg. wt. 0.3 lbs. List $8.75. Each ..... **$6.00**



B **In-Line Check Valve** comes with two reversible rubber pipe adapters which fit 1¼ or 1½" OD pipe. Four stainless steel hose clamps included.

**No. 1P995.** Shpg. wt. 0.5 lbs. List ..... $10.88. Each ..... **$7.25**

## ZOELLER FULL FLOW CHECK VALVES

ull flow design with no restrictions and an be installed in either a vertical or hor- zontal line. Valves stop the back flow of ater and sewer gas. Feature neoprene askets and flappers with stainless steel ardware. Zoeller brand.

**os. 2P843 and 2P844 ABS Plastic Check alves.** Require no threading of pipe. Slip asily over ABS, PVC, steel pipe, or copper iping. Flexible neoprene slip x slip unions nclude stainless steel clamps and screws nd extra wide hinges. Rated at 4.3 PSI at 30°F. Avoid more than 10 ft. static head bove check valve.

**No. 2P845. Cast-Iron Check Valve.** 2" female NPT pipe connection. Stainless steel bolts. Suitable for installation below basin cover. Rated at 50 PSI (115 feet of head) at 130°F.

| Fits Pipe (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 1¼ or 1½ | **2P843** | $15.00 | **$10.50** | 0.8 |

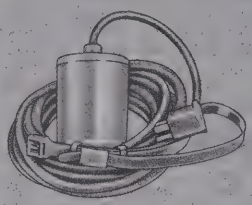
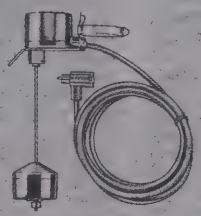
# MECHANICAL FLOAT AND PUMP SWITCHES

## PIGGYBACK MICRO-SWITCH, AND MECHANICAL FLOAT SWITCHES

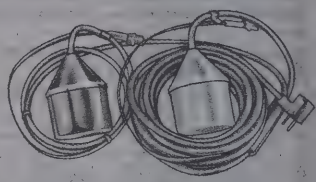


TEEL®

New



E94522 LR54245



No. 4RK04

No. 4RK17

No. 4RJ46

No. 4RK19

Mechanically activated wide-angle pump float switches provide automatic control of pumps in sump/sewage and non-potable water applications. Use with pumps that have integral thermal overload protection. Use only with liquids compatible with switch construction. Not for use in direct control of 3-phase motors. Corrosion-resistant polypropylene or PVC float housings. Switches are not sensitive to rotation or turbulence, allowing them to be used in both calm and turbulent applications. See chart below to choose correct switch for your application.

**Economy, heavy-duty and extra-heavy-duty float switches** serve in typical sump, sewage and effluent applications. They vary in cord length, wire gauge, voltage rating, starting amps and max running amps. Maximum temperture: 140° F. Mounting strap included.

**Vertical float switches** are ideal for use with limited space; small sump chambers, laundry/sink trays, or sump and effluent applications. Switch bracket provided allows easy installation to most discharge piping. Maximum temperature: 125°F.

**Normally closed float switches** turn on (close) when the float drops slightly below horizontal, signaling a low level, and turns off (opens) when the float tips slightly above horizontal. Maximum temperature: 140° F. Mounting strap included.

**Double float switches** are mercury-activated and consist of two floats for applications requiring accurate, large differential, pumping ranges, with one float containing a holding relay which enables them to function in series. Maximum temperature: 140° F. Mounting strap included.

**Chemical-resistant float switches.** Mechanical blue, ABS (Acrytonitrile Butadiene Styrene) float with 16 gauge SJTOW cord 15 or 30 ft. long, with 115V or 220V series plugs. Maximum temperature: 140° F. Use only with chemicals compatible with switch construction. Mounting strap included.

**Special application, mercury-activated float switches.** No. 4RK31 is a "control panel/pilot duty" model, and has a pre-set tether length (Min/Max, On/Off). Maximum temperature: 140° F. No. 4RK33 can be used in hotwater sump applications. Maximum temperature: 200° F. Mounting strap included.

| | 120VDC | 0.2 |
| | 24VDC | 0.5 |

*) For inductive loads, use arc suppression to maximize control life

**Nos. 2A554 and 2A552**

- Polypropylene switch for general purpose applications and acidic conditions
- Seamless foamed floats
- FDA approved materials

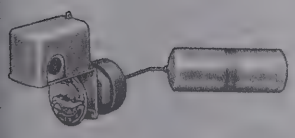
**No. 2XC13**

- FDA approved materials
- Polypropylene float and stem
- Mounts inside tank or outside tank
- For general purpose and highly acidic conditions

**No. 2A553**

- Buna N float with brass stem for fuels
- Excellent for low specific gravity fluids
- Use with lubricating/hydraulic oils and many solvents

**No. 2A551**



- 316 stainless steel for high temperature, high pressure, or corrosive conditions
- Highly polished for applications such as food processing
- Explosion proof for hazardous locations Class I, Groups A, B, C, D; Class II, Groups E, F, G; Class III

# FLOAT SWITCHES

- NEMA type 1
- Closed tank switches are mounted using 2.5 screw-in connection. (2½" NPT mount)
- Open tank switch used on open tank or sump applications with mounting feet
- Can be used to control small motor loads directly
- Temperature limitations (ambient): -22°F to 220°F
- Rated for 10 amps at 600 volts

### ACCESSORY FLOAT KIT

For use with open tank float switch No. 2FH59. 5 Ft. brass rod with 7" diameter float. Square D brand (9049A6).

**No. 2FJ26.** Shpg. wt. 6.0 lbs. List $92.00. Each.....$78.60

### CONTROL PANEL SELECTION GUIDE

1. Select voltage and phase required by the pump or motor.

2. Determine the maximum "Run" current in amps required by the pump or motor.

3. Select the simplex or duplex control panel which has a larger amp rating than the pump or motor full load amp rating. Simplex panels control a single pump or motor.

Duplex panels control two pumps or motors, alternating each.

4. 3-Phase control panels require overload heaters, refer to page 3235 for the heater coils required.

**Control boxes and panels operate pumps and motors** with float, pressure or other switch inputs. Switches not included, sold separately. For residential, commercial, and industrial applications controlling surface water, underground water, sewage and waste water systems. Common applications: lift stations, pump chambers, pump basins, irrigation systems, and air compressor systems. Wiring diagrams for float and other applications included.

### Simplex Control Boxes Nos. 2P544, 2P545, and 2P546

- **NEMA 1 enclosure**

Single-phase control box (No. 2P544) contains magnetic motor starter with 230V coil, two control fuses, test button, and terminal strip for control leads. Recommended for use with No. 2P055 or other float switches. 3-phase units (Nos. 2P545 and 2P546) contain magnetic motor starter. No. 2P544 and No. 2P545 have 230V coil; No. 2P546, 115 volt coil. Both units have holding contacts, selector switch with ON-OFF-AUTO selections, terminal strips for control leads, and control fuses. No. 2P546 may be used for 208 or 230V by moving primary control transformer tap to desired voltage. UL listed.

### Simplex Control Panels Nos. 1D012-1D015, 1D021-1D025

- **Hand-Off automatic switch**
- **Plug-in control relay**
- **100 Decibel alarm**
- **NEMA 4 enclosure**

Units provide contacts for remote alarms or for interfacing with telephone dialing equipment. For applications requiring circuit breaker protection and motor starters for motor-driven equipment. Have terminal strips for field connections, high level alarm, circuit breaker protection for the pump, and Test-Off switch for the alarm circuit.

115V coil. 3-Phase units feature magnetic starters. UL listed.

### Alternating Duplex Control Panels Nos. 1D010, 1D011, 1D016-1D020, 1D026, and 1D030-1D032

- **All Simplex panel features plus:**
- **Magnetic starter for each pump**
- **Connections for three or four floats to control operations**
- **Lockable latches on the NEMA 4 enclosure**
- **Solid-state plug-in alternator**
- **Overload heater relays for all 3-phase units**
- **Auxiliary terminal connections for remote alarm or telephone interface**
- **Run-light for each pump**
- **Control circuit protection**

These control boxes provide override control should either pump fail. In the event of an alarm condition, these units provide audio alarms with a standard dry contact connection for remote alarms or telephone interface. 115V coil. UL listed.

(*) Operable on 208 or 230V, 3-phase by moving control transformer's primary connections. (†) To select overload Thermal Units from column C NEMA Size Chart. (Do not exceed panel max amp range.)

*If we don't have a pump for it, chances are it can't be pumped.*

# PUMP CAPACITOR CONTROL BOXES

No. 1D027

**HOW TO SELECT A CAPACITOR BOX**

1. Select panel (with or without disconnect).

2. Check pump/motor for capacitor sizes and pump starter relay required. External capacitors and starting relays are usually included with the pump or ordered separately as a kit.

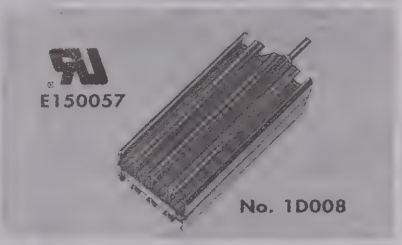
3. Check pump or motor specifications to see if overload protection is required. If required, size overload heaters.

4. When using capacitor box with overload relays, select the proper ampacity heater for the pump or motor running amperes. Capacitors and relays are found on pages 196,116,197,198, 474.

NEMA 4 enclosed capacitor boxes are used for controlling single phase pumps or motors where the capacitors and starting relays are mounted remote from the pump or motor. Suitable for most environmental conditions such as waste water, surface water or irrigation applications.

Easy mounting is provided in each panel with terminal blocks for connection. Boxes include terminal points for adding capacitors and starting relays. Teel brand.

**No. 1D027.** NEMA 4 enclosure for easy installation of starting capacitors and relays.



**No. 1D028.** 58 Amp starting contactor and Square D overload block which can be used for either NEMA 4 enclosure starter or multiple purpose. For installing most capacitors and starting relays.

**No. 1D029.** Non-fused combination starter and circuit breaker. Rated 58 amp using a Square D overload relay block. Includes contactor.

| Control Type | Phase | Volts | Max. Amps | Enclosure | Dimensions (In.) H | W | D | Stock No. | List | Each | Shpg. Wt. |

# HEATERS FOR CONTROL BOXES

uitable for maintaining a condensation-ee environment of control boxes and nels, electrical switch-gear, and other ectrical or electronic cabinets. These nergy-efficient heaters are self-regulating and do not require any additional thermostat controls. Easily mounted on standard "DIN" rail as found in most control box installations. Also include one NEMA 4 vent (easily installed).

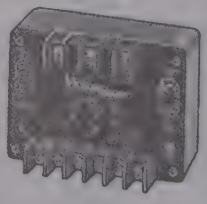
# PUMP/MOTOR PROTECTORS

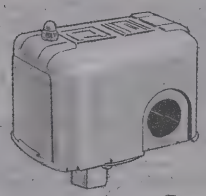


**SymCom, Inc.**

No. 1D003

No. 1D005

No. 1D007



ll units protect 3-phase pumps and motors from: Loss of any hase (single-phasing), low voltage (10% of setting), voltage nbalance (greater than 5%), and phase reversal. Will detect a ngle phase condition even on lightly loaded motors. Nos. 1D005 nd 1D006 also protect 3-phase motors from high voltage (10% of etting, any or all phases), and short cycling.

No. 1D007 protects pump or motor from contact failure, and high voltage. Other features for No. 1D007 include: Automatic power system range sensing (200-480V), adjustable trip delay, restart delay, voltage unbalance trip point, and LED status indicators. SymCom brand.

# PRESSURE SWITCHES FOR PUMPS

SQUARE D
GROUPE SCHNEIDER

Class 9013

Type F

Type G

## PUMPTROL® PRESSURE SWITCHES

### WATER PUMP PRESSURE SWITCH TYPE F

- Type FSG is the standard water pump switch suitable for all types of pumps: jets, submersible, reciprocating, etc.
- Type FYG is designed to meet higher horsepower and pressure requirements
- NEMA 1 enclosure
- Nos. 5B416, 1V630, and 6B452 are reverse action pressure switches-contacts open on falling pressure, all other switches are standard action pressure switches-contacts open on rising pressure
- 1/4"NPSF (internal)
- All pressure switches are two pole
- Replacement contacts for Nos. 5B410 & 5B411 available below
- FRG models rated for 10 amps (continuous) @ 300VAC max

### COMMERCIAL PRESSURE SWITCH TYPE G

- Designed for the control of electrically driven water pumps or air compresors
- Type G devices cover higher electrical ratings for direct control of motors in pumps and compressor applications
- NEMA 1 enclosure
- Contacts open on pressure rise (except reverse acting)
- 2-Pole models
- 1/4" NPSF (internal)
- Diaphragm actuated
- UL Listed and CSA Certified

# LIQUID & AIR FLOW SWITCHES

## GENERAL PURPOSE LIQUID FLOW SWITCHES

r starting or stopping electrically operated equipment such as gnal lights, alarms, motors, automatic burners and metering vices. Switches have sensitivity adjusting screw for easy flow justment. Single pole, double throw snap switch. 120/240 VAC eration. Amps: Full load—7.4 @ 120V, 3.7 @ 240V; Locked tor—44.4 @ 120V, 22.2 @ 240V.

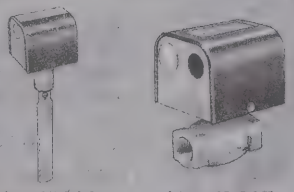
**os. 4RC65 and 4RC66** have four monel paddles. Fit 1", 2", and 3" pe, or the extended paddle can be trimmed to fit other pipe zes.

## HIGH SENSITIVITY LIQUID FLOW SWITCHES

r heavy-duty applications where high sensitivity is required, ch as water treatment systems, cooling systems for electronic rcuits, compressors, booster pumps, and bearings, and other plications that need instant switching. Sensitivity adjusting rew makes flow adjustment easy. Single pole, double throw ap switch. Full load Amps: 7.4@120V; 3.7@240V. Locked Rotor: .4@120V; 22.2@ 240V.

**o. 4RC69** for applications requiring a water-tight, dust-tight, or a EMA4X rated flow switch.

## INDUSTRIAL LIQUID FLOW SWITCHES



niversal design serves the widest variety of large pipe applica- ons, including heating and hydronic systems, air conditioning, frigeration and process work. Single pole, double throw snap vitch. Paddles can be trimmed to suit application needs. ensitivity adjusting screw makes flow adjustment easy. 120/240 AC operation. Full load amps: 7.4@120V; 3.7@ 240V. Locked otor amps: 44.4@120V; 22.2@240V.

**os. 4RC72 and 4RC73** for applications requiring a water-tight, ust-tight or a NEMA 4X rated flow switch.

**os. 4RC74 and 4RC75** for hazardous environment applications quiring a NEMA 7 (Class I, Group C or D) or NEMA 9 Class II, roup E,F, or G) rated flow switch.

# FROSTPROOF YARD HYDRANTS AND SHALLOW WELL JET PUMPS

## FROSTPROOF YARD HYDRANTS

- **Dual by-pass valve delivers approximately 27 GPM at 30 PSI**
- **Cast-iron construction**
- **Brass hardware resists corrosion**
- **Pistol type handle is easily padlocked to hydrant head**
- **Hand wheel locks water flow at desired rate**
- **One-piece molded Buna N plunger can be replaced easily without removing hydrant from ground**
- **Threaded brass nozzle accepts standard hose connector**
- **Convenient bucket holder on spout**

### ORDERING DATA

| Bury* Length | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 2 ft. | 2P813 | $73.14 | **$46.00** | 14.0 |
| 3 | 2P814 | 77.45 | **49.00** | 17.0 |
| 5 | 2P815 | 88.35 | **57.00** | 22.0 |

(*)Actual length is 24" longer than bury depth, to allow 24" exposure above ground.

Frostproof yard hydrants assure wate availability, even in subzero temperatures Shut-off valve is located below the fros line to prevent hydrant from freezing When hydrant is in Off position, water i the stand pipe drains out a freeze-proo waterway located below the frost line.

Ideal for barnyards, kennels, and livestoc areas where year-round availability o water is essential.

Hydrants operate under the same principl as a faucet or spigot. When cast-iron han dle is lifted, a shut-off valve opens an pressurized water flow through the spout.

Available in three bury depths*. Choos according to frost line in your area. 5-ft hydrants are for northern states wher frost line is deepest. 2 and 3-ft. hydrant are for southern and western states. Pip size: 3/4" NPT. Simmons brand.

### GPM OF WATER @ SYSTEM PSI

| 10 PSI | 20 PSI | 30 PSI | 40 PSI | 50 PSI |
|---|---|---|---|---|
| 12 GPM | 20 GPM | 27 GPM | 32 GPM | 34 GPM |

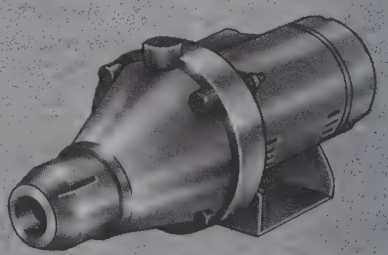
## STANDARD SHALLOW WELL JET PUMPS

- **1/3, 1/2 or 3/4 HP A.O. Smith pump motor**
- **Square D pressure switch**

**"True" shallow well pumps** for single pipe (to the well) service; incorporate a built-in ejector in the nose of the pump body so there is **no separate ejector to purchase.** Fiberglass reinforced thermoplastic body provides excellent corrosion and abrasion resistance. Housings are lightweight and exceptionally strong. Pump body copper heat sink provides maximum cooling of mechanical shaft seal—important in high pressure-low flow applications. Impeller, diffuser, jet nozzle and venturi are noncorrosive. UL Listed (E85176).

**A.O. Smith motor has stainless steel shaft,** ball/ball bearing design with rear access motor controls protected by rain-proof cover. 1/3 HP is 115/230V, 60 Hz split phase design; 1/2 and 3/4 HP models are dual voltage 115/230, 60 Hz capacitor-start design and is factory connected for 230V. Instructions on motor label show how to switch two wires for voltage change to 115V.

**All motors have NEMA 48 frame,** common square flange face (Y) mounting with rear compartment that opens for easy servicing of motor components without motor removal or disassembly. Pressure switch is adjustable for cut-in pressure; factory set for 30-50 PSI. Pumps have 3/4" discharge and 1¼" suction. Maximum operating temperature: 125°F continuous duty. Maximum pressure: 75 PSI. Not recommended for pressure boosting applications. Overall dimensions: 8¾H x 9½W x 19¾"L.



**Shallow well installations**—only use when vertical distance pump to water level is less than 25 feet—units will not operate at greater than 25 feet. Install as a single (suction) pipe system with piping in a drilled well or driven well point of at least 1¼" size. Check valve not included. See page 3256

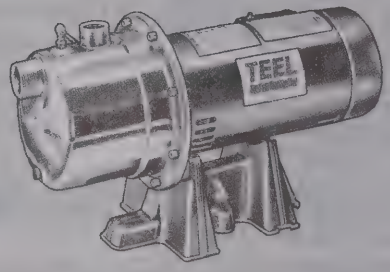
# SHALLOW WELL JET PUMPS

## STAINLESS STEEL SHALLOW WELL JET PUMPS



- 3/4 or 1 HP A.O. Smith motor
- Rugged stainless steel, corrosion-resistant construction
- Built-in shallow well jet
- Stainless steel motor shaft, heavy-duty ball bearings, and dust-proof cover to protect all electrical components
- UL Listed, CSA Approved

For use in shallow well applications where vertical distance from pump to water is less than 25 ft. 1¼" suction pipe, 1" discharge pipe. 3/4 and 1 HP motors are 115/230V, 60 Hz capacitor start motor, factory wired for 230V. Square D adjustable pressure switches factory set for 30-50 PSI cut-in, cut-out operation. UL listed (E61535) and CSA Approved (LR47013). Dimensions: 11W x 21L x 12"H.

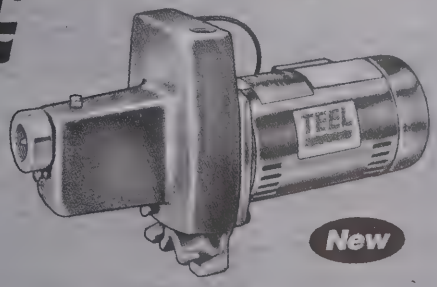
## HEAVY-DUTY SHALLOW WELL JET PUMPS



Cast iron jet pumps for shallow well water system service. Large water housing makes initial priming simple by easily dispelling air from suction pipe. Offers quiet operation. Pump units provide continuous duty operation design. Features noncorrosive impeller and diffuser, pump drain plug for freeze avoidance, air volume control port, pressure gauge port. Adjustable pressure switch set for 30-50 PSI cut-in, cut-out operation. Maximum pressure: 80 PSI. Not recommended for pressure boosting applications. UL Listed (E85176).

A.O. Smith motor has stainless steel shaft, ball/ball bearing design with rear access motor controls protected by rain-proof cover. 1/3 HP is 115/230V, 60 Hz split phase design; 1/2 through 1½ HP are dual voltage 115/230V, 60 Hz, factory connected for 230V. All motors have NEMA 48 frame, common square flange face (Y) mounting, with rear easy-opening compartment for servicing of motor components without motor removal or disassembly.

Maximum operating temperature: 140°F continuous duty. Overall dimensions: 13¼H x 9½W x 24½"L.

Shallow well installation only. For use when vertical distance to water is less than 25 feet and installed as a single pipe system to water source. Check valve included.

# HEAVY-DUTY CONVERTIBLE JET PUMPS AND WELL EJECTORS

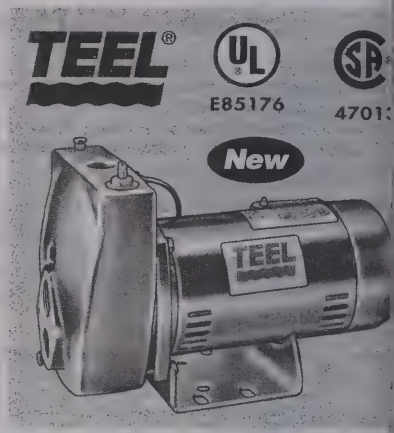
**Heavy-duty cast-iron jet pumps** are designed for either shallow well or deep well water system service, depending on separate ejector selection. Pump units provide continuous duty operation with noncorrosive impeller and diffuser along with pump drain plug for freeze avoidance. UL Listed (E85176).

**Motor has stainless steel shaft,** ball/ball bearing design with rear access motor controls protected by rainproof cover. 1/3 HP is 115/230V, 60 Hz split phase design; 1/2 to 1½ HP are dual voltage 115/230V, 60 Hz capacitor start design and are factory connected for 230V. All motors have NEMA 48 frame, common square flange face (Y) mounting, with rear compartment that opens for easy servicing of motor components without motor removal, disassembly.

**Units have 1" discharge.** 1" pressure pipe connection and 1¼" suction pipe connection. Appropriate ejector package must be used to obtain proper performance and long motor life. Maximum operating temperature 140°F continuous duty. Overall dimensions: 12H x 9¼W x 14½"L.

**Shallow well installation.** Use bolt-on ejector when vertical distance to water is less than 25 ft. and install as a single pipe system to water source. Water well installation requires the well point or drilled well suction pipe be 1¼" for best performance.

**Deep well installation.** For well water depths of 20 to 110 ft. Use double pipe ejector package for wells having 4" or larger diameter with 1" pressure and 1¼" suction pipes. Use single pipe (packer) ejector with wells of 2" diameter having double to single pipe adapter at top of well.



| HP | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 1/3 | *New* 4RJ47 | $307.12 | **$204.75** | 37.0 |
| 1/2 | *New* 4RJ48 | 318.37 | **212.25** | 36.0 |
| 3/4 | *New* 4RJ50 | 400.12 | **266.75** | 40.0 |
| 1 | 4P035 | 478.60 | **320.00** | 70.0 |
| 1½ | 4P036 | 506.46 | **338.00** | 75.0 |

**Large cast iron housings easily dispel air for quick initial prime and quiet operation.**

**For shallow or deep well service to 110 ft. Requires separate ejector.**

**Includes:**

- **1/3 to 1½ HP, NEMA 48, A.O. Smith motor. Square flange face with rear service access**
- **Drain plug**
- **Air volume control port**
- **Built-in pressure regulator**
- **Pressure gauge**
- **Square D adjustable pressure switch set for 30-50 PSI cut-in, cut-out operation**

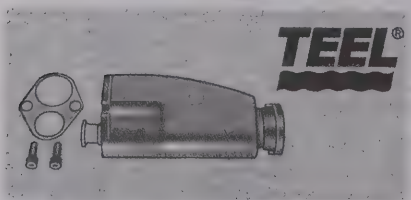
## DEEP WELL DOUBLE PIPE EJECTOR



**In-the-well ejector requiring 4" or larger well diameter. For suction and drive pressure pipes.**

- **For cast-iron heavy-duty and corrosion resistant premium jet pumps Nos. 3P685 thru 3P687, 3P716, 3P740, 4P035 thru 4P039, 4RJ47 thru 4RJ50 and 4RJ96**
- **Plastic suction pipe adapter**
- **Foot valve**
- **2½" Foot valve pipe nipple**
- **Extra nozzles and venturies for various horsepowers and depths**

**No. 2P430.** Shpg. wt. 5.0 lbs. List.....$72.3
Each.....$48.0

## CAST-IRON BOLT-ON SHALLOW WELL EJECTORS

Ejector package required when installing pump in new installations or motor overloading will occur. Performance dependent upon both ejector and pump. Replacing one and not the other could result in performance deliveries other than those listed. New ejector must be installed in all shallow well convertible pump applications where pump model or brand is different from pump stock numbers.

- **For cast-iron, heavy-duty jet pumps Nos. 4PO35, 4P036, 4RJ47, 4RJ48, 4RJ49, 4RJ50**
- **Check valve and venturi adapter**
- **Extra nozzles and venturies for various horsepowers and depths**
- **Gasket/bolts included**

**No. 2P429.** Shpg. wt. 7.5 lbs. List.....$39.40
Each.....$23.9

*If we don't have a pump for it, chances are it can't be pumped.*

# PREMIUM CONVERTIBLE CORROSION-RESISTANT JET PUMPS

- **High performance**
- **Fast prime**
- **Advanced design, materials, and construction for maximum pump life and serviceability**
- **For shallow or deep wells to 110 feet requires separate ejectors, sold below**

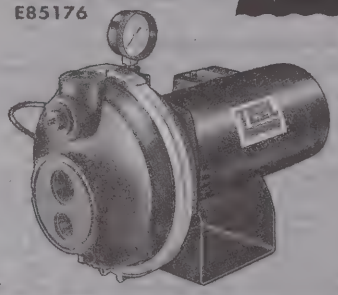
**rge pump housing** holds more water, creasing air removal capability and eeding up initial priming.

**mp body** is fiberglass thermoplastic; peller, nozzles and venturies are Noryl® astic, and impeller diffuser is reinforced lypropylene. All parts that contact water e resistant to corrosives and abrasives und in most wells.

**ilt-in regulator** sets drive pressure in deep ell installation; pressure gauge included. ain plug allows draining in freezing environments.

**otor has stainless steel shaft,** ball/ball bearg design with rear access motor controls otected by stamped steel rainproof ver.

**l motors are 115/230V, 60 Hz capacitorrt.** Factory wired for 230V, factory set r 30-50 PSI. All units have 1" discharge. ector piping sizes of 1" drive pressure id 1¼" suction. Maximum operating temrature 125°F continuous duty. Not recmmended for pressure-boosting applicaons. 10¾W x 18¾L x 11"H.



**Includes:**

- 3/4 to 1½ HP, NEMA 48, A.O. Smith pump motor. Square flange face with rear service access
- Rustproof construction
- Drain plug
- Air volume control port
- Built-in pressure regulator
- Pressure gauge
- Square D pressure switch
- UL Listed (E85176)

## CORROSION-RESISTANT CLAMP-ON SHALLOW WELL EJECTOR

TEEL®

No. 2P431

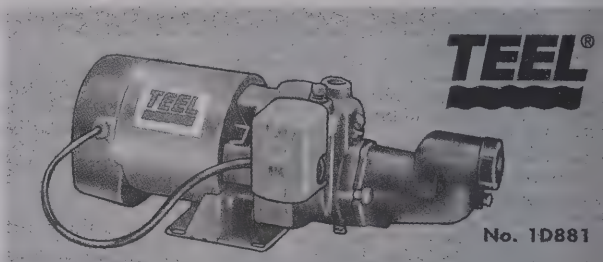
- **For corrosion-resistant premium jet pumps Nos. 3P685, 3P686, 3P687, and 3P716 only**
- **Built-in check valve**
- **Extra nozzles for various horsepowers and depths**
- **Stainless steel clamp**
- **An ejector package is required when installing pump in new installations or motor overloading will occur**
- **Performance is dependent upon both the ejector and the pump**
- **A new ejector must be installed in all shallow well convertible pump applications where the pump model or brand is different from pump Stock Nos.**
- **1¼" Suction**
- **Teel brand.**

**No. 2P431.** Shpg. wt. 5.0 lbs. List .....$69.35.
Each .....$46.30

## SINGLE PIPE 2" DEEP WELL PACKER

**Single pipe "in the well ejector"** for pumps Nos. 3P685 thru 3P687, 4RJ47 thru 4RJ50, 3P716, 4P035, and 4P036. Requires 2" cased well in good condition for sealing drive and suction water. Includes: cast iron body with packer cup type seals and check valve, nozzles and venturies for all pump horsepowers and depths, pump side tappings—1" drive and 1¼" suction, well seal for 2" O.D. casing, tapped for 1¼" galvanized suction pipe (do not use plastic pipe), 10 turned suction pipe couplings. Estimate 10% performance loss from pump performance charts with use of packer.

**No. 2P484.** Shpg. wt. 12.0 lbs. List ..... $176.86.
Each .....$118.00



# HIGH-EFFICIENCY CAST-IRON SHALLOW WELL JET PUMPS

## HIGH-EFFICIENCY CAST-IRON SHALLOW WELL JET PUMPS

- **Unique patented motor mounting ring allows replacement with any standard NEMA 56J motor**
- **1/2 and 3/4 HP Dayton pump motor with rear access service**
- **Large cast-iron pump housing**
- **Includes removable, bolt-on shallow well ejector**
- **Precision modeled thermoplastic impellers and diffusers**
- **Square D pressure switch**
- **CSA Certified**

**Applications:** Shallow well jet pumps are designed for installations with driven well points, dug wells, drilled wells or cisterns where higher operating efficiencies are desired. For use when vertical distance to water is less than 25 feet and installed as a single pipe system to the water source. Pumps feature large cast iron housing with open case design and top located priming ports for easy priming. Removable bolt-on, cast-iron ejector with nozzle cleanout port and air volume control tapping. Features non-corrosive impeller and diffuser, 1/4" NPT drain plug and reusable Buna N internal sealing rings. Adjustable Square D pressure switch for 30-50 PSI cut-in, cut-out pressure.

**Motor:** High efficiency Dayton single phase, 60 Hz, 3450 RPM, capacitor start motor. Copper start and run windings, permanently lubricated and shielded ball/ball bearings, thermal overload protection with automatic restart. Rear motor cover provides quick access to all electrical components. Fully enclosed motor switch protects contact points from dirt, dust and insects. Capacitor start motor is factory connected for 115V. Spade connectors enable quick voltage change. Maximum operating temperature: 140°F continuous-duty. Teel brand.

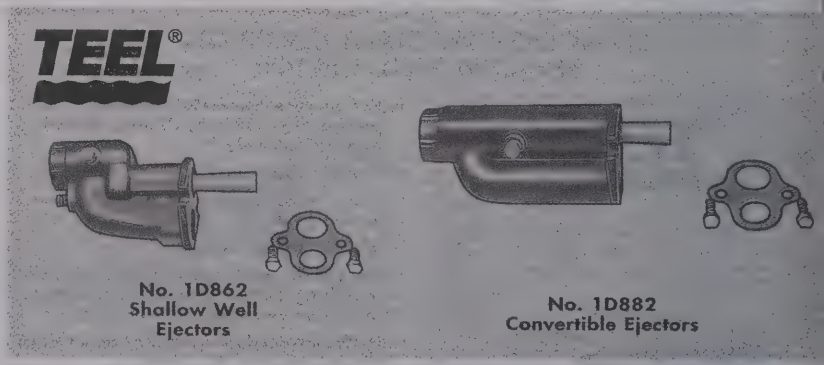
## EJECTORS FOR PREMIUM CAST-IRON OR STAINLESS STEEL CONVERTIBLE JET PUMPS



Ejector package is required when installing pump in new installations, to optimize operating efficiencies and prevent motor overloading. Performance is dependent upon both ejector and pump. Replacing one and not the other could result in performance deliveries other than those listed. A new ejector must be installed in all shallow and deep well applications when a new pump is installed. Teel brand.

### SHALLOW WELL EJECTORS

- **Extra nozzle and venturies for optimizing efficiencies of various horsepower pumps (1/2-1 HP)**
- **Gaskets and bolts included**

### DEEP WELL EJECTORS

- **For 4" minimum diameter deep well installations**
- **Extra nozzles and venturies for optimizing efficiencies of various horsepower pumps and depths**
- **Gasket and bolts included**

# HIGH EFFICIENCY CAST IRON OR STAINLESS STEEL SHALLOW WELL & CONVERTIBLE JET PUMPS

TEEL®

Shallow Well

LR90197

Convertible

Replacement Parts Available
1-800-323-0620

Repair Service Available
Contact Your Local Branch

**3-YEAR TEEL LIMITED WARRANTY**
**on stainless steel models; 1-year on cast iron.**

- **Unique patented motor mounting ring allows replacement with any standard NEMA 56J motor**
- **High operating efficiencies**
- **Cast iron or Type 303 stainless steel pump housings**
- **For shallow well (0-25 ft.) or deep well service to 110 ft.**
- **Shallow well pumps include bolt-on shallow well ejector**
- **Convertible pumps require separate ejector (see page 3242)**
- **Non-corrosive, precision molded impellers and diffusers**
- **Adjustable Square D pressure switch**

**hallow well pumps:** For applications where ne vertical distance to water is less than 5 feet and installed as a single (suction) ipe system to the water source. May also e used as a booster pump to augment low ity water pressure. Includes motor, quare D pressure switch and removable hallow well ejector.

**onvertible jet pumps:** Adaptable to either ingle pipe (suction) shallow well or dou- le pipe (suction and pressure) deep well stallations. Includes motor, pressure reg- lator, Square D pressure switch and pres- ure gauge. For max. capacities on shallow ell applications, a shallow well ejector ould be used. A deep well ejector can be sed for wells where the pumping water vel is from 30 feet to 110 feet.

**onstruction:** Cast-iron or Type 303 stain- ss steel pump housing and motor mount- g bracket. Top located priming port and rge water cavities enable quick water fill and fast evacuation of air for easy priming. Separate 1/4" tappings are provided for the convenient mounting of the pressure gauge, the pressure switch and for pump draining. 1/4" NPT air volume control tapping also provided. All pumps feature reusable, internal Buna N sealing rings and shaft seal with carbon/ceramic parts. Impellers and diffusers on 1/2 thru 1 HP are non-corrosive and non-fusing thermoplastic. Impeller is lead-free brass on 1½ HP models. Adjustable Square D pressure switch for 30-50 PSI cut-in, cut-out pressure, 1¼" suction, 3/4" discharge, and 1" pressure ports.

**Motor:** High efficiency uni-frame Dayton 115/230V, NEMA J electric motor with copper start and run windings, permanently lubricated and shielded ball/ball bearings, and thermal overload protection with automatic reset. Rear motor cover provides quick access to all electrical components without motor disassembly or removal. Motor switch is fully enclosed protecting contact points from dust, dirt and insects. Capacitor start motor is factory connected for 115V on 1/2 HP motors and 230V on 3/4-1½ HP motors. Spade connectors enable quick voltage change. Maximum operating temperature: 140°F continuous-duty. Teel brand.

# VERTICAL CONVERTIBLE JET PUMPS

- **1/2 to 1½ HP, NEMA 48 Frame, A.O. Smith motor, square flange face with rear service access**
- **Precision automatic pressure regulator**
- **Square D pressure switch set for 30-50 PSI cut-in, cut-out operation**
- **Pressure gauge**
- **Air volume control port**
- **Deep wells to 300 ft. require separate ejector, see page 3240 and 3244.**

Deep well installation. For well water depths of 30 to 300 ft. Use double pipe ejector package for wells having 4" or larger diameter. Use single pipe (packer) ejector with wells of 2" diameter having double to single pipe adapter at top of well. Performances shown below are double pipe; single pipe slightly less at greater depths.

**Applications:** Vertical design for limited space and over-the-well installations. For deep well service to 300 ft. Large cast-iron housings easily dispel air for quick initial prime and quiet operation. NOTE: Nos. 3P740 and 4RJ96 are 2- and 3-stage designs for higher operating pressures and deeper well applications.

**Construction:** Precision machined, close grained cast-iron pump body and base, Noryl impeller and diffuser, and carbon/ceramic Buna N shaft seal. Maximum operating temperature: 140°F.

**Motor:** Stainless steel shaft, ball/ball bearing design with rear access motor controls protected by dustproof canopy. Dual voltage 115/230V 60 Hz design comes connected for 230V. All motors have NEMA 48 frame with rear compartment that opens for easy servicing or motor components without motor removal or disassembly.

**Replacement Parts Available 1-800-323-0620**

# SINGLE PIPE DEEP WELL PACKER FOR VERTICAL JET PUMPS

**Single pipe "in the well ejector"** requires 2" case well in good condition for sealing drive and suction water. Includes: cast iron body with packer cup type seals and check valve; nozzles and venturies for most pump horsepowers and depths; bolts and gaskets; well seal for 2" O.D. casing; tapped for 1¼" galvanized suction pipe (do not use plastic pipe); 11 turned suction pipe couplings. Estimate 10% performance loss from pump performance charts with use of packer. For pump Nos. 3P740, 4RJ96, and 4P037 through 4P039 only.

**No. 4P061.** Shpg. wt. 12.0 lbs. List.....$169.45. Each.....**$112.80**

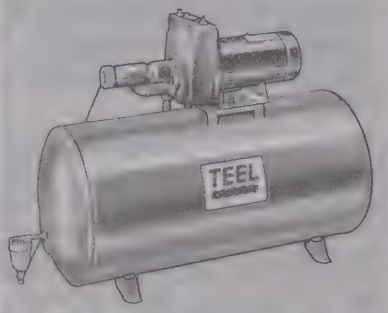
*If we don't have a pump for it, chances are it can't be pumped.*

# SHALLOW AND DEEP WELL WATER SYSTEMS

## CONVERTIBLE JET SYSTEM



**Heavy-duty cast-iron jet pump with 1/2 HP A.O. Smith motor**
**30 Gallon standard tank with special epoxy powder protection**
**Delivers up to 14.3 GPM at 5 feet head**

onvertible jet system is assembled ready or hookup to a 25 ft.—pump to water—hallow well application. Remove bolt-on ector and install "in the well" for a dou-le pipe deep well application to 80 feet eep —pump to water—having well dia. of ' or larger. System includes: 1/2 HP Teel ump connected air volume control, quare D pressure switch, built-in deep ell ejector pressure regulator and gauge, ombination shallow well or deep well ejector with check valve. Pump is driven by A.O. Smith 1/2 HP capacitor-start, 115/230V, 60 Hz, square flange face motor, with easy rear service access. Motor is factory connected for 230V. Adjustable Square D pressure switch is factory set to turn pump on at 30—off at 50 psi. Shallow well capacities based on 1¼" suction pipe. Deep well capacities based on 1¼" suction and 1" ejector drive pressure piping. Pump unit has 1" discharge. Overall dimensions: 29½H x 16W x 40½"L.

## SHALLOW WELL SYSTEM

- **Heavy-duty jet pump with check valve**
- **1/3 HP A.O. Smith jet pump motor**
- **Precharged 2-gallon capacity tank**
- **Draw capacity to 1/2 gallon at 30-50 PSI**

Designed for installation with driven well points, dug wells, drilled wells, ponds, springs or cisterns to 25 feet deep. System comes partially assembled, easily installed in residences, vacation homes, mobile trailers, resort cabins, etc. May also be used as a booster system pump to supplement low city water pressure. 1¼" suction size, 1" discharge. Maximum suction lift: 25 feet. Pump is driven by a A.O. Smith 1/3 HP split phase, 115/230V, 60 Hz, square flange face motor, with easy rear service access. Motor is factory connected for 230V. Adjustable Square D pressure switch preset at factory to turn On at 30, Off at 50 psi. Overall dimensions 21½H x 12W x 21"L. Teel brand.

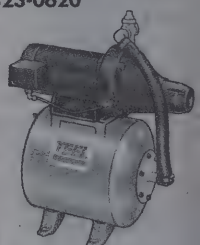
Electric motors, controls, blowers, fans and ventilators, lighting, boilers, ballasts, pumps, furnaces, water heaters, and other products. See Index under Energy Saving Products for complete listings.

# SHALLOW AND DEEP WELL WATER SYSTEMS

- **Corrosion resistant jet pumps with A.O. Smith motors**
- **Assembled and ready for hookup (No. 3P716 requires ejector, purchase separately. See below.)**
- **Heavy-gauge steel tanks with tough polyester exterior finish**
- **Replaceable seamless vinyl air/water separator bags (plastisol, PVC compound) keeps water from touching metal; helps prevent "water logging" and eliminates need for air volume controls.**

Pumps are driven by a 1/2 (No. 3P715) or 3/4 (No. 3P716) HP, 115/230V, 60 Hz capacitor-start motor, factory wired for 230V. Square flange face motor with easy rear service access. Square D pressure switch on pump is adjustable for cut-in pressure; factory set for 30-50 PSI. CSA Certified. Teel brand.



**No. 3P715 is a shallow well jet system with 6 gallon pre-charged squat tank** (equivalent to 15 gallon standard tank), and 1/2 HP A.O. Smith motor. For use in shallow applications where vertical distance of pump to water level is less than 25 feet. 1¼" Suction pipe, 3/4" discharge pipe. Maximum suction lift: 25 feet. Delivers up to 615 GPH at 5 feet of head.

**No. 3P716 is a convertible jet system with 19 gallon pre-charged tank,** and 3/4 HP A.O. Smith motor. For use in shallow or deep wells to 80 feet deep—pump to water—depending on the ejector selected **(purchase ejector separately).** Built-in pressure regulator for setting deep well ejector, pressure gauge. 1" Discharge with 1" drive pressure and 1¼" suction pipe size. Delivers up to 970 GPH at 5 feet of head.

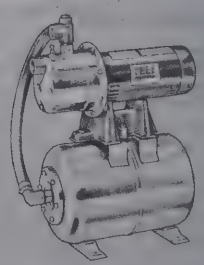
## 3/4 HP STAINLESS STEEL SHALLOW WELL WATER SYSTEM



- **Assembled and ready for hook-up**
- **Rugged stainless steel pump and tank for maximum corrosion resistance**
- **Precharged stainless steel 6-gallon tank (equivalent to 15-gallon standard tank)**
- **Replaceable seamless butyl-blend air/water separator cell helps prevent "water logging" and eliminates need for an air volume control**
- **AO Smith pump motor**

For use in shallow well applications where vertical distance from pump is less than 25 feet. 1¼" suction pipe, 1" discharge pipe. 3/4 HP motor is 115/230V, 60 Hz capacitor start motor, factory wired for 230V. Square D adjustable pressure switch, factory set for 30-50 PSI cut-in, cut-out operation. Built-in shallow well jet. Overall dimensions: 14¼H x 23½W x 27½"L

***New* No. 4RJ37.** Shpg. wt. 54.0 lbs. List $804.75. Each .....**$536.50**

# WELL POINTS AND ACCESSORIES

**COOK LIMITED WARRANTY**

**1-Year on standard product; 3-years on stainless steel accessories. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

### A & B WELL POINTS

Well points are used in the construction of driven wells or can be used as sand screens. Provide quick and economical method for developing ground water wells, draining excavation areas, providing water for irrigation and dewatering. Screens on well points prevent sand, rock and other debris from entering well system. Longer lengths are required for higher flows.

A **Well Points** have cast iron hexagon shaped points, No. 60 stainless steel gauze screens.

B **Cook Well Points** have Type 304 stainless steel points and fittings, and slotted (0.010") stainless steel screens. These points are corrosion resistant, superior to brass, and have 0% lead content. Can handle alkaline water, mildly acidic water and brackish sea water.

C **Drive Coupling** is used to connect sections of pipe as well point is driven deeper into the ground. Coupling is constructed to withstand the force encountered when driving a well. Galvanized steel or Type 304 stainless steel construction.

D **Drive Cap** is designed to withstand the impact of driving a well and protect threads of pipe sections. Galvanized steel or Type 304 stainless steel construction.

DESK SPACE AT A PREMIUM? USE THE GRAINGER CD-ROM, ELECTRONIC CATALOG TO REVIEW THOUSANDS OF PRODUCTS!

Our Grainger Electronic Catalog is a state of the art CD-ROM selection guide which features products and information from our General Catalog. The perfect reference tool when you need product and technical information on the road. Contact your local branch for more information.

NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

# GUIDE TO SUBMERSIBLE PUMP SELECTION

**A deep well submersible water system is used to supply domestic water** automatically to the plumbing system of a home or building from a private well. The complete pumping unit is submerged in the well below water level. Basic components of the system are the pump, pressure switch, and tank.

**Before planning or installation can begin,** two questions must be answered: How much water will be required for daily use; ar can the well produce enough water to meet daily requirements

**The following discussion will assist you** in answering the questio above and help you choose the right size pump.

## 1. WELL CAPACITY

How much water will the well produce in GPM (gallons per minute)? Determine this by : a) well drillers log, or b) use of an older cleanout pump to determine flow rate. NOTE: Never use a new pump for this service. After cleanout pump operates for 30 minutes at free flow, fill a 5 gallon bucket and make a note of the time it takes to fill. Use this data in the following formula:

$$\frac{\text{gal. of water (5)}}{\text{seconds}} \times 60 = \text{GPM (gallons per minute)}$$

**GPH (gallons per hour) = GPM x 60**

NOTE: If at any time during the 30 minutes of free flow water fails to flow, pump should be turned off immediately. Wait 3-4 hours, lower pump deeper into well, and throttle (use a gate valve) pump back by closing valve 1/4 turn. The above procedure should be repeated until water flows continuously for 30 minutes. Not doing so could result in dry running and destroy the pump. The pump should never be closer than 10 feet to the bottom of the well.

## 2. DEPTH OF WELL

This can be determined by one of the following: a) well drillers log, or b) tie a heavy weight to a string, lower into well until it reaches bottom and measure this distance.

## 3. DEPTH TO WATER (WATER PUMPING LEVEL)

To determine this, two vertical distances must be added together: a) total vertical feet from the highest service outlet to ground level and b) total vertical feet from ground level to the pumping level of the water. The water pumping level is defined as the standing water level in the well when the pump is operating, and the water being pumped out equals the water entering the well. This level is generally several feet lower than the water level in the well when pump is not operating.

It should be understood that pump setting depth does not determine pump performance. Main criteria is the water pumping level. The depth of the pump below this water level is of no significance regarding gallons and pressure delivered by the pump.

## 4. VOLUME

Each outlet that may be left on for continuous use will require about 3 gallons per minute (GPM). A one bathroom house is usually sized for two continuous use outlets and a two bathroom house is usually sized for three continuous use outlets. Livestock requirements are in addition to home requirements and, of course must be added to arrive at the final volume requirement.

## 5. PRESSURE

Many homes use a 20-40 pressure (PSI) setting. Higher cut-in and cut-out (30-50 PSI) settings may be needed where automatic appliances require higher pressure for proper operation.

## 6. 2-WIRE VS. 3-WIRE

Three-wire pumps have the advantage of high starting torque motors. A high starting torque is sometimes needed to break free mineral deposits that may adhere to the pump's moving parts. Two-wire pumps should not be used where abrasives or heavy water scale is present.

## 7. CONSTRUCTION MATERIALS

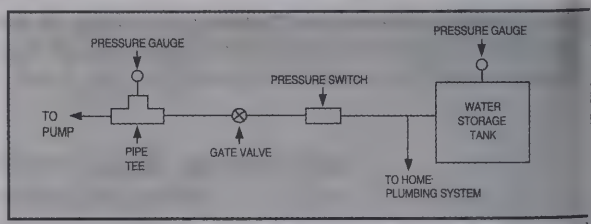
a. Cast iron basic construction represents good value and is useful in many applications.

b. Bronze construction resists corrosion but applicable lead content specifications should be determined.

c. Type 316 stainless steel construction has superior corrosion-resistance.

## USING THE SELECTION CHART

From the Catalog's product listing page (see Index under De Well Pumps), find the section in the pump selection chart th accurately reflects your well's capacity as determined in St 1.**Low capacity wells** generally deliver 4 GPM (gallons per minut or less; **average capacity wells** deliver 10 GPM; **high capacity we** deliver 20 or 27 GPM; **very high capacity** wells deliver 35 or mo GPM.



On the horizontal line at the top of the chart locate your depth water (water pumping level), go vertically down the column un the volume required (GPH) or slightly greater appears in t same column within the pressure (cut-in PSI) you have chose **Do not select a pump that will deliver more water than the well can p duce.** Select a pump based upon the DEPTH TO WATER (wat pumping level) not the pump setting level (depth of the pump the well). Once the proper volume has been found on the cha locate the pump group letter in the far left column. Any pur listed in the specification chart with the same pump group lett will satisfy your requirements.

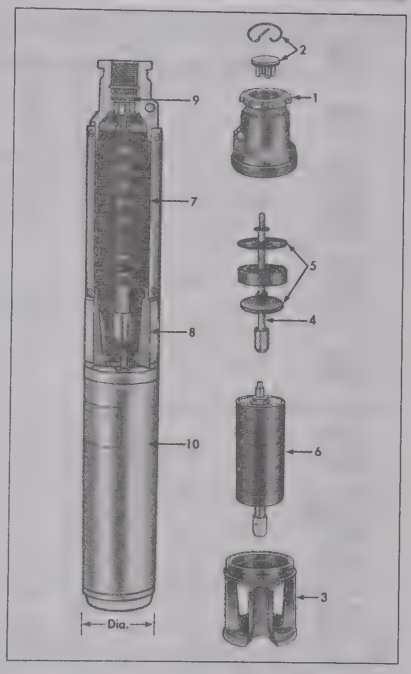
### EXAMPLE

Knowing 500 GPH is desired (based upon volume required and well capacity) with a total vertical distance of 150 feet to the water pumping level and a 20 PSI cut-in pressure setting, move across to 150 feet and down to read 500 GPH. At 20 PSI (590 GPH) you could have two choices in pump 4P859 or 4P860.

### CAUTION

Should your selection be on or off the far left of the chart and not have a gallon per hour rating shown, the pump must be restricted or throttled before the water system tank, or pump damage may occur. Example: No. 4P862 at 60 feet and 20 PSI has no rating shown. Pumps at less than 20 feet have no rating.

Should the above situation occur, the following installation d gram is to be followed utilizing the pump you have selected:



With the pump running, adjust gate valve until pressure gau located on pump side of the valve reads 10 PSI higher than t highest tank pressure gauge reading i.e., if the system is set 20-40 PSI the pressure gauge on the pump side of gate va would show 50 PSI.

# 1/3 TO 5 HP, 2 AND 3-WIRE PREMIUM SUBMERSIBLE PUMPS

**Cast iron, stainless steel or thermoplastic intake and discharge**

**For wells having 4" ID or larger diameter.**

**remium submersible pumps** for water well ystems. Volume of water delivered over ie range of pressure switch settings is ore consistent than a jet pump. lectrical power consumption can run 50 ) 75% less than jet pump operation for the ime amount of water delivered. Pumps id motors are designed and manufac- ired to ensure quiet, trouble-free service and long life in home, farm, ranch, commercial, and industrial applications. Motors are Franklin Electric watercooled and can be installed in any position—vertical or horizontal.. 3-Wire models require an above ground control box between pressure switch and pump motor. 2-Wire models have "in the motor" controls and wire directly to water system pressure switch or power supply. Assembled units include pump, motor and built-in or external check valve. Splice kit included on Teel models.

**PM Series**—For low capacity wells where a higher series would "overpump" the well, using pump failure.

**GPM Series**—For low capacity wells where a higher series would "overpump" the well, using pump failure.

**) GPM Series**—For average capacity wells—the most popular choice in farm and home pplications.

**)-27 GPM Series**—For high capacity wells where more than normal water supply is quired: ranches, dairy farms, light irrigation and light industrial water systems.

**-85 GPM Series**—For very high capacity wells and/or very deep wells. For irrigation and dustrial water systems where higher water volume is needed.

TEEL®

**DAYTON 18-MONTH LIMITED WARRANTY**

**Dayton Electric Mfg. Co. warrants Teel deep well submersible pumps for 18 months except Nos 4P867 thru 4P877 which are warranted for 3 years.**

UL® E85176

**Replacement Parts Available 1-800-323-0620**

(*) Pump motors will overload depths less than 20 ft. or at depths indicated. See "Caution" in Guide for Submersible Pumps Selection" on page 3248. (†) Suggested tanks are sized to provide d down sufficient to allow approximately 2 minutes cycling at 80 ft. depth to water, daily peak use. For shallower wells, use next size larger tank. Tank models with extra number shown indicate number of tank needed to pride sufficient drawdown at pressure setting shown.

*If we don't have a pump for it, chances are it can't be pumped.*

# MOTOR CONTROL BOXES AND SUBMERSIBLE PUMP CABLE

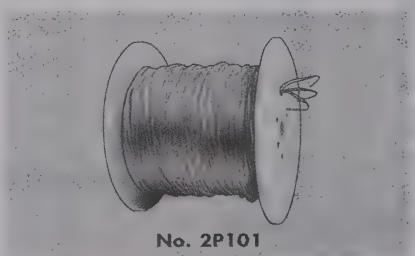
## SUBMERSIBLE MOTOR AND PUMP CONTROL BOXES

E79319

LR54766

Replacement Parts Available 1-800-323-0620

- Includes starting capacitors and running capacitors
- Easy wiring, box type terminal lugs accept up to #10 AWG wire on 1/3-1 HP and up to #2 AWG wire on 1½-15 HP boxes
- Pre-punched holes for pole or wall mounting
- Type 3R enclosure, suitable for outdoor use



For Franklin single-phase, 3-wire submersible motors and submersible well pumps driven by these motors. Not suitable for pumps with Dayton oil filled motors or motors manufactured by a company other than Franklin. For outdoor mounting with operation temperature ranges of 14°F to 122°F (-10°C to 50°C). Designed for vertical upright mounting only. Do not mount in direct sunlight, high temperature locations, damp well pit or other humid locations. CSIR (Capacitor start, induction run) boxes are quick disconnect relay type. CSCR (Capacitor sta capacitor run) models for greater electrical efficiency and long pump life. Deluxe CSCR boxes include a magnetic contact eliminating the need for auxiliary boxes, contactors and hea duty pressure switch. Deluxe box is recommended for water sy tems that utilize a pressure switch. Franklin brand. **Note:** phase motors require a 3-phase motor starter with correct ove load (heater) coils installed.

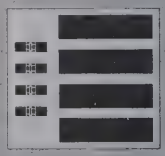
(*) Deluxe box includes magnetic contractor. Recommended for water systems that utilize a pressure switch and safety relief valve.
(†) ... and most pumps powered by Franklin Electric submersible pump motors. (‡) CSA Certified (LR9862).

## 4-WIRE SUBMERSIBLE PUMP CABLE

- Premium grade PVC insulation for wet or dry applications
- Resists oil, lubricants, acids, alkalis, ozone and abrasion
- Color-code: Black, yellow, red and green ground
- Twisted construction, 600V rated type THW
- Temperature range: –4 to 167°F
- 500 ft. reel
- UL Listed (E24939)
- Capital brand



No. 2P101

## CABLE SPLICE KIT

No. 2P031

**Self-sealing heat shrinkable tubing** provid quick, leakproof cable splicing. Lighter match can be used to shrink tubing waterproof seal. Excellent dielect strength. Resistant to moisture, fungus a weathering. For wire sizes 14, 12 and Kit contains four shrink tubes and b connectors.

**No. 2P031.** Shpg. wt. 0.1 lbs. List .....$9.6
Each **$4.97**; Lots 3 .....**$4.**

# STANDARD WATER TANKS

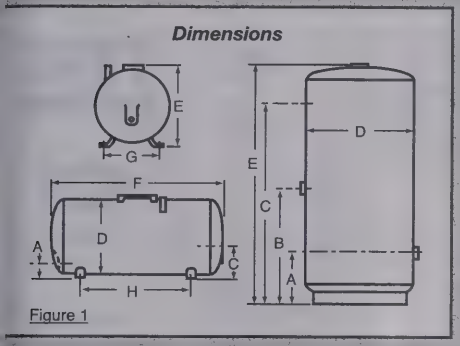

Figure 1

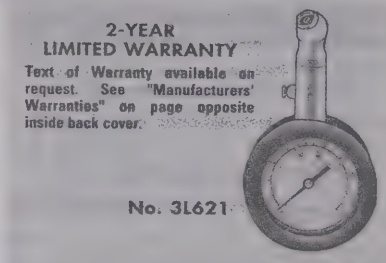
No. 3P557

**DAYTON 3-YEAR LIMITED WARRANTY**

**Dayton warrants Teel water tanks in this listing for 3 years. Text of Warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**



**For all domestic cold water systems**
**Meet 100 PSI test pressure and 75 PSI working pressure standards**
**Maximum temperature 120°F**
**Epoxy coating inside; blue polyester coating outside.**

**ter tanks** are made of high-grade steel, emically cleaned and dried, then coated h epoxy on the inside and out for sani- y storage of domestic use water.

**mounting bracket designed to accept a vari- of pumps** is welded to the top of the 12 l 30 gallon capacity horizontal style ks. Tanks are suitable for all domestic d water systems. Horizontal units, Nos. 56 and 3P557 have bottom discharge 3/4" FNPT-3/4" OD standpipe for hose connection to jet pump discharge and 1/4" FNPT connection for jet pump air volume control. No. 3P272 has 1¼" FNPT inlet and outlet with 1¼" FNPT connection for submersible well pump air release float air volume control and 1/4" FNPT connection for air volume control of a jet pump. Teel brand.

**NOTE:** Always use a pressure relief valve with pressurized tanks. Pressure relief valve must be capable of discharging the full output of pump. Output must be at maximum rated pressure of lowest rated components in system. **Failure to use relief valve may result in property damage or serious injury.**

## WATER TANK GAUGE

- **Steel case**
- **Rubber "shock absorber" cover**
- **Polycarbonate window**
- **Full geared brass movement**
- **Easy-to-read dial face**
- **Dual scale: 0-100 PSI, 0-700 KPa (Kilo Pascal = PSI x 6.895)**
- **Phosphor bronze bourdon tube**
- **±1% Full-scale accuracy**
- **Stop-hand indicates and holds pressure reading until released**
- **Release valve allows bleeding of air to exact tank pressure**
- **Nickel-plated swivel-angle tip and valve**

**Applications:** Accurately and conveniently measures air pressure in precharged water tanks and other equipment with Schrader valve connections. Correct tank pressure assures proper operation of water well pumps, thereby increasing pump life.

**No. 3L621.** Shpg. wt. 0.6 lbs. List .....$19.50.
Each .....**$9.95**

sable water in tank between pumping cycles. Data based on atmospheric pressure at sea level. Proper drawdown relies upon a properly installed and operating air olume control. (†) Measured to center of outlet. (#) Tolerance ±1/4". Note: All outlets are FNPT.

## TANK SELECTION GUIDE

ecting the correct tank is important. If replacing a precharged k, use a comparable size or larger, or use the sizing instruc- ns and table below. Always choose the largest tank possible, ause it lengthens pump life by reducing the operating cycles, reduced pump cycling can save electricity.

charged tanks have more than twice the drawdown capacity tandard tanks of the same size.

TE: More than one tank can be used to obtain the required wdown, but all tanks should be either standard or precharged. all tank between the water source and the service outlet.

**NOTE:** Always use a pressure relief valve with pressurized tanks. Pressure relief valve must be capable of discharging the full output of pump. Output must be at maximum rated pressure of lowest rated components in system. **Failure to use relief valve may result in property damage or serious injury.**

**Sizing instructions:**

- **Determine the flow rate of your pump in Gallons Per Hour**
- **Choose your pressure switch setting**
- **Select the tank from the chart below with drawdown at your chosen switch setting that is equal to or above your pump GPH**

| mp GPH | 240 | 300 | 360 | 420 | 480 | 540 | 600 | 720 | 840 | 960 | 1080 | 1200 | 1320 | 1500 | 1800 | 2100 | 2400 | 2700 | 3000 | 3600 | 4800 | 6000 | 7200 |

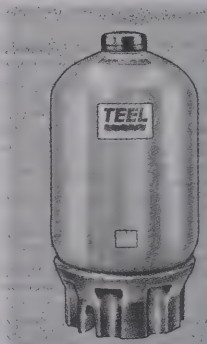
he amount of usable water discharged between pump cycles of an automatic water system.



# PRECHARGED FIBREWOUND WATER TANKS

- **Tough composite construction is rust and dent resistant, extends tank life**
- **Only air cell which can be replaced with tank plumbed in place**
- **Heaviest thermoplastic base in the industry**
- **50% lighter than steel tanks**
- **33% greater burst strength than steel tanks**

Use wherever pressurized tanks are needed in water systems applications. Tank utilizes a durable, FDA approved air cell which is resistant to chlorine and will not promote taste or odor problems associated with iron bacteria that may be present in the water supply.

Each tank is wrapped with more than three miles of overlapping, continuous fiberglass strands, sealed with high grade epoxy resin, then oven-cured. Tanks will not rust, corrode, dent, or scratch. Composite construction is tougher and half the weight of steel tanks. Installation is faster, easier, and can be handled by one person.

One piece, high density polyethylene base rotates 360° for ease of service hook-up. Air cell is fabricated from durable and extensively tested ethyl-vinyl-acetate (EVA). Inner liner is one piece, high density polyethylene. Brass body, Schrader core assembly air valve. Generous top air cell opening provides easy access and serviceability to the air cell with the tank plumbed in place.

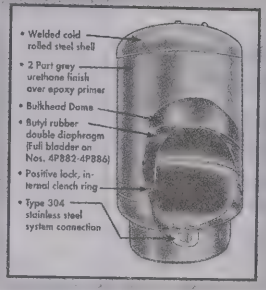
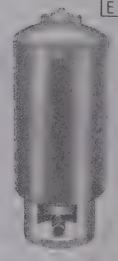
## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

**Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.**

# PRECHARGED WATER TANKS



TEEL®



D No. 4P836

**DAYTON 5-YEAR LIMITED WARRANTY**

**Dayton Electric Mfg. Co. warrants Teel water tanks in this listing for 5 years. Nos. 4P882-4P885 have 1-year warranty. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

**pplications:** Jet and submersible water ell systems, Reverse Osmosis (R.O.) fil- r systems and car wash holding tank sys- ms. Materials compatible with distilled d deionized water. Reduces number of mping cycles and helps extend pump e. Precharged design allows up to three nes the drawdown capacity of standard yle tanks. Greater drawdown is available increasing range between pump cut-in d cut-out pressure settings. Tank deliv- s maximum amount of water each time, d virtually eliminates water-logging. rtical and horizontal tanks available. ximum working pressure: 100 PSI; ximum temperature: 160°F, except Nos. 882-4P886 have 125 PSI max. working essure, 200°F max. working tempera- e, and are ASME Section VIII Certified.

**scription:** All air charging-valves and pip- connections are conveniently located eliminate elbows and joints, and reduce ie/materials required for installation. System connections accept all threaded standard pipe (NPT) fittings. Vertical tanks, Nos. 4P835-4P839, Nos. 4P882-4P886 and 5P229, 5P230 have bottom discharge with Type 304 stainless steel elbow installed and prealigned to skirt opening. Nos. 3P676, 4P833, and 4P834 have stainless steel pipe nipple. Brass air charge valve can be repaired or replaced without disconnecting plumbing. Most units have universal pump stand which can be easily installed or put aside if not required. Pump stands for Nos. 4P838, 4P839, 5P229 and 5P230 are available from Grainger Parts Operations (Call 1-800-323-0620 for Part No. PS2126).

**Construction:** Durable and airtight shell of welded cold rolled steel. Durable finish with high luster except Nos. 4P882-4P886 which have a coat of gray primer paint and heavy-duty top and side lifting rings. FDA approved butyl rubber double diaphragm separates water from tank's inside and air charge so no taste or odor enters water. Clench ring maintains diaphragm form. Nos. 4P882-4P886 have full butyl rubber bladder. Diffuser directs water flow upward and outward. System connection is corrosion resistant stainless steel. **NOTE:** Always use a pressure relief valve with pressurized tanks. Pressure relief valve must be capable of discharging full output of pump. This output must be at the maximum rated pressure of the lowest rated components in the system. **Failure to use a relief valve may result in property damage or serious injury.**

**No. 3P676.** Compact design for cramped installations such as mobile homes.

**No. 4P835.** Compact, squat design that fits in tight spots such as under sink or staircase. 23 gallon capacity is roughly equivalent to a 60 gallon standard tank.

**Nos. 5P229 and 5P230.** Tall, narrow design for closet or well house installations.

required, order Part No. PS2126 separately from Grainger Parts Operations at 1-800-323-0620.

# CHECK AND FOOT VALVES

**1-YEAR BRADY, AND MYERS LIMITED WARRANTY**
**3-YEAR COOK LIMITED WARRANTY**
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite back cover

**Brady combination check/foot valves** are used in water well and irrigation or fertilizer systems to prevent backflow or loss of prime. Patented "nose cone" design reduces turbulence and increases flow thru the valves. Made of DuPont Delrin with a stainless steel spring and Buna N Seal. **3-In-1 Valves.** Shipped as spring-loaded foot valves; can be converted to check valves by removing strainer. With spring removed, they convert to check/float valves, ideal for low pressure applications. Maximum temperature: 180°F. Valves contain no leaded components. Brady brand.

**Positive-action no-lead silicon bronze check and foot valves** are for use with cold water. Cast bronze construction. Foot valves have No. 6 perforated strainer. One piece cast silicon bronze poppets are equipped with corrosion-resistant stainless steel spring and Buna N seat. Maximum temperature: 190°F. Valves contain no leaded components. Teel brand.

**Teel PVC Spring Check Valves** for use in stopping backflow and siphoning. Use on potable water lines, swimming pools, hot tubs, spas, and solar installations. Maintenance-free operation. Tapered valve body design and enlarged valve chamber reduce chatter and turbulence. Feature stainless steel spring, raised radius valve seat for positive seal and excess solvent trap to prevent excess cement or softened material from entering body and sealing area during installation. Max. temperature: 120°F. Teel brand.

**Teel High Strength Ductile Iron Check Valves** for use with high flow submersible well pumps. No. 4RK71 for pumps with 2" NPT, No. 4RK70 for pumps with 3" NPT. Valves have ductile iron poppet, Buna N seal and stainless steel spring loaded springs and fasteners. Max. temperature: 180°F. Valves contain no leaded components. Teel brand.

**Cook Type 304 stainless steel check and foot valves** are corrosion-resistant and used in potable (drinking) water and alkaline water applications. Also used where non-leaded valves are required. Valves have Neoprene flapper and Type 304 stainless steel seat. Foot valves have 1/8" slotted strainer. Maximum temperature: 160°F. Cook Screen Technologies brand.

**Cook positive-action Type 316 stainless steel check and foot valves** are corrosion-resistant and used in water and chemicals compatible with component materials. Foot valves have 1/8" slotted strainer. One piece cast stainless steel poppets are equipped with stainless steel spring and Viton O-ring. Maximum temperature: 190°F. Valves contain no leaded components. Cook Screen Technologies brand.

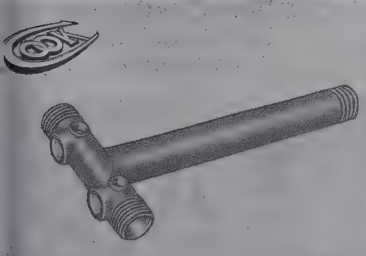
## PUMP NOZZLE/STRAINERS

2" Nozzle/ Strainer

COOK 3-YEAR LIMITED WARRANTY

Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**Nozzle/Strainers** can process flow in either direction. Can be used as pump inlet strainer or with ion exchange resin and water softeners, sand filters and carbon filters. Type 316L stainless steel. Male or female fittings. Max. 1 PSI differential pressure. 60 mesh openings.



**Applications:** Constructed of Type 304 or 316 stainless steel with profile wire screen for strength and durability.

**Strainers** are used at pump inlets to protect pump and system. Also used at pump outlets to prevent clogging or contamination of carbon or filter media. Max. temperature: 260°F. Can be used on centrifugal, rotary gear, rotary screw, flexible impeller and piston type pumps. For use with fluids compatible with Type 304 or 316 stainless steel.

At 0.5 FPS (feet per second) velocity.

## STAINLESS STEEL TANK TEES

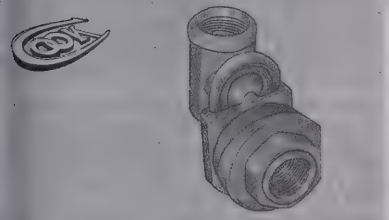
COOK 3-YEAR LIMITED WARRANTY

Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**Corrosion-resistant;** used to connect submersible water well pumps to standard and pre-charged water tanks. Used for potable (drinking) and alkaline water applications, or where non-leaded components are required. 1 and 1¼" Tank tees have two 1/4" gauge ports, two 1/2" control ports, and three 1 or 1¼" male tank connections. Plugs, gauges, controls and tank are not included; order separately. Cook Screen Technologies brand.

### TANK TEE ORDERING DATA

| Tee Size | Cook Model | Stock No. | List | Each | Lots 3 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 1" | TT1000 | 1D224 | $134.08 | $95.45 | $82.52 | 2.6 |
| 1¼ | TT1250 | 1D892 | 147.60 | 105.50 | 91.26 | 4.1 |



## PITLESS ADAPTER

**Prevents well contamination** by forming a tight seal between vertical drop pipe and horizontal service pipe connection. Seal is achieved by compressing an O-ring at the casing to precision machined elbow and slide. Brass construction with neoprene gasket. Unit fits 5 to 12" I.D. well casing and 1" service pipe. For installations up to 500 ft. Tested to over 150 PSI working pressure. 2500 lb. weight capacity. **Not for sale in Wisconsin.** Check state and local codes for compliance.

**No. 2P028.** Shpg. wt. 3.2 lbs. List $48.76. Each **$31.85;** Lots 3 ..... **$27.58**

## STAINLESS STEEL PITLESS ADAPTER

COOK 3-YEAR LIMITED WARRANTY

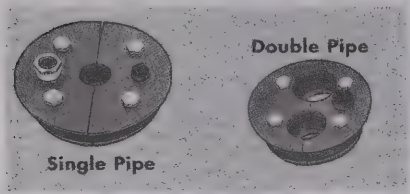
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**Corrosion-resistant** for use in potable (drinking) and alkaline water applications. Also used where nonleaded adapters are required. Construction cast Type 304 stainless steel with neoprene gaskets. Unit fits 5 to 11" I.D. well casing and 1¼" service pipe. Two 1¼ x 1" stainless steel reducing bushings are included to fit 1" service pipe. For pump installations up to 500 ft. Working pressure: 150 PSI; max. weight capacity: 2500 lbs. **Not for sale in Wisconsin.** Check state and local codes for compliance. Will reduce I.D. of casing by 1⅜" for passage of pump by the adapter and into the well. Cook Screen Technologies brand (PA1250).

**No. 1D893.** Shpg. wt. 7.0 lbs. List ..... $249.80. Each ..... **$178.50;** Lots 3 **$154.29**

## TORQUE ARRESTOR

**Installs directly** above the pump, holds it centered in well. Snubs starting torque to prevent drop pipe whipping or power cable damage. Submersible, two-piece design of non-toxic PVC installs quickly. Securely fastens to 1 or 1¼" drop pipe with two stainless steel clamps provided. Field adjustable; fits well casings from 4 to 8" I.D.



**No. 2P029.** Shpg. wt. 2.2 lbs. List ..... $13.60. Each ..... **$7.08;** Lots 3 **$5.77**

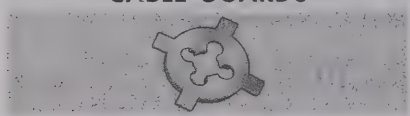
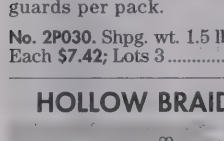
# WATER WELL ACCESSORIES



## CAST IRON SANITARY WELL SEALS

**Sanitary well seals** keep dirt, liquids and impurities from entering the well from the top. Seal plates are thick gray iron castings split into halves for greater flexibility. Four chrome plated steel bolts allow maximum torque to compress a 3/4" thick virgin rubber gasket against the well casing and water pipe to make the seal tight. 3/4" diameter hole provides an opening for cable in submersible well applications. Washers and grommets for control wires included.

| Well Casing Size | Drop Pipe Size | Stock No. | List | Each | Lots 3 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **SINGLE PIPE SEAL SPECIFICATIONS** | | | | | | |
| 4" | 1" | 2P022 | $25.51 | $16.28 | $13.04 | 3.5 |
| 4 | 1¼ | 2P023 | 25.51 | 16.28 | 13.04 | 3.5 |
| 6 | 1 | 2P025 | 39.59 | 25.10 | 20.09 | 8.2 |
| 6 | 1¼ | 2P026 | 38.59 | 24.46 | 19.58 | 7.9 |
| **DOUBLE PIPE SEAL SPECIFICATIONS** | | | | | | |
| 4 | 1¼ x 1 | 2P024 | 25.57 | 16.32 | 13.07 | 2.7 |
| 6 | 1¼ x 1 | 2P027 | 39.90 | 25.30 | 20.25 | 7.9 |

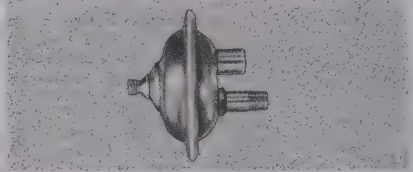


## CABLE GUARDS

Used to prevent scraping of power cable against well casing causing abrasion of insulation. Polyethylene guards fit 6" well casing with tabs that can be cut to fit 5 and 4" casings. Recommended spacing is one every 20 ft. inside well. Twelve guards per pack.

**No. 2P030.** Shpg. wt. 1.5 lbs. List .....$18.70.
Each **$7.42;** Lots 3 .....**$6.04**

## HOLLOW BRAID WELL ROPE

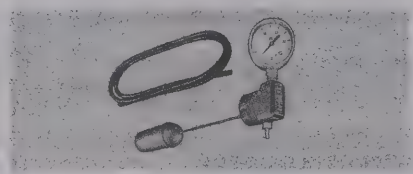


1/4" hollow braid monofilament polypropylene rope for use in anchoring deep well submersible pumps. Color black. Resistant to mildew, dry rot and the effects of sun light and weather. Sold in reels of 500 and 1000 feet. Duraline brand by Crowe Rope Co.

**No. 2W658.** 500 feet. Shpg. wt. 6.0 lbs.
List $24.02. Each.....**$19.36**

**No. 2W659.** 1000 feet. Shpg. wt. 11.0 lbs.
List $48.01. Each.....**$38.60**

## AIR VOLUME CONTROLS



Maintains air volume in standard water system pressure tanks, reduces cycling frequency, resulting in longer pump life. A built-in check valve on tank side of No. 2A650 allows the control to displace a much greater volume of air into the tank per pump cycle. It also allows proper control operation in installations where a high static water table is prevalent or a minimal amount of vacuum is created by the pump. Factory sealed, non-repairable controls are constructed of zinc chromated steel with a molded butyl rubber diaphragm. Pump side connections are 7/16"-24 thread, which accept compression nut and sleeve for 1/4" O.D. tubing. Tank connections: 1/4" MPT, No. 3A421; 3/8" MPT, No. 2A650. Brady brand.

| Tank Size Gallons* | Brady No. | Stock No. | List | Each | Lots 3 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 6-42 | AV45 | 3A421 | $14.10 | $10.61 | $8.59 | 0.7 |
| 6-120 | AV100 | 2A650 | 19.54 | 11.72 | 9.53 | 0.8 |

(*) Controls may be manifolded together for use on larger tanks.

## FLOAT AIR VOLUME CONTROL

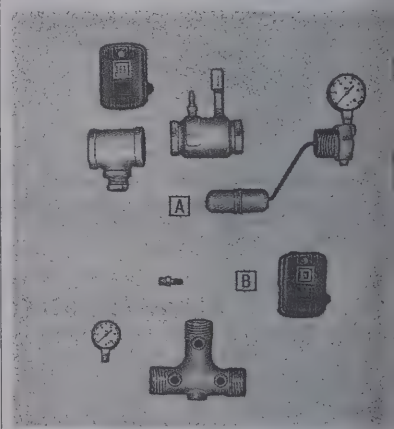
Maintains air volume in shallow well water tank. When pressure drops, float opens the air inlet valve inside the control drawing air inside the tank. Air is drawn into the pump through the air inlet valve, connecting tubing and snifter valve, and carried out with water into the tank. This action continues until pressure inside the water tank causes the float to lower and close the air inlet valve. Kit includes 2" diameter 0-100 PSI gauge and 48" polyethylene 1/4" tubing. 1/4" tubing connector installed. 2 extra 1/4" connectors (1 male, 1 female) included for ease of installation. Tank connector has 1¼"NPT. Use on tanks having minimum 9" diameter. 200°F maximum temperature; 120 PSI maximum pressure. U.S. Gauge brand (300L).

**No. 7P020.** Shpg. wt. 1.1 lbs. List .....$25.45.
Each .....**$17.50**

### AIR VOLUME CONTROL, LESS GAUGE

Air volume control as listed above, but without pressure gauge.

**No. 1P733.** Shpg. wt. 0.9 lbs. List..... $21.00.
Each .....**$17.05**



## JET PUMP/ PRESSURE TANK INSTALLATION PACKAGE

Fittings package contains all par required to connect Teel jet pumps to pre sure tanks having top mount bracket ar 1" pipe fittings. Includes galvanized te elbow, nipples, plastic hose adapter, 1 34" long hose, clamps, nuts, bolts, ar washers.$19.50

**No. 1P978.** Shpg. wt. 4.0 lbs. List .....$27.8(
Each .....**$23.3**

## SUBMERSIBLE PUMP CONTROLS INSTALLATION PACKAGE

A **No. 1P918.** Contains controls and fittin to install a submersible pump to standa nonpressurized water tank: bleeder orifi valve, 1" galvanized tee, 1/4 x 3" brass ni ple, Heyco knockout plug, snifter valve, NPT check valve, air volume control, pre sure gauge and Square D pressure switc All parts fit together for easy installatio

B **No. 1P920.** Contains controls and fittin to install a submersible pump to pre-pre surized water tank; universal tank, tee, 1 x 3" brass nipple, Heyco knockout plu 1/4" brass plug, 1/8 brass plug, pressu gauge and Square D pressure switch. parts mount on tank tee for easy instal tion.

| Key | For Pumps | Water Tank Type | Stock No. | List | Each | Sh W |
|---|---|---|---|---|---|---|
| A | To 2 HP | Standard | 1P918 | $101.00 | $84.55 | 5 |
| B | To 2 HP | Pre-Pressurized | 1P920 | 75.00 | 63.30 | 3 |

# MARINE AND BILGE PUMPS

## rule® SUBMERSIBLE BILGE PUMPS

ll pumps [A] thru [J] offer compact, efficient design which is ble to run dry. Features silent vibrationless operation, ignition rotection, stainless steel shafts and rust/corrosion protection.

] **No. 4NX11** offers high pumping capacity and reliability.

] **No. 4NX12 and 3P998** high capacity bilge pump is engineered commercial standards; 4NX12 is 24VDC.

] **No. 4NX13 and 3P797** 12 VDC bilge pumps allows for 36 ounting variations and offers a gasoline-resistant strainer base.

] **Nos. 4NX15 and 4NX17** offer automatic operation with no float witch required.

] **Nos. 4NX16 and 4NX18 Platinum®** Series bilge pumps offer fully utomatic operation, no float switch required. Patented "soft-tart" system for quiet operation with computer chip self-learning eature for maximum cycling mode efficiency. Internally self-pro-ected against jamming, freezing, and overloading.

## CENTRIFUGAL PUMPS

] **No. 4P016** is used primarily for boat/RV wash down, live ells, bait tanks, and other general purpose applications. NOTE: ump is not self-priming and must have flooded suction.

onstruction: Polyacetal plastic housing and stand; stainless steel haft; permanent magnet 12VDC motor; exclusive Teflon shaft eal.

## SHOWER DRAIN SYSTEM

] **No. 4P019** 12VDC system is compact but full capacity. ontains 800 GPH submersible pump with strainer and Rule-A-atic float switch, plus 1½ gallon basin with clear screw down over.

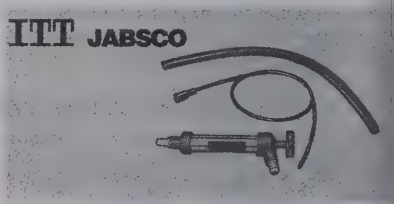
Automatic Computerized Model. (†) Can act as a replacement pump for many back-up sump pump systems.

# SUBMERSIBLE, UTILITY, & HAND PUMPS

## SUBMERSIBLE UTILITY SUMP PUMPS

- **Manual or automatic models**
- **Computerized automatic pump No. 3P993 senses presence of water without external floats or switches to tangle, stick or fall**
- **Heavy-duty, compact construction**
- **Snap-off strainer for easy cleaning**
- **Anti-airlock design is able to run dry**



**Applications:** For draining flooded basements, boats, ponds, sumps, etc. Fully submersible in fresh or saltwater. 120VAC, 60 Hz, 1 Amp. 1/2" Pump cut-off depth.

**Pump materials:** Acetal plastic housing and strainer base, glass-filled nylon impeller, stainless steel shaft, heavy-duty double insulated permanent magnet motor, Rule exclusive Teflon® shaft seal. Allows pump to run dry. For use with nonflammable liquids compatible with pump component materials. Includes 90° elbow with 1⅛ to 1" NPT pipe thread and 8 ft., 16/3 SJTW cord with 3-prong grounding plug. Rule brand.

### PUMP SPECIFICATIONS, PERFORMANCE AND ORDERING DATA

## MULTI-PURPOSE HAND PUMP

**Compact multi-purpose hand pump** does many draining and liquid transfer jobs. Small enough to fit in tool box. Seamless 1¼" diameter brass cylinder with brass plunger shaft. Neoprene suction and discharge ports for 1/2" ID hose; adapter from 1/2 to 1/4" ID hose included. Snap action self seating neoprene disc valve. Delivers one gallon per 40 strokes. Includes 2 ft. of 1/2" discharge hose and 40" of 1/4" suction hose. Can be used for bilge pumping, oil draining or diesel fuel transfer. Jabsco brand (34060-7010).

**No. 2P138.** Shpg. wt. 1.0 lbs. List $41.22.
Each ..... **$25.15**

## BRASS UTILITY HAND PUMP

- **Quick, easy pumpout of flooded areas**
- **Quick prime on the first pull**
- **Oil-resistant plunger and end caps**
- **Ideal for boaters, contractors, plumbers, farmers and sportspeople**
- **Complete with 5 ft. of 1/2" discharge hose**

Compact, multi-purpose, hand-operated pump is ideal for many small drainage and liquid transfer jobs. Seamless 1¼" diameter brass tube and plunger shaft. Neoprene suction and discharge caps. Overall length 17"; delivers 1 gallon per 15 strokes. Jabsco brand (33760-0000).

***New*** **No. 4UL39.** Shpg. wt. 2.5 lbs. List $40.63. Each ..... **$38.70**

## PORTABLE HAND PUMP

**Constructed of sturdy ABS plastic,** has comfort-grip handle for smooth, firm strokes. Includes 4 ft. of 1⅛" ID polyethylene hose. Pump is 36" long and has 10 GPM capacity at 30 strokes per minute. For use with nonflammable liquids compatible with pump component materials. Rule brand (168).

**NOTE:** All Rule marine pumps and switches are for use with nonflammable liquids compatible with pump component materials.

**No. 4P018.** Shpg. wt. 1.0 lbs. List $35.02.
Each ..... **$24.91**

**DESK SPACE AT A PREMIUM? USE THE GRAINGER CD-ROM, ELECTRONI CATALOG TO REVIEW THOUSANDS OF PRODUCTS!**

## DIAPHRAGM HAND PUMP

**xcellent for saltwater** or applications involving sand, stones, and ther small solids and debris. Hand operated diaphragm pump is ounted to cast-iron platform/base that accommodates handle orage and pump hanging capability. Self-priming suction lift up 20 ft. Delivers up to 30 GPM at 150 strokes per minute. Suction id discharge accommodates either 2" hose or 1½" pipe. Male raight pipe threads provided. Brass handle is 17⅞"L. Cast-iron latform is 20½L x 9W x 4"H.

**onstruction:** Bronze pump with stainless steel hardware. eoprene diaphragm and flapper valves. For use with nonflam- able liquids compatible with pump component materials.

**o. 3P739.** Shpg. wt. 31.0 lbs. List $292.32. Each.....$278.00

## BRONZE CENTRIFUGAL PUMPS

- **12 or 32VDC Operation**
- **All bronze construction with stainless steel hardware**

**Applications:** Live well filling and circulation, bait tanks, boat/RV wash down, intermittent hot water circulation, and other general purpose applications. Intermittent duty. Max. temperature: 180°F. For use with nonflammable liquids compatible with materials of pump construction. Not for use in flammable and/or explosive atmospheres. Meets United States Coast Guard (USCG) Electrical Standards (Title 33, Chapter 1, Part 183, Subpart 1) for ignition protection on gasoline powered vessels.

**Driver:** Permanent magnet, fully enclosed, ball bearing ignition protected DC motor with stainless steel shaft. Pump must be mounted in a dry location where motor is protected from dampness.

**Sherwood units are not self-priming** and must have flooded suction. Pump head can be rotated in 90° increments. Can be mounted in any position or on thru-hull fitting and seacock for applications requiring overboard water to be pumped aboard. Viton lip seal and O-ring.

**Teel unit is self-priming** up to 4½ ft. above water level and can be mounted up to 45° off vertical. Can be piped over gunwale with seacock or on thru-hull fitting with seacock for applications requiring overboard water to be pumped aboard. Vortex-type impeller resists clogging by seaweed. Buna N carbon/ceramic mechanical shaft seal.

## A FLOJET AUTOMATIC MARINE/RV POTABLE WATER SUPPLY PUMP

**Compact pump designed for recreational vehicles and marine potable water systems.** Built-in pressure switch automatically turns pump On when system pressure drops to 20 PSI and Off when pump raises system pressure to 30 PSI. Pumps up to 156 GPH. Maximum pressure is 30 PSI. Maximum water temperature is 160°F. Self-primes to 6 feet. Pump can run dry, thereby, protecting the pump if the water supply is lost. Constructed of corrosion resistant polypropylene. Duplex diaphragm design of Santoprene. No liquid touches metal parts. Pump inlet and outlet are 3/8" FNPT. Pump has permanent magnet 12 VDC motor with ball bearings, replaceable brushes, two 11" lead wires and rubber mounting feet to reduce noise and vibration. Motor draws 3.5 amps at 0 PSI (full flow) and up to 7.0 amps at 30 PSI. Intermittent duty. For use as water system pump only. For potable water use only. Not for use with hydrocarbon based or other chemicals. Overall dimensions are 8⅛ L x 3¾ H x 3¼"W. Meets United States Coast Guard (USCG) Electrical Standards. All parts that contact water are constructed of Food and Drug Administration (FDA) Approved material International Association of Plumbing an Mechanical Officials (IAPMO) Liste Flojet brand (2100-12).

| GPH OF WATER @ TOTAL DISCHARGE PRESSURE* | | | |
|---|---|---|---|
| 0 PSI | 10 PSI | 20 PSI | 30 PSI |
| 156 | 129 | 120 | 111 |

(*) Operating pump above 30 PSI is not recommended.

**No. 2P366.** Shpg. wt. 3.9 lbs. List .....$108.5
Each .....**$64.3**

## B MARINE AND CAMPER 12V DC PUMP

**Compact 12V DC centrifugal pump** for boats, camper-trailers, etc., as bilge or water system pump. Low-profile design. May be mounted in any position, submerged or in open air, as long as inlet is at or below level of liquid pumped. Fits in tight, out-of-the-way places. Large capacity—pumps up to 339 GPH, yet draws only 1.0 to 1.8 amps at 12 volts DC, the higher the back pressure, the lower the current draw. For water up to 160°F. Constructed of Food & Drug Administration (FDA) and National Sanitation Foundation (NSF)approved high-impact plastic and stainless steel. For use with nonflammable liquids compatible with materials of pump construction.

**Comes complete** with hooded screened inlet for bilge pumping and alternate 1/2" male NPT threaded inlet plate for water syste use. 5 ft. leads. Outlet has 3/8" male pi fitting and accepts 5/8" ID hose. Nomi size 2 x 2 x 5½", plus outlet and mounti feet; 1/4" mounting slots, 2⅞" OC. F intermittent use only in open air and su merged applications.

## C COMPACT SELF-PRIMING MARINE-UTILITY PUMPS

**Widely used for marine and general** commercial and industrial applications. Used for dewatering, liquid transfer, and bilge applications. No. 1P579 self-primes to 10 ft.; No. 1P580 to 7 ft.

**Chrome plated brass pump body** with stainless steel shaft. Buna N impellers and lip-type seals. AC-DC series motors with external brush holders. Motor on No. 1P579 is fan-cooled, with thermal protection. Dual threaded inlet and outlet; 3/8" ID NPT, and 3/4" OD hose thread. Water temperature range 40 to 140°F. Overall, 6⅝L x 3½H x 4"W. For use with nonflammable liquids compatible with materials of pump construction. Do not use in flammable or explosive atmospheres. Includes 2 extra impellers and gaskets. For intermittent use only. Teel brand.

### DOUBLE REPAIR KITS

Repair kit No. 1R230 for pumps No. 1P579 and 1P580 models B and C. Includes two O-rings, 2 impellers and one cam. Repa kit No. 1R387 fits pumps Nos. 1P579 a 1P580 models D,E and F and Proven Pur models 360 and 365. Includes 2 impelle and 2 cover gaskets. Order kits for old model pumps from Grainger Pa Operations.

# SHALLOW PAN AND VERTICAL CONDENSATE REMOVAL PUMPS

- **Fit most mechanical refrigeration or air conditioning units**
- **For condensation removal in high efficiency gas furnaces and air conditioning units, disposal or waste water from drinking fountains, ice makers, humidifiers, etc.**
- **Rated for continuous-duty**
- **UL Listed; CSA Certified**

Shallow pan and vertical condensate removal pumps are used where there is no gravity drainage. These continuous-duty pumps are for use with nonflammable liquids compatible with pump component materials. All units feature 6 ft. power cord with 3-prong molded 115V plug, snap action safety switch and thermal overload protector. Beckett brand.

A **Nos. 4NW93-4NW96.** Use for the removal of water from ice makers, drinking fountains, beverage machines, dehumidifiers, water coolers, computer room A/C equipment, furnaces, refrigeration and many other applications. Constructed of flame-retardant plastic with a large high-impact ABS tank. Duck-bill check valve design, microswitch float mechanism, three intake holes and convenient discharge with barbs and threads. Stainless steel shaft, thermal overload protection. Can be mounted from either side. Nos. 4NW93 and 4NW95 include 20 ft. of tubing.

B **Nos. 5P227 and 5P228 Compact Pumps.** For use where space is limited. Features: ABS plastic housing, polyethylene safety float, stainless steel shaft, and check valve with 3/8" OD barbed discharge hose connection.

C **No 5P225 Large Tank Pump.** For large refrigeration and air conditioning units. Features: High impact-resistant polystyrene base, metal impeller and polystyrene volute, and stainless steel shaft. 3/8" OD barbed discharge hose connection with 20 ft. of 3/8" ID clear tubing.

D **Nos. 5P219 and 5P220 High Flow Rate Shallow Pan Pumps.** For use in limited space. These completely submersible pumps feature a screen to keep floating debris out of pump, epoxy encapsulated motor with molded plastic volute, check valve and impeller. Diaphragm activated switch mechanism cuts in at approx. 2½". All brass or stainless steel parts. No. 5P219 does not include safety control switch.

**No. 5P220** includes No. 5P219 with polystyrene sump pan, 20 ft., 3/8" ID clear tubing and safety control switch No. 2P874. Pump cuts in at approx. 2¼". Tank dimensions: 10¼L x 4½W x 3½"H.

E **No. 5P226 Heavy-duty Vertical Pump.** Features: Maximum corrosion-resistant construction including, rust-resistant polymer condensate collecting tank, stainless steel shaft and galvanized steel tank cover and switch housing. Safety switch (included) can be wired to shut off low voltage thermostat controlling air conditioner if malfunction occurs. Includes fan cooled motor, integral sump tank and control float, 1/2" OD copper tube discharge.

F **No. 4NW97 Condensate Overflow Protector** reduces risk of flooded carpets, sub-floor and sheetrock damage, insurance claims, and costly installation. May be used on primary and secondary drain lines. Takes minutes to install. Pre-wired, with a float-activated switch rated at 30V, 5A. Wire length 18". Up to 5 cup capacity. Threaded bottom fittings for easy installation; eliminate leaks. Dimensions: 7.25H x 6.25" x 3.75"H. PVC adapter fittings included.

***New* No. 4NW97.** Beckett Condensate Overflow Protector (COP5). Shpg. wt. 1.0 lbs. List $29.79. Each ..... **$19.36**

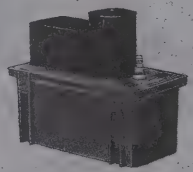
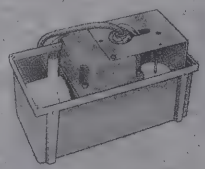
# SHALLOW PAN AND VERTICAL CONDENSATE REMOVAL PUMPS

Little Giant PUMP COMPANY SUBSIDIARY TECUMSEH PRODUCTS COMPANY

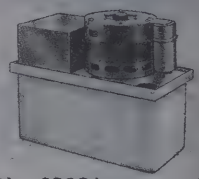
E81811 LR19315



Replacement Parts Available 1-800-323-0620



[A] Nos. 2P350 & 2P351



[B] No. 3P730

[C] Nos. 3P731 & 3P732

[D] No. 2P095

[E] No. 2P096

- **Fit most mechanical refrigeration or air conditioning units**
- **Use for removal of condensation in high efficiency gas furnaces and air conditioning units**
- **Also may be used for disposal of waste water from drinking fountains, ice makers, humidifiers and beverage machines**

Used where gravity drainage is impossible or impractical. Include 6-ft. power cord with 3 prong molded 115V plug and thermal overload protector (except No. 2P096 has 3-foot cord). All models (except No. 2P095) include low voltage safety switch with polypropylene float that can be wired to cut off air conditioners or other low voltage circuits in case of malfunction, etc. Safety switch should be connected to a Class II low voltage safety device. Switch has 3 terminals marked COMMON, NO, and NC. Connect NO terminal to turn off electrical equipment in case of overflow; connect NC terminal to activate an alarm bell or buzzer. All are UL Listed and CSA Certified except Nos. 2P095 and 2P096. Pumps cannot be run dry without damage to the unit and are recommended for intermittent duty only. For use with nonflammable liquids compatible with pump component materials. Maximum temperature: 110°F. Little Giant brand.

[A] **Nos. 2P350 and 2P351.** Automatic condensate removal pumps accommodate acidic condensate with 120°F maximum liquid temperature often produced by high-efficiency gas furnaces. Two mounting slots on end of tank cover. Reinforced tank sides. Can be mounted on either side of an air conditioning unit or on a wall, but inlet must be below coil drain. Outlet piping should be flexible tubing or pipe. Evacuates 2/3 quarts per cycle. 3/8" OD barb type discharge fitting with built-in check valve. High impact polystyrene tanks. ABS motor cover, tank cover, volute, and impeller. All stainless steel hardware. C-Frame, thermally protected motors with extended stainless steel motor/pump shaft.

**No. 2P350.** Compact unit recommended for installations where a low head self contained pump is preferred.

**No. 2P351.** For high acid level conditions.

[B] **No. 3P730.** Low-profile, compact unit for use where space is limited. Pump unit is constructed of durable ABS plastic housing, polypropylene float, and stainless steel shaft. Pump cuts in at approx. 1". Includes check valve with 3/8" OD barbed discharge hose connection.

[C] **Nos. 3P731 and 3P732.** Large tank units for large mechanical refrigeration and air conditioning units. Constructed of hig impact resistant polystyrene base, AB impeller and volute, and stainless stee shaft. 3/8" OD barbed discharge hose con nection.

[D] **No. 2P095.** High flow rate shallow pa pump for use in limited space applica tions. Pump is a compact in-pan unit and i completely submersible. Screen keep floating debris out of pump. Die cast alu minum motor housing with epoxy finish nylon volute and impeller, ABS plasti float, epoxy coated metal switch mecha nism and all brass or stainless part ensure maximum corrosion resistance Includes polystyrene sump pan. Als includes control float and filter screen 1/4" MNPT 1/2" OD nylon discharge.

[E] **No. 2P096.** Heavy-duty vertical pum with rust resistant polymer condensat collecting tank. Constructed of material providing maximum resistance to corro sion including high impact polymer pum base, stainless steel shaft, and galvanize steel tank cover and switch housing Includes fan cooled motor, integral sum tank, and control float. 3/8" OD coppe tube discharge.

# CONDENSATE PUMPS

**Fit most mechanical refrigeration or air conditioning units**
**Use for removal of condensation in high efficiency gas furnaces and air conditioning units**
**Also may be used for disposal of waste water from drinking fountains, ice makers, humidifiers and beverage machines**

sed where gravity drainage is impossible or impractical. Include 6- power cord with 3 prong molded 115V plug and thermal overload rotector on 4RL03 and 4RL04. The 4RL07, 4RL08, 4RL05, and 4RL06 30V units have no plug. All models (except No. 4RL03) include low oltage safety switch with polypropylene float that can be wired to ut off air conditioners or other low voltage circuits in case of malnction. Safety switch should be connected to a Class II low voltage afety device. Switch has 3 terminals marked COMMON, NO and NC. onnect NO terminal to turn off electrical equipment in case of overow; connect NC terminal to activate an alarm bell or buzzer. All are L Listed except No. 4LR03. Nos. 4RL05 and 4RL06 are CSA ertified. Pumps can not be run dry without damage to the unit and re recommended for intermittent duty only. For use with nonflamable liquids compatible with pump component materials. Little iant brand.

**No. 4RL03.** For removing waste water from beverage dispensers nd water from air ducts. Completely submersible pump features aluinum housing and is designed for in-pan mounting. Float operated witch engages in 1" of water and automatically disengages in 1/2" ater, 1/2" MNPT discharge.

**No. 4LR07.** Vertical pump unit for removing waste water from rinking fountains, humidifiers and ice makers. Features 1/2 gallon akproof, rustproof, high impact polystyrene tank. Stainless steel naft. Thermal overload protection. Includes check valve, safety witch and 3/8" O.D. barbed discharge.

**No. 4RL08.** Low profile, compact design for use in limited space installations. Vertical type pump removes waste water from drinking fountains, humidifiers and ice makers. Engages in 1" of water and disengages in 0.45" of water. Features thermal overload protection. Includes safety switch, check valve and 3/8" O.D. barbed discharge.

**No. 4RL05.** Large tank unit for removal of condensate in most larger air conditioners and mechanical refrigeration units. One gallon tank is constructed of leakproof, rustproof, high impact polystyrene. Features stainless steel shaft and snap action switch. Engages in 3.56" of water; disengages in 2.6" of water. Includes safety switch and 3/8" O.D. barbed discharge.

**No. 4RL04.** Shallow pan tank for use in limited space installations. Fully submersible pump features sealed motor housing and 1/2" MNPT discharge. For removing waste water in drinking fountains, humidifiers, ice makers and beverage machines. Float operated switch engages in 4.45" of water; disengages in 3.45" of water. Includes 3/8" check valve, 1/2 " MNPT discharge.

**No. 4RL06.** For removing condensate from air conditioning and mechanical refrigeration units and waste water from drinking fountains, humdifiers and ice makers. One gallon tank is constructed of leakproof, rustproof, high impact polystyrene and features a stainless steel shaft. Pump engages in 3.56" of water and disengages in 2.6" of water. Includes snap-action switch, safety switch and 3/8" O.D. barbed discharge.

## ACCESSORIES FOR CONDENSATE PUMPS

**No. 4LR02.** Tank kit for condensate pump No. 4LR03 includes 1/2 gallon nylon tank, check valve and 20 ft. of 1/4" I.D. tubing.

# CONDENSATE RETURN PUMPS

A No. 4RD29

B No. 4RD33

## HOFFMAN

New

Replacement Parts Available
1-800-323-0620

C No. 4RD67

D No. 4RD34

## A & B HOFFMAN WATCHMAN CONDENSATE RETURN PUMPS

- **Heavy-duty cast iron pump construction**
- **Cast iron or welded steel receivers (tanks)**
- **Simplex or duplex systems**
- **Replacement continuous-duty pump fits most systems**

**Applications:** Condensate transfer for residential, commercial, and industrial steam heating and industrial processing: dry cleaning plants, chemical refineries, wood pulp processing, textile mills and manufacturing facilities. For use with nonflammable liquids compatible with materials of construction. Maximum liquid temperature 210°F.

**Construction:** Pump has cast iron volute with bronze impeller and wear ring, and 3/4" NPT pump discharge port. John Crane Type 6 Buna N/carbon/ceramic shaft seal rated for 250°F. 4-bolt flang mounting. Flange adapters available. Cast iron or welded stee receivers. Simplex units have single pump with heavy duty no mally-open float switch. Duplex units have mechanical alternato which equalizes running time between two pumps and provide emergency backup in case of excessive liquid return or pump fai ure. Receivers have 2" NPT low return inlet port, 1-1/4" NPT ver line port, 2" NPT overflow port, and 1-1/4" NPT (cast iron receiv er) or 1/2" NPT (steel receiver) drain port.

**Driver:** 1/3 HP, capacitor start, 115/230 VAC, 60 Hz, 3540 RPM open-dripproof motor, single phase motors. Permanently lubr cated ball bearings, threaded stainless steel shaft. Internal the mal overload protection.

## D HOFFMAN BOILER FEED PUMPS

- **Heavy duty cast iron pump construction**
- **Welded steel receivers (tanks)**
- **Simplex systems**
- **Replacement continuous-duty pump fits most systems**

**Applications:** Small boiler feed systems handling condensate from steam heating or process applications. For use with nonflammable liquids compatible with materials of construction. Maximum liquid temperature 210°F.

**Construction:** Pump has cast iron volute with bronze impeller and wear ring, and 3/4" NPT pump discharge port. John Crane Type Buna N/carbon/ceramic shaft seal rated for 250°F. 4-bolt flang mounting. Flange adapters available. Welded steel receiver. Flo operated internal water make-up water feeder with 1/2" NPT co nection. Water level gauge with protective brass rods and shut-o valves. Receiver has 2" NPT low return inlet port, 2" NPT vent lir port, 2" NPT overflow port, and 1/2" NPT drain port.

**Driver:** 1/3 HP, capacitor start, 115/230 VAC, 60 Hz, 3540 RPM open-dripproof motor, single phase motors. Permanently lubr cated ball bearings, threaded stainless steel shaft. Internal the mal overload protection.

# IN-LINE CENTRIFUGAL PUMPS

**Bell & Gossett**

New

No. 4RD57

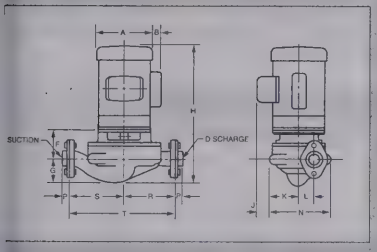

Fig. 1

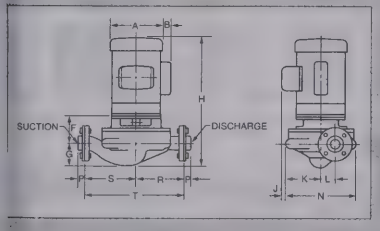

Fig. 2

Close-coupled pump with back pull-out design allows for easy maintenance without disturbing piping.

- **Internally self-flushing Buna/Carbon-Ceramic mechanical seal allows a maximum 225°F and 175 PSI working pressure**
- **Vertical and horizontal in-line mounting saves space and alleviates the need for special mounting pads or foundations**
- **Wide hydraulic coverage for a large range of pumping requirements**
- **Bronze fitted construction with open drip proof motors**
- **Companion flanges supplied**
- **Gauge, drain and vent tappings to accommodate any installed position**
- **Applications: Hydronic heating & cooling systems, general service, refrigeration and cooling towers**

# TURBINE PUMPS

## BRONZE-FITTED TURBINE PUMPS

**Description:** For boiler feed and condensate return service. Liquid temperature: -20° to 230°F. Handles vapors up to 20% by volume minimizing the possibility of vapor lock. Pumps are designed for low flows at high discharge pressures while maintaining high efficiency. Top vertical discharge for self-venting and end suction connections. For use with nonflammable liquids compatible with pump component materials.

**Construction:** Close coupled pumps with standard NPT threaded suction and discharge ports. Designed for 300 PSI max. casing pressure. Impeller utilizes balancing holes to promote hydraulic self centering, eliminating side wear and need for external adjustment. Replaceable shaft sleeve provided to protect shaft from wear.

Cast iron cover and motor bracket plated with hard electroless nickel for longer life. Bronze impeller and shaft sleeve. Buna N "O" ring gaskets. Mechanical seal with Buna N and stainless steel parts, carbon/ceramic seats. Rated for 230°F water service.

**Driver:** Dayton 3450 RPM 60 Hz single phase 115/230V with capacitor start and automatic reset thermal protection. NEMA 56 mounting face motor with keyed shaft, ball bearings and open dripproof enclosure.

**Note:** A suitable relief valve, such as No. 4UN31, should be installed to assure maximum PSI is not exceeded; otherwise, electric motor/pump may be damaged.

## ALL BRONZE TURBINE PUMPS

**Description:** For high-pressure liquid transfer applications up to 130 PSI where no suction lift is required; boiler feed, condensation return, pressure-booster service, reverse-osmosis filtration. Not for use with highly viscous or abrasive liquids. Liquid temperature range, 40 to 160°F. Handles entrapped gases without vapor locking. Maximum viscosity, 100 SSU. Inlet strainer should be used on most applications. For use with nonflammable liquids compatible with pump component materials.

**Construction:** Heavy-duty cast-bonze construction for elevated pressures. Easily accessible front drain plug for draining liquid. Double shielded, prelubricated ball bearings. 40°C rise.

All metal wetted parts are bronze. Buna N carbon/ceramic, and stainless steel seal.

**Driver:** Dayton 3450 RPM, 60 Hz. ball bearing motor. NEMA 56J mounting face motor with threaded stainless steel shaft. Single phase units have capacitor-start, open drip-proof motors with automatic reset thermal protection. 3-Phase units have TEFC motors.

**Note:** A suitable relief valve, such as No. 2P073 should be installed to assure maximum PSI is not exceeded; otherwise, electric motor/pump may be damaged.

(*) With 1 PSI positive suction head (flooded suction). (†) To convert to feet of head, multiply by 2.31.

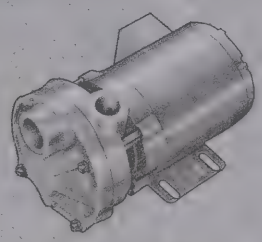
If we don't have a pump for it, chances are it can't be pumped.

# TURBINE PUMPS

## BRONZE-FITTED TURBINE PUMPS

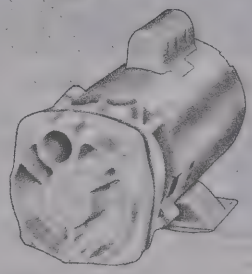
**Description:** For boiler feed and condensate return service, jockey pumps on fire and sprinkler systems, or any application requiring moderate to high head, low flow, pumping clean fluids. Liquid temperature: -20° to 230°F. Handles vapors up to 20% by volume, minimizing the possibility of vapor lock. Pumps are designed for low flows at high discharge pressures while maintaining high efficiency, thus requiring less horsepower. Top vertical discharge for self-venting and end suction connections. For use with nonflammable liquids compatible with pump component materials.

**Construction:** Close coupled pumps with standard NPT threaded suction and discharge ports. Designed for 300 PSI max. casing pressure. Impeller utilizes balancing holes to promote hydraulic self centering, eliminating side wear and need for external adjustment.



Nos. 4UP50 & 4UP51 are all bronze. Nos. 4UP52 thru 4UP66 have cast iron cover and motor bracket with hard electroless nickel plating for longer life and replaceable bronze shaft sleeve. All models have bronze impeller, Buna N "O" ring gaskets, mechanical seal with Buna N and stainless steel parts, carbon/ceramic seats. Rated for 230°F water service.

**Driver:** 3450 RPM, 60 Hz ball bearing C face motor. Single-phase capacitor-dripproof. Three phase units have TEFC motors.



**Note:** A suitable relief valve, such as No. 4UN31, should be installed to assure maximum PSI is not exceeded; otherwise, electric motor/pump may be damaged.

# HOT WATER CIRCULATING PUMPS

- **Bronze or cast-iron construction**
- **Compact design**
- **Maintenance-free cartridge permanent split capacitor motor 3250 RPM**
- **Quiet, efficient operation**
- **Taco brand**

**Applications:**

**Nos. 4PC85-4PC87, 4PC91, 5P429-5P433, 4P977.** Bronze construction, used in higher head heat recovery systems, water source heat pumps, and open lop solar systems. **No. 4PC92,** Cast-iron construction, used in higher head hydronic systems, radiant heating, and closed loop solar.

**Nos. 5P428 and 4PC90.** Bronze construction, used in hydronic heating, chilled fresh water, and domestic water systems. **Nos. 5P427, 4P975, 4PC89.** Cast-iron construction, used in hydronic heating, add a zone additions, and zoning with circulators.

**Nos. 4PC93 and 4PC82.** Bronze construction, used in higher head/higher flow open loop domestic fresh water, and heat recovery/earthloop systems. **Nos. 4PC94, 4PC78, 4PC82.** Cast-iron construction, used in higher head/higher flow closed loop hydronic systems, high pressure drop boilers, fan coils, heat exchangers, and larger radiant systems.

**Nos. 4PC79 and 4PC83.** Bronze construction, used in high velocity open loop fresh water systems, and recirculation loops. Nos 4PC77, 4PC80, 4PC84. Cast-iron construction, used in high velocity closed loop hydronic systems, with large BTUH boilers, primary-secondary loops, and heating/cooling systems.

**Construction:**

**Nos. 4PC85-4PC87 and 5P429-5P432.** Bronze construction, used for domestic hot water circulation, heat recovery units, water source heat pumps, drain down open loop solar systems, and potable water systems.

**All units feature a replaceable cartridge circulator** which contains all moving parts and allows circulator to be serviced instead of replacing entire pump. Quiet direct-drive cartridge-type circulator is self-lubricating, contains no mechanical seal, and requires no maintenance. Compact low power consumption design. Permanent split capacitor motor at 3250 RPM is impedance protected. Feature non-metallic impeller, ceramic shaft, carbon bearings. Max. Pressure: 125 PSI. Nos. 4PC89 and 4PC90 temperature rating: 240°F max. Nos. 4PC77-4PC84, 4PC91-4PC92, 4P975, 4P976, 4P977, 5P428, and 5P433 temperature rating: 230°F max. Nos. 4PC85-4PC88, 5P429-5P432 temperature rating: 220°F max.

) Impedance protected, auto. (‡) Use standard Teel 3/4, 1, 1¼, 1½" flanges. Four bolts and four nuts nuts supplied. (†) Includes (2) 3/4 x 1/2" reducers.
) Glass-filled polypropylene.

## "00" CLOCK TIMER

**Domestic Hot Water Recirculation - circulates on peak demand**

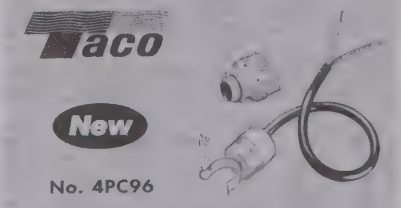
**24 Hour clock timer - 15 minute intervals**

**Rugged construction - steel timer enlosure**

he Clock timer is retro-fittable to any "00" eries Circulator. This user-friendly clock has an hour hand, raised minute hand for ease of adjustment, two directional arrows, and AM/PM settings. The timer can be mounted in any direction, by attaching it to the capacitor box electrical connection hole. 115 VAC/60 Hz/ 1 Phase and 16A

***New* No. 4PC95.** Shpg. wt. 0.5 lbs. List.....$67.60
Each .....**$48.85**

## TEMPERATURE AQUASTAT



**Temperature control - 95°F On and 115°F Off Aquastat**

**Fits all "00" Series; can be used with "00" Clock Timer**

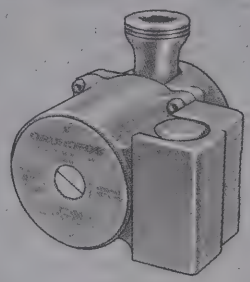
**Connects to 1/2" and 3/4" pipe**

emperature Aquastat is retro-fittable to ıy "00" Series Circulator. The circulator ycles continuously to maintain a temperature between 95°F and 115°F. The Aquastat snaps directly onto 3/4" pipe and, for 1/2" applications, it snaps directly onto the discharge of the 1/2" bronze body.

***New* No. 4PC96.** Temperature Aquastat. Shpg. wt. 0.3 lbs. List .....$22.90
Each .....**$17.55**

## ORDERING HAS NEVER BEEN EASIER!

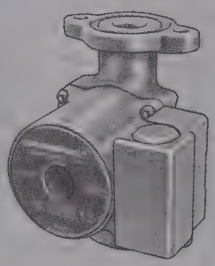
**Whether you phone, fax, write or stop by your local branch to place an order, Grainger can tailor sales terms to meet your needs. Ask about establishing an open line of credit or pay with your VISA, MasterCard, or American Express card.**



# HOT WATER CIRCULATOR PUMPS FOR HYDRONIC AND SOLAR APPLICATIONS

- **Single stage, direct drive centrifugal pumps**
- **Cast-iron, bronze, or stainless steel pump bodies**
- **Efficient wet rotor motor design**
- **Maximum fluid temperature: 230°F**
- **Maximum system pressure: 145 PSI**
- **UL Listed, CSA Certified**

**Applications:** Nos. 2P310, 4P309 and 2P410 are designed for domestic and light commercial closed loop water circulating systems such as hydronic heating, heat pumps, low pressure boosting, and general water circulating systems. No. 2P311, 4P907–13 are designed for open loop systems such as domestic hot water recirculation, solar thermal heating, and heat recovery systems. Mixtures of water and glycol solutions of up to 50% by volume may be pumped. Flange bolts and gaskets are included with Nos. 2P310 and 2P410. Order flanges separately, see page 3274. Threaded connections on No. 2P311 are adapted to piping systems using threaded half union kit No. 2P312, sold separately below.



**Pump Body Construction:** Nos. 2P311, 4PD07-08 and 4PD10-11 stainless steel; Nos. 4PD12-13 bronze; Nos. 2P310, 2P410, and 4PD09 are cast iron.

**Impeller construction:** 2P310-11, 4PD10-13 are polyether sulfone; Nos. 2P410, 4PD07-09 are stainless steel.

### A CAST IRON WET ROTOR CIRCULATORS

Up to 80% more starting torque than the competition DuraGlide™ Bearing System assures whisper-quiet, maintenance-free operation. One-piece, high nickel stainless steel stator can isolate the stator from system fluid and maintains precision bearing alignment for longer bearing life. Carbon bearings, diamond-like ceramic shaft and generous clearances are more resistant to lime, chloride and oxide build-up for years of trouble-free service. Closed impeller design improves operating efficiency. Maximum working pressure: 150 PSI. Maximum temperature: 240° F.

### B THREE-PIECE OIL LUBRICATED BOOSTER PUMPS

Powerful motor provides years of trouble-free service. Flexible spring design coupler adds to quiet operation. Cast Iron sleeve bearings maintain exact shaft alignment and provde constant circulation of oil over bearing surfaces for long operating life. Mechanical seal is designed to withstand the wide range of temperatures and resist calcium and chloride build-up found in potable water systems. Centrifugal impeller prevents accumulation of air at seal faces to assure long life.Close impeller/body tolerances minimize water slippage and maximize efficiency. Maximum working pressure: 125 PSI. Maximum temperature: 225° F.

### C & H SERIES 60

Needs only normal pipe support for direct in-line mounting. Companion flanges furnished on all sizes. Suction and discharge gauge and vent tappings are standard. Quiet operation from specially designed flexible coupling and long bronze sleeve bearings in both pump and motor. Hydraulically and dynamically balanced impellers. Back pull-out feature for ease in servicing. Working pressure: 175 PSI. Maximum temperature: 225° F.

### D, E & F BRONZE WET ROTOR CIRCULATORS

100% lead-free bronze body exceeds code requirements for potable water systems. 150 PSI working pressure equals of exceeds doe requirements. Three types of system connections (flanged, union and sweat) make installation easier and less expensive. Up to 80% more starting torque than other models. DuraGlide™ Bearing System assures whisper-quiet, maintenance-free operation. One-piece, high nickel stainless steel stator can isolate the stator from system fluid and maintains precision bearing alignment for longer bearing life. Carbon bearings, diamond-like ceramic shaft and generous clearances are more resistant to lime, chloride and oxide build-up for trouble-free service. Closed impeller design improves operating efficiency. Maximum temperature: 230° F.

### G BRONZE THREE-PIECE OIL LUBRICATED BOOSTER PUMPS

Powerful motor provides years of trouble-free service. Flexible spring design coupler adds to quiet operation. Bronze sleeve bearings maintain exact shaft alignment and provide constant circulation of oil over bearing surfaces for long operating life. Mechanical seal is designed to withstand the wide range of temperatures and resist calcium and chloride build-up found in potable water systems. Centrifugal impeller prevents accumulation of air at seal faces to assure long life. Close impeller/body tolerances minimize water slippage and maximize efficiency. Maximum working pressure: 125 PSI. Maximum temperature: 225° F.

# CIRCULATING PUMP ACCESSORIES

## HIGH-TEMPERATURE HYDRONIC EXPANSION TANKS

A No. 2P668

B No. 2P670

5-YEAR LIMITED WARRANTY

**Diaphragm type high-temperature expansion tanks** are designed to accommodate the natural expansion of water in closed-loop hydronic and solar heater systems. **Not intended for potable water.** Water-logging, common in regular steel expansion tanks, is virtually eliminated. Strong flexible Butyl diaphragm is securely attached to inner tank wall with steel retaining ring. Epoxy finish protects tank exterior against rust.

**1/2" NPT connection on bottom of tank;** air charging valve on top of tank (Nos. 2P670 and 2P671 have 1" MPT connection on top of tank and air charging valve on bottom.) Factory precharged to 12 PSI, field adjustable. Maximum working pressure: 100PSI. Maximum temperature: 240°F. Not for use in potable or open systems.

| Key | Gallons | Dim. (In.) H x Dia. | | Connection Size (In.) NPT | Net Boiler Output in 1000's of Btu's | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|

| B | 13.2 | 21½ | 15¾ | 3/4 | 200-400 | **2P670** | 228.00 | **131.50** | 25.0 |
| B | 21.0 | 21⅛ | 20¾ | 1 | 425-600 | **2P671** | 241.00 | **138.50** | 29.0 |

## POTABLE WATER HEATER EXPANSION TANKS

**Diaphragm type potable water expansion tanks** are designed to accommodate the natural expansion of water in open water systems. Help eliminate the problem of weeping T & P valves and water hammer, when turning off hot water faucets. Water-logging, common in regular steel expansion tanks, is virtually eliminated.

**Drawn steel construction** with strong flexible double-Butyl diaphragm. Steel retaining ring holds diaphragm securely. Epoxy finish protects tank exterior against rust. 3/4" NPTM connection on bottom of tank. Air changing valve on top of tank.

**Factory precharged to 40 PSI,** field adjustable. Maximum working pressure: 150 PSI. Maximum temperature: 200°F. For use in potable or open systems.

| Gals. | Dimensions (In.) H | Dia. | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **2.1** | 11½ | 8½ | 2P672 | $93.00 | **$45.00** | 4.5 |
| **4.5** | 15 | 10 | 2P673 | 123.00 | **66.00** | 7.5 |

**SELECTION GUIDE**

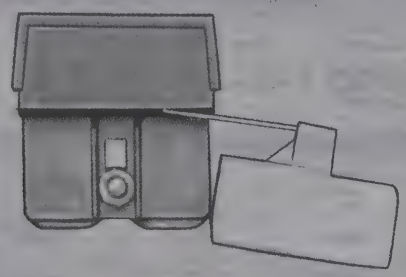
|---|---|---|---|---|---|
| 140 | | | | | |
| 150 | | | | | |
| 160 | | | | | |
| 170 | | | | | |
| 180 | | | | | |

Use expansion tank No. 2P672
Use expansion tank No. 2P673
Temp. and/or volume beyond range of individual expansion tanks. Install multiple tanks in series for larger size system.



**5-YEAR LIMITED WARRANTY**

**Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## FLOAT CONTROL SAFETY SWITCH

BECKETT P·U·M·P·S CORPORATION

SUPPLIER DIVERSITY™ Minority-Owned Business

No. 2P874

MH16153

- **Shuts off equipment if water levels become too high**
- **Easy-to-use switch wires directly to appliances.**

**Beckett Float Control Switch** provides a reliable means of controlling electrical circuits in response to rising water levels. Wire switch directly to appliances to shut down systems producing water. Typically used to turn off equipment such as air conditioners or furnaces if water level becomes too high. Prewired at the factory for **normally closed** operation. 18 in., 18 gauge stranded copper wire. Rated: 10 Amp, 115-230VAC, 24VDC normally closed (N.C.) contact. Check local codes to ensure that wire size is adequate for amperage load. Easily converted to normally open contact operation. UL Recognized (MH16153).

**No. 2P874.** Shpg. wt. 0.2 lbs. List .....$13.20. Each .....**$7.99**

# EXPANSION TANKS AND BOOSTERS

**A Nos. 4UP02, 4UN99 and 4UP01.** Therm-X-Trol Expansion Tanks are pre-pressurized for closed loop potable water heating systems. Feature heavy-duty butyl diaphragm with flexible polypropylene liner that resists tearing, cracking, leakage and corrosion. Precharged air cushion controls pressure build-up and eliminates relief valve spillage. Max. working pressure of 150 PSIG. Max. working temperature: 200° F.

**B Nos. 4UN85, 4UN87 and 4UN91.** Expansion Tanks are pre-pressurized for use in hydronic heating systems. Welded construction for safe operation up to 100 PSIG. Butyl diaphragm retains a 100% airtight air cushion to prevent loss of pressure. Max. operating temperature: 240° F.

**C Nos. 4UN83 and 4UN84.** Fill-Trol System consists of a pressure reducing fill valve used in conjunction with pre-pressurized diaphragm tank. Automatically maintain the tank fill pressure to 12 PSIG in closed hydronic heating systems. Max. working pressure: 100 PSI.

# CHEMICAL METERING PUMPS, SOLUTION TANKS AND SYSTEMS

D No. 2P307
(Pump not included)

Replacement Parts Available 1-800-323-0620

E No. 7P076

## A & B LIQUID FEED PUMPS

- **Adjustable metering pumps—8, 12 and 30 GPD**
- **Corrosion/chemical resistant**
- **Anti-fouling injection point and pressure relief/release included**
- **Strong 7½ or 15 gallon polyethylene tanks**
- **Systems include pump, tank and necessary fittings**

**Applications:** Chemical treatment of well water, swimming pools, spas, waste water, boilers, cooling towers; feeding liquid fertilizers and insecticides into sprinkling systems, and hydroponics. Maximum suction lift is 4 ft. and maximum viscosity is 300 CPS. For metered pumping of nonflammable chemicals compatible with component materials, including liquid chlorine, fluorine, bromine, acids, caustics, biocides, fertilizers and detergents.

**Nos. 1P679, 2P300 and 2P301** automatically inject controlled amounts of chlorine solution into pressure tank of residential water systems.

**No. 2P120** has ten minute percentage timer to interrupt normal pumping of feed pump, allowing pump to regulate flow down to 0.25 gallon per day. No. 2P301 will handle larger well systems and cooling towers for air conditioners. When connected directly to water system motor terminals, chemicals are metered when water well pump is running.

**Construction:** Fluid contacts Teflon diaphragm, Viton valve seats, ceramic ball checks, PVC head, pressure relief-release valve, anti-fouling injection fitting and foot valve strainer. 12 ft. of 3/8" OD polyethylene tubing.

**Pressure relief-release valve** in pump provides easy priming; clearing and changing chemical bath without disconnecting tubing; diverts pressure back to supply, preventing ruptured lines or motor burnout. 115VAC, 60 Hz Gearmotor with 6 ft., 3-conductor cord set. Polycarbonate housing. Installation/Operation/Maintenance manual is included. Mec-O-Matic brand.

### REPLACEMENT VALVE KIT

Kit (not shown) has one suction and one discharge valve, fits Nos. 1P679, 2P120, 2P300, 2P301 pumps. PVC valve with Viton seals. Mec-O-Matic brand (8800704)

**No. 1R252.** Shpg. wt. 0.1 lbs.
List $25.65. Each.....**$20.06**

| Key | Max. Feed*(GPD) | Max. Operating Pressure (PSI) | Min. Flow Rate (GPD) | Dimensions (In.) H | W | D | Mec-O-Matic Model | Stock No. | List | Each | Shp Wt |

(*) Max. feed rate per 24-hr. day at 0 PSI. (†) No. 2P120 is not Agency listed.

## C 3/8" FLOW INDICATOR

- **Maximum Pressure: 100 PSI**
- **Maximum Flow: 60 GPD**
- **Provides quick visual indication of fluid flow in pump system**

Installs into pump discharge line for convenience. For nonflammable fluids compatible with component materials. Acrylic sight glass. PVC fittings and Viton O-rings for 3/8" OD tubing. Indicator should be mounted in vertical position for best results. Meets NSF Standard 29, Item 4x4. Will fit on diaphragm and piston chemical metering pumps including Nos. 1P679, 2P120, 2P300, 2P301, 4UP25, 4UP26, 4UP27, 4UP28, 4UP29, 4UP30, and 4UP31. Mec-O-Matic brand (7012309).

**No. 2P362.** Shpg. wt. 0.1 lbs. List $28.34. Each.....**$20.47**

## D CHEMICAL SOLUTION TANKS

7½ and 15 gallon chemical solution tanks for use with Mec-O-Matic pumps listed above. Tight fitting covers on supply tank minimize contamination and chemical odors. All fittings, tubing and instructions for tank assembly included with pump. No. 2P306 includes integral base/tray and chlorine test kit.

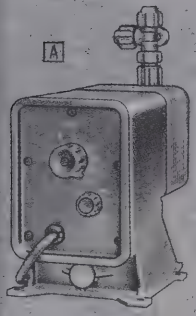
Strong polyethylene tank resists chemical attack and mechanical abuse. No. 2P307 has liquid level monitor to check liquid level without opening tank lid. Mec-O-Matic brand.

| Gal. | M-O-M Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 7½ | 8800449 | **2P306** | $114.21 | **$78.35** | 7.5 |
| 15 | 8800667 | **2P307** | 140.55 | **95.15** | 12.0 |

## E SOLUTION PUMP SYSTEMS

Chemical solution tank systems consist of a tank and feeder pump. See chart below for tank size and pump feed rate.

Injection point fittings, 12 ft., 3/8" polyethylene tubing, pump with 6 ft. 3-conductor cord, tank, chlorine test kit and operating manual included. Chlorine test kit not included with No. 7P077. Packed in separate cartons. Agency listed. Note: 7P075-7P077 use Mec-O-Matic brand pumps.



| Incl. Pump | Incl. Tank | Pump Rate (GPD) | Tank Size (Gal.) | Stock No. | List | Each | Shpg. Wt. |

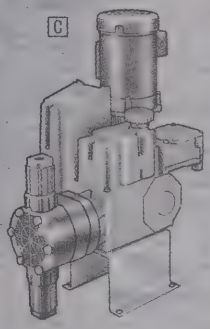
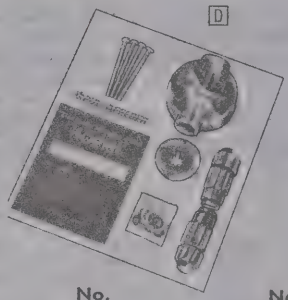
*If we don't have a pump for it, chances are it can't be pumped.*

# CHEMICAL METERING PUMPS

PULSAFEEDER®

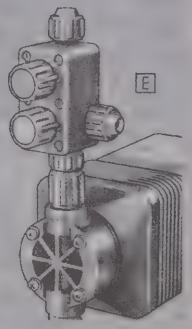


No. 4UP25



No. 4UP30

New



No. 4UP18

No. 4UP12

No. 4UP22

## A, B, AND C CHEMICAL METERING PUMPS

- **For continuous-duty action**
- **±2% accuracy and repeatability**
- **Chemical-resistant pump head and valves; check compatibility chart in Terminology and Technical Data listed at back of catalog**
- **Pressure capability up to 305 PSI**
- **Internally dampened to reduce noise**
- **Guided ball check valve systems**
- **Leak-free, sealless, liquid end**

**A and B Applications:** Chemical treatment of well water, swimming pools, municipalities, waste water, boilers and sprinkling systems. For metered pumping of nonflammable chemicals compatible with component materials, including acids, caustics, biocides, fertilizers, and detergents. Includes foot valve/strainer assembly, backpressure injection valve assembly, bleed valve, 4 ft. suction tubing, 8 ft. discharge tubing, and 4 ft. bleed valve tubing. 100:1 turn down ratio. 115VAC, 60 Hz.

**C Applications:** Municipal and industrial, including pH, disinfection and waste water treatment. Provides greater flow at higher pressure for more demanding applications. Rugged motor-driven pump designed for reliable and capable metering, simple installation, small footprint and multiple motor orientations to fit into any space. 115/230 VAC. 0-100% adjustable.

## D KOPKITS

**Contains wet-end spare parts recommended for preventative maintenance**

**Guards against unnecessary downtime**

Even the best equipment requires a minimal amount of maintenance. KOPkits are designed to assure you of the highest level of efficient and uninterrupted service from PULSAtron pumps A and B, above.

| For Stock No. | Pulsatron Model | New! Stock No. | List | Each | Shpg. Wt. |

## E FIVE FUNCTION VALVE

- **Relieves pressure**
- **Aids priming**
- **Controls back pressure**
- **Prevents siphoning**
- **Drains discharge line**

Easy to install. Upgrades existing pumps. Durable, chemical-resistant wetted end with recessed screws to withstand corrosive solution. Only service required is cleaning or replacement of diaphragms when changing pump diaphragm. All parts easily replaced. Valve material is GFPPL. Note: Can be used with Nos. 4UP25-4UP32.

***New* No. 4UP22.** 3/8" OD Tubing Connection. Shpg. wt. 0.2 lbs.

# PERISTALTIC METERING PUMPS AND PUMP ACCESSORIES

## HI-PRESSURE PERISTALTIC PUMPS

- **Self-priming**
- **Chemical-resistant rugged ABS housing**
- **Automatic de-gassing**
- **Adjustable feed rate and incremental control on Nos. 4UP06, 4UP07, and 4UP08. 10:1 turn down ratio**

Applications: Automatic de-gassing allows trouble-free metering of hypochlorite, peroxide and other gas-producing solutions. Self-priming, clear polycarbonate head assembly with high-strength peristaltic tubing maximizes safety when metering solutions. Includes foot valve, injection assembly, spare tube assembly, and 15 ft. of suction/discharge tubing. 115 volt, 60 Hz with 6-ft. 3-wire power cord.

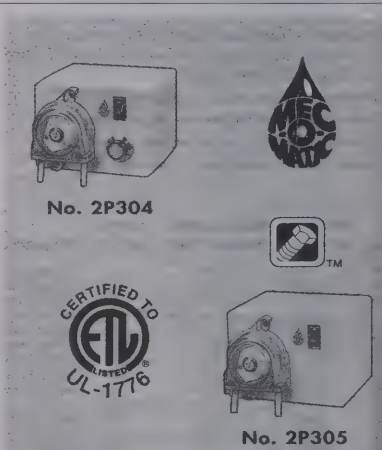
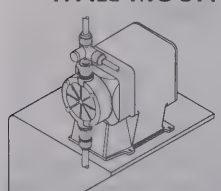
## MULTI-PURPOSE PERISTALTIC PUMPS



- **Self-priming to 15 ft. suction lift**
- **Valveless, nonclogging design**
- **Corrosion/chemical-resistant**
- **Quick disconnect heads for easy maintenance**

**Applications:** Chemical treatment of swimming pools, spas, waste water, food processing (where the chemical being pumped must be kept pure). Use where discharge pressure does not exceed 25 PSI. Metered pumping of nonflammable chemicals compatible with pump component materials, including liquid chlorine, weak acids, enzymes, detergents, polymers and wetting agents. Handles viscosities to 15,000 CPS. Mec-O-Matic brand.

**Construction:** Norprene/polyethylene tubing, PVC injection fitting and strainer. Lubricated Norprene tubing is 7/16" OD x 1/4" ID and has a broader chemical resistance than EPDM, Silicone or Viton. All metal 120VAC gearmotor turns roller which moves fluid through tubing. Polycarbonate housing. 5 1/16W x 8 1/2L x 5 1/16"H. UL Listed (E51844). ETL Approved.



**No. 2P304** for general purpose applications. Output controlled by manually adjusted 120VAC variable speed gearmotor. Max. flow rate 20 GPD.

**No. 2P305** for high output pool/spa applications. 120VAC motor. Output controlled by current interrupter that varies the pump on time. Max. flow rate 60 GPD.

| Max. Flow Rate, GPD | Max. Feed Rate, GPH | cc/ Min. | Max. PSI | Max. Strokes/ Min. | Mec-O-Matic Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|

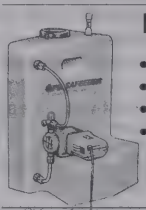
## WALL MOUNT BRACKET

- **Heavy-duty ABS plastic**
- **Mounting hardware included**
- **Universal pump mounting**

Wall mount bracket allows a pump to be mounted on a wall or other vertical support in applications where it is necessary to have the pump mounted above a tank or drum.



***New*** **No. 4UP24.** Shpg. wt. lbs. List.....$39.93. Each.....$36.30

## NORPRENE® TUBING KIT FOR PERISTALTIC PUMPS

Kit comes complete with parts necessary to change pump head tubing on peristalti pumps Nos. 2P304 and 2P305. Tubing: 7/16" OD x 1/4" ID x 9" long. Mec-O-Matic brand

**No. 1R422.** Shpg. wt. 0.3 lbs. List $21.21. Each.....$15.3

## ITS SYSTEM (INTEGRATED TANK SYSTEMS)

- **Liquid level wand**
- **Childproof lid**
- **Flooded suction**
- **Universal pump mount**

***New***

Completely integrated tank system constructed high density, UV-resistant polyethylene with a 1 gallon capacity. System is translucent with 5-ga lon increments. Tank's low level indicator allow visual monitoring of chemicals without openi the tank. System consists of a chemical tank wi lid and bulkhead fittings; a liquid level indicat float assembly; and feeder mounting hardware.

*If we don't have a pump for it, chances are it can't be pumped.*

# PERISTALTIC PUMPS

## PERISTALTIC PUMPS

- **Versatile, compact, self priming**
- **Heat, chemical, and impact-resistant**
- **Quick change tubing**
- **Easy set-up, operation, and cleaning**

**Applications:** Agriculture, chemical, food processing, laboratory, lubricants, machine tools, water treatment, printing, plastics-liquid color, transferring materials, waste removal, metering. Use when situations require a self-priming pump, pumping caustic or corrosive materials, or when a sanitized condition must be maintained.

**A PANEL MOUNT/NEMA 1 ENCLOSURE.** Panel mount or NEMA 1 table unit. Motors are 115VAC, 50/60 Hz, thermally protected. Class F insulation. Use with Tube Kits Nos. 4JV37-4JV40.

**B MICROPROCESSOR CONTROLLED.** Anodized brushed aluminum enclosure. For operation in the metered, continuous, or proportional mode. Speed range 2-60 RPM. Operates on 120/240 VAC, 50/60 Hz with temperatures to 140°F and pressures to 40 PSI. Use with Tube Kits Nos. 4JV41-4JV43.

**C VARIABLE-SPEED.** Anodized brushed aluminum enclosure. Speed range 2-100 RPM on 120/240 VAC, 50/60 Hz, with temperatures to 140°F, and pressures to 40 PSI. Pump No. 4JV13 use Tube Kits Nos. 4JV37-4JV40. Pumps 4JV14-4JV15 use Tube Kits Nos. 4JV41-4JV43.

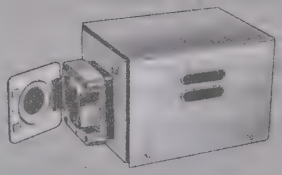
## TUBING KITS

**D E-D PLEX KITS.** Black, thermoplastic rubber is resistant to many acids and bases. Material is also UV resistant, withstands temperatures to 265° F, and exhibits good abrasion resistance. Has 65 durometer (Shore A) rating. Kit contains a 1-oz. bottle of Tube Lube.

**E CILRAN KITS.** Translucent white thermoplastic rubber is resistant to many acids and bases. Working temperature is 290° F, meets USP VI specifications, and is 55 durometer (Shore A). Kit contains a 1-oz. bottle of Tube Lube.



**F POLYURETHANE KITS.** Resistant to attack from moisture, humidity, and fungus with a working temperature to 200° F. 85 durometer (shore A). Use with pump Nos. 4JV13 and 4JV14 sold above.

**G TUBE LUBE.** Used to reduce friction between rollers and tube for increased tube life in the Cilran and E-D Plex kits.

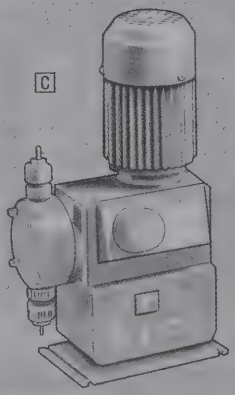
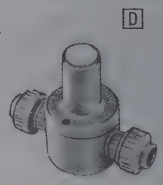
# CHEMICAL METERING PUMPS



- **For continuous-duty operation**
- **±2% Accuracy and repeatability**
- **Chemical resistant pump head and valves-check compatibility chart on pages in Terminology section**
- **Constant flow over pressures to 145 PSI**
- **Quiet operation**
- **Double ball valves**
- **115 VAC, 60 Hz motor**



Replacement Parts Available 1-800-323-0620

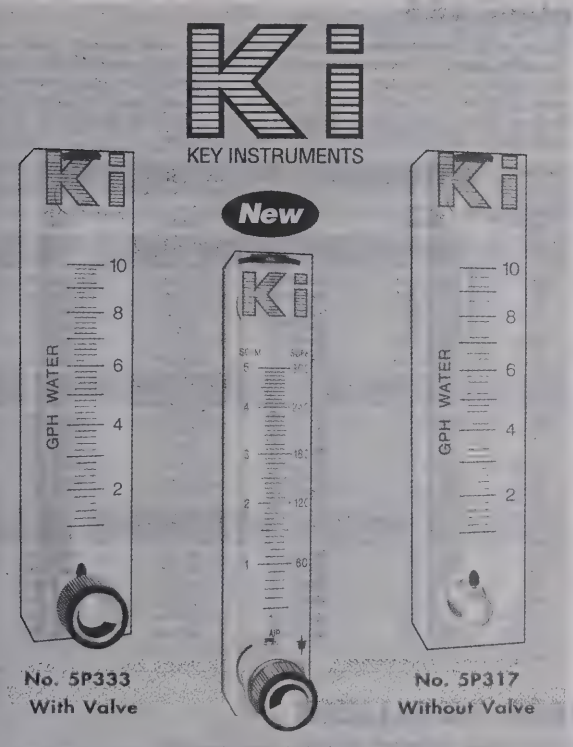
ALLDOS

A **Applications:** Chemical treatment of well water, swimming pools, spas, waste water, boilers and sprinkling systems. Teflon diaphragm driven by continuous duty synchronous gear motor. For metered pumping of nonflammable chemicals compatible with component materials, including acids, caustics, biocides, fertilizers and detergents. Includes strainer, ejector fitting, 6 ft. clear polyethylene suction tubing and 12 ft. polyethylene discharge tubing. Alldos brand (M190 series).

B **Applications:** Meter liquids into drinking water systems, swimming pools, boilers and sprinkling systems. Teflon diaphragm driven by continuous duty synchronous gear motor. Includes strainer and ejector fitting, 6 ft. clear polyethylene suction tubing and 12 ft. polyethylene discharge tubing. Alldos brand (M205 Series).

C **Applications:** Commercial/industrial metering of chemicals into cooling towers, waste treatment systems, irrigation, municipal water systems, food processing, pulp and paper, and car wash systems. Teflon-coated diaphragm driven by TEFC gear motor. **NOTE:** For feed pressures less than 30 PSI, a back pressure retention valve, No. 4P063 (available separately, see below) should be used. Alldos brand (M220 Series).

## BACK PRESSURE RETENTION VALVE



D **Applications:** For chemical metering where feed pressures are less than 30 PSI, such as into open tanks or basins. Also prevents siphoning back to tank. 1/2" MPT fittings. Suitable for use with most Alldos, Bran & Luebbe, Milton-Roy, Pulsafeeder, and Wallace & Tiernan chemical metering pumps. 4L x 4W x 3½"H. Alldos brand (BPV050-P).

**No. 4P063.** Shpg. wt. 1.9 lbs. List .....$256.18. Each .....**$216.00**

# KEY INSTRUMENTS FLOW ROTAMETERS

- Easy-to-read English or Metric scales
- Durable one-piece clear acrylic construction
- Full scale accuracy of ±3% for FR4000/FR4500 models and ±2% for FR5000 models
- Brass or stainless steel fittings on FR4000 (1/8" FNPT) and on FR4500 (1/4" FNPT); 1" FNPT PVC Fittings on FR5000
- 100 PSIG Max. liquid pressure
- 150°F/65°C Max. liquid temperature
- 10-32 threaded brass inserts for quick installation
- FR4000/FR4500 models available with valves
- Stable, easy-to-read floats
- Easy disassembly and assembly for maintenance

For measuring liquid or gas flows in air sampling equipment, chromatography systems, desalinization equipment, gas analyzers, medical systems, photo processing equipment, water treatment and distribution systems, and in aquaculture systems. For use with gases and liquids compatible with component materials.

Flowmeters with brass and PVC fittings feature nitrile o-rings; flowmeters with stainless steel fittings have Viton o-rings. Valves isolate/connect flowmeter to fluid flow.

# HAYS PULSE FLOWMETERS AND DIGITAL FLOW RATE/TOTALIZER

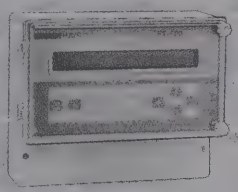
## PULSE FLOWMETERS

No. 5P298

**FLOW LIMITS (GPM)**

| | | |
|---|---|---|
| 3/4" size | 0.25 min. | 20 max. |
| 1½" size | 0.5 min. | 50 max. |
| 2" size | 1.0 min. | 130 max. |

**These pulse flowmeters measure liquid flow and provide reed switch contact output.** Connect to metering pumps, regeneration controls and remote counters. They transmit signals to pumps based on rate of flow (volume) or to No. 5P316 flow rate/totalizer shown below. Flow rates range from 0.25 to 130 GPM. Includes 12 ft., conductor. 24 AWG wire cable. Hays brand.



- For cold water use
- 105°F max. operating temperature
- 3/4, 1½, and 2" sizes
- Accuracy: ±1% full scale
- 150 PSI working pressure
- Maximum voltage: 24VDC
- Maximum reed switch current: 100mA
- Built-in union ends with union couplings
- Cast bronze case; thermoplastic rotor and gearing
- 7-Digit mechanical counter display

## DIGITAL FLOW RATE/TOTALIZER

No. 5P316

- Includes 115VAC-12VDC power supply
- For use with Hays and most other pulse flowmeters
- 12-16VDC, 4 watt power for remote totalizing
- 0.4" LCD, 20 character alpha-numeric display with contrast control
- Dry contact closure or 12VDC powered sensor input
- 0.3 to 600 pulses/second input frequency or 12VDC powered sensor
- NEMA 4X enclosure.

Displays flow with large LCD numerals. Features Microprocessor that allows easy front panel programming with prompts and touch controls, and programmable pulse output. Total flow (in gallons, imperial gallons, fluid ounces, cc, liters, mL, cubic meters) and flow rate (units per hour, minute or second). Features high and low alarms and two Form C relay contact outputs (max. 3 amps @ 24VDC). Best performance is achieved with Nos. 5P298, 5P299, 5P304 and 5P310 pulse flow meters described above. Hays brand (FT500).

**No. 5P316.** Shpg. wt. 3.8 List $960.00. Each ..... $769.00

# SWIMMING POOL COVER PUMPS

## SWIMMING POOL COVER PUMPS

- **For draining swimming pool covers to reduce weight and prolong cover life**
- **Also used to drain building roofs**
- **Can be used as utility pumps where longer than normal electric cords are required**
- **For use with nonflammable liquids compatible with pump component materials**
- **Nos. 3P994 and 3P995 suitable for saltwater applications**

A Manual On/Off operation pump draws down to 1/8" of standing water. Epoxy-coated, die-cast aluminum motor housing with removable nylon volute for easy cleaning. Oil-filled, 115VAC, 60 Hz motor has stainless steel shaft, nylon impeller and single-lip nitrile seal. Includes garden hose adapter and an 18 ft., 3-conductor, oil-resistant cord with 3-prong plug. Little Giant brand.

B Pump draws to 2.5" on level and 1.38" off level. Solid state switch and 3/4" Garden hose thread discharge. Corrosion resistant polyester housing has snap-off screen for easy cleaning. Includes 25 ft. power cord. UL Listed and CSA Certified. Little Giant brand.

C and D Heavy-duty, compact submersible pumps have computerized automatic operation that senses presence of water without external floats or switches to tangle, stick, or fail. Draws down to 3/4" of standing water. Acetal plastic housing, glass-filled nylon impeller and base, and exclusive Rule Teflon shaft seal. Heavy-duty double insulated 115VAC, 60 Hz permanent magnet motor has stainless steel shaft. Snap-off strainer provides easy cleaning. Anti-airlock design is able to run dry. Includes: 24 ft. (No. 3P994) or 18 ft. (No. 3P995), 3-conductor, oil-resistant cord with 3-prong grounded plug; garden hose adapter and 90° elbow/pipe adapter for connection to 1" NPT (No. 3P994) or 1¼" NPT (No. 3P995) rigid piping systems. Rule brand.

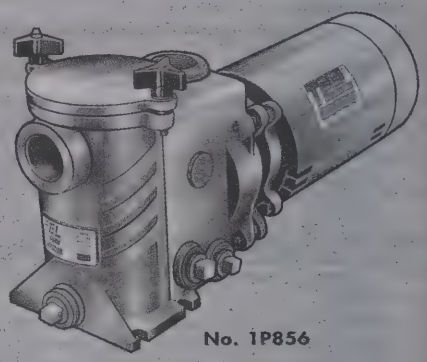
# SWIMMING POOL PUMPS

## SELF-PRIMING CAST-IRON SWIMMING POOL PUMPS

**Description:** Designed for use with above and below ground swimming pools. Units are self-priming to 20 ft. and handle liquid temperatures from 40 to 160°F. Built-in oversized suction trap and strainer basket with easy access lid. For use with non-flammable liquids compatible with pump component materials.



**Construction:** 1½" NPT suction and discharge ports. Pull-from-rear design permits complete disassembly without disconnecting piping or disturbing pump. Clog resistant semi-open impellers. Not to be used where positive pressure on suction side exceeds 5 PSI.

Heavy-duty cast-iron casing, impeller and adapter. Mechanical seal has stainless steel and Buna N parts with ceramic seat.

**Driver:** Heavy-duty swimming pool service motors with ball bearings at pump end. Motors are capacitor-start, NEMA 56J frame, continuous duty, 3450 RPM, 115/230 VAC, 60 Hz with automatic reset thermal overload protection and stainless steel shaft. Teel brand.

TEEL®

- Cast-iron construction
- Medium head, self-priming design
- Integral strainer
- Semi-open impellers
- 1½" Suction and discharge
- Pull from rear motor design for easier servicing

## COMMERCIAL SWIMMING POOL PUMPS

TEEL® New

No. 4RJ30

- Cast iron pump with bronze closed impeller
- Self-priming, maximum suction lift is 25 ft.
- Centerline discharge for easy installation
- NSF listed (with hair and lint strainer installed)
- Must order hair and lint strainer package separately (4RJ99, 4RK02, 4RK01)

Teel cast iron, self-priming, high performance, medium head pump for commercial swimming pools and spas. Bronze impeller is precision cast, machined, and dynamically balanced for long seal life and quiet operation. Available in 3 and 5 HP, 60 Hz 230V single-phase models. Motors are open dripproof, continuous-duty rated 3450 RPM. Back pull-out design allows entire motor to be removed for servicing impeller, seal or motor without disturbing plumbing. 2" discharge on 3 HP No. 4RJ30, 2½" discharge on 5 HP No. 4RJ31.

(*) Operating pump at or below indicated levels is not recommended. Can cause motor to overheat.
(†) To convert to PSI, divide by 2.31.

*If we don't have a pump for it, chances are it can't be pumped.*

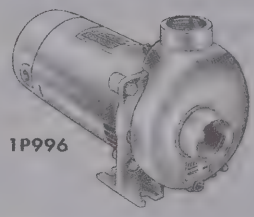
# SWIMMING POOL & SPA PUMPS

## 1½" BRONZE POOL/SPA PUMPS

- All bronze construction
- Self-venting center line discharge
- Self-priming casing, eliminates vapor binding
- Semi-open impellers
- 1½" Suction and discharge
- Pull-from-rear motor design for easier servicing
- UL 1081 Listed

**escription:** Underwriters Laboratories 1081) listed design for use with spas, hot ubs, health club spa pools and for swim- ing pool water circulation. Self-priming o 12 ft. when used with No. 1P999 strain- r basket and foot valve. Separate casting etween motor and pump provides heat arrier that permits handling of tempera- ures up to 180° F. For use with nonflam- able liquids compatible with pump com- onent materials.

**onstruction:** 1½" NPT suction and dis- harge ports. Pull-from-rear design per- its easy servicing and cleaning without isturbing piping. Clog resistant semi- pen impeller. Precision machined suc- on port for reliable O-ring seal when sing No. 1P999 strainer basket.



ronze casing, impeller, and casing cover. luminum motor adapter. Mechanical seal s Buna N, stainless steel and ceramic rts. Buna N O-rings.

**Driver:** Motors are open dripproof enclosure with permanently lubricated ball bearings. NEMA 56J frame, capacitor start, 115/230 VAC, 60 Hz, 3450 RPM with automatic reset thermal overload protection and stainless steel shaft.

**No. 2P092** is close-coupled to a 2-speed 1725/3450 RPM, 230 VAC only, 60 Hz motor. Switch is mounted on side of motor for speed selection. The low speed is generally used for the circulation of hot water in spas and hot tubs, while the high speed is used for water agitation and filtration.

## STRAINER BASKET

Designed to trap harmful debris before it enters pump. Extra large ABS plastic strainer basket removes easily for cleaning and has clear plastic lid for inspection. 1½" NPT inlet and outlet connections. Buna N O-ring provides positive seal. Built-in check valve. For use with swimming pool /spa pumps above. 5 PSI max. inlet pressure.

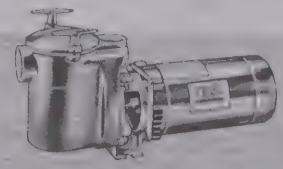
**No. 1P999.** Shpg. wt. 2.8 lbs. List..... $61.76.
Each..... $40.00

## 1½" BRONZE POOL/SPA PUMPS

- All-bronze construction
- Self-priming
- UL Listed
- Semi-open impeller
- 1½" suction and discharge

**scription:** 3/4 through 2½HP models for sidential and commercial swimming pool d spa circulation systems. Use for spas, t tubs, health club spa pools, and for imming pool water circulation. All- onze centrifugal-type pump with a 5" ir and lint strainer integral with pump.

**nstruction:** 1½" NPT suction and dis- large ports. Non-clogging, semi-open peller coupled to the motor by means of adjustable stub shaft. Rear access otor allows easy servicing and cleaning thout disturbing piping.



**tor:** Open dripproof enclosure with per- nently lubricated ball bearings. 3/4 ough 1½HP are 115/230V, 60 Hz; 2 and HP models are 230V, energy-saving pacitor start/capacitor run motors.

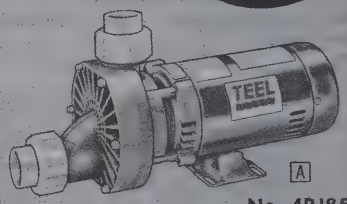
# SWIMMING POOL, JETTED TUB AND SPA PUMPS

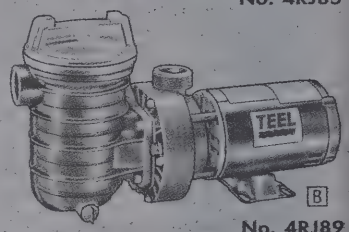
Specifically engineered for jet tubs, spas and above- and below-ground swimming pools. Precision-molded used a blend of glass-reinforced thermoplastic that is highly corrosion-resistant. Do not use as booster pumps or install in such a way that they can be pressurized above their normal operating pressure.

[A] **Nos. 4RJ85, 4RJ86 and 4RJ87 and 4RJ88.** Corrosion-resistant engineered thermoplastic pumps are fully self-draining to meet needs of jetted bathtub installations. Designed for quiet, reliable operation. Semi-open impeller will not clog with hair or lint. 1/2 through 1½ HP models with 115V, 3450 RPM, 60 Hz motors. Union connectors included. 1½" IPS, slip union on both the inlet and discharge ports. UL Listed (E53415).



[B] **Nos. 4RJ89, 4RJ90 and 4RJ91 and 4RJ92.** Designed for those who need both value and performance in an above-ground pool pump. Reliable rapid priming for moderate lift applications. Constructed of rugged, weather- and corrosion-resistant engineered thermoplastic. Hair and lint strainer has "see through" polycarbonate trap lid. Continuous-duty rated all-weather 115V 60 Hz motor is exceptionally quiet running. 1½" NPT inlet, 1½" IPS slip port discharge union connection. UL Listed (E53415).

[C] **Nos. 4RJ82, 4RJ83 and 4RJ84.** Weather- and corrosion-resistant engineered thermoplastic spa pumps are designed for high performance and warm environment of portable-type spas. Closed impeller. Hair and lint strainer and spigot tees available through Grainger Parts Operations. Call 1-800-323-0620. AO Smith motors provide two speeds (1725 or 3450 RPM) to allow low flow circulation for prolonged periods of time, and high volume water movement on command. Union connectors included. 1½" IPS, slip union on both the inlet and discharge ports. UL Listed (E53415).



[D] **Nos. 4RJ93, 4RJ94 and 4RJ95.** Rapid, self-priming, medium head pumps in 1, 1½ and 2 HP. Extra-large, integral hair and lint strainer has "see-through" polycarbonate trap lid, and holds a large amount of debris without diminishing pump efficiency. Noryl® closed impeller. Motor: 115/230V on 1 and 1½ HP models, 230V on 2 HP; 3450 RPM, 60 Hz. Designed for swimming pool use and variable temperature conditions. Union connectors included. UL Listed (E53415). NSF Listed (STD 50).

# POOL AND SPA FILTERS

## POOL AND SPA FILTERS

**pplications:** Filtering water for swimming pools, spas, and jetted tubs. Corrosion-resis-ant design.

### CARTRIDGE FILTERS

**For residential/ commercial pools and spas.** Installed indoors or outdoors. Precision-olded of a proprietary blend of glass-reinforced thermoplastic. Extremely efficient, alanced flow cartridge yields high dirt-loading capacity. No other cartridge filter pro-ides more value to any pool or spa. Filter element included. Element can be cleaned nd reused. Maximum pressure: 50 PSI. Maximum temperature: 104°F. Tank port size is ½".

### SAND FILTERS

**High rate sand filter for residential, commercial, or public swimming pools** ranging in size rom 16,000 to 48,000 gallons capacity. Permanent media high rate sand filters in 20, 24, nd 30" diameter models. Durable, non-corrosive thermoplastic construction in low-pro-le, two-piece design. Available with choice of slide or multiport valving. Maximum mperature 104°F. Maximum pressure 50 PSI. Tank port size is 2".

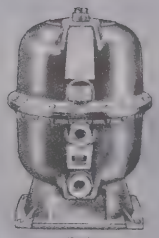
**Top-mount high rate sand filter for residential in-ground or above pools** ranging in size from 2,000 to 58,800 gallons capacity. Permanent media high rate sand filters in 20, 24, and )" diameter models accommodate large and small pools, offering the best combination f economy, durability and ease of maintenance. Corrosion-resistant, one-piece, extra-ick molded polyethylene tank assures long service life. Top-mounted, corrosion-resis-nt multiport selector valve included. Convenient union connectors, tank winterizing rain, continuous air relief system. Maximum temperature 95°F. Maximum pressure 50 SI. Valve port size 1½" on 4RK75 and 4RK76, and 2" on 4RK77.

### DIATOMACEOUS EARTH FILTERS

**For residential, commercial or public swimming pools** from 17,000 to 80,000 gallons in apacity, or larger if multiple filters are installed. Maximum flow rates 72 to 166 GPM. iatomaceous earth media filtration is available in three model sizes from 36 to 83 sq. of filter media. Molded 2-piece, glass-reinforced thermoplastic tanks are non-corro-ve. Maximum temperature 104°F. Maximum pressure 50 PSI. Tank port size is 2".

**OTE:** Sand (Nos. 4RJ55, 4RJ56, 4RJ57) and DE (Nos. 4RJ24, 4RJ25, 4RJ26) filters require ne of the following valves which must be purchased separately; see page 3290.

2"ABS slip-side valve (No. 4RK82) with 2" PVC unions for filter to valve connection.



1½" NPT ABS multiport valve (No. 4RK83) with 2" PVC unions for filter-to-valve con-ection.

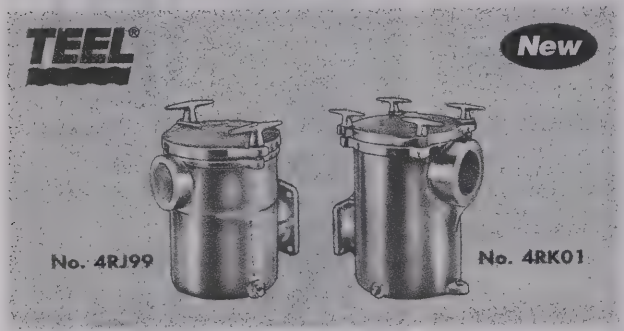
# POOL PUMPS AND ACCESSORIES



## 1/2 HP HIGH PRESSURE BOOSTER PUMP

High pressure, corrosion-resistant booster pump used to powe automatic swimming pool cleaners, solar heating, or other sys tems requiring high pressure. 1/2 HP, 115/230V, 60 Hz motor, fac tory wired for 230V. Precision molded fiberglass-reinforced ther moplastic construction. Alternate discharge ports for variou pipe installations. Delivers 80 to 90 ft. of head at 10 - 25 GPM Maximum load amps 13.4/6.7. 1¼" inlet and 1" outlet with 3/4 reducer bushings supplied.

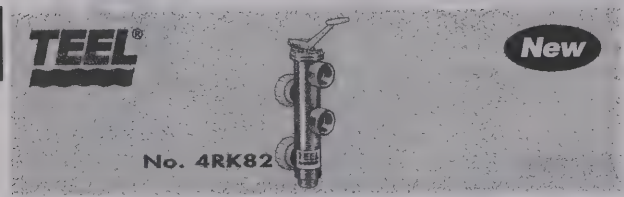
***New* No. 4RK03.** Shpg. wt. 29.0 lbs. List..... $406.70.
Each..... **$290.50**

## POOL HAIR AND LINT STRAINER PACKAGES

- **Fits commercial pool pumps Nos. 4RJ30 and 4RJ31**

**Cast Iron Pump Strainer No. 4RJ99**—6" cast iron pump strainer an lint trap with threaded locking handles and stainless steel baske for commercial pool pumps. 2" NPT suction port.

***New* No. 4RJ99.** Shpg. wt. 20.0 lbs. List $123.12. Each..... **$98.5**

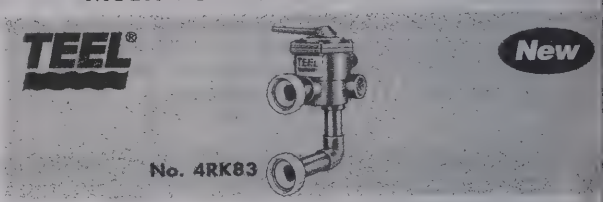


**Cast Iron Pump Strainer No. 4RK01**—8" cast iron pump strainer an lint trap with threaded locking handles and stainless steel baske for commercial pool pumps. 3" NPT suction port.

***New* No. 4RK01.** Shpg. wt. 46.0 lbs. List $362.50. Each..... **$290.0**

**Bronze Pump Strainer No. 4RK02**—8" bronze pump strainer and lin trap with threaded locking handles and stainless steel basket, fo commercial pool pumps with 3" NPT suction port.

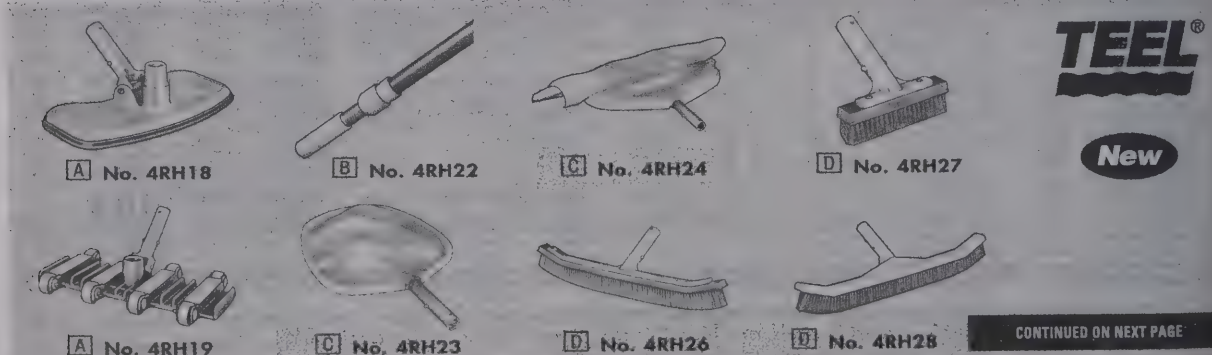
***New* No. 4RK02.** Shpg. wt. 56.0 lbs. List $1068.75. Each..... **$855.0**



## SLIDE VALVE

Two-position ABS backwash valve has minimal flow restriction. Unique handle design allows easier operation; pin locks valve in filter position. Connects directly to side ports in DE or Sand fil ters wtih 2" PVC unions. 2" (F) NPT ports. Corrosion-resistant.

***New* No. 4RK82.** Shpg. wt. 15.0 lbs. List..... $118.86.
Each..... **$88.05**



## MULTI-PORT VALVE—SIDE MOUNT

Six-position ABS dial-type valves offer convenience, ease of us and efficient operation. Includes connecting pipe to match sid ports in DE or Sand filters. 2" PVC unions for filter-to-valve co nection. 1½" (F) NPT ports. Positive seal prevents leaka between ports. Corrosion-resistant.

***New* No. 4RK83.** Shpg. wt. 10.0 lbs. List $139.86. Each..... **$103.6**

## A POOL/SPA VACUUM HEADS

**Vinyl Liner Vacuum.** Weighted vacuum with spring-loaded UniDapt® handle and bumper. Utilizes replaceable brushes to channel debris to vortex. Fits 1¼" and 1½" hoses.

**New No. 4RH18.** Shpg. wt. 2.5 lbs. List ..... $27.41.
Each ..... **$21.93**

**Concrete Pool Vaccum.** Flexible five-pound vaccum for concrete pools with pool-saver side bumpers. 14" wide. Fully enclosed weights help hug pool walls. comes with UniDapt® ABS handle and adjustable wheels.

**New No. 4RH19.** Shpg. wt. 3.5 lbs. List ..... $38.93.
Each ..... **$31.15**

**Deluxe Concrete Pool Vacuum.** Same flexible 5-lb. pool vacuum as above, but with extra-sturdy metal UniDapt® handle.

**New No. 4RH20.** Shpg. wt. 4.0 lbs. List ..... $40.43.
Each ..... **$32.35**

## B TELEPOLES

**LOUR-LOK 8 to 15 Ft. Telepole.** 8-ft. pole extends to 15 feet. External locking cam won't slip. Bicycle grip. Blue anodized finish. Fits vacuums, brushes, and skimmers.

**New No. 4RH21.** Shpg. wt. 2.2 lbs. List ..... $30.59.
Each ..... **$24.48**

**LOUR-LOK 6 to 11 Ft. Telepole.** 6-ft. pole extends to 11 feet. External locking cam won't slip. Bicycle grip. Blue anodized finish. Fits vacuums, brushes, and skimmers.

**New No. 4RH22.** Shpg. wt. 1.7 lbs. List ..... $27.03.
Each ..... **$21.63**

## C SKIMMERS AND RAKES

**Leaf Skimmer.** Rugged aluminum frame skimmer with no-mar plastic rim. Heavy-duty reversible net stands up to tough wear. Includes kwik-snap handle for pole mounting. Order telepole separately.

**New No. 4RH23.** Shpg. wt. 0.6 lbs. List ..... $12.42.
Each ..... **$9.94**

**Leaf Rake.** Deep 16" heavy-duty bag with woven sides and a sturdy 1/2" aluminum frame. Includes kwik-snap handle for pole mounting. Order telepole separately.

**New No. 4RH24.** Shpg. wt. 0.6 lbs. List ..... $17.60.
Each ..... **$14.08**

**Leaf Skimmer.** Blue, ultra-light and durable one-piece molded frame is practically indestructible. Includes kwik-snap handle for pole mounting. Webbing contains UV inhibitor. Order telepole separately.

**New No. 4RH25.** Shpg. wt. 0.3 lbs. List ..... $7.40.
Each ..... **$5.92**

## D POOL BRUSHES

**18" Wallbrush.** Curved blue back with die-cast aluminum reinforcement. No sharp edges. Heavy bristles and kwik-snap assembly. (Order telepole separately.)

**New No. 4RH26.** Shpg. wt. 1.0 lbs. List ..... $15.15.
Each ..... **$12.13**

**6" Algae Brush.** Straight blue back with die-cast aluminum reinforcement. No sharp edges. Heavy stainless steel bristles and kwik-snap assembly. (Order telepole separately.)

**New No. 4RH27.** Shpg. wt. 0.5 lbs. List ..... $13.99.
Each ..... **$11.19**

**18" Wallbrush.** One-piece molded white body has curved ends and no sharp edges. Five rows of bristles for easy cleaning. Includes kwik-snap assembly. (Order telepole separately.)

**New No. 4RH28.** Shpg. wt. 0.5 lbs. List ..... $10.43.
Each ..... **$8.35**

## E POOL AND SPA SIGNS

Teel pool and spa signs are weather proof plastic, grommeted and ready to hang. Conform to most state and municipal codes.

**"No Lifeguard" Sign** posts warning for commercial pools that children under 14 should not use pool without an adult in attendance. 24 x 18".

**New No. 4RH29.** Shpg. wt. 0.6 lbs. List ..... $14.49.
Each ..... **$11.59**

**Commercial "Pool Rules" Sign** posts rules and pool hours. 18 x 24".

**New No. 4RH30.** Shpg. wt. 0.7 lbs. List ..... $14.52.
Each ..... **$11.62**

**Commercial "No Diving" Sign.** 18 x 12".

**New No. 4RH31.** Shpg. wt. 0.4 lbs. List ..... $8.74.
Each ..... **$6.99**

**Commercial "Occupant Capacity" Sign.** 18 x 24".

**New No. 4RH32.** Shpg. wt. 0.8 lbs. List ..... $8.88.
Each ..... **$7.10**

## F ACCESSORIES

**5 x 9" blue and white float** for standard float lines.

**New No. 4RH13.** Shpg. wt. 0.3 lbs. List ..... $4.44.
Each ..... **$3.56**

**3 x 5" blue and white float** for standard float lines.

**New No. 4RH14.** Shpg. wt. 0.1 lbs. List ..... $2.29.
Each ..... **$1.84**

**Deluxe Thermometer.** Solid brass with chrome finish. Lens magnifies temperature readings. Easy-to-read Fahrenheit and Celcius scales and shatterproof lens. Includes 18" lanyard tie.

**New No. 4RH15.** Shpg. wt. 0.2 lbs. List ..... $15.45.
Each ..... **$12.36**

**Spa Buoy Thermometer.** Injection-molded plastic body. Head floats above water while temperature scale remains submerged. Easy-to-read Fahrenheit and Celcius scales and shatterproof lens.

**New No. 4RH16.** Shpg. wt. 0.3 lbs. List ..... $8.53.
Each ..... **$6.83**

**Jumbo Jim Thermometer.** Injection-molded housing with weighted body. Easy-to-read Fahrenheit and Celcius scales, and shatterproof lens.

**New No. 4RH17.** Shpg. wt. 0.2 lbs. List ..... $7.88.
Each ..... **$6.31**

## G BULK HEAD UNION SET

**Bulk Head Union Set.** Allows disconnect at swimming pool filter valve and spa/tub pumps. Required for use on top-mount valve sand filter and spa/tub pump applications where quick disconnect is desired. Set includes: two union collars, two 1½" slip adapters, and two o-rings.

**New No. 4RH35.** Shpg. wt. 1.0 lbs. List ..... $22.73.
Each ..... **$18.19**

# POOL AND SPA LIGHTS

### A Nos. 4RG55 thru 4RG63

Large stainless steel incandescent underwater pool lights provide a safe, reliable source of light for pools or spas. Feature simple light replacement and stainless steel construction. May be used in concrete (gunite) and vinyl-liner pools. Available in 300 and 500 watt 120V, and 300 watt 12V models. UL Listed (E41102). Order housing or niche separately. Light fits many American Products, Hayward, and Pac Fab niches.

### B Nos. 4RG51 and 4RG52

Light niches for vinyl or fiberglass pools. Large stainless steel pool light niches, with rear conduit hole, for metallic or nonmetallic conduit. Stainless steel trim ring and extra length sealing screws. Available for 3/4" and 1" conduit sizes. UL Listed (E41102). Order light separately.

### B No. 4RG53

PVC light niche for gunite pools. Large PVC pool light niche and 1" conduit connection, for metallic or nonmetallic conduit. UL Listed (E41102). Order light separately.

### B No. 4RG54

PVC light niche for vinyl or fiberglass pools. Large PVC pool light niche, with ABS trim ring and 1" conduit connection, for metallic or nonmetallic conduit. UL Listed (E41102). Order light separately.

### C Nos. 4RG48 thru 4RG50

Light niches for concrete/gunite pools. Large stainless steel pool light niches, with 45° side conduit hole, for metallic or nonmetallic conduit. Available in 1/2, 3/4 and 1" conduit sizes. UL Listed (E41102). Order light separately.

### D Nos. 4RG45 thru 4RG47

Junction boxes. Lexan® cover, brass body construction. Available with three 1/2" taps; three 3/4" taps; or 3/4", 1", 3/4" tap configuration. All junction boxes are UL Listed (E41102) and CSA Certified.

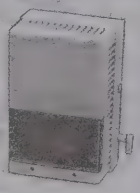
# PNEUMATIC THERMOSTATS



## LANDIS & STAEFA

No. 4E666

No. 4E668

No. 4E673
(Cover Not Included)

- Replacements for competitive models available
- Factory calibrated
- Wallplate and screws included with each thermostat
- Internal, field adjustable limit stops
- Ability to check output pressure without removing cover
- Field adjustable sensitivity for each setpoint dial

Designed to control pneumatic valves and damper actuators in HVAC equipment in schools, office buildings, hospitals, clean rooms, and other commercial or institutional facilities.

**Single Setpoint Pneumatic Room Thermostats** are for room control when only one setpoint condition is required. Designed for heating or cooling applications.

**Heating/Cooling, Dual Setpoint Pneumatic Room Thermostats** automatically switch from the heating to the cooling setpoint. Unit operates by changing the system supply pressure as heating and cooling requirements change for the building.

**Day/Night, Dual Setpoint Pneumatic Room Thermostats** conserve energy. Designed for day to night (or weekend) temperature setback. Comfort is ensured with a manual override selector switch that allows individual room or zone "day" control during the night cycle. Landis & Staefa brand.

## PNEUMATIC THERMOSTAT SPECIFICATIONS DATA

## PNEUMATIC POSITIONING AND SELECTOR SWITCHES

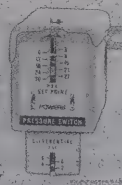
### POSITIONING SWITCH

- **Delivers to operating equipment any manually selected pressure from 0 to 30 PSI. Locking ring included**
- **Landis & Staefa brand (141-0600)**

**No. 4E715.** Shpg. wt. 0.5 lbs. List.....$80.00. Each.....**$40.00**

### THREE-POSITION SELECTOR SWITCH

- **Delivers or stops the flow of compressed air to selected controllers, valves, or damper actuator**
- **Landis & Staefa brand (786-0610)**



**No. 4E716.** Shpg. wt. 0.2 lbs. List.....$98.00. Each.....**$52.55**

### WE OFFER A WIDE RANGE OF ENERGY SAVING PRODUCTS

**Electric motors, controls, blowers, fans and ventilators, lighting, boilers, ballasts, pumps, furnaces, water heaters, and other products. See Index under Energy Saving Products for complete listings.**

## PRESSURE ELECTRIC SWITCHES

LANDIS & STAEFA

No. 4E717

**Applications: Pressure operated, snap action switches actuate electrical circuits from pneumatic control signals. Used to start and stop fans, pumps, and chillers, or to energize electric heating elements, pilot lights, etc. UL Listed (E35198).**

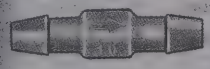
## ELECTRO-PNEUMATIC VALVE

LANDIS & STAEFA

LR63273

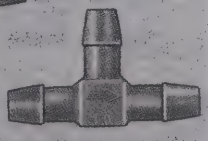
MH4922

No. 4E725



- **General purpose, electrically operated valve**
- **Two-position, three-way valve is designed to control air flow**
- **Used to apply pressure to and exhaust pressure from pneumatically controlled devices such as valves, dampers, and actuators**

| Fluid | Max. Air Supply Pressure | Air Flow Capacity Inlet | Air Flow Capacity Differential | Air Flow (SCIM) |
|---|---|---|---|---|
| Air (only) | 50 PSIG | 20 PSIG | 1 PSI | 600 |



| VAC | Watts | Current Drain Inrush | Current Drain Holding | Landis & Staefa Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **120** | 5.7 | 17.3VA | 9.2VA | 265-1002 | **4E725** | $65.00 | **$32.50** | 0.5 |

## EXTERNAL RESTRICTORS

LANDIS & STAEFA

No. 4E709

No. 4E712

- **External restrictors are used to change the velocity pressure in a pneumatic system to static pressure**

| Air Supply Pressure | Percent of Max. Flow Capacity | Nominal Air Capacity (SCIM)† 10 | 20 | 40 | 80 | 320 |
|---|---|---|---|---|---|---|

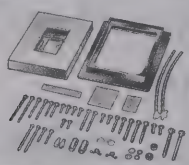
# PNEUMATIC THERMOSTATS

No. 3UC87

**Application:**

One or two-pipe, single or two temperature, pneumatic thermostat used to provide proportional control of pneumatic valves and damper actuators in heating and air conditioning systems.



- **Direct Acting (DA), Reverse Acting (RA) and Heating/Cooling (DA/RA) models are available.**
- **Pilot operated for high capacity models are available**
- **Night setback models are available**
- **Backplate has molded air connections-no separate fittings needed**
- **Universal locking cover with satin chrome finish models are available**

## REMOTE BULB PNEUMATIC TEMPERATURE SENSOR

Honeywell

No. 3UC13

**Application:**

Two-pipe, single temperature, remote bulb pneumatic temperature sensor used to provide proportional control of pneumatic valves or damper actuators in heating and air conditioning systems.

- **Pilot operated for high capacity**
- **Direct Acting (DA) and Reserve Acting (RA) models are available**
- **Replaceable filter cartridge**
- **Single point or averaging elements**

### REMOTE BULB PNEUMATIC TEMPERATURE SENSOR SPECIFICATIONS

# PNEUMATIC CONTROLLERS AND ELECTRONIC PNEUMATIC TRANSDUCER

## PNEUMATIC CONTROLLERS

No. 3UC58

Honeywell

Nos. 3UC59 and 3UC60

**Application:** Proportional, high capacity, single or dual input pneumatic controller used in conjunction with remote sensors to provide proportional (P) or proportional plus integral (P+I) control of temperature, humidity, pressure or dewpoint for heating and air conditioning systems.

- **P+I control option minimizes offset (No. 3UC60 only)**
- **Miniature diaphragm technology provides high degree of accuracy and reliability (No. 3UC60)**
- **Direct Acting (DA) models are field reversible**
- **Field adjustable compensation start point**
- **Integral action cut-off provides trouble free automatic startup**
- **Corrosion resistant construction**
- **Adjustable proportional band of 2.5 to 50% of primary sensor span**
- **Integral reset time is 0.5 to 20 minutes adjustable**

### PNEUMATIC CONTROLLER SPECIFICATIONS

| Model | Approximate Dimensions (In.) H | W | D | Output Signal Range (PSI) | Operating Range (PSI) | Ambient Temp. Limits (F°) | Input Signal (PSI) | Output Signal PSI) | Air Capacity |
|---|---|---|---|---|---|---|---|---|---|
| Single Sensor | 5 7/8 | 1 7/8 | 3 1/4 without cover or 3 3/8 with cover | 3 to 13 | 17 to 30 | 40 to 130 | 3 to 15 | 3 to 13 nominal main pressure minus 1/2 maximum | 0.07 SCFM with 1 PSI pressure drop at 18 PSI main air supply |
| Dual Sensor | 5 7/8 | 3 13/16 | 3 13/16 without cover or 3 3/8 with cover | 0 to 1 | 17 to 30 | 40 to 130 | 3 to 15 | 3 to 13 nominal main pressure minus 1/2 maximum | 0.07 SCFM with 1 PSI pressure drop at 18 PSI main air supply |

## ELECTRONIC PNEUMATIC TRANSDUCER

Honeywell

No. 3UC56

**Application:** Used in electronic pneumatic control systems to convert a proportional electric output signal from a controller into a direct-acting (DA), proportional pneumatic signal.

- **Screw mounting or snap rail (model with cover)**
- **Factory calibrated**
- **Dual barb fittings**
- **High accuracy**
- **Internal power supply of 24V, +10-15%, 50/60 Hz**

### ELECTRONIC PNEUMATIC TRANSDUCER SPECIFICATIONS

| Model | Approx. Dimensions (In.) (with cover) H | W | D | Operating Range (PSI) | Maximum Safe Air Pressure (PSI) | Ambient Temperature Limits °F | Ambient Humidity Limit (% rh) | Air Handling Capacity | Air Connections (In.) |
|---|---|---|---|---|---|---|---|---|---|
| 3-wire | 2 1/16 | 3 5/8 | 2 | 0 to 18 | 30 | 41 to 131 | 5 to 95 | 0.45 SCFM | Dual barb for 1/4 or 5/32 O.D. polyethylene tubing |

### ELECTRONIC PNEUMATIC TRANSDUCER ORDERING DATA

| Model | Input Signal | Power Consumption | Electrical Connections | Nominal High End PSI with 18 PSI Main Pressure | Honeywell Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| **3-wire with power supply and cover** | 2 to 10 VDC at 0.1 mA max. | 1.7 VA | 30 in. leadwires | 17 at 12 VDC or 16 at 11 VDC (minimum) | RP7517B1016 | **3UC56** | $144.93 | **$92.05** | 1.0 |

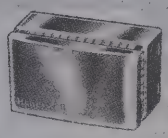
# PNEUMATIC THERMOSTAT, TEMPERATURE SENSOR, AND PNEUMATIC HUMIDISTAT

Honeywell

No. 3UC01

## AIRSTREAM INSERTION PNEUMATIC THERMOSTAT

**Application:** One-pipe, single temperature pneumatic thermostat used to provide proportional control of pneumatic valves or damper actuators in heating and air conditioning systems. Commonly used as discharge controllers for unit ventilators.



- Rod and tube insertion sensing element
- Wide throttling range
- Gauge tee and tank valve facilitate checking line pressures

### THERMOSTAT SPECIFICATIONS

| Type of Element | Approx. Case Dimensions (In.) H | W | D | Max. Safe Air Pressure (PSI) | Air Consumption (SCFM) | Max. Safe Operating Temp (°F) | Operating Temp Range (°F) | Setpoint Range (°F) | Throttling Range (adjustable) (°F) |

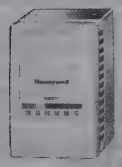
Honeywell

## ROOM TEMPERATURE SENSOR

**Application:** One or two-pipe, Direct Acting (DA) temperature sensor used with pneumatic controllers to provide proportional control of pneumatic valves and damper actuators in heating and air conditioning systems.



- Plug-in air connections
- High efficiency air filter
- Bimetal element
- Continuous temperature indication available by using receiver gauge.

### SENSOR SPECIFICATIONS

| Approx. Case Dimensions (In.) H | W | D | Output Pressure (PSI) | Max. safe air pressure (PSI) | Air Consumption (SCFM) | Max Safe Temp. Supply Air Pressure (PSI) | Sensing Range (°F) | Mounting |
|---|---|---|---|---|---|---|---|---|
| 3 | 1⅞ | 1½ | 3 to 15 over temp. sensing range | 25 | 0.019 with 0.007 in. restricted air supply | 150 | 18 | 50 to 100 | Horizontal or vertical wall mounted with plug-in backplate |

### SENSOR ORDERING DATA

Honeywell

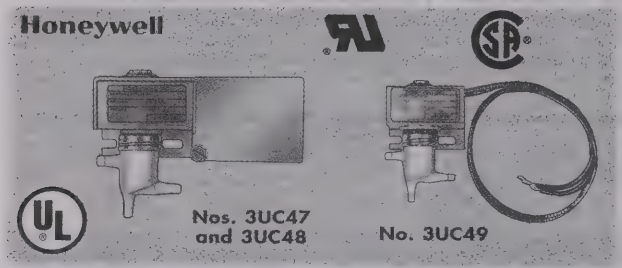
No. 3TZ97

## PNEUMATIC HUMIDISTAT

Application: Two-pipe, single temperature, pneumatic humidistat used to provide proportional control of pneumatic valves on humidification or dehumidification systems.

- Pilot operated for high capacity
- Direct Acting (DA) and Reverse Acting (RA) models are available
- Vertical or horizontal mounting
- Backplate has molded air connections; no separate fitting needed

### HUMIDISTAT SPECIFICATIONS



| Approx. Dimensions (In.) H | W | D | Max. Safe Air Pressure (PSI) | Air Consumption (SCFM) | Safe Operating Temp. (°F) | Safe Storage Temp. Range(°F) | Setpoint Range (% rh) | Throttling Range (adjustable) (% rh) |
|---|---|---|---|---|---|---|---|---|

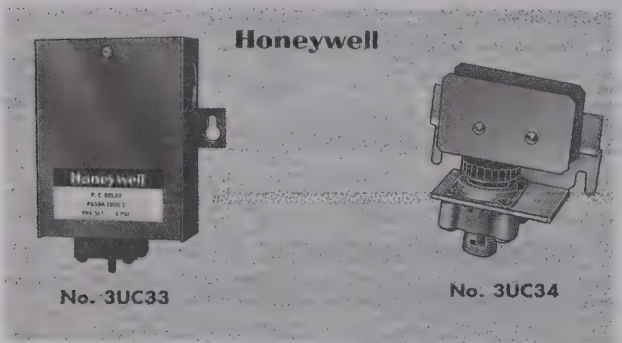
# PNEUMATIC RELAYS AND SWITCHES

## ELECTRIC PNEUMATIC RELAYS

**Application:** Used to interlock an electric system and a pneumatic control system.

- **Usable as a diverting relay, a selector relay or a stop and bleed relay**
- **Mount and operate in any position**
- **Available with lead wires or junction box**
- **Surface mounted models are UL Listed; panel mounted model is UL Recognized Component and CSA Certified**



### RELAY SPECIFICATIONS

| Model | Approx. Dimensions (In.) H | W | D | Electrical Connections (In.) | Power Consumption VA | Ambient Temperature Limits (°F) | Pressure Rating (PSI) | Air Capacity | Capacity Index (Cv) | Air Connections |
|---|---|---|---|---|---|---|---|---|---|---|
| Surface Mounted | 2 7/8 | 3 13/16 | 1 1/4 | Junction box and 15 leads | 12.5 inrush, 7.1 holding | to 100 | 50 maximum air | 0.42 SCFM at 20 PSI supply with 1 PSI pressure drop | 0.075 | Barb for 1/4 plastic tubing |
| Panel Mounted | 2 7/8 | 1 3/4 | 1 1/4 | 15 leads | 12.5 inrush, 7.1 holding | 0 to 100 | 50 maximum air | 0.42 SCFM at 20 PSI supply with 1 PSI pressure drop | 0.075 | Barb for 1/4 plastic tubing |

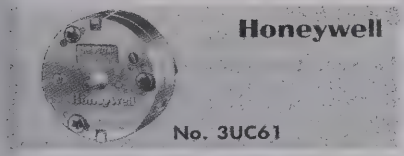
## PNEUMATIC ELECTRIC SWITCHES

**Application:** Used to convert a pneumatic signal from a controller to an electric switching action (SPDT) to provide start and stop control of equipment such as fans and pumps.

- **Models available for surface or panel mounting**
- **Neoprene diaphragm element**
- **Barb protected by open cage**
- **All ferrous parts plated to prevent corrosion**
- **Factory calibrated setpoint is field adjustable to meet job requirements**

### ELECTRICAL RATINGS



| Motor Load HP | VAC | Resistive Load | Pilot Duty |

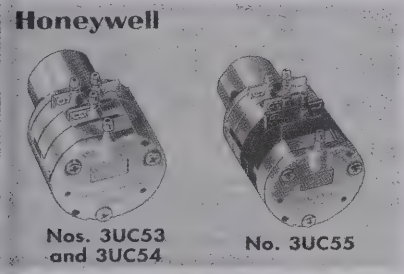
## PNEUMATIC CAPACITY RELAY

**Application:** Used to provide increased capacity of the branchline pressure to the final control device.



- Sharp barb connections
- Molded plastic construction with neoprene diaphragms
- Mounting clip provided

### RELAY SPECIFICATIONS

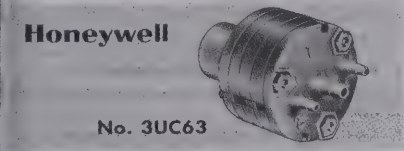
| Approx. Dimensions (In.) | Operating Range (PSI) | Max. Safe Air Pressure (PSI) | Ambient Temp. Limits (°F) | Ambient Humidity Limits(%rh) | Air Capacity (SCFM) | Mounting | Air Connections (In.) |
|---|---|---|---|---|---|---|---|
| Dia: 1<br>Deep: 1½ | 0 to 18 | 30 | 0 to 140 | 5 to 95 | 0.039 at 1 PSI differential | In-line, wall, or panel mounted | Barb fitting, Port 1 for 1/4 O.D. plastic tubing; all others for 5/32 O.D. plastic tubing |

### RELAY ORDERING DATA

| Description | Honeywell Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Direct Acting (DA) modulating Relay | RP970A1008 | **3UC61** | $52.57 | **$33.65** | 0.1 |

## PNEUMATIC SWITCHING RELAYS

**Application:** Used to block, divert or bleed pneumatic air lines when pilot pressure is changed from one specific value to another. Commonly applied in Day-Night, Summer-Winter, Start-Stop, On-Off-Auto and other multiple condition systems where control sequence is changed as conditions change



- Available with either single pole double throw (SPDT) or double pole double throw (DPDT) switching action
- Second switch on dpdt model is molded in black for identification
- Molded plastic construction with neoprene diaphragms, stainless steel lever and music wire spring
- In-line, wall or panel mounting with provided metal spring clip

### RELAY SPECIFICATIONS

| Model | Approximate Dimensions (In.) Diameter | Deep | Operating Range (PSI) | Maximum Safe Air Pressure (PSI) | Ambient Temperature Limits (°F) | Ambient Humidity Limit (% rh) | Air Handling Capacity (SCFM) | Air Connections (In.) |
|---|---|---|---|---|---|---|---|---|
| SPDT Relay | 1½ | 2 ¼ | 0 to 22 | 30 | 32 to 125 | 5 to 95 | 0.039 at 1 differential | Barb for 5/32 O.D. plastic tubing |

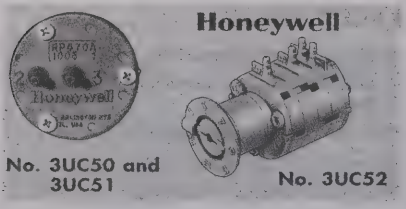
## PNEUMATIC REVERSING RELAY

**Application:** Used to reverse and increase the capacity of the branchline pressure to the final control element. The output varies inversely with the input with an adjustable offset.

- Reverse acting
- Neoprene diaphragm
- Stainless steel valve seats
- Mounting clip provided



### RELAY SPECIFICATIONS

| Approximate Dimensions (In.) | Operating Main Pressure (PSI) | Operating Pilot Pressure (PSI) | Maximum Safe Air Pressure (PSI) | Ambient Temperature Limits (°F) | Ambient Humidity Limit (% rh) | Air Capacity (SCFM) | Mounting | Air Connections (In.) |

| Four port modulating relay | RP972A1006 | **3UC63** | $55.78 | **$35.50** | 2.0 |

# PNEUMATIC RELAYS AND PNEUMATIC LOAD ANALYZER

## PNEUMATIC RELAYS

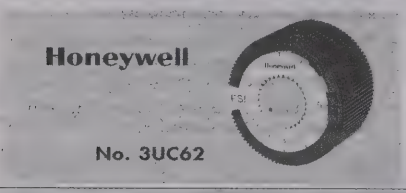
**Nos. 3UC50 and 3UC51:**

**Selector relays** are three-port and used in heating and air conditioning systems to transmit the higher of two input signals, lockout one pressure signal when a second signal is higher, or transmit the lower of two pressure signals.

- **Select models use diaphram-logic technology**
- **Molded plastic construction**

**No. 3UC52:**

**Snap-acting relay** is four-port and converts a proportional air pressure change from a controller to a positive (two-position) pressure change or to divert a supply line to one of two branches.



- **Molded plastic construction**

### RELAY SPECIFICATIONS

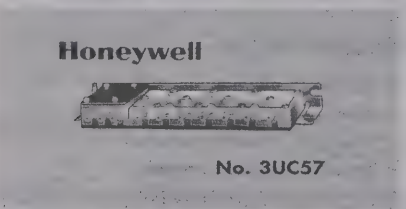
| Type | Approximate Dimensions (In.) | Operating Range (PSI) | Maximum Safe Air Pressure (PSI) | Ambient Temperature Limits (°F) | Ambient Humidity Limit (% rh) | Air Capacity (SCFM) | Mounting | Air Connections (In.) |
|---|---|---|---|---|---|---|---|---|
| **Selector** | 1 1/2 dia. 1 deep | 0 to 18 | 30 | 0 to 140 | 5 to 95 | 0.039 at 1 differential | In-line, wall, or panel mounted | Barb for 5/32 O.D.plastic tubing |
| **Snap-Acting** | 1 1/2 dia. 2 3/4 deep | 0 to 18 | 30 | 0 to 140 | 5 to 95 | 0.039 at 1 differential | Mounts in any position with mounting clip | Barb for 5/32 O.D.plastic tubing |

### RELAY ORDERING DATA

| Type | Description | Honeywell Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Selector** | Higher-of-two-pressures selector relay; includes mounting clip | RP470A1003 | **3UC50** | $36.45 | **$22.95** | 1.0 |
| **Selector** | Lockout, lower-of-two-pressures or repeater relay; includes mounting clip | RP470B1001 | **3UC51** | 36.45 | **22.95** | 1.0 |
| **Snap-Acting** | Snap-acting relay; includes mounting clip; 1 psi max nonadjustable differential; 3 to 15 PSI adjustable setpoint. | RP471A1002 | **3UC52** | 58.46 | **37.35** | 1.0 |

## PNEUMATIC RATIO RELAY

Application: Used to control pneumatic valves or damper actuators in sequence from a single thermostat by producing a modulating pressure output proportional in a fixed ratio to pilot input changes.



- **Adjustable pilot start point pressures**
- **Four sharp barb air connections**
- **Molded plastic construction with neoprene diaphragms and stainless steel valve seats**
- **100 mesh stainless steel screens in main and branch ports**
- **Mounting clip provided**

### RELAY SPECIFICATIONS

| Approximate Dimensions (In.) | Operating Main Pressure (PSI) | Operating Pilot Pressure ( PSI) | Ambient Temp. Limits (°F) | Ambient 3 to 15 0 to 140 | Start Point (PSI) | Air Capacity | Mounting | Air Connections (In.) |
|---|---|---|---|---|---|---|---|---|
| Dia: 2 Deep: 2 5/8 | 18 | 3 to 15 | 0 to 140 | 5 to 95 | 0 to 10 adjustable | 0.039 scfm at 1 PSI differential | In-line, wall, or panel mounted | Barb fitting, Port 1 for 1/4 O.D plastic tubing; all others for 5/32 O.D. plastic tubing |

### RELAY ORDERING DATA

| Description | Honeywell Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Four port nonbleed pneumatic relay** | RP971A1007 | **3UC62** | $85.46 | **$54.45** | 3.0 |

## PNEUMATIC LOAD ANALYZER

Application: Used to select the highest and/or lowest branch pressure input from zone thermostats to operate final control elements in pneumatic control applications.

- **Seven input manifold containing logic diaphragm, air filter and restrictions**
- **Ten sharp barb connectors for all piping requirements**
- **Large integral filter assures clean air to the manifold**
- **Requires no field adjustment**
- **Minimum maintenance due to plastic construction**
- **Can add an analyzer to increase inputs to twelve**

### PNEUMATIC LOAD ANALYZER ORDERING DATA

| Description | Honeywell Model | Stock No. | List | Each | Shpg. Wt. |

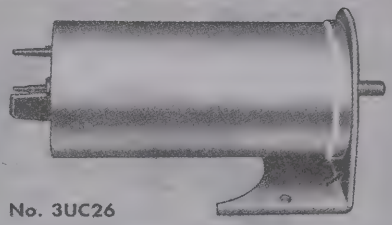
| **Diaphragm logic pressure selector** | RP913A1008 | **3UC57** | $150.17 | **$95.45** | 4.0 |

### PNEUMATIC LOAD ANALYZER SPECIFICATIONS

| Approximate Dimensions (In.) H | L | D | Operating Range (PSI) | Maximum Safe Air Pressure (PSI) | Ambient Temperature Limits (°F) | Ambient Humidity Limit (%rh) | Air Capacity (SCFM) | Air Consumption (SCFM) | Mounting | Air Connections (In.) |
|---|---|---|---|---|---|---|---|---|---|---|
| ¾ | 6½ | 2⅛ | 0 to 18 | 25 | 0 to 140 | 5 to 95 | 0.039 at 1 differential | 0.039 at 1 | In-line, wall, or panel mounted | 10 barb for 1/4 O.D.plastic tubin |



# PNEUMATIC DAMPER ACTUATOR

## PNEUMATIC DAMPER ACTUATOR

**Application:** Used to provide pneumatic proportional control of dampers and high velocity mixing box air valves. Available in various operating ranges for either independent operation or sequence operation with other actuators.

- Corrosion resistant materials
- Low friction shaft bearing
- Adjustable stroke feature option
- Close tolerance on operating range and stroke
- Non-overlapping spring ranges for sequencing
- Rolling diaphragm operated
- Versatile mounting and connecting hardware options
- Models available for use with UL Classified leakage rated (smoke) dampers

Honeywell

No. 3UC26

### NET FORCE EXERTED

| Pressure Range (PSI) | Force in lb. at 0 PSI | Force in lb. at 18 PSI |

## PNEUMATIC CONTROL VALVES

No. 4E696

No. 4E698

LANDIS & STAEFA

- Direct-coupled design allows easier installation
- Cartridge type packing for easy service
- Modified equal percentage throttling characteristics
- Hole type plug design provides quieter operation
- ANSI Class 250 rated valve bodies

Used to provide pneumatic proportional control of water, steam, and ethylene glycol solutions. Varying Cv and operating ranges for use in all cooling and heating applications.

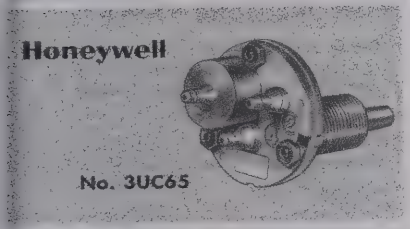
## PNEUMATIC UNIT VENTILATOR DAMPER ACTUATOR

**Application:** Used to provide pneumatic proportional control of damper on unit ventilators. May be adapted to various unit ventilator control cycles.

- **Die cast zinc construction**
- **Hesitation feature available for unit ventilator cycles requiring a minimum percentage of outdoor air**



### PNEUMATIC UNIT VENTILATOR DAMPER ACTUATOR SPECIFICATIONS

| Approx. Dimensions (In.) H | W | Max. Safe Air Pressure in (PSI) | Ambient Temperature Limits (°F) | Damper Load Rating (Sq. Ft.) | Mounting | Stroke (Adjustable) (In) | Air Connections |
|---|---|---|---|---|---|---|---|
| 4½ | 6⅞ | 25 | -20 to 160 | 2.7 | 3/4 16 stud for mounting on bracket or compartment partitions | 2⅛ to 2½ | 1/8 In. FPT |

### PNEUMATIC UNIT VENTILATOR DAMPER ACTUATOR ORDERING DATA

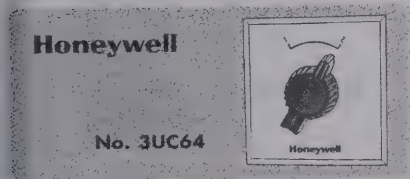
| Spring Range (PSI) | Description | Honeywell Model | Minimum stroke No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 3 to 12 | Minimum stroke factory set at 33% (field adjustable from 0 to 100%) of full stroke at 3 PSI; hesitates from 3 to 8 PSI; full storke form 8 to 12 PSI. | MP516A1087 | **3UC21** | $146.89 | **$93.35** | 5.0 |

## PNEUMATIC MANUAL OR MINIMUM POSITION SWITCH

**Application:** Used to manually position a remote damper actuator, reset the setpoint of a pneumatic controller or provide minimum damper position by setting a minimum pressure limit in the branch line to the damper actuator.

| SELECTABLE SPANS FOR PSI | | |
|---|---|---|
| 188° Knob Rotation | 244° Knob Rotation | 300° Knob Rotation |
| 10 PSI | 13 PSI | 16 PSI |

- **Three-port pneumatic manual or minimum switch with pilot bleed**
- **Two breakaway stops on the knob allow for 244 and 300 degrees of rotation**
- **Wall or panel mounting**
- **Complete with knob, 0 to 100% scaleplate, locknuts, and wall mounting bracket**



### PNEUMATIC MANUAL OR MINIMUM POSITION SWITCH SPECIFICATIONS

| Approx. Dimensions (In.) Depth | Diameter | Main Operating Pressure in (PSI) | Branch and Pilot Operating Pressure in (PSI) | Max. Safe Air Pressure in (PSI) | Air Capacity | Air Consumption (SCFM) | Air Connections (In.) |
|---|---|---|---|---|---|---|---|
| 3 | 11/2 | 18 | 3 to 15 | 25 | 0.021 SCFM below minimum position, device feeding pilot determines capacity. | 0.022 | Barb for 5/32 O.D. plastic tubing |

### PNEUMATIC MANUAL OR MINIMUM POSITION SWITCH ORDERING DATA

| Description | Honeywell Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Three-port pneumatic manual or minimum switch with pilot bleed** | SP970A1005 | **3UC65** | $49.64 | **$31.80** | 1.0 |

## PNEUMATIC DIVERTING SWITCH

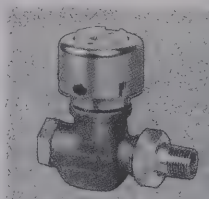
**Application:** Used to manually divert, block or bleed air in pneumatic air lines to revise control sequence with a change in conditions. Commonly applied on Day-Night, Summer-Winter, On-Off-Auto, or Start-Stop functions.

- **Mounts on a panel up to one inch (25mm) thick**
- **Complete with knob, 0 to 100% scaleplate, locknuts, and wall mounting bracket**

### PNEUMATIC DIVERTING SWITCH SPECIFICATIONS

| Approx. Dimensions (In.) H | W | D | Normal Operating Pressure(PSI) | Input Pressure (any port) (PSI) | Max. Safe Air Pressure (PSI) | Ambient Temp. Limits (°F) | Ambient Humidity Limit (% rh) | Air Capacity |
|---|---|---|---|---|---|---|---|---|
| 1⅝ | 1⁹/₁₆ | 3 | 0 to 18 | 0 to 25 | 30 | 0 to 140 | 5 to 95 | 0.175 SCFM at 1 PSI pressure drop |

### PNEUMATIC DIVERTING SWITCH ORDERING DATA

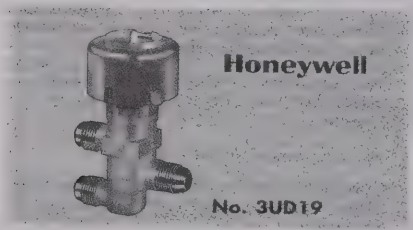


| Description | Honeywell Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Pneumatic two-position diverting switch** | SP470A1000 | **3UC64** | $80.61 | **$51.45** | 4.0 |

# PNEUMATIC RADIATOR VALVES

## PNEUMATIC RADIATOR VALVE

**Application:** Normally-open, single-seated pneumatic radiator valve with straight through construction used to provide proportional control of two-pipe hot water or steam systems.



- **Available in several capacities and spring ranges for various application requirements**
- **Easily replaceable actuator assembly for service convenience**
- **Compact size**
- **Can be repacked without shutting down system**
- **Rotating actuator for aligning air connection with control air piping**

| Approx. Case Dimensions (In.) | Max. Safe Air Pressure (PSI) | Spring Range (PSI) | Ambient Temp. (°F) | Body Pressure Rating (PSI) | Max. Controlled Medium Temperature (°F) | Air Connection |
|---|---|---|---|---|---|---|
| 4⅞ High<br>3¾ Wide | 30 | 2 to 5<br>or 3 to 10 | 160 | 150 | 180 | Push-on for 1/4 in. O.D. plastic tubing |

## PNEUMATIC THREE-WAY HIGH PRESSURE VALVE

**Application:** Three-way pneumatic mixing valve provides proportional control of hot and/or cold water in unit air conditioners and fan coil systems.

- **Direct Acting (DA), rolling diaphragm actuator with integral high temperature plastic air connector**
- **Spring loaded, self-adjusting Buna-N "V"-ring packing replaceable**
- **Brass seats (lower is integral, upper is removable) and contoured plug provide metal-to-metal seating**
- **Stainless steel stem**
- **Linear and constant total flow throughout full plug travel**
- **Compact size**

| Approx. Case Dimensions (In.) | Max.Safe Air Pressure (PSI) | Spring Range (PSI) | Body Pressure Rating (PSI) | Controlled Medium Temperature (°F) | Port Connections | Air Connection |
|---|---|---|---|---|---|---|
| 4⅞ High<br>3⅛ Wide | 29 | 2 to 5 | 250 | 35° to 250° | 1/2 or 5/8 in. O.D., SAE Flare | Push-on for 1/4 in. O.D. plastic tubing |

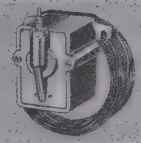
## PNEUMATIC TERMINAL UNIT VALVE

**Application:** Normally-open (N.O.), single-seated valve provides proportional control of steam or hot and/or cold water in terminal units.

- **Easily replaceable actuator assembly for convenience of service**
- **Compact size**



| Approx. Case Dimensions (In.) | Max.Safe Air Pressure (PSI) | Spring Range (PSI) | Body Pressure Rating (PSI) | Max. Controlled Medium Temperature (°F) | Face-to-Face Approx. Dimensions (In.) | Air Connection |

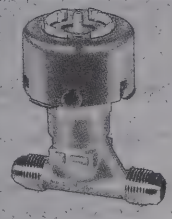
## PNEUMATIC TEMPERATURE SENSOR

**Honeywell**

- Corrosion resistant
- Indicates continuous temperature with receiver gauge

**Application:** One-pipe, direct acting temperature sensor used with P908 or RP920 Controllers to provide proportional control of neumatic valve or damper actuators. One type of sensor is a rod nd tube insertion element for duct, well, or through-the-wall ıounting. The second type is an averaging liquid-filled element or duct mounting.



### PNEUMATIC TEMPERATURE SENSOR SPECIFICATIONS

| Output Pressure (PSI) | Maximum Safe Air Pressure (PSI) | Air Consumption (SCFM) | Supply Air Pressure (PSI) | Air Connections (In.) |
|---|---|---|---|---|
| 3 to 15 over temp. sensing range | 25 | 0.019 | 18 | Push-on barb for 5/32 and 1/4 O.D. tubing |

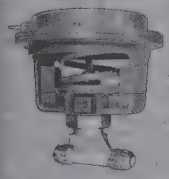
## PNEUMATIC WATER VALVE

**Honeywell**

**No. 3UD21**



**Application:** Normally-open, single-seated, straight-through, high-pressure valve provides proportional control of hot and/or cold water in unit air conditioners and fan coil systems.

- Spring loaded, self-adjusting Buna-N "V"-ring packing replaceable without shutting the system down
- Integral seat and brass plug with removable composition disc provides equal percentage flow
- High temperature rolling diaphragm actuator and plastic diaphragm retaining cup with integral air connection
- 1/2-In. port connection—SAE flare nuts required
- Push-on air connection for 1/4-in. O.D. plastic tubing
- Stainless steel stem has 3/16-in. diameter
- Compact size

## PNEUMATIC WATER VALVE

**Honeywell**

**No. 3UD11**

**No. 3UD12**

**Application:** Used to provide proportional control of unit air conditioners using hot and/or chilled water.

- Proportional normally-open (N.O.) or normally-closed (N.C.) models available
- Straight-through pattern
- Rotating actuator for aligning air connection with control air piping
- Molded replaceable composition disc for tight shut-off
- Flare tube connections
- Compact size

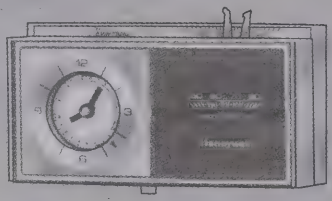
# LOW VOLTAGE ELECTROMECHANICAL THERMOSTASTS



No. 2E901 Less Subbase
No. 2E994 Subbase Not Required

No. 2E995 Subbase Included

Honeywell

No. 4E394 Less Subbase

ENERGY RIGHT®

- Electromechanical thermostats help minimize fuel costs by automatically raising and lowering temperature for one or more periods of time every 24 hours
- For use with 24V systems
- Units with battery powered quartz clock maintain correct time in the event of power interruption; require no additional wiring which eliminates system compatibility problems
- Easily programmed by placing colored indicators in the clock dial at the desired setback times. Indicators are color coded; red, for high setting; blue, for low setting. 2 indicators required for setback cycle
- For No. 4E394, if subbase No. 4E395 is used, clock power is selectable from: 24V system transformer, system circuit (power stealing) or battery
- Nos. 2E994, 2E901, and 2E995 are powered by standard AA alkaline battery

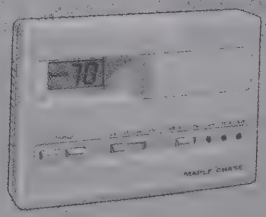
# NON-PROGRAMMABLE ELECTRONIC THERMOSTATS

**Digital non-programmable electronic thermostat for mercury-free replacement of mechanical thermostats.**



MAPLE CHASE™

No. 3GD25

No. 3GD24

No. 3GD26

**MAPLE CHASE 5-YEAR LIMITED WARRANTY**

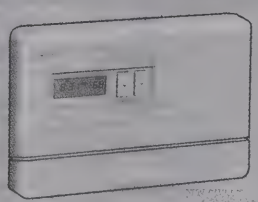
Text of warranty available upon request. See "Manufacturer's Warranties" on page opposite inside back cover.

**Thermostats Feature:**

- Large LCD display shows room and setpoint temperatures
- Battery powered to allow replacement of all standard 24VAC mechanical thermostats (battery included)
- Easy non-programmable operation for trouble-free use
- Low temperature protection heat turns on when temperature goes below 40°F
- Mercury-free, environmentally safe temperature control
- Quick-wiring terminal block for fast, dependable installations
- Adjustable temperature differential
- Low battery indicator
- Temperature range 45-90°F
- UL Listed

**No. 3GD25** is fully compatible with all standard 24 volt AC and Millivolt heating systems. Provides positive-off and fan control switching for total comfort and efficiency. Contemporary white housing. Maple Chase brand.

**No. 3GD24** is fully compatible with all standard 24 volt AC heating/cooling systems. O and B terminals provide complete zoning system compatibility. Automatic compressor short cycle protection. Contemporary white housing. Maple Chase brand.



**No. 3GD26** is fully compatible with all standard 24VAC multistage heat pump systems—up to 2 stage heat, 2 stage cool. Accurate staging control for increased system efficiency. Automatic compressor short cycle protection. Zone system compatible. Maple Chase brand.

## THERMOSTAT SPECIFICATIONS AND ORDERING DATA

(*) Requires extra 24 volt neutral wire from transformer to power thermostat.

# NON-PROGRAMMABLE MICROELECTRONIC THERMOSTAT

No. 4DG50

**No. 4DG50 Features:**

- Heat-Off-Cool system switch
- On-Auto fan switch and low battery indicator
- Mercury free, environmentally safe
- 1 Heat and 1 cool stage
- 45-90°F Operating temperature range
- Battery powered (3 'AA' batteries included)
- Built-in 5 minute time delay for compressor protection in cooling
- High and low temperature protection limits
- White case
- Back-lit display

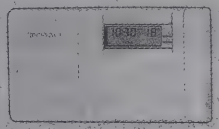
# PROGRAMMABLE THERMOSTATS

## ELECTRONIC PROGRAMMABLE THERMOSTATS

Honeywell



No. 3UC86
Displayd without control panel door

No. 4TL95

New

No. 4CZ54

- Easy to program and install
- LCD continuously indicates time-of-day, day of week, current program period, and room temperature
- Separate programs for weekdays and weekends (5 day/2 day)
- Provides up to 4 temperature settings per weekday schedule
- Heating cycle rates may be adjusted for different heating systems
- Includes mounting wallpate and batteries
- Features energy-saving winter setback and summer setup

For No. 4TL95:

- Large display
- Two period programming
- Selectable heating cycle rate (1,3,6 or 9 cph)
- Set points permanetly held in memory (no batteries needed) and retained during power outages
- power stealing for all equipment and application needs gas, oil, electric forced air, condensing gas furnaces, hydronic heat, gravity and radient heat systems

Check your frequently-ordered product categories for line extensions and new product offerings.
Look for the "New Products" header at the top of the page and the "New" designation next to the stock number.

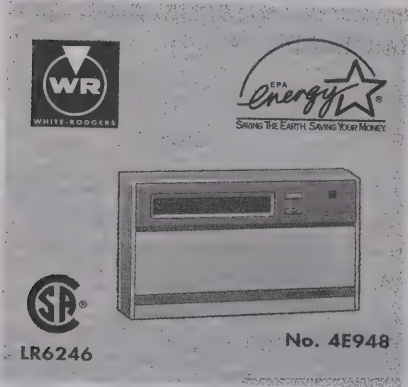
# PROGRAMMABLE ELECTRONIC THERMOSTATS

**FEATURES:**

- Automatically raises or lowers temperature at preselected times
- Programmable blower control. Whenever fan is required to run continuously during specific times of the day
- "Hold Temp" key provides indefinite program override
- Programmable vacation mode
- Selectable Energy Management Recovery (computed recovery) system
- Key pad lockout (partial or full)
- Remote sensing available (order No. 4DG57 or 4E726)
- Filter change-out indicator
- Automatic heat/cool changeover option available
- Classic white color
- Back-Lit display
- Daylight savings time reset button

No. 3TZ54

No subbase required



## PROGRAMMABLE THERMOSTAT SPECIFICATIONS

LR6246

No. 4E948

**FEATURES:**

- Automatically raises or lowers temperature at preselected times
- LCD displays setpoint temperature continuously and alternately shows actual time and temperature
- "Hold Temp" key provides indefinite program override
- Temperature keys allow for a temporary program override
- Programmable fan feature. Whenever fan is required to run continuously during specific times of the day
- Nos. 4E171, 4E172 and 1N179 feature optional remote sensing up to 200 ft. when used with No. 4E726 or 4DG57 remote sensor (sold on page 3321.) 18-gauge, 3 conductor shielded cable not included
- EMR™ (Energy Management Recovery) automatically calculates when to begin raising or lowering temperature in order to reach programmed temperature at preset time. Activated by installer
- 60 second time delay on fan in cooling cycle—increases efficiency
- No subbase required

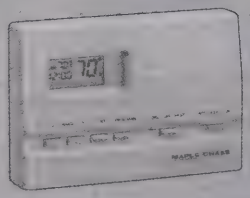
(✓) Denotes energy efficient product. (*) 1 Program for weekdays, 1 program for weekends. (*) One program for weekdays, one program for weekends.

### MAPLE CHASE THERMOSTATS FEATURE:

- Fully compatible with all standard 24VAC/750 mV heating/cooling systems and single stage heat pumps
- Low temperature protection—heat turns on when temperature goes below 40°F
- Automatic compressor short-cycle protection for cool operation
- Memory and Relay switching battery powered. This is not a "Current" Robbing thermostat
- Low battery indication

### NO. 3GD27 FEATURES:

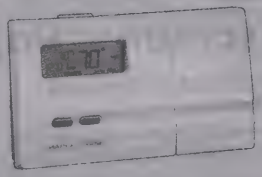
- Four Temperature changes a day for weekdays. Weekend program automatically eliminates middle two setbacks for all-day comfort



### NO. 3GD28 FEATURES:

- Seven separate daily programs with four time and temperature changes per day for maximum flexibility
- QuickSet™ programming allows all seven programs to be simultaneously entered
- Residual cooling feature provides up to a 90-second fan delay on break for maximum cooling efficiency
- O and B terminals provide complete zoning system compatibility

### NO. 3ZP74 FEATURES:



- QuickSet™ programming mode makes daily programming easy
- Auto-changeover feature with installer override switch
- Programmable fan feature allows independent programming of fan operation to meet commercial code requirements
- Residual cooling fan feature allows user to program up to 90 second delay on break during cool mode
- NiteView™ LCD display backlight
- Temporary override for up to 4 hours to meet commercial code requirements
- Remote sensor capable—averages up to 4 thermistor sensor inputs (including thermostat sensor). Part no. 09015 available from Grainger Parts Operations, call 1-800-323-0620
- 5-Year Limited Warranty

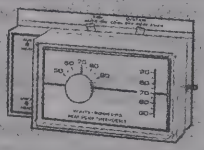
# HEAT PUMP THERMOSTATS

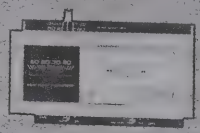


## NON-PROGRAMMABLE HEAT PUMP THERMOSTATS

**NOS. 4E034, 3TZ48, AND 3TZ49 FEATURE:**

- 24VAC operation
- Dual mercury bulb design on a single bimetal coil
- Nos. 4E034 and 3TZ48 energize reversing valve in cooling mode only
- No. 3TZ49 energize reversing valve in heating or cooling mode
- Manual change-over
- Emergency heat provides source of heat other than heat pump's compressor (typically electric resistance heat)

**NO. 2E856 FEATURES:**



- Manual changeover
- Indicators: Emergency Heat, Auxiliary Heat and Check LED to indicate compressor failure

## ELECTRONIC NON-PROGRAMMABLE HEAT PUMP THERMOSTAT

**WHITE-RODGERS THERMOSTAT FEATURES:**

- Thermostat design eliminates the need for an outdoor thermistor
- Microcomputer based design provides digital accuracy
- Rotary temperature dial
- Mercury-free design
- Low profile design and soft white color
- Adjustable compressor cycle rate

**ELECTRICAL RATINGS: 18-30VAC; 0.01 to 1.5 amps (load per terminal) 2.5 amps max. total load (all terminals combined)**

No. 1N176

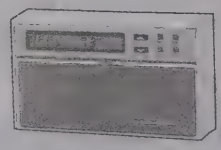
# PROGRAMMABLE HEAT PUMP THERMOSTATS

**WHITE-RODGERS THERMOSTATS FEATURE:**

- Automatically raise or lower temperature at preselected times
- LCD displays set point temperature and system mode continuously; time and room temperature alternately
- Temperature adjustment keys allow for a 2 hour manual override
- Remote sensing capabilities on all models, except No. 4DG49; Order remote sensor, No. 4E726 or 4DG57 on page 3321
- EMR™ (Energy Management Recovery) automatically calculates when to begin raising or lowering temperature in order to reach programmed temperature at preset time
- Compressor short cycle protection
- CSA Certified (LR27935)

ELECTRICAL RATINGS: 20-30VAC 50/60 Hz; 0.01-1.5 Amps (normal load) 0.01-2.5 Amps (total combined load)



No. 4DG49

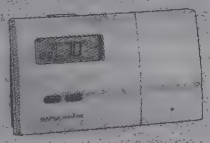
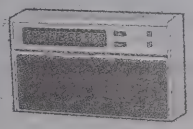
## FLEXIBLE CONDUIT KITS



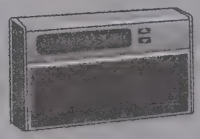
SwivelLok™ Flexible conduit kits contain 2 SwivelLok multi-position nylon connectors and 6 ft. of Polytuff I liquidtight, flexible, nonmetallic conduit. This kit offers a convenient way to make short connections to air conditioners, hot tubs, and other outside electrical equipment. Available in 1/2" and 3/4" trade sizes. Corrosion-resistant. UL Listed for outside use. Hubbell-Kellems brand.

**No. 6D267** 1/2" Kit contains 2 gray SwivelLok connectors and 6' PolyTuff I conduit Kellems brand (PS05GY-KIT). Shpg. wt. 1.2 lbs. List $13.86. Each.....$11.0



**No. 6D268** 3/4" Kit contains 2 gray SwivelLok connectors and 6' PolyTuff I conduit Kellems brand (PS07GY-KIT). Shpg. wt. 1.7 lbs. List $21.76. Each.....$17.4

# MULTISTAGE PROGRAMMABLE ELECTRONIC THERMOSTATS



## MAPLE/CHASE™

No. 3ZP75

No. 4E661

Nos. 4E662 aned 1N178

**MAPLE CHASE THERMOSTAT, NO. 3ZP75, FEATURES:**

- QuickSet™ programming mode makes daily programming easy
- Auto-changeover feature with installer override switch
- Energy Efficient Recovery (EER™) mode automatically calculates when to begin recovery period
- Adjustable second stage differential for maximum system control
- Programmable fan feature allows independed programming of fan operation to meet commercial code requirements
- Residual cooling fan feature allows user to program up to 90 second delay on break during cool mode
- NiteView™ LCD display backlight
- Temporary override for up to 4 hours to meet commercial code requirements
- Remote sensor capable—averages up to 4 thermistor sensor inputs (including thermostat sensor) parts number 09015 from GPO 1-800-323-0620

**ELECTRICAL RATINGS: 24 VAC (18-30VAC); 1.5 amp maximum load per terminal (relay outputs), 4 amp total maximum load (all terminals combined)**

**WHITE-ROGERS THERMOSTATS, NOS. 4E661, 4E662, 1N178, FEATURE:**

- Automatically raise or lower temperature at preselected times
- LCD displays set point and system mode continuously; time and room temperature alternately
- 2-hour manual program override
- "Hold" key provides indefinite program override
- Remote sensing capabilities up to 200 ft. (Remote sensors sold separately below). 3-Conductor wire not included
- EMR™ (Energy Management Recovery) automatically calculates when to begin raising or lowering the temperature in order to reach programmed temperature at preset time (optional on No. 1N178)
- No. 4E662 has automatic system changeover only; Nos. 4E661 and 1N178 offer optional automatic or manual system change-over (installer adjusted)
- No. 1N178 has an "A" terminal energized during the occupied mode for fresh air damper control
- No subbase required

**Note: These controls are designed for use where both the "hot" and "common" sides of the 24VAC are supplied to the thermostat**

**ELECTRICAL RATINGS: 20-30VAC; 0.01 to 1.5 amps (normal load), 0.01 to 2.5 amps (total combined load)**

**DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER**

**Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.**

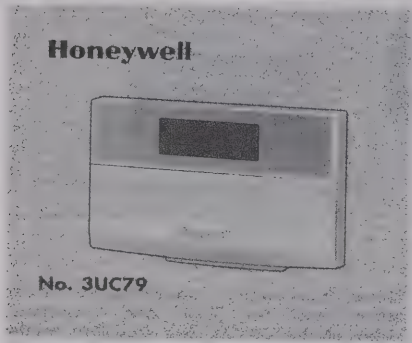
## REMOTE SENSORS FOR SELECTED WHITE-RODGERS THERMOSTATS



Nos. 4E726 and 4DG57

For use in applications where it is desirable to locate sensing device in an area remote from the thermostat. Can be located up to 200 ft. from the thermostat. For indoor use only. 18 gauge, 3-conductor thermostat. Use with thermostat Nos. 4E171, 4E172, 4E660, 4E661, 4E662, 4E663, 1N178, 1N179, 3TZ52, 3TZ54, and 4E949. Cable not included. Measures 4½W x 2¾H x 1½"D.

# PROGRAMMABLE COMMERCIAL THERMOSTATS, ELECTRONIC THERMOSTATS & SENSORS

## PROGRAMMABLE COMMERCIAL THERMOSTATS

No. 3UC79

**Application:** Used to control 24VAC multi-stage commercial single zone heating, ventilating and air conditioning equipment.

- 7-day flexible programming with 2 occupied/unoccupied periods per day
- Installer self-test mode simplifies troubleshooting
- Individual heat and cool setpoints available for each period
- Proportional plus integral (P+I) control eliminates temperature fluctuation
- Convenient override allows temporary setpoint changes
- Intelligent Recovery® algorithm automatically optimizes start time depending on building load
- Reversing valve operation configurable in heat pump models
- Automatic changeover from heat/coo
- Locking setpoint prevents tampering
- Three hour override

**OUTPUT RELAY CONTACT RATINGS AT 30 VAC**

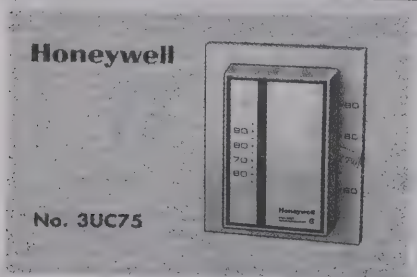
## ELECTRONIC RETURN AIR TEMPERATURE SENSOR

No. 3UC74



**Application:** Use to sense return air temperature. For use with thermostats above.

- Senses air temperature and sends modulating resistance signal to electronic transmitter or electronic sequencer
- Calculates setpoint at electronic transmitter or sequencer
- Includes mounting bracket and screws to mount to return air stream
- Requires continuous fan

### ELECTRONIC RETURN AIR TEMPERATURE SENSOR ORDERING DATA

| Temperature Sensor | Operating Temperature Range (°F) | Standard Insertion, (In.) | Sensor Resistance in ohms nominal at 75°F | Honeywell Model | Stock No. | List | Each | Shpg Wt. |

## ONEYWELL UNIVERSAL GUARDS FEATURE:

- Protect virtually any thermostat including Honeywell, White-Rodgers, and Robertshaw
- Nos. 4E646, 4E648 and 4E651 can also be mounted on exposed J-box; includes mounting hardware
- Patented double wall design provides vents in the base to allow for optimal thermostat performance while second inner wall prevents most tampering
- Include solid wallplate, ring base, and two keys; units of the same model are keyed alike
- Mounts horizontally or vertically

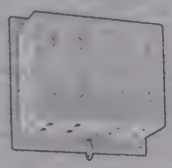
## WHITE-RODGERS UNIVERSAL GUARDS
## EATURE:



- Protect virtually any thermostat including Honeywell, White-Rodgers, and Robertshaw
- All solid base guards can be mounted on an exposed J-box; includes mounting hardware
- Tamper-resistant design and reliability
- Includes 2 keys; all White-Rodgers thermostat guards are keyed alike
- Mount vertically or horizontally

# TEMPERATURE CONTROLLERS AND ACCESSORIES

## ELECTRONIC TEMPERATURE CONTROLLERS

- **Remote sensor may be located 1000 ft. from controller with 18 AWG wire**
- **Adjustable setpoint and differential temperatures**
- **One well sensor, No. 4E147, included**

**Nos. 4E058 and 3GC93.** Single stage controllers can be used in refrigeration, air conditioning, heating and process control applications. Dimensions are 5⅝H x 4⅞W x 2⅜"D.

**Nos. 4E222 and 3GC94.** Two-stage controllers can be used in energy management, 2-stage heat, 2-stage cool, or single stage heat/single stage cool. Auto changeover. Dimensions are 5⅝H x 4⅞W x 1⅜"D. UL Listed. CSA Certified (LR62974).

# ELECTRONIC TEMPERATURE CONTROLLERS

**plication:** Used to provide on/off, modulating or reset control in applications where ectronic accuracy and remote sensing is desired. Uses include On/Off control for fans, otors and heaters, outdoor reset control of heating and cooling systems. Honeywell and.

- **Electronic control accuracy**
- **Linear platinum temperature sensor included**
- **Keypad allows precise temperature selection; easy on-finger programming**
- **Heating and cooling stages independently programmable**
- **LCD display for mode and sensed temperature**
- **Adjustable temperature range and differential**
- **Remote sensing up to 1000 ft. (Use 3UC75)**
- **±1°F temperature accuracy**
- **No. 3UC83 includes NEMA 4X enclosure**

Honeywell

# ELECTRIC HEAT & LINE VOLTAGE THERMOSTATS

No. 4CZ52

Honeywell

No. 4CZ53

## DUAL-DIAPHRAGM ELECTRIC HEAT THERMOSTAT

- **For replacement and upgrade applications**
- **Unique dual diaphragm technology for precise, accurate temperature control**
- **Sensitive to 2°F temperature changes**

**Provides precise line voltage** control of resistive-rated electric heating equipment. Controls both fan-forced and baseboard electric heaters. Rugged, thermoplastic mounting base. Contoured, Euro-white cover. Honeywell brand.

## ELECTRONIC ELECTRIC HEAT THERMOSTAT

- **High performance and accuracy with 1°F temperature sensitivity and 5 to 7 cycles per hour**
- **Patented CoolSwitch™ technology reduces wear on contacts and provides longer themostat life**
- **2 wires (no need to pull a third wire for installation)**
- **Mounts directly on 2 x 4 outlet box**

Electronic non-programmable thermostat provides precise, accurate control of resistive-rated electric heating equipment. For high-end new construction or upgrades. LED indicator light on cover. White contoured design. Honeywell brand.

## CHRONOTHERM® PROGRAMMABLE LINE VOLTAGE THERMOSTAT

Honeywell

No. 5M209

Application: Used to provide line voltage electronic programmable temperature control of resistance-rated electric heating equipment, such as baseboards and fan-forced heaters.

- **Patented CoolSwitch™ electronic switch provides long life and reliable performance**
- **Easy to program using keys on the front cover**
- **Directly replaces any two-wire (spst), 240 Vac resistive-rated (up to 2500 watts) line voltage electrochemical or electronic thermostat**
- **User-selectable options for Time-of-day format (am/pm or 24 hour) and temperature scale (F/C)**
- **Conforms to NEMA Standard DC3 for scale accuracy**
- **Developed with assistance from the Electric Power Research Institute (EPRI), representing the electric power industry of the U.S.**

### CHRONOTHERM® LINE VOLTAGE THERMOSTAT SPECIFICATIONS

## PORTABLE HEATER THERMOSTAT

JOHNSON CONTROLS PEAK

Columbus Electric

No. 2E535

**APPLICATIONS:** Fan-forced gas and oil-fired space heaters

**FEATURES:**

- **6 ft. HSJ cord with piggyback plug**
- **Suspension chain/wire hanger**
- **Positive Off on No. 2E535**
- **No. 2E535 has gray finish and stainless steel sensing element**
- **No. 2E817, black finish**
- **3°F Differential**
- **No. 2E817 is UL Listed and CSA Certified**

**MOUNTING:** Wall or suspension

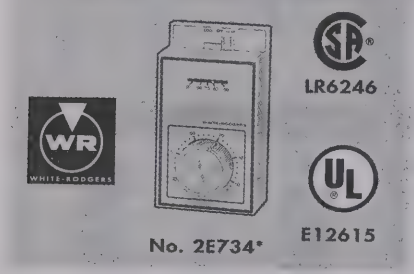
# LINE VOLTAGE THERMOSTATS

## HONEYWELL LIGHT-DUTY THERMOSTAT

**APPLICATIONS:** Fan coil units, motor starters, valves, contactors, and circulator motors in heating and cooling applications.

**FEATURES:**



- **Locking cover setting lever**
- **Adjustable range stops**
- **55-95°F thermometer**
- **Silver bronze color, brushed gold faceplate**
- **UL Listed (E4436)**

**MOUNTING:** Standard 2 x 4" vertical box.

## WHITE-RODGERS LIGHT AND HEAVY-DUTY THERMOSTATS

**APPLICATIONS:**

**No. 2E347.** For use with unit heaters, heating fan coil unit, hot water circulators.

**No. 2E734 and 3TZ43.** For use with fan motors, circulator motors, contactors, motor starter, and valves.

**FEATURES:**

- **Two dial stops for locking dial settin or limiting temperature range**
- **Large, easy-to-adjust knob**
- **Beige case with aluminum faceplate**
- **UL Listed (E12615); CSA Certified (LR6246)**

**MOUNTING:** Standard 2 x 4" vertical box.

## WHITE-RODGERS HEAVY-DUTY THERMOSTATS

**APPLICATIONS:**

**Nos. 2E369 and 2E477.** Unit heaters and fan coil units.

**No. 2E997.** Heating or cooling control

**FEATURES:**

- **Nos. 2E369 and 2E997 have set point dial and manual On position**
- **No. 2E477 has concealed temperature dial with locking case**
- **2°F differential on Nos. 2E369 and 2E477. 3°F differential on No. 2E997**
- **Dustproof enclosures**
- **Hydraulic element**
- **Gray finish**
- **UL Listed (E29357)**

**MOUNTING:** Standard 2 x 4" vertical box o flush to wall.

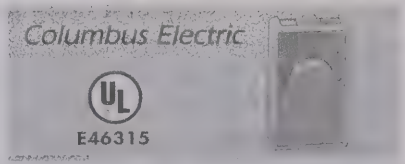
# LINE VOLTAGE AND FAN COIL THERMOSTATS

## ATTIC FAN THERMOSTAT



**APPLICATIONS:** Attic ventilators, fans, and dampers

**FEATURES:**

- **Heavy-duty snap action switch**
- **Ivory color case**
- **Columbus Electric brand**

**MOUNTING:** Standard 2 x 4" vertical box

**ELECTRICAL DATA:** 3/4 HP @ 115VAC; 1½ HP @ 230VAC, 13.8 Amp Inductive.

## HAZARDOUS LOCATION THERMOSTAT

**APPLICATIONS:** For controlling heating systems in explosive environments; Class I, Group D and Class II, Groups E, F, and G locations.

**FEATURES:**

- **7/32" thick cast aluminum housing**
- **Coiled hydraulic sensing element**
- **1/2" female pipe thread in bottom of case**
- **White-Rodgers brand (2A20-2)**

**MOUNTING:** Flush

## FAN COIL THERMOSTATS

**APPLICATIONS:** Provide thermostatic control of one or two line voltage valve(s) in automatic change-over (2E858 only) heating-cooling fan coil unit systems

**FEATURES:**

- **3-speed (High-Med-Low) manual fan control**
- **No. 1N172 includes thermometer**
- **Off position breaks both heating and cooling circuits**

**MOUNTING:** Standard 4 x 4" vertical box; No. 1N172 also mounts on two-gang outlet box

## MULTIPURPOSE THERMOSTAT

**APPLICATIONS:** Unit heaters, fan coils, unitary coolers, and refrigeration equipment

**FEATURES:**

- **3-way setup: external knob over full range; external knob over restricted range; and internal adjustment (removable external adjustment knob)**
- **Includes faceplate for horizontal mounting.**
- **Thermometer**
- **Hydraulic sensing element**
- **Johnson Controls/Penn brand (T26T-3E)**

- **Open on rise, fail-safe switch**
- **Insertion-type element**

**Five-foot capillary tube allows switch mechanism to be mounted** remotely from sensing bulb. Unit can be used as a high limit or low limit operating control on hot water or other system media non-corrosive to copper.

**Fail-safe switch opens control** circuit if remote bulb loses charge. Supplied with 1/2" NPT male threaded packing nut for direct insertion in liquid temperature control applications. Set point range adjustable 140 to 240F. differential adjustable 10-35f. Full-load contact ratings: 8A @ 120 VAC. 6A @ 240VAC. 4.8 @ 25VAC, 0.25A @ 0.25 to 12 VDC. CSA Certified. 3½ H x 3W x 2¼"D. Gray enamel finish. White-Rodgers brand (11C06-401).

**No. 2E375.** Shpg. wt. 1.4 lbs. List .....$151.52
Each .....**$76.60**

## REMOTE BULB OUTDOOR THERMOSTATS

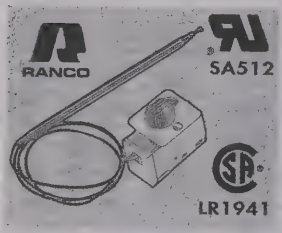
LR6246

E12615

No. 2E552

- **Open-on-rise switch action**

**Used with heat pumps to turn on auxiliary strip heaters** during very cold weather, and also to control resistance and fan-forced heaters used to prevent freezing such as in well houses and boat houses. "Lockout" keeps heaters off during mild weather.



**Features open-on-rise switch action,** self-contained mounting bracket, and calibrated temperature dial. 1½W x 3½ L x 2½"H. 48" capillary length. 3¾" x 3/8" bulb size and 6" lead length. 0 to 50°F temperature range and fixed 6°F differential. CSA Certified.

**No. 2E552.** Remote bulb thermostat with plastic temperature dial. White-Rodgers brand (2B61-186). Shpg. wt. 0.6 lbs.
List $56.06. Each .....**$30.7**

**No. 2E998.** Remote bulb thermostat with metal slide indicator. White-Rodgers brand (2B61-430). Shpg. wt. 0.5 lbs.
List $47.39 Each .....**$26.6**

| Heaters | | | Motor Inductive | | | |

## HEAT/COOL CONTROL

SA512

LR1941

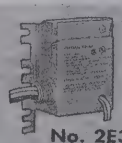
**Single stage control** for packaged terminal, room and thru-the-wall heat/cool units. Control replaces many OEM controls on heat/cool units. SPDT switch. 60 to 98°F temperature range. 3/4" dial shaft. 3°F differential. 36" capillary with 3/8 x 9" bulb sensing element. Includes dial plate and knob. Ranco brand (C12-5010).

**No. 4E912.** Heat/Cool Control.
Shpg. wt. 1.0 lbs. List.....$90.00.
Each .....**$40.70**

| Voltage | Contacts |
|---|---|
| 240V<br>277V | 25 Amps<br>16 Amps |

## TWO-STAGE HEAT/COOL CONTROL

SA512



LR1941

**This control replaces** many OEM controls on two-stage cooling and heat/cool units. Two SPDT switches are staged with a 3.5°F deadband. 71 to 101°F cooling temperature range; 64 to 94°F heating temperature range. 26" capillary with 3/8 x 8⁹⁄₁₆" bulb sensing element. Ranco brand (C17-100).

**No. 4E919.** Two-Stage Heat/Cool Control Shpg. wt. 1.0 lbs.
List $127.98. Each .....**$56.70**

## LEVEL TEMPERATURE CONTROL

No. 2E346

E12615

LR6246

**Provides silent operation** and narrow differential control for heating or cooling installations for use with a 2-wire, 24 volt thermostat. UL Listed (E12615).

- **Conduit hub or screw mounting**
- **Universal break-off tabs**

**SWITCH ACTION:** SPST normally open (NO)
**AVERAGE TIME DELAY:** 45 Seconds
**LEAD LENGTH:** 18"
**AMBIENT TEMPERATURE RANGE:** -20 to 140°F

| Input Voltage | Resistive 240VAC | Contact Rating Inductive Full Load 240VAC | Locked Rotor | Dimensions (In.) H | W | D | White-Rodgers Model | Stock No. | List | Each | Shpg. Wt. |

## UNIVERSAL SERVICE REFRIGERATOR CONTROL

Works with old or new refrigerators to provide temporary cold control when an exact replacement is not available. Has two suction cups, SPST switch rated 20A @ 120V AC, and 12" leads for quick-connect terminals. Air Coil Sensing. Dial range: 27 to 53°F. Differential: 6°F. Ranco brand (US1-1000).

**No. 4E913.** Shpg. wt. 1.0 lbs. List.....$56.88.
Each.....**$34.80**

# HEAT PUMP DE-ICE CONTROL

- SPDT switch action
- 30, 45, or 90 minute timer control for de-icing of heat pump outdoor coils
- UL Recognized (SA512); CSA Certified (LR32079)
- Interlock prevents more than one de-ice cycle per time period
- Interlock requires temperature of 28°F or lower at initiation to start

Function of de-ice control is to remove frost and ice from outdoor coils of central or window unit heat pumps. Features frequency selection of de-ice cycle and field adjustment of termination temperature. Ranco brand.

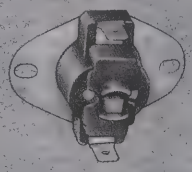
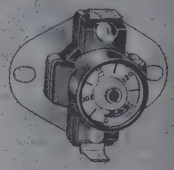
# SNAP DISC CONTROLS



No. 2E245



No. 2E365

E19279 LR10281

No. 2E362

No. 4E116

**Fixed or adjustable temperature ranges.** SPST single-circuit type for fan/blower control and high limit safety, SPDT 2-circuit type for universal use such as controlling 2-speed blowers, high limit alarms, etc. SPST limit controls available in automatic and manual push-button reset models. See specifications below. Fast, positive snap-action of bimetal disc assures precise control at a times. Mounting holes, 1⅝" O.C., match standard ¾" snap dis controls. 1½H x 1¾W x 1"D. UL Recognized Componer (E19279). CSA Certified (LR10281). White-Rodgers brand.

## SWITCHING RELAYS

- **Semi-enclosed**
- **Two pole double throw control**
- **2⅛ x 1⅞x2¼"**
- **40° to 130° F**
- **Stevco brand**

For general purpose. Relays for use in vending machines, appliances, fan controls, heating, and air conditioning applications.

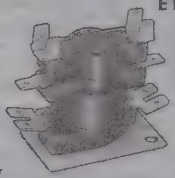
# ELECTRIC FAN/HEAT ELEMENT SEQUENCERS

rovide automatic On-Off time delay quencing of fans or heating elements.



- 24V input control
- Ambient temperature: -40 to 165°F
- Multipoise mounting
- Double quick-connect terminals for combination loads
- Normally open switch
- UL Recognized (E19279)
- CSA Certified (LR62037)
- White-Rodgers brand

LR62037

E19279

Nos. 2E603, 2E604

Nos. 2E605, 2E606

# ELECTRIC HEAT ELEMENT SEQUENCERS

No. 2E377

E12615

Provide highly versatile circuitry on electric furnaces, duct heaters, heat pumps, auxiliary heaters and other heating equipment.

- 24VAC input
- Ambient temperature: -20 to 165°F
- Multipoise mounting
- Double quick-connect terminals
- UL Recognized (E12615)

## FAN AND LIMIT CONTROLS

- **Single element-type for applications with narrow space limitations. Regulates fan or blower operation and acts as high limit safety control**
- **Manual fan switch to override fan setpoint and keep fan running continuously**
- **Limit setpoint is adjustable up to "Stop"; factory shipped at 200°F**
- **Nos. 2E518 and 2E519 have rigid mounting bracket, allowing installer to vary element to fit application**

## FLUSH MOUNT AND INSERTION-TYPE CONTROLS

**Control blower operation or provide high limit protection for warm air furnace**

**Nos. 2E370 and 2E371: For use where space is limited**

- **Bimetal sensing element in air stream gives quick response**
- **Fan control has adjustable range with direct reading temperature dial**
- **Limit control has adjustable cut-out setting**

**Nos. 2E148, 2E368, 2E147, and 2E367:**

- **Adjustable differentials remain constant through entire range of control**
- **Limit control has "universal" contacts handling millivolts to 240VAC**
- **Limit control equipped with adjustable stop to limit setting;**

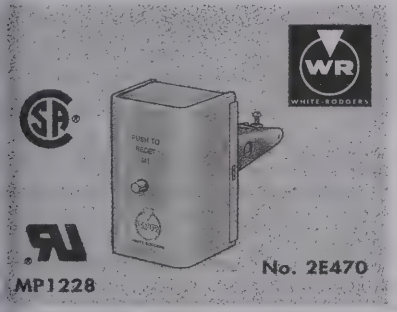
# LIMIT CONTROLS AND DUCT MOUNTED SMOKE DETECTORS

## MANUAL RESET LIMIT CONTROL



- **Trip-free reset lever prevents contacts from being blocked in closed position**
- **Unit conforms to Section 172, National Board of Fire Underwriters Pamphlet No. 90A**
- **Replaces most similar controls**
- **Adjustable dial stop**

**MAXIMUM ELEMENT TEMPERATURE:** 300°F

**CONTACT RATING:** 16A @ 120VAC, 8A @ 240VAC inductive and 16A @ 120-277VAC non-inductive

**PILOT DUTY RATING:** 125VA @ 24-600VAC

| Temp. Range (°F) | Element Length (In.) | Switch Action | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **25 - 215** | 9 21/64 | SPST—Open on rise | **2E383** | $121.92 | **$55.55** | 2.0 |

## MANUAL RESET FIRESTAT/LIMIT CONTROL

- **Noncycling manual reset-type; once the contacts open, they remain open until the reset button is pushed**
- **Designed to break a line voltage (or low voltage) circuit if air temperature at element location ever reaches its predetermined cut-out setting**
- **May be used as a firestat to protect against fire hazards in air conditioning and ventilation systems by shutting off the blower if circulated air reaches a temperature indicative of fire**

| Cut-Out Temperature | Element Length (In.) | Switch Action | Motor Rating (Full Load) 120V / 240V | White-Rodgers Model | Stock No. | List | Each | Shpg. Wt. |

## DUCT MOUNTED SMOKE DETECTOR

Designed for early detection of smoke and particles of combustion present in air conditioning or ventilation ducts.

- **Ionization-type detector**
- **Provides contacts for direct fan control and capability for remote communication or alarm panel operation**
- **MEA #427-91-E Approved for New York City**

**OPERATING VOLTAGE:** 240VAC/120VAC/24VAC/24VDC

**AIR DUCT VELOCITY:** 300 to 4000 ft. per minute

### SAMPLING TUBES FOR SMOKE DETECTOR

# GAS PRESSURE REGULATORS

MAXITROL

**No. 3UP33**
**Lever Acting Regulator**

**No. 3UP35**
**Poppet-Type Regulator**

**No. 3UP36 Straight-Thru-Flow Regulator**

**No. 3UP32**
**Balanced-Valve Regulator**

**NOTE: All Maxitrol appliance regulators should be installed and operated in accordance with Maxitrol's "Safety Warning" Bulletin (included with product).**

These Maxitrol gas pressure regulators are for use with natural, manufactured, mixed, LP, or LP gas-air mixtures. For residential, commercial, and industrial applications. Housings are corrosion-resistant aluminum alloy. Some models include optional use automatic vent limiting device (ball check permits free inhalation for fast regulator-diaphragm response on opening cycle, but limits gas escapement to allowable ANSI limits should a diaphragm rupture). To insure fast response of the regulator when equipped with a ball check type automatic vent limiting device, regulators must be mounted in upright position (see installation instructions). No. 3UP35 has integral vent limiting orifice. External venting must be in accordance with government and plumbing codes and regulations.

**Nos. 4E224, 4E225, and 3UP33 Lever Acting Gas Regulators.** Used to reduce intermediate pressure (up to 10 PSI) to a level usable by standard low pressure controls (4-12" WC). For main burner and pilot load applications requiring positive dead-end lock-up (reduced pressure maintained under static conditions when no gas is flowing to downstream controls) and precise regulating control from full flow down to pilot flow. Nos. 4E224 and 4E225 include optional automatic vent limiting device. (Max. 5 PSI Nat, 2 PSI LP, with automatic vent limiting device.)

**These regulators provide no downstream over-pressure protection in the event of failure. They should not be used if the appliance controls downstream will not safely contain gas when exposed to supply pressure.**

**For use on commercial ranges,** baking ovens, commercial water heaters, boilers, unit heaters, steam generators, and furnaces. May be used as single stage regulator reducing pounds pressure to normal burning pressure, or as first stage (line) regulator of 2-stage systems on equipment already fitted with an appliance regulator; i.e., 2 PSIG house piping systems. AGA and CGA Design Certified.

**Nos. 4E226 and 3UP35 Poppet-Type Regulators.** For burner and pilo load applications where precise control of tiny flows is an essen tial operating requirement. **Range of regulation:** Main burner an pilot No. 4E226 @ 250 CFH, No. 3UP35 @ 90 CFH; individual loa - No. 4E226 @ 160 CFH; No. 3UP35 @ 40 CFH. AGA and CG Certified for 1/2 PSIG rated pressure under the ANSI standard fo gas pressure regulators. No. 3UP35 includes integral vent limitin orifice. No. 4E226 includes optional automatic vent limitin device.

**Nos. 4E227 and 3UP36 Straight-Thru-Flow Regulators.** For main burn er only applications not requiring a lock-up type regulato Should NOT be used as a line regulator ahead of low pressur controls. For gas-fired appliances and equipment used on lo pressure gas supply. Under static conditions when no gas is flow ing, outlet pressure will rise to the line pressure. This conic straight-thru-flow design permits gas to flow straight through th regulator without changing directions, unlike other design Frictional flow resistance is reduced, resulting in greater capac ty. Improved flow pattern provides sensitive regulation extremely low pressure differentials. May be used with all fue gases, and air or other non-corrosive gases within its pressur limits. AGA and CGA Certified for 1/2 PSIG rated pressure unde ANSI standard for gas pressure regulators. No. 4E227 include optional automatic vent limiting device.

**Nos. 3UP32 and 3UP34 Balanced Valve Regulators.** For main burne and pilot applications. Balanced valve design virtually eliminate inlet pressure effect acting on the valve. No. 3UP32 - regulatin stability is improved and hunting tendencies reduced. Precis regulation over a broad range of pressures and flow rates. Fo gas-fired boilers, steam generators, industrial furnaces, oven and similar high-demand equipment. No. 3UP34 - relatively sma size regulator body with greater capacity characteristics. Ideall suited for infra-red heaters, and pilot lines of large industri heaters and boilers.

# GAS WATER HEATER CONTROLS

No. 2E704

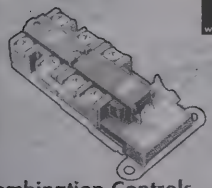
No. 2E705

No. 4E121

No. 4E122

- For replacement of standard gas water heater controls
- Automatic shutoff of main and pilot gas in the event of pilot failure
- 4E121 has special style pointer knob for limited clearance applications
- Temperature adjustment
- Manifold pressure tap
- Built-in energy cut-off, noncycling high limit switch

PIPE SIZE: Inlet 1/2" NPT. Outlet 1/2" inverted flare



PILOT CONNECTION: 1/4" Compression fitting

MOUNTING: 3/4" NPT

# ELECTRIC WATER HEATER THERMOSTATS AND LIMIT CONTROLS

Combination Controls
Nos. 2E679, 2E680

Limit Control
No. 2E104

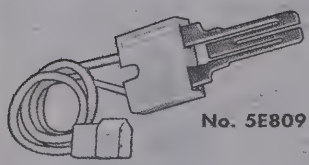
Thermostats
Nos. 2E050, 2E051

**No. 2E104 Electric Water Heater Limit Control.** Features DPST open on rise switch. Manual reset.

**No. 2E050 Electric Water Heater Thermostat.** Features SPST control.

**No. 2E051 Electric Water Heater Thermostat.** Features SPDT control. Terminal 1 is common and on temperature rise, it opens circuit 1 & 2, and closes circuits 1 & 4.

**No. 2E679 Combination Control.** Factory assembled combination of No. 2E104 limit control and No. 2E050 thermostat.



**No. 2E680 Combination Control.** Factory assembled combination of No. 2E104 limit control and No. 2E051 thermostat.

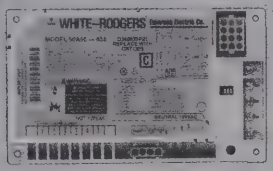
## HARNESS CONNECTOR

For hot surface ignition systems. Harness connects 5E809-5E813 ignitors to 4E95 4E956 ignition modules (p. 3343). Wire (18 ga.) and connectors are rated at 105°( Features 24" control lead length. White-Rodgers brand (F115-0100).

**No. 4E946.** Shpg. wt. 0.3 lbs. List.....$11.2
Each.....**$9.7**



## FLAME SENSOR

- **For hot surface ignition systems**
- **Can be mounted remotely on multiple burner or adjacent to ignitor on other applications**
- **Designed to detect presence of flame**
- **Alumina ceramic insulator**
- **High temperature Kanthal flame rod material can withstand 1800°F**
- **Probe length is 3"**
- **Teflon insulated (250°C rating) lead wire**
- **30" lead length**
- **1/4" female spade terminal**
- **AGA Design Certified and CGA Certified.**

**No. 4E957.** Flame Sensor. White-Rodgers brand. (760-401). Shpg. wt. 0.1 lbs. List $47.49. Each.....**$32.**

## INTEGRATED FURNACE CONTROLS

These modules are automatic gas interrupted ignition controls, employing a microprocessor to continually monitor, analyze, and control the proper operation of the gas burner, inducer, and fan. Signals interpreted during continual surveillance of the thermostat, and flame sensing element initiate automatic ignition of the burner, sensing of the flame, and system shutoff during normal operation. The control incorporates system fault analysis for quick gas flow shutoff, coupled with automatic ignition retry upon sensing a fault correction. White-Rodgers brand.

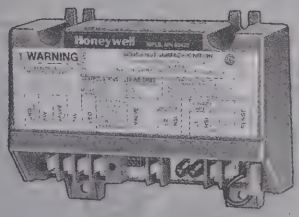
**INPUT VOLTAGE: 25VAC 50/60Hz**

**MAX. INPUT CURRENT @ 25VAC: 0.35 amp**

**RELAY LOAD RATINGS:**

**VALVE RELAY: 1.5 amp @ 25VAC 50/60Hz 0.6 pf**

**IGNITOR RELAY: 6.0 amp @ 120VAC 50/60Hz resistive**



**OPERATING TEMPERATURE RANGE: -40 to 175°F**

**HUMIDITY RANGE: 5% to 93% relative humidity (non-condensing)**

### ORDERING DATA

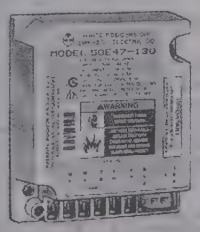
## UNIVERSAL HOT SURFACE IGNITION MODULE



- **Replaces more than 100 HSI modules, including Honeywell, White-Rodgers, and Robertshaw**
- **Can be used on both single-rod and dual-rod hot surface ignition systems**
- **LED signals system lockout, weak flame signal or another internal error**
- **Selectable number of ignition trial (1 or 3), and selectable length of trial for ignition (4 or 7 seconds)**

Provides operating control of a direct ignition system using a 120VAC hot surface ignitor. **NOTE:** For use ONLY in 60 Hz systems. Honeywell brand.

### ORDERING DATA

| System Use | Ignitor Voltage | Igniter Warm-up Time (Sec.) | Pre-purge Time (Sec.) | Honeywell Model | Stock No. | List | Each | Shpg. Wt. |

# GAS BURNER CONTROLS

## HONEYWELL COMBINATION & COMBINATION DUAL GAS VALVES

No. 4E095

No. 1D278

No. 2E791

No. 4E098

- Valves may be mounted 0 to 90° in any direction from upright position of gas control
- Gas control knob, wiring connections, pressure regulator, gas pilot adjustments, and thermocouple connection are a on top of control for easy access

COMBINATION DUAL VALVES

- Solenoid-operated valve opens and closes on thermostat call for heat. Diaphragm-operated valve opens under control of regulator; closes if gas or power supply is interrupted

ALL VALVES:
REGULATOR SETTING: Natural gas, 3.5" WC
AMBIENT OPERATING RANGE: 32-175°F; Nos. 4E190 and 4E770, 0-175°F
MAXIMUM PRESSURE RANGE: 1/2 PSI
PILOT GAS CONNECTION: 1/4" compression fitting furnishe
PRESSURE TAP: 1/8" NPT
REGULATOR ADJUSTMENT: 2.0 to 5.0" WC

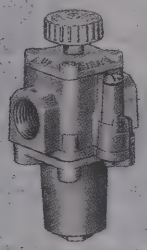
## SINGLE FUNCTION MAIN GAS VALVE

No. 2E380

- Relay operated diaphragm valve with side taps
- Valve may be mounted in any position except upside down
- Natural or LP gas applications
- LP applications require a 100% shut off system
- AGA Certified; CGA Certified



MAXIMUM PRESSURE RATING: 1/2 PSI (14"WC)

AMBIENT OPERATING RANGE: -40 to 175°F (-40 to 79°C)

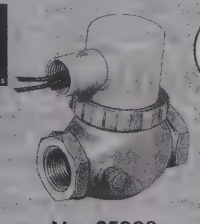
| Coil Voltage | Inlet/Outlet Size (In.) | Capacity (BtuH) | Side Taps | White-Rodgers Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 250-750 mV | 1/2 x 1/2 | 250,000 | No | 36C21U-206 | **2E380** | $172.88 | **$92.10** | 2.2 |

## GAS PILOT SAFETY VALVE

MP1323

No. 2E374

- Gas cock safety valve is a nonregulated, safe light, in-line appliance control with 100% shutoff
- For use with approved natural or LP gas; vented systems only
- May be mounted horizontally, vertically, and 90° from horizontal
- Valve has optional pilot filter, adjusted pilot pressure and manual shutoff
- 100 PSI Protection
- AGA and CGA Certified
- Valve has pilot and thermocouple connections



REGULATOR ADJUSTMENT RANGE: non-regulated

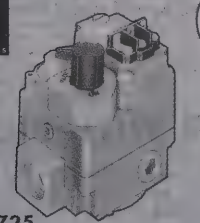
SWING RADIUS: 2.5"

AMBIENT OPERATING RANGE: 32 to 175°F

| Coil Voltage | Inlet/Outlet Size (In.) | Capacity (BtuH) | Electrical Connection | White-Rodgers Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 20 to 30 mV | 1/2 x 1/2 | 142,000 | Thermocouple | 764-742 | **2E374** | $79.12 | **$53.20** | 0.9 |

## SOLENOID VALVES

No. 2E228



- For use on all types of gas burners, natural and LP
- Resilient-mounted coil, sound deadening cover, compression spring closing, and soft seat construction give positive performance with the least possible noise
- AGA, CGA, and CSA Certified
- Normally closed

MAXIMUM PRESSURE RATING: 1/2 PSI (14" WC)

AMBIENT OPERATING RANGE: -40 to 125°F (-40 to 51°C)

| Coil Voltage | Inlet/Outlet Size (In.) | Capacity (BthH) | Gas Type | White-Rodgers Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 24VAC | 1/2 x 1/2 | 329,000 | Nat. & LP | 2509-254 | **2E228** | $153.89 | **$93.90** | 1.6 |
| 24VAC | 3/4 x 3/4 | 451,000 | Nat. & LP | 2509-256 | **2E229** | 168.96 | **101.95** | 2.0 |

## COMBINATION GAS VALVES

No. 2E725

- Valves may be mounted in any position except upside down
- Both main valve seat and line-interrupter seal with line pressure, assuring positive gas seal off
- Gas control knob, pilot adjustment screw, regulator adjustment, and thermocouple connection are located on top of control for easy access
- AGA and CGA Design Certified

REGULATOR SETTING: Natural gas, 3.5" WC; LP gas, 11.0" WC

AMBIENT OPERATING RANGE: -40 to 175°F

MAXIMUM PRESSURE RATING: 1/2 PSI (14.0" WC)

PILOT GAS CONNECTION: 1/4" compression fitting furnished

PRESSURE TAP: 1/8" NPT

REGULATOR ADJUSTMENT RANGE: 2.5 to 5.0" WC

| Coil Voltage | Inlet/ Outlet Size (In.) | Capacity (BtuH) | Gas Type | Side Taps | Inlet Pressure Tap | White-Rodgers Model | Stock No. | List | Each | Shpg. Wt. |

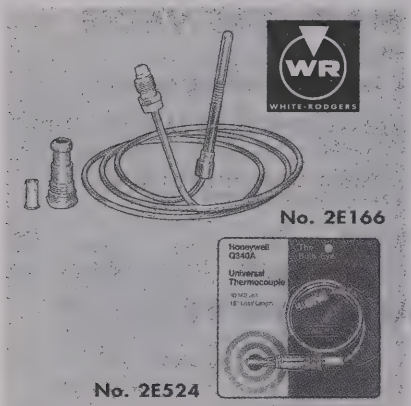
**ushing Kit** for No. 2E725 or 2E854 gas valve. Includes 1/2 x 3/8" nd 3/4 x 1/2" reducer bushings.

**o. 2E730.** Shpg. wt. 0.1 lbs. List $6.89. Each ..... $5.33



**LP Adapter Kit†.** Use to convert No. 2E725, 2E401, 2E402, or 2E854 valve from natural gas to LP gas applications.

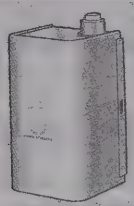
**No. 2E731.** Shpg. wt. 0.1 lbs. List $2.79. Each ..... $1.36

† When using No. 2E731, an external regulator must be in the gas line ahead of the valve and properly set for LP (11-14.0" WC).

# GAS BURNER CONTROLS

## REPLACEMENT THERMOCOUPLES

- For any standing pilot system
- Stainless steel tip construction



**For 30 millivolt systems.** Come with adapters that fit virtually any pilot and provide positive "on target" positioning. Long-life stainless steel tip construction. Instructions included.

**Nos. 2E166, 2E140-2E142 & 2E337.** Stainless steel tip. Each thermocouple is individually packed with universal adapter fittings included. White-Rodgers brand.

**Nos. 2E720, 2E524, 2E721 & 2E525.** Stainless steel outer jacket, heavy 0.108" inner element. Universal adapter. In bubble pack. Honeywell brand.

| Length (In.) | Brand | Stock No. | List | Each | Shpg. Wt. |

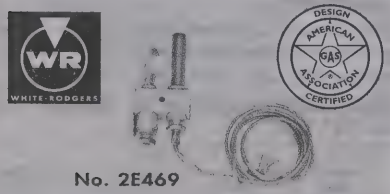
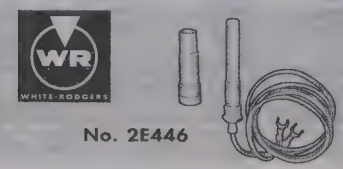
## AUTOMATIC GAS PILOT RE-LIGHTER



- For all natural or propane gas-fired standing pilot systems
- Use with most gas heaters, furnaces, dryers, ovens and water heaters which incorporate a safety shutdown device
- Instantly senses pilot outage and provides constant electrical spark until pilot re-ignites—before safety shutdown occurs
- Unit consists of sensor/electrode element and control circuitry housed in fire retardant ABS plastic case
- Standard thermocouple mounting hardware included
- No changes to existing equipment necessary
- UL Recognized (MH17328)

**Note:** Control is for use with standing pilot systems only. Any other use voids warranty and may create unsafe conditions. Fenwal brand (05-379000-250).

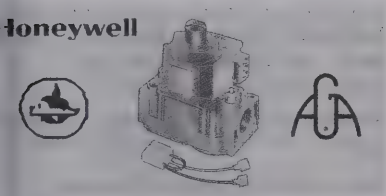
| Electrical Ratings | Electrode Lead (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 24/120VAC, 50/60 Hz, 25mA | 24 L | 2E338 | $91.23 | $40.95 | 0.5 |



## 750 MILLIVOLT GENERATOR WITH PILOT

- Provides power for 750 millivolt self-generation control systems
- For natural gas only
- For replacement of similar screw-in type generators
- Has 32" long armored cable leads with spade terminals
- Use with millivolt thermostat No. 4E033 and gas valves Nos. 2E380, 2E401 or 2E854
- Replaceable generator cartridge
- AGA Certified
- White-Rodgers brand (G01A432)

**No. 2E469.** Shpg. wt. 0.2 lbs. List $69.8
Each ..... $38.4

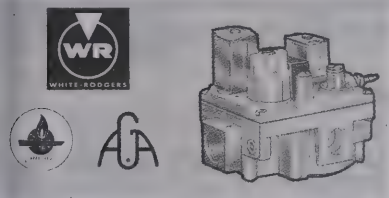


## 750mV POWER GENERATOR CARTRIDGE

- Replacement power cartridge for 750 millivolt self-generating heating control systems
- Screw-in type adapter
- 36" Armored cable leads with spade terminals
- White-Rodgers brand (G01A332)

**No. 2E446.** Shpg. wt. 0.2 lbs. List $53.4
Each ..... $31.0

## UNIVERSAL ELECTRONIC IGNITION GAS VALVE



- **Replaces more than 100 standard-opening IP, HSI or DSI valves**
- **415,000 BtuH max. reg., N.G.**
- **Uses 2 simple adapters to convert between IP and HSI/DSI applications**

Universal electronic ignition combination gas control for use with direct spark ignition, hot surface ignition or intermittent pilot ignition in 24VAC, gas-fired appliances, with capacities from 30 to 415 cfh. Includes manual valve, two automatic operators, pressure regulator, pilot adjustment, pilot plug, and ignition adapter. For use with natural or manufactured gas or LP gas. Includes converter kit to adapt from natural to LP gas. All adjustments and wiring connections accessible from top of control. Honeywell brand.

| Coil Voltage | Inlet-Outlet Size (In.) | A.G.A Cert. Capacity cfh | A.G.A Cert. Capacity $m^3/r$ | Gas Type | Pressure Regulator | Includes | Honeywell Model | Stock No. | List | Each | Shpg. Wt. |

## REDUNDANT GAS VALVES

Compact multifunction valves are designed to meet requirements for use with all types of intermittent ignition systems. All valve adjustments and features are located on top surface of control for easy accessibility. Valves may be mounted horizontal, vertical, and 90° from horizontal. Include pilot filter, adjustable pilot pressure, and manual shut-off valve. AGA and CGA Design Certified. White-Rodgers brand.

## IGNITER SENSORS AND PILOT BURNERS

[A] Igniter Sensors. Nonprimary-aerated combination pilot burner and igniter. Used with ignition modules in intermittent pilot systems on page 3348. Honeywell brand.

[B] Pilot Burners. Nonprimary-aerated, insert orifice-type pilot burner for main burner ignition. Provide main burner ignition for natural and LP gas-fired equipment. Used with Honeywell Q340A (30 mv) thermocouple to provide automatic pilot safety control or with Honeywell Q313A (750 mv) thermopile in a self-powered system. Each pilot burner is shipped with .018" orifice for natural gas; also contains .010" orifice (unassembled) for LP gas. Honeywell brand.

# GAS PILOT SYSTEMS

## HONEYWELL INTERMITTENT PILOT GAS IGNITION SYSTEM

- For converting conventional standing pilot systems to intermittent pilot systems
- Each kit includes: intermittent pilot module, dual combination valve, ignition cable, wiring harness, and misc. installation hardware
- Requires ignitor-sensor, see page 3347

REGULATOR SETTING: Natural gas, 3.5" WC; LP gas, 11" WC

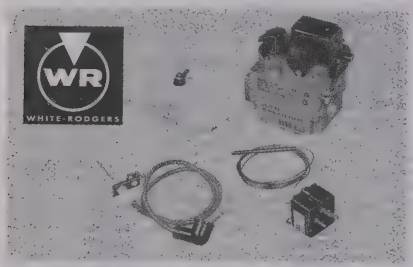
AMBIENT OPERATING RANGE: 32-175°F

MAXIMUM PRESSURE RANGE: 1/2 PSI

PILOT GAS CONNECTION: 1/4"

PRESSURE TAP: 1/8" NPT

REGULATOR ADJUSTMENT RANGE Natural, 3.0 to 5.0" WC; LP, 8.0 to 12 WC



MAX LOCKOUT TIME: 90 seconds

SHUTOFF: 100%

# GAS PILOT SYSTEM AND REPLACEMENT MOTORS

## SMARTVALVE™ SYSTEM

**Honeywell**

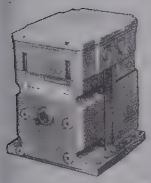
No. 3UC66

**Application:** Combines gas flow and electric intermittent pilot sequencing functions into a single unit.

- **Use in natural gas applications such as furnaces, rooftop furnaces, boilers, infrared heaters, space heaters and commercial cooking units**
- **Replaces Honeywell models SV9500M2603, SV9500M2645, SV9500M2674, and SV9500M2682**
- **American Gas Association and Canadian Gas Association design certified**

**IMPORTANT:** System is for direct replacement of only OEM installed controls. Do not attempt to apply this control except as a direct replacement for the specific Honeywell models listed at left.

**SMARTVALVE™ SYSTEM SPECIFICATIONS**



| Type of Gas | Inlet/Outlet Size (In.) | Pressure Regulator Setting in In.-WC | Type of Opening |
|---|---|---|---|
| Natural | 1/2 x 1/2 | 3.5 | Standard |

### SMARTVALVE™ ORDERING DATA

## MODUTROL IV™ MOTORS

**Honeywell**

Nos. 3UC17 & 3UC18

E4436 LR1620

No. 3UC19

**Application:** 3-Wire, reversing, SPDT proportional motors used to operate dampers and valves.

- **Electric drive circuit**
- **Drive up to 6 Modutrol™ motors**
- **No. 3UC19 contains integral helical springs to return motor shafts to normal position (full closed) on power interruption**
- **Adapter bracket included to match the height of MOD III motors**

**MODUTROL IV™ MOTORS SPECIFICATIONS**

| Stock No. | Ambient Temp. Range (°F) | Voltage (50/60Hz) | Power (W) | Norm. Running Torque (Lb.-In.) | Crankshaft (In.) | Timing (Seconds) | Stroke (Degrees) |

## MODUTROL IV MOTOR ACCESSORIES

**No. 4E391 Internal Transformer.** Converts Modutrol IV motors from low voltage to line voltage. Features multitap primary. 120/208/240VAC, 50/60 Hz, internally mounts in Modutrol IV motors. Honeywell brand (198162AA).

**No. 4E391.** Shpg. wt. 1.8 lbs. List ..... $119.09.
Each ..... **$48.05**

**No. 4E392 Internal Auxiliary Switch.** Controls equipment as a function of motor shaft position. Can be installed in any Tradeline Modutrol IV motor. Features 1 SPDT switch with selectable differentials of one or ten degrees. Electrical ratings 7.2/3.6 FLA (full load amps), 43.2/21.6 locked rotor amps at 120/240VAC. Honeywell brand (220736A).

**No. 4E392.** Shpg. wt. 0.3 lbs. List ..... $136.60.
Each ..... **$56.00**

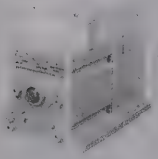
**No. 1D298 Internal Auxiliary Switch.** Controls equipment as a function of motor shaft position. Can be installed in any Tradeline Modutrol IV motor. Features 2 SPDT switches with selectable differentials of one to four degrees. Electrical ratings, 7.2/3.6 FLA. 43.2/21.6 locked rotor amps at 120/240VAC. Honeywell brand (220736B).

**No. 1D298.** Shpg. wt. 0.2 lbs. List ..... $224.03.
Each ..... **$101.10**

**No. 1D281 Super Tradeline Damper Linkage for Internal or External Mounting.** Contains ball joints, motor crank arm, and damper arm for 1/2" diameter shaft. Honeywell brand (Q605D1069).

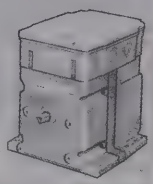
**No. 1D281.** Shpg. wt. 1.0 lbs. List ..... $188.28.
Each ..... **$79.40**

**No. 1D283 Tradeline Valve Linkage.** For Modutrol IV motors and Honeywell valves with 3/4" stem travel and 1⅜" bonnet diameter. Adjustable stem forces of 80 or 160 lbs. Honeywell brand (Q500D, 1000).



**No. 1D283.** Shpg. wt. 7.7 lbs. List ..... $243.91.
Each ..... **$97.80**

**No. 1D282** Tradeline Valve Linkage. For Modutrol IV motors and Honeywell valves with 3/4" stem travel and 1C\," bonnet diameter. Adjustable stem forces of 160 or 320 lbs.



**No. 1D282.** Shpg. wt. 7.8 lbs. List ..... $243.91.
Each ..... **$97.80**

## MODUTROL MOTORS

**No. 4E388.** Two-position, spring-return motor used to operate dampers and valves. Integral helical spring returns motor shaft to fully closed position on power interruption.

**Nos. 4E389 and 4E390** are for use with Honeywell Series 90 controllers. Electronic drive circuit positions motor between fully open and fully closed according to demand of controller.

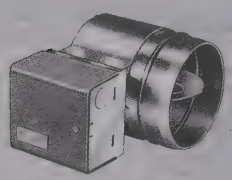
**No. 4E389.** Reversing, proportional spring return motor used to operate dampers and valves. Integral helical spring returns motor shaft to fully closed position on power interruption.

**No. 4E390 and 1D290** have reversing, proportional motor for operating dampers and valves.

**Nos. 4E388, 4E389, 4E390, and 1D29**

- **Double-ended crankshaft: 3/8"**
- **Ambient Temperature Rating: -40 to 140°F**
- **Timing: 30 to 60 seconds**
- **Stroke: 90 to 160 degrees**

**No. 2E976.** Spring-return motor for tw position zone or damper controls. Sprir returns motor to start position on pow failure. Internal SPDT switch for contro ling auxiliary equipment, addition motors, or a burner interlock switch.



**No. 2E976:**

- **Crankshaft: 3/8" double-ended**
- **Ambient temperature: 32-125°F**
- **Timing: 30 seconds**
- **Stroke: 75 degrees**

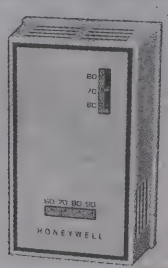
No. 1H807

## AUTOMATIC VENT DAMPER

- **Reduce heat loss by closing off the vent between heating cycles**
- **Use only on atmospheric-type, gas-fired furnaces and boilers equipped with drafthoods**
- **Direct spark ignition, intermittent pilot, or standing pilot control systems must have dual automatic valve combination gas control**
- **Interlock switch for safe operation**
- **Burner will fire only with damper in open position**
- **Prewire plug-in receptacle for use with Honeywell S8610F1008, Y861003003, and Penn Baso G60 or G66**



**CLOSING TIME: 20 seconds, nominal**

**POWER CONSUMPTION: 5W**

**HEAT ANTICIPATOR SETTING: 0.2 amps**

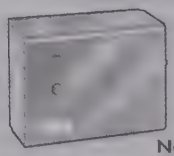
# OIL BURNER PRIMARY CONTROLS

## OIL PRIMARIES AND COMBINATION CONTROLS

Honeywell



Nos. 2E864, 4E291

No. 2E521

LR95329-1

MP268

No. 2E865

**All models feature a** Protector relay unit which cycles burner on demand of thermostat and shuts down burner on loss of flame or system malfunction. All models except No. 2E521 feature a solid state flame sensing circuit which utilizes a cadmium sulfide sensor cell (not included). No. 2E521 employs helical bimetal to sense flame presence. Units feature intermittent ignition and external safety switch reset button. Honeywell brand.

**No. 2E864. Box-Mount Oil Primary Control with Remote Alarm Function.** L.E.D. for lockout indication. Manual safety lever on safety switch assures burner shutdown during servicing. Capable of remote lockout indication power. UL Listed (MP268); CSA Certified (LR95329).

**No. 4E291. Box or Burner Housing-Mount Oil Primary Control.** Used with a 24VAC thermostat. This unit has integral transformer which powers low voltage control circuit. Features manual trip safety switch lever and lockout indicator light on terminal strip. Exposed terminal strip with screw terminal for low voltage connections.

**No. 2E521. Stack-Mount Oil Primary Control.** Features a Pyrostat flame detector which senses temperature changes of flue gases. Manual trip safety switch and element length adjustable 3½" x 5½". UL Listed (MH11564); CSA Certified (LR95329).

**No. 2E865. Horizontal-Mount Combination Primary/Hydronic Control.** Combines oil primary control with high limit, low limit, and circulator control. 1½" insulation and 3/4" NPT spud. Includes well adapter and heat conductive compound. UL Listed (MP268); CSA Certified (LR95329).

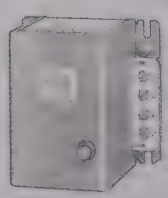
### REPLACEMENT CADMIUM SULFIDE SENSOR CELL

For use with Nos. 2E864, 2E865, and 4E291 above. Plugs into existing mounting bracket. Sealed in glass to guard against moisture contamination. 140°F maximum ambient. Honeywell brand (130367).

**No. 2E523.** Shpg. wt. 0.1 lbs. List $28.56. Each.....$15.66

### CADMIUM SULFIDE FLAME SENSING DEVICE

For use with Honeywell Protector relay controls (sold above). Includes cadmium sulfide sensor cell, mounting bracket and 60 inch lead wire assembly. Honeywell brand (C554A1463).



**No. 1D294.** Shpg. wt. 0.2. List $24.61. Each.....$15.99

## OIL PRIMARIES

**Fast-responding oil burner primary controls** have solid state control circuit. No. 2E341 can be used with 2-wire or 3-wire low voltage or line voltage thermostats. Nos. 2E727 and 2E343 use 2-wire thermostats only. Unit automatically opens electrical circuit of the thermostat, motor, or ignition transformer in event of flame or ignition failure. 45 second timing. No. 2E341 has safety switch indicator light. Ruggedly constructed with "high ambient" motor relay. Components not affected by vibration, high-temperatures, or fluctuating motor loads.

**Order flame detector separately.**

**Mounts on standard 4 x 4"** conduit box. External low voltage terminals. 120VAC, 60 Hz. 0.4A thermostat current. 10A full load motor rating. 3A ignition transformer rating. 4¼H x 4¼W x 2¾"D. UL Recognized Component (MP1323). CSA Certified (LR6246).

### FLAME DETECTOR ASSEMBLY

**For use with Nos. 2E341, 2E343, and 2E727.** Includes cadmium sulfide sensor cell, socket, and mounting bracket assembly with 48" lead wires. White-Rodgers brand (956-1).

**No. 2E360.** Shpg. wt. 0.1. List $30.43. Each.....$16.13

# OIL BURNERS, TRANSFORMERS & PUMPS

## BLUE ANGEL PLUS™ HIGH EFFICIENCY OIL BURNERS

- **Uses #1 and #2 fuel oil only**
- **Fully assembled**

**The Blue Angel Plus** has a complete firing range from 0.5 GPH (70,000 Btu/hr.) to 3.00 GPH (420,000 Btu/hr.) **without changing any parts except the nozzle.** Burners have 0.75 GPH nozzle and primary control factory installed. Not for use with waste oil.

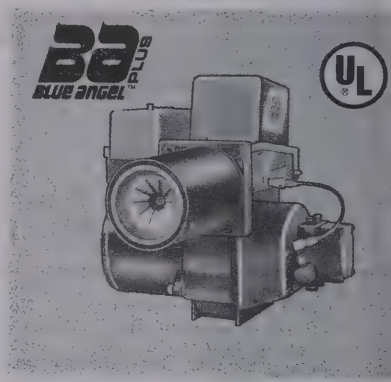
**Flame-lock flame retention head** keeps flame uniform. Prevents smoke and soot build-up. Prepositioned and factory installed.

**Motor.** Meets NEMA standard. Split phase, 3450 RPM, 115V, 60 Hz.

**Fuel pump.** Compact, 3450 RPM, standard single stage.

**"High static pressure firing",** forced air at the point of flame ignition, results in more efficient oil combustion and heat generation.

**Components.** Utilizes state-of-the-art components for ease of installation, simplified serviceability, and outstanding performance.



**Ignition.** 10,000V constant duty transformer.

**Air-cone.** Precision machined, cast iron construction. Requires no changes for entire firing range.

**Fan housing.** Aluminum alloy, die cast housing maintains alignment of all moving parts for lifetime of burner.

**UL Listed (MP98).** 12½H x 12⅞W x 7¾"D. Center line of tube to floor: 7". Adjustable mounting flange included.

**Replacement Parts Available**
**1-800-323-0620**
™

**BLUE ANGEL PLUS™**
**3-YEAR LIMITED WARRANTY**
Text of warranty available on request. See "Manufacturers Warranties" on page opposite inside back cover.

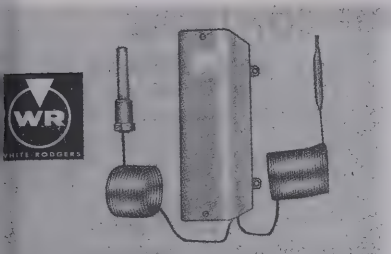
## OIL BURNER PUMPS

SUNTEC industries incorporated

- **Two-stage gearsets (No. 4E249)**
- **Can be mounted in any position except No. 4E249 which cannot be mounted upside down**
- **Clockwise rotation facing shaft**
- **Suitable for No. 2, No. 1 fuel oil or kerosene**
- **Suntec brand**

**Nos. 4E247 and 4E248 Single-Stage Pumps.** Feature single pipe installations to 6" Hg vacuum, two-pipe installations to 12" Hg vacuum, and lift or gravity feed applications with 10 PSI max inlet/return pressure, 3 GPH capacities, factory set 100 PSI.

**No. 4E249 Two-Stage Pump.** Used for gravity feed and high lift, long run applications. The first stage draws oil to the pump; the second stage pressurizes oil to the nozzle. Feature two pipe installations up to 17" Hg vacuum, lift or gravity feed applications with 10 PSI max inlet/return pressure, 3 GPH capacities, factory set 100 PSI.



- **Oil Burner Pumps draw oil from the tank and pressurize oil to nozzle**
- **Patented positive drive gear and shaft assembly**

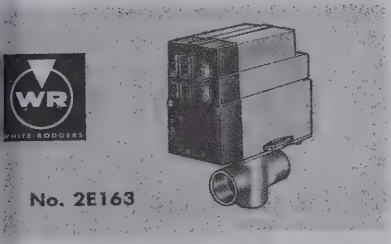
## INDOOR-OUTDOOR HOT WATER CONTROL

**Adjusts water temperature according to outdoor air temperature**

No. 2E398

**Used with conventional hot water heating systems to** correct system lag or overshoot when outdoor air temperature changes. Control increases or decreases frequency of burner operation to maintain proper balance between boiler temperature and outdoor temperature. Cuts fuel costs, provides closer temperature control.



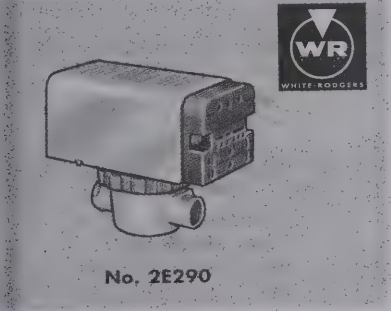
**Includes outdoor sensing bulb** with 30 ft. long capillary and indoor insertion bulb and well with 15 ft. long capillary. Insertion bulb well has 1/2 NPT thread and is 2⅞" long beyond thread.

**Adjustments provided for basic boiler temperature setting** and for heat loss of specific installation (reset ratio). Heavy-duty construction. **Control range:** 80-250°F. 10°F fixed differential. SPST open-on-rise switch rated inductive 14A @ 120VAC and 7A @ 240VAC. Case is 9H x 3½W x 4"D. White-Rodgers brand (1050-1).

**No. 2E398.** Shpg. wt. 5.8 lbs. List $405.85. Each ..... **$189.00**

## 24V HYDRONIC ZONE VALVES

**Quiet operation**



No. 2E163

**Self-aligning barrel-type valve system** uses line pressure to seal off without binding on opening and closing. Visible automatic recycling manual operator. Use with 3-wire thermostat, No. 2E165 or equivalent. Opens or closes in 45 sec. Max. water temp., 240°F; max. system pressure, 50 PSI; operating differential, 15 PSI across valve. 24V 0.40 amp. Auxiliary contacts rated 2 amps at 24 VAC. 4⅝W x 5⅞H x 2¾"D. White-Rodgers brand.

| Tubing Size | Max. Press. Diff. Across Valve | Cv | White-Rodgers Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **3/4"** | 15 PSI | 23.5 | 1311-102 | **2E163** | $172.34 | **$74.40** | 3.1 |

## COMPACT 24V HYDRONIC ZONE VALVES

**No "swing clearance" needed for installation**

No. 2E290

**These adjustable-flow valves are highly suited for baseboard units,** fan coils, convectors, etc. Unique design requires no "swing clearance" for installation. Sweat fittings and push-in type wiring simplify installation. Flow indicator dial simplifies system balancing. Special spring-loaded disc and seat construction assures seal-off. Non-synchronous torque motor operates valve: on command of a 2-wire thermostat, valves open. Open time, 30 sec.; close time, 20 sec. 150 PSI max. pressure, 40 to 250°F temp. range. Non-recycling manual operator provided. Both sizes have auxiliary switch circuit to control burner/chiller and/or circulator. Snap-off cover allows access to all components without removing valve body for convenient servicing. Operator rated 0.35A at 25VAC.

| Tubing Size | Body Length | Max. Press. Diff. Across Valve | Cv | White-Rodgers Model | Stock No. | List | Each | Shpg. Wt. |

## MOTORIZED 24V HYDRONIC ZONE VALVES

**Honeywell**

**Installs without disassembling valve. Opens or closes in 15 seconds**

MH1639

LR95329-1

No. 2E789

**Provides two-position straight through control of supply water** for baseboard radiation, convectors, fan coil units and zone systems. Sweat fit design enables installation without disassembling valve. Manual opener for operation upon power failure. Valve returns to automatic position when power is restored. Rotating ball plug for leakproof sealing and longer life. Easy access assembly allows servicing without removal from the line. Integral auxiliary end switch permits sequencing of auxiliary equipment. High torque, constant speed motor operates valve on command of a 2-wire thermostat. Opens or closes in 15 sec. **Max. water temp.:** 240°F (115.5°C). **Max. static pressure:** 125 PSI; max. pressure differential across valve: 20 PSI. 3½"L. Honeywell brand.

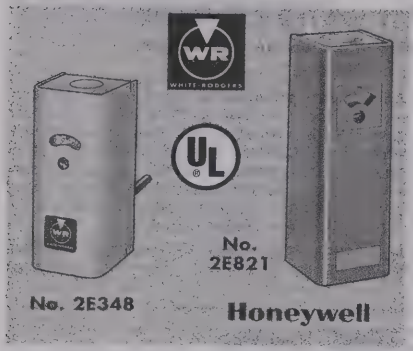
### REPLACEMENT POWERHEADS FOR HYDRONIC ZONE VALVES ABOVE



Complete powerhead may be replaced without breaking line connections or draining the system.

**No. 1D296. Replacement powerhead** for use with zone valve Nos. 2E870, 2E787, and 2E788. Honeywell brand (40003916-026). Shpg. wt. 1.0. List $94.27. Each ..... $66.35

**No. 1D295. Replacement powerhead** for use with zone valve Nos. 2E789 and 2E790. Honeywell brand (40003916-048). Shpg. wt. 1.0. List $102.17. Each ..... $71.30

# HOT WATER CONTROLS

## WELL IMMERSION CONTROLS

All units are for limiting or regulating temperature of liquids in boilers or tanks. Used as high limit, reverse action, or SPDT switching action. May be mounted horizontally or vertically.

### WHITE-RODGERS No. 2E348 SPST

Used as high limit operator control. Furnished with universal well adapter and tube of heat transfer compound to enable replacement without changing well on existing installation. UL Listed (MP2610). White-Rodgers brand (11C18-104).

### WHITE-RODGERS No. 2E146 SPDT

Provides SPDT switching for low limit and circulator control. Includes a 1/2" well adapter. UL Listed (MP2610). White-Rodgers brand (1131-128).

### HONEYWELL No. 2E821 SPDT

SPDT switching for high limit or low limit and circulator control. Includes 1/2" well adapter and tube of heat conductive compound. UL Listed; CSA Certified. Honeywell brand (L6006A1145).

## STRAP-ON HOT WATER CONTROLS

- **All models may be attached directly to surface of pipe**
- **No tapping of boiler or draining of system necessary**
- **Hydraulic action element can be mounted in any position; no leveling is necessary**

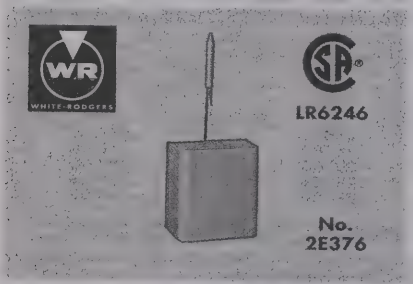
### WHITE-RODGERS No. 2E349 SPST

"Open on temperature rise" control. Can be used as high limit control. UL Listed. CSA Certified (LR6246).

### WHITE-RODGERS No. 2E350 SPST

"Close on temperature rise" control. Can be used as operating control to start circulator pump or fan. UL Listed and CSA Certified.

### WHITE-RODGERS No. 2E145 SPDT



"Open/close on temperature rise" control. Provides high limit, low limit and circulator control. UL Listed and CSA Certified.

### HONEYWELL No. 2E859 SPDT

"Open/close on temperature rise" control. Provides high limit, low limit and circulator control. UL Listed (MP466); CSA Certified (LR95329).

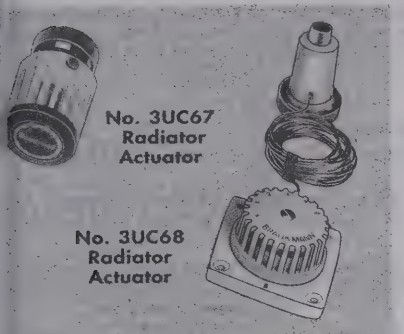
## TRIPLE ACTION IMMERSION CONTROL



Designed for used on domestic hot water systems with a tankless coil to provide high limit protection, low limit control, and circulator control. Also used on other systems to replace dual high limit-low limit, or dual high limit circulator controls. High limit switch opens control circuit if element bulb loses charge. Furnished with universal well adapter, vertical-to-horizontal well adapter and tube of heat transfer compound. Gray enamel case with knockouts for electrical connections. 3½H x 3¾W x 2¼"D. White-Rodgers brand (11C61-103). CSA Certified (LR6246)

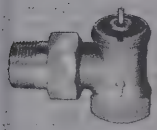
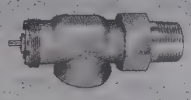
## HIGH CAPACITY THERMOSTATIC RADIATOR ACTUATORS AND VALVES

No. 3UC67 Radiator Actuator

No. 3UC68 Radiator Actuator



Honeywell



No. 3UC69 Radiator Actuator

No. 3UD02 Radiator Valve

No. 3UD05 Radiator Valve

No. 3UD08 Radiator Valve

**Application:** Used to provide precise and automatic control of room temperature in two-pipe systems by modulating the flow of hot water or steam through free-standing radiators, convectors and other heating units with high capacity requirements.

- **High capacity design prevents "too cool" complaints**
- **Continually monitor and adjust room temperature for consistent comfort and relief from underheating and overheating**
- **Tight shutoff on steam and hot water systems**
- **Valve seat disc is made of resilient material (EPDM)**
- **All working parts are replaceable while valve remains in service, in-line and under pressure (with a special tool; available at GPO)**
- **Meet ASHRAE Standard 102-1989**

## AIR VENTS

Honeywell

No. 3TZ95 Automatic Air Vent

No. 3TZ96 Industrial Air Vent

- **Built-in shutoff valve for servicing without system shutdown**
- **Built-in vacuum breaker**
- **Vent cap with leakage guard**
- **Removable float/valve assembly for easy servicing**
- **Internal parts made of corrosion-resistant and chemical-resistant materials for use with water systems containing propylene glycol, mineral oils or petroleum-based oils**

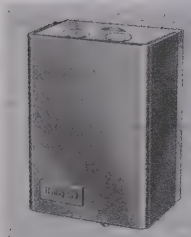
**Automatic Air Vent Applications, No. 3TZ95:**

Use to purge air trapped in closed hot or chilled water system

- **Body, cover, and float assembly made of thermoplastics**

**Industrial Air Vent Applications, No. 3TZ96:**

Use to purge air from high pressure mains and equipment in closed hot or chilled water systems



- **Brass shell construction**

# AQUASTAT RELAYS, EVAPORATIVE COOLING CONTROLS

## AQUASTAT® RELAYS

Honeywell

Vertical Mount No. 2E860

Horizontal Mount No. 2E861

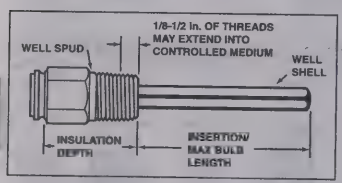
**Immersion-type controllers** for use in hydronic heating system which include domestic hot water service. Both units requir 24VAC thermostats with heat anticipation set at .2A.

**Insertion length:** 3⅜"

**Bulb size:** 3/8 x 2⅞"

**Maximum ambient temperature:** 150°F

**No. 2E860** combines high limit protection with low limit and ci culator control.



**No. 2E861** combines high limit protection with switching rela control of burner and circulator motors. High limit opens o burner circuit only.

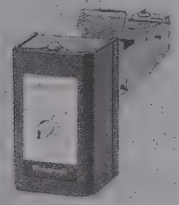
## EVAPORATIVE COOLING CONTROL

### For Pump Type Coolers (Not for use with Essick Coolers)



- System designed with fan delay (approximately 60 seconds) to pre-wet cooler pads before the fan starts
- Separate fan and pump relays
- High or low fan speed selection
- Raintight relay enclosure
- Relay panel is removable from enclosure to facilitate field wiring
- Transformer 120/240 to 24VAC, 60 Hz
- Control range 55 to 90°F, Off-Cool-Vent system with Hi-Lo fan switch

## MULTI-PURPOSE SPDT AIR SWITCH

More versatile than a sail switch and easier to install. Must be installed vertically. Widely used to control electronic air cleaners, humidifiers, refrigeration equipment and in many other applications where air flow must be proved. Can be activated by positive, negative or differential air pressure. Will not flutter or malfunction due to shock and vibration. Control range is field adjustable from 0.05" to 12"WC. Furnished with 1/4" OD tubing nuts, ferrules, and one 12" length of 1/4" OD flexible tubing. Operates in ambient temperatures of -40° to 180°F. SPDT switch rated 300VA pilot duty at 125-277VAC, 15A resistive at 125 to 277VAC, 1/4 HP at 125VAC, 1/2 HP at 250VAC, 490VA duty at 250VAC. Columbus Electric brand.

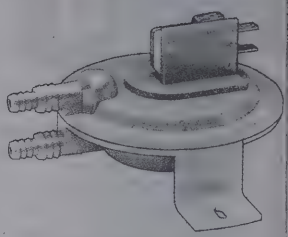
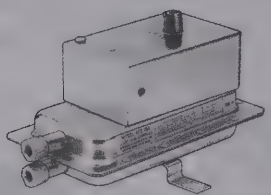
# AIR SENSING SWITCHES

A B



**General Purpose Air Switches Nos. 3ZM92 & 3ZM93**

D



**Pneumatic Sensing Switch No. 3ZM95**

E

**Air Sensing Switches with Field Adjustable Kits Nos. 3ZM96 & 3ZM97**

C

**Air Switch with Manual Reset No. 3ZM94**

**Air sensing switches** offer unlimited versatility for proving air flow or air pressure. Models feature adjustable set point ranges as low a .05" to 12.0" wc. Other features are compact size, wide operating temperature range, reliability, long life and proven ability to wit stand high shock and vibration conditions. Cleveland Controls brand.

A For general purpose, HVAC, and energy management applications. Senses positive, negative, or differential air pressure; or when extreme low temperature or pressure is a critical factor. Includes 6-in. poly tube and 2 slip-on 1/4-in. OD tubing adapters. UL Listed, CSA Certified, and FM Approved.

**ELECTRICAL RATING: 300VA pilot duty @ 115 to 277VAC, 15 amps non-inductive**

B Air sensing switch with gold contacts for HVAC, energy management, and direct digital control applications. Senses positive, negative, or differential air pressure. Includes 6-in. poly tube and 2 slip-on tubing adapters. UL Listed and CSA Certified.

**ELECTRICAL RATING: 300VA pilot duty @ 115 to 277VAC, 10MA @ 5VAC dry circuit applications**

C Air sensing switch with manual re-set feature. Senses positive, negative, or differential air pressure in HVAC and energy management applications which require operator interface. Includes 6-in. poly tube and 2 slip-on tubing adapters. UL Listed and CSA Certified.

**ELECTRICAL RATING: 15 amps, non-inductive to 277VAC**

D Pneumatic sensing switch with adjustable set point. Senses positive, negative, or differential air pressure. Applicable for HVAC and energy management applications where a pneumatic output signal for actuation is required or in an intrinsically safe environment when electrical arcing must be avoided.

**OUTPUT PRESSURE: Fan On and Air Flow—20 PSIG @ 0.15" WC or more Fan Off and Air Flow—1/4 PSIG @ 0.015"WC or less**

E Air sensing switches with fiel adjustable kits are designed for residenti and mid-efficiency furnaces as well a light commercial applications. May b used to sense positive, negative, or diffe ential air pressure. Barbed sample lin connectors. UL Listed and CSA Approved

**ELECTRICAL RATING: SPDT contact arrangement—5 amp non-inductive to 277VAC; 1 amp pilot duty @ 120VAC**

Inverted Bucket Steam Traps
No. 3ZT55

spirax sarco

Thermo-Dynamic Steam Traps
No. 3ZR91

Balance Pressure Thermostatic Steam Traps
No. 3ZT72

## FLOAT & THERMOSTATIC STEAM TRAPS

**Cast Iron Float & Thermostatic Steam Traps** discharge condensate at steam temperature continuously and modulate with the condensate load. They are recommended to drain low pressure steam mains, unit heaters, blast coils, heat exchangers, and all process applications requiring removal of condensate as quickly as it is formed. The condensate level is always above the main valve providing a positive water seal and preventing any steam leakage. The Spirax Sarco F&T traps range in pressure from 15 psig 200 psi with parrallel connections.

Air binding is impossible. These steam traps are equipped with separate thermostatic air vents which automatically and immediately remove all air and gases reaching the trap. The balanced pressure air vent self-adjusts to all operating pressures and its location above the condensate level assures discharge of all air and gases for best drainage and heat transfer. Spirax Sarco brand.

(*) Limited availability - Contact local branch.

## INVERTED BUCKET STEAM TRAPS

**Cast Iron "B" Series Inverted Bucket Steam Traps** have a powerful camlift mechanism for greater discharge of condensate with no increase in size of the body. Inlet and outlet NPT connections are on the same level for easy installation in horizontal lines and the mechanism is easily lifted out for inspection or repair. The stainless steel valve is resistant to corrosion and waterhammer. Stainless steel strainers are provided for added protection against dirt. These steam traps have a self-priming design of the condensate seal required to operate all inverted bucket steam traps. Spirax Sarco brand.

## THERMO-DYNAMIC STEAM TRAPS

**Steam Traps** are designed with a rugged simplicity providing efficiency and reliability unsurpassed in any steam trap of its type. This steam trap has only one moving part—a hardened stainless steel disc. Three balanced outlet ports assure parallel lift of the disc without tilting or rubbing. . . and eliminating the possibility of uneven or local wear. Seats are hardened stainless steel. Spirax Sarco brand.

Nos. 3ZR44 through 3ZR46 also feature a protective built-in strainer. Blowdown is unobstructed and steam flows from inside out through the screen.

## BALANCED PRESSURE THERMOSTATIC STEAM TRAPS

**The thermostatic operation adjusts automatically** to varying steam pressures and has excellent air venting characteristics. These air venting characteristics are essential to a quick and efficient start-up and also a smooth uninterrupted operation.

Feature built-in strainers. Resistant to waterhammer and freezing. These traps are designed to be serviced without removal from the piping for ease of maintenance. Spirax Sarco brand.

## 25-SERIES PILOT OPERATED PRESSURE REGULATORS

**25-Series Pressure Pilot.** For most economical operation, steam should be used at the lowest pressure that will satisfy the temperature requirement of the application. The 25P is a reliable, accurate regulator to reduce steam from a high pressure supply to its most efficient lower pressure and to protect expensive equipment from dangerously high pressures. Steam coils, jackets, steam chests, drums, conveyor screws—whatever the steam space may be—can be supplied through a 25P pressure reducing valve with steam of the pressure and temperature at which this equipment is designed to operate best. Interchangeable pressure pilot springs are available in three standard color coded pressure range springs to provide pressure from 3 to 250 psig. Spirax Sarco brand.

### PRESSURE PILOT SPECIFICATIONS & ORDERING DATA

## PIPELINE "Y" STRAINERS

**Strainers are a critical component** in any steam, liquid, or gas system. Designed to remove pipeline debris, such as rust and pipescale, strainers will protect components such as valves and pumps from possible damage, and help ensure that heat transfer surfaces are kept free from deposit build up. Spirax Sarco brand.

**Typical applications include:**

- **Steam systems to protect valves, pipeline components, and heat transfer equipment**
- **Liquid systems to protect pumps and valves**
- **Gas systems to protect filters and valve orifices**

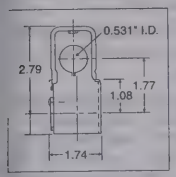
## VACUUM BREAKERS



**In a steam system,** vacuum formation will prevent efficient condensate removal and lead to possible equipment or system damamge and poor process control. In condensate return systems, vacuum formation leads to waterhammer and noise problems. This selection of vacuum breakers offers a simple and effective solution, allowing air to enter a system as vacuum forms, thus restoring the system balance. Spirax Sarco brand.

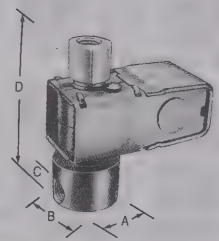
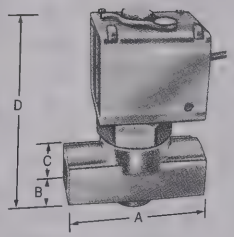
# SOLENOID VALVES

1 2-Way NC Round Body



2 2-Way NC Forged Body



CSA 3204

Dayton

UL MP3242

3 3-Way NC/NO and Universal, and 2-Way NO Round Body

4 2-Way NC Brass Body

**Shown with Coils—Order coils separately on page 3361**

## HOW TO SELECT A SOLENOID VALVE

1. **Choose appropriate valve type and pipe size**
2. **Select valve body material (e.g., brass) compatible with gas or fluid in system. See Chemical Resistance Chart in Terminology and Technical Data Section**
3. **Ensure that minimum and maximum Operating Pressure Differentials (OPD) are suitable for system conditions. Valves having OPD ranges beginning with zero (e.g., 0-300 PSI) are direct acting; that is, they will open and clos properly as long as line pressures are within that range.**

   **Other OPD ranges (e.g., 5-150 PSI) designate pilot-operat ed valves. These open and close properly only if pressure differential between inlet and outlet is within the OPD range. To assure consistent operation, discharge pressure must be allowed to bleed down after the valve has closed.**
4. **Dayton valves require a coil, sold separately on page 3361. ASCO valves come complete with 120 Volt coils.**

## DESCRIPTION

Solenoid valve bodies are of packless construction, provide shut off in systems controlling the flow of water, air, and steam. **No for use in explosive atmospheres.** Rated in accordance with stan dards sanctioned by the Fluid Control Institute, Inc. and the National Fluid Power Association (NFPA). Valves are spring loaded and can be mounted in any position. All units have 400 stainless steel plungers with 300 stainless steel enclosing tubes.

## SOLENOID TYPES AVAILABLE

**General Purpose Types** with Buna N discs and gaskets available in 2 or 3 way types, normally open or closed, with brass or stainless steel bodies.

**Low Pressure Steam Types** with ethylene propylene discs and gaskets available in 2 way, normally closed brass bodies.

**High Pressure Steam Types** with Teflon reinforced discs and ethylene propylene gaskets available in 2 way, normally closed brass bodies. Note: some leakage can be expected with both air and water.

**Note: Maximum suggested cycling rate is 10 times per minute.**

*) OPD—Operating Pressure Differential. (†) Coefficient of Volume: the amount of water in GPM at standard conditions (60°F specific gravity 1) which will pass through the valve with a one PSI pressure drop and the valve in the full open position. (‡) Flow rates based on maximum OPD at inlet and AC operation. (#) Adjustable meter

**) Do not exceed temperature limitations. (##) Flow rates based on 15 PSIG inlet pressure. (^) Minimum flow required for proper valve operation. ② These products are covered by California Proposition 65. California purchases or shipments, see first page of Grainger Branch Listings or call any California branch

# ASCO® RED-HAT® SOLENOID VALVES

Valves with the letter "G" or "H" in the ASCO model numbers (eg.: 8210G34) have coils completely encapsulated in a one-piece, molded epoxy enclosure with built-in 1/2" NPT conduit hubs with strain relief. Valves offer the following protection as standard:

NEMA Type 1—General Purpose

NEMA Type 2—Dripproof

NEMA Type 3, 3S, and 3R—Raintight, dust-tight and sleet (ice) resistant

NEMA Type 4—Watertight

NEMA Type 4X—Watertight, dusttight, corrosion resistant

Valves with letters other than "G" or "H" in the ASCO model number (eg.: 8210B20) have coils with metallic enclosures. These models offer NEMA Type 1 General Purpose protection only.

The prefix "EF" in the ASCO model number (eg.: EF8210G33) denotes that the valve offers NEMA Type 1, 2, 3, 3R, 3S, 4 and 4X protection plus:

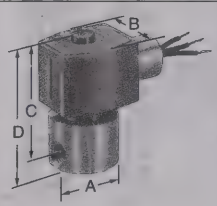
NEMA Type 6 and 6P—Submersible

NEMA Types 7 and 9—Hazardous Locatio (Class I, Division I, Groups A, B, C & D and Class I, Division II).

### HOW TO ORDER

Match all valve specifications to th process being controlled. Be certain th maximum operating pressure differentia is equal to or greater than the pressur against which the valve must operate.

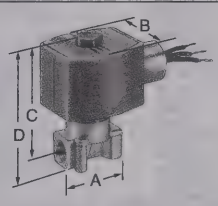
**For more solenoid valve ordering infor mation, see page 3280.**



## 2-WAY GENERAL PURPOSE VALVES

- **Brass or stainless steel body**
- **Coil included**
- **Maximum fluid temperature of 180°F**
- **120V, 60Hz (110V, 50Hz)**

2-Way Valves have one inlet and one outlet, and are used to control the on/off flow of fluids: air, inert gas, water, light oil, as listed. UL Listed and CSA Certified.



**Normally-Closed Valves** are closed when the coil is de-energized and open when energized. Construction Ref. Nos. 1-7 are FM Listed.

**Normally-Open Valves** are open when de-energized and closed when energized.

# SOLENOID VALVES

## 3-WAY QUICK EXHAUST VALVES

- **Brass body**
- **Coil included**
- **Maximum fluid temp. of 180°F**
- **120V, 60Hz (110V, 50Hz)**
- **UL Listed and CSA Certified**

These 3-way valves have three pipe connections and two orifices (when one is open, the other is closed, and vice versa). Used to externally pilot larger valves or valve actuators, and to operate single-actin cylinders. ASCO brand.

**Normally-Closed Valves** exhaust pressur when the solenoid is de-energized, appl pressure when energized.

**Normally-Open Valves** apply pressure whe the solenoid is de-energized, exhaust pres sure when energized.

**Universal Valves** have pressure at any port.

## 4-WAY VALVES

- **Brass body**
- **Coil included**
- **120V, 60Hz (110V, 50Hz)**
- **CSA Certified**
- **UL Listed (except Nos. 3UM15 & 3UM16)**

4-way, single solenoid valves are used to operat double-acting cylinders. Have 4 or 5 pipe connec tions: one pressure, two cylinder, and one or tw exhausts. They may be mounted in any position ASCO brand.

## ANGLE BODY PISTON VALVES, 2-WAY NORMALLY CLOSED

- **Bronze body**
- **Requires 120V, 60Hz pilot valve shown in the chart below**
- **Minimum 60 to maximum 150 PSI operating pressure**

Auxiliary-piloted, 2-way angle body piston valves are designed to handle water, light slurries, and steam. Interchangeable with quarter-turn ball valves. Feature an extra stable cold-rolled stainless steel shaft with oversized bearings, a spring-loaded stem seal and a Dupont® Viton shaft wiper. Tested to over a million cycles. Asco brand.

## COMBUSTION VALVES

- **Aluminum body**
- **Coil included**
- **120V, 60Hz (110V, 50Hz)**
- **Junction box included on 3UK39-3UK46**

All have 1/8" NPT downstream pipe taps to provide easy access for routine testing. Nos. 3UK39 thru 3UK46 have a built-in junction box. Series 8214 valves replace series 8215. Asco brand.

**Normally-Closed Shutoff Valves** for pilots and main fuel supplies. Shut down automatically in the event of a power interruption.

**Normally-Open Gas Vent Valves** for use in double block and vent gas burners.

# SPECIAL PURPOSE SOLENOID VALVES

## SLOW CLOSING VALVES, 2-WAY NORMALLY-CLOSED

- Brass body
- Coil Included
- Maximum fluid temperature of 180°F
- 120V, 60Hz (110V, 50Hz)

2-way valves are designed to protect against the water hammer problems experienced in many water and light oil applications. Unique slow closing construction reduces the pressure spike which causes water hammer to a level eliminating the need for suppressors or other controls. UL Listed and CSA Certified.

SUPPLIER DIVERSITY™ Women-Owned Business

### STANDARD CARTRIDGE HEATERS:

- **Corrosion resistant 304 stainless steel sheath with a 900°F max. temperature capability**
- **CSA Certified (LR25347)**

**Standard cartridge heaters** are designed for heating in a limited space. Ideal for insertion into dies, molds, and platens. Applications include packaging equipment, heat sealing equipment, laminating equipment, refrigeration, hot melt reservoirs or nozzles, and laboratory equipment.

### THUNDERBOLT CARTRIDGE HEATERS:

- **Corrosion resistant Incoloy sheath with a 1600°F max. sheath temperature capability**
- **Precision sheath diameter tolerance of +.000 - .004"**
- **UL Recognized construction (E60605)**

**Thunderbolt cartridge heaters** are designed to operate up to 5 times the watt density of standard cartridge heaters. Heaters are designed for concentrated heat in a limited space and - for close fit insertion. Application examples include plastic extruders, hot stamping, medical equipment, food processing, hot runner molds, and other plastics molding equipment.

# STEEL AND STAINLESS STEEL STRIP HEATERS

- Low profile
- 5/16Wx1/2"L slotted holes on each end
- 10-32 Screw
- UL Recognized (E60605)

Applications: Clamp on heat, dies, platens, vessels, tanks and heat transfer surfaces

Sheath temperature 750°F max. on 1010 carbon steel strips

Sheath temperature 1200°F max. on 304 stainless steel strips

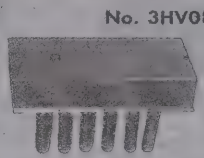
**THE RIGHT STUFF. RIGHT HERE. RIGHT NOW.**

**It's more than just a slogan with Grainger. More than 78,000 products, most in stock and available for same day shipping, are available with a call to your local branch. And when you need product selection assistance, count on our trained personnel for fast, accurate answers to your technical questions.**



# FINNED STRIP, TUBULAR, AND TUBULAR AIR DUCT HEATERS AND ENCLOSURE HEATERS

No. 3HM48

No. 3HK19

No. 3HV08

No. 3HK15

VULCAN ELECTRIC COMPANY

SUPPLIER DIVERSITY™

Women-Owned Business

## STAINLESS STEEL FINNED STRIP HEATERS

- Corrosion resistant, welded 304 stainless steel sheath with nickel plated steel fins. 1200°F max. sheath temperature capability
- 5/16W x 1/2"L slotted holes on each end for mounting. 10 - 32 screw and nut terminations 1⅜H x 2"W across fins
- UL Recognized construction (E60605)
- Ideal for forced air systems, heat pumps, tempering air in air conditioning systems, convection heating, incubators, drying ovens, and food warming

## FINNED TUBULAR HEATING ELEMENTS

- Rugged 1010 carbon steel sheath with high temperature corrosion resistant finish designed for sheath operating temperatures up to 800°F
- 3/4 - 16 threaded mounting fittings with hardware provide convenient installation method. 8-32 screw and nut termination is included for wiring hookup. 2" center-to-center mounting

## FINNED TUBULAR AIR DUCT HEATER

- Designed for new and existing air duct heating applications. Ideal for comfort heating and air process heating. Provides highly efficient heating. Pre-drilled flange mount for convenient assembly into duct. Sheet metal terminal housing for wiring hookup and safety protection

## FINNED TUBULAR REPLACEMENT HEATING ELEMENTS FOR VULCAN VFT DUCT HEATERS ABOVE

- 3/4 - 16 threaded mounting fittings for assembly into housing

## ENCLOSURE HEATERS

- Low profile 1⅜H x 2"W finned strip heater design with mounting brackets for installation
- These rugged heaters provide a reliable method for freeze and condensation protection in cabinets, control panels, and other enclosures
- UL recognized construction (E60605)

(*) Circular element configuration. This dimension equals diameter.

**All immersion heaters feature:**

- Copper sheath suitable for clean water and liquids non-corrosive to copper
- Incoloy sheath suitable for process water, mild corrosive solutions, and cleaning solvents
- 1010 Carbon steel suitable for oils, degreasing solvents heat transfer media and non-corrosive materials

**Automatic bushing heaters include:**

- Thermostatic control from 110 to 190°F
- Automatic reset low water cutoff protection

**Bottom outlet heaters feature:**

- Units feature a ring clamp style mounting design with a bronze flange for mounting in a 2⁷⁄₁₆" diameter hole
- Low profile copper tubular heating elements with high wattage output
- 4" metal housing protects the heater termination and provides a convenient method for wiring installation to the heater assembly. Single phase hookup.
- Normally used in steam tables and coffee urns.

**Bushing immersion heaters feature:**

- #8-32 screw and nut terminals
- Copper sheath element

**Over-the-side heaters feature:**

- Incoloy or steel element
- 3-phase hook-up
- Sludge legs elevate element off bottom of open container
- Moisture resistant terminal housing

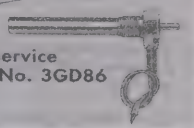
# THERMOSTATS AND ACCESSORIES

## CAL-STAT™ THERMOSTATS INCLUDE:

- Differential 1°F
- UL Recognition (E36322) on 1/2 and 5/8" diameter models
- CSA certification (LR 23541-4) on 5/8" diameter models
- -100° to +600°F

## CAL-STAT™ FOOD SERVICE THERMOSTATS INCLUDE:



- 304 Stainless steel
- -100°F to +600°F
- UL Recognized (E36322), CSA Certified (LR23541-4)
- For fryers and other food service equipment and replacement units

VULCAN ELECTRIC COMPANY

Women-Owned Business

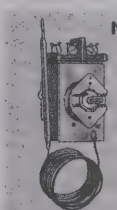
## BULB AND CAPILLARY STYLE THERMOSTATS

- Direct acting, open on temperature rise, double pole single throw switch action with positive off position
- Electrical ratings of 30 Amps at 120 - 277 VAC and 21 Amps at 480 VAC
- UL Recognized component (E12103)

## THERMOSTAT KNOBS



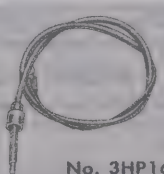
- Knobs for bulb and capillary style thermostats

## THERMOSTAT HOUSING

- Housing assembly for Nos. 3HL18, 3HL19, and 3HL20
- Mounting provisions and knockouts included

## ADJUSTABLE BAYONET STYLE THERMOCOUPLE PROBES

- Stainless steel probe tip, .187" diameter and 118° angled tip designed to fully contact drilled hole. Tip is 1/4" long. Maximum probe temperature of 900°F



No. 3HL18

# THERMOCOUPLE WIRE, PLUGS AND RECEPTACLES, PROBES AND BAYONET ADAPTERS

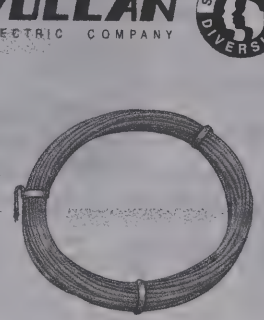
## INSULATED THERMOCOUPLE WIRE

- **Type "J" (Iron Constantan) and Type "K" (Chromel - Alumel) ANSI calibration options**
- **20-gauge stranded and solid wire options with several insulation options**
- **Convenient 100 Ft. spools**

Type "J" is suitable for oxidizing, reducing, inert, or vacuum atmospheres. Not recommended for sub-zero temperatures. Type "K" is suitable for oxidizing and reducing atmospheres and is not recommended for use in sulfurous, vacuum, or alternating oxidizing and reducing atmospheres. Both types are limited by the insulation material as noted in the table.

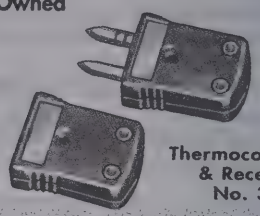
Thermocouples are used in a variety of temperature sensing applications including medical, packaging, molding, food service, and industrial processes.

## THERMOCOUPLE PLUGS AND RECEPTACLES



- **Type "J" (Iron - Constantan) and Type "K" (Chromel - Alumel) ANSI calibration options**
- **Rated for ambient service temperature of 375°F**
- **Plug and receptacles are color coded to sensor calibration type**
- **Connectors provide quick and accurate connection method for many temperature measurement applications**

## BAYONET ADAPTERS



- **Straight adapters for installation of bayonet style thermocouple assemblies**
- **Ideal for installation of bayonet style thermocouples in molding equipment, food processing equipment, and other industrial processes**

# SELF-REGULATING PIPE HEATING CABLES

Raychem HeatSystems™ Self-Regulating™ Heating Products

No. 6E896

No. 4E512

No. 4E516

- **Fast and easy to install**
- **Reliable self-regulating performance**
- **Cut-to-length convenience and economy**
- **Cables for plastic and metal pipes**
- **Cables for roof and gutter de-icing**
- **Needs no thermostat**
- **UL System Listed and CSA Certified**
- **Use for water pipe systems**
- **Raychem 2-Year Limited Warranty**

/interGard self-regulating heating cables in be overlapped and insulated without verheating or burning out. Automatically ljust heat output at each point along the pe without using thermostats. Three pes of cable to choose from (depending on application). Available in TruckPaks® **WARNING:** To minimize the danger of fire if the heating cable is damaged or improperly installed, use a ground fault protection device (GFPD).

**All pipe heating applications of WinterGard cables require the use of pipe insulation material (see page 3376).**

**WinterGard®:** 3-Watt cable used to prevent freezing of small metal piping up to 2" in diameter. 120V, self-regulating heating system with a tough metal braid, designed for dry locations such as: unheated attics, basements, garages, intake and drainlines, and water meters. Heat System™ brand by Raychem.

**WinterGard Plus™:** 6-Watt cable offered in 120V or 240V. Designed for more demanding residential/commercial applications with a tough metal braid for use on larger plastic or metal pipes with diameters up to 8". Must be used in dry environments similar to WinterGard cable. Heat System™ brand by Raychem.

**WinterGard Wet™:** 120V or 240V, 6-watt cable same as WinterGard Plus, but also has a protective, waterproof outer jacket suitable for wet applications such as downspouts, roof drains, or marine applications. Use on metal and plastic pipes up to 8" dia. in both dry and wet environments. In addition WinterGard Wet may be used for roof and gutter applications when used with clip accessory No. 4E523.

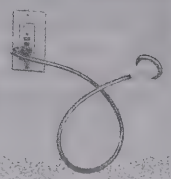
## GARDIAN® PIPE HEATING CABLES

No. 4MC04

**Keeps water pipes from freezing**

- **Suitable for plastic or metal pipes**
- **Waterproof**
- **No thermostat needed**



Energy efficient pipe heating cables are self-regualting and have low operating cost. Ideal for refigeration applications and short pipes. Prevent freeze up problems on freezer doors and in drain pan and drain lines. Long-lasting and reliable, these cables come in a variety of lengths. Come with prestripped 30" SJTW leads for easy connection and hardwiring. UL Listed, CSA Certified.

# PREASSEMBLED PIPE HEATING CABLES AND PIPE HEATING ACCESSORIES

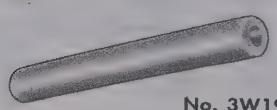
## GARDI❄N™

No. 4E528

- For small applications and short pipes
- For water pipe systems only
- Reliable self-regulating performance
- No assembly required
- Suitable for plastic or metal pipes
- Needs no thermostat
- UL Listed; CSA Certified

## PREASSEMBLED PLUG-CONNECTED PIPE HEATING CABLES

**These plug-connected 120VAC heaters** are available in 6, 12, 18, 24, 50 and 100 ft. lengths. 5W waterproof heaters (nominal power at 40°F on insulated metal pipe) come complete with 30" SJTW leads and grounded plugs.



Easy to install: Attach to pipe, insulate, and plug into a ground fault protected outlet per instructions supplied with heate For pipes up to 2½ inches in diameter. F larger diameter pipes or longer lengt see WinterGard cut-to-length self-regul ing heating cables on page 3375.

**Warning:** To minimize the danger of fire the heating cable is damaged or improp ly installed, use a ground fault protecti device (GFPD).

## CLOSED CELL PIPE SOLUTION

### POLYETHYLENE THERMA-CEL

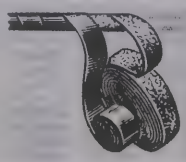
- **Temperature range: -160 to +200°F**
- **Durable skin resists solvents, chemicals, and abuse**
- **Durable skin resists solvents, chemicals, and abuse**

Semi-slit can be cut with scissors to accommodate joints, elbows, or angle. Slip over pipe and seal with contact adhesive. Sold in 6 ft. lengths. Gray color. Rubatex brand.

### ELASTOMERIC INSUL-TUBE

- **Retards heat loss; prevents condensa tion**
- **Temperature range: -70 to +220°F**
- **For Insul-Sheet and contact adhesive see page 3433**

Supplied unslit can be slit lengthwise an snapped over piping already installed. Se with contact adhesive. Sold in 6 ft. length Black color. Rubatex brand.



**INSUL-TUBE SPECIFICATION COMPLIANCE**

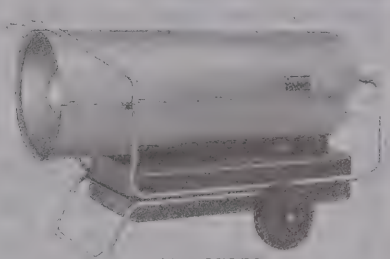
# COMMERCIAL OIL-FIRED SPACE HEATERS

Dayton®



Replacement Parts Available 1-800-323-0620

No. 2E510

No. 3E218

No. 3E359

- **High output blower and balanced combustion system**
- **Built in afterburner to assure clean, efficient operation**
- **Key components are stainless steel for longer life**
- **Built in flame-out control automatically shuts down all systems if the flame fails or the unit runs out of fuel**
- **Easily serviced air and fuel filters**

**Dayton portable oil-fired space heaters** provide fast, dependable heat for workshops, job sites, warehouses, factories, and farms.

**Easy to operate-** just fill with kerosene or No. 1 fuel oil and plug into standard 120V, 60 Hz outlet. Use as is for continuous heat or with optional thermostat below for use with 35,000 to 150,000 BtuH models. 200,000, 350,000 and 600,000 BtuH models are equipped with built in thermostat.

These heaters are built to meet or exceed standards established by the Occupational Safety and Health Act of 1970 (OSHA) in effect at the time of manufacture. They are tested and certified by Applied Research Laboratories. For use in well ventilated areas only; user must supply at least 3 sq.-ft. of fresh air supply for each 100,000 BtuH of heater capacity. **Heaters may not be attached to ductwork.** Units must be used only in accordance with local codes and ordinances.

**Nos. 2E510 and 2E511-** These units generate enough low cost heat to warm a workshop. Their compact design and convenient handle make them easy to carry to any work area. Perfect for the do-it-yourselfer. No. 3E218-Heavy-duty for tough, large scale commercial heating needs. Comes equipped with heavy-duty wheels and handles for portability.

**No. 3E219-** Designed for the large heating needs of warehouses, factories, or construction sites. Allows contractors to pour concrete in cold weather. Unit includes heavy-duty wheels and handles.

**No. 3VG79-** Great for large open areas in even the coldest conditions. It can heat up to 37,000 cubic feet.

**No. 3E358-** Every hour this big unit delivers 350,000 BtuH of clean, economical heat for industrial, commercial, and agricultural uses. Includes a thermostat, heavy-duty wheels and handles. Heavy-duty transformer and continuous ignition system help assure instant starts even in sub-zero weather. 6 ft. power cord.

**No. 3E359-** Our most powerful unit for the largest industrial and commercial user. Unit includes thermostat and has the same features as No. 3E358, plus it operates as easily as our smaller unit. 6 ft. power cord.

**HEATER SIZING GUIDE:** To determine approximate BtuH requirement, multiply room size in cubic feet (room length x width x height) by 0.133, by desired temperature rise in °F.Example: Room 28 x 40 x 10 = 11,200 cu.-ft. Desired temperature 70°F minus actual temperature of 10°F equals 60°F rise. 11,200 x 0.133 x 60 = 89,376. Unit producing at least 89,376 BtuH required. Actual requirement will vary depending on amounts of outdoor air entering, etc.

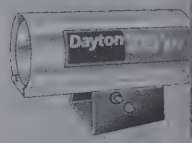
# FAN-FORCED COMMERCIAL GAS HEATERS



## FAN-FORCED PROPANE HEATERS

- **Spark ignition eliminates need for matches or pilot lights**
- **Solid state thermocouple sensor monitors flame and shuts off if flame should go out**
- **10 ft. UL-Listed hose and regulator included**
- **120V, 60 Hz**

Use these heaters for construction, industrial, commercial, and agricultural applications. Units are angled upward slightly on a wide base for better heat distribution. Heaters can not be attached to duct work. AGA approved. No. 4TM53 has three heat settings: 30,000, 40,000, and 50,000 BtuH output.

## FAN-FORCED NATURAL GAS & PROPANE HEATERS

B No. 4E769

Dayton®

DESIGN AMERICAN GAS ASSOCIATION CERTIFIED

**Replacement Parts Available 1-800-323-0620**

E No. 4E236

- **Spark ignition eliminates need for matches or pilot lights**
- **Solid state or thermocouple sensor monitors flame and shuts gas off if flame should go out**
- **10 Ft. UL Listed hose and regulator included (except No. 3VG78)**
- **120V, 60 Hz**

**1-YEAR DAYTON LIMITED WARRANTY**

**Test of warranty available on request. See "Manufacturers' Warranties" on page inside opposite inside back cover**

**Heavy-duty forced air heaters** for construction, industrial, commercial and agricultural applications. Units are angled up slightly on wide base for better heat distribution. **Heaters may not be attached to duct work.** Nos. 3VG78 and 3VG81 come equipped with built-in thermostat; Optional thermostat, No. 2E817, can be used with No. 4E236.

A **Dependable heat for natural gas hook-ups.** Generates 150,000 BtuH's of heat for all kinds of environments where natural gas is available.

B **Runs for up to 12 hours on a 20 lb. LP tank (not included).** Features 35,000 BtuH output which heats 4700 cu.-ft. Operates at 65 decibel noise level. Cool shell design is AGA approved.

C **A great mid-sized LP forced air heater.** heat settings, 65,000/85,000/100,000 BtuH enable this heater to perform in a variet of intermediate-sized jobs. AGA approved

D **An LP forced air heater for the toughest job** Built-in thermostat for convenient tempe ature control with Hi-temperature lim switch and improved blower design. Spli shell design for easy servicing. AG approved.

E **For those big heating jobs.** Features var able output from 225,000 to 375,000 BtuH High capacity blower develops 1500 CFM hot air flow to heat up to 51,000 cu.-ft. o space. Removable service panel for eas access to parts and control valve. Quie operation with cool shell design. **Uses 100-lb. LP cylinders for proper operation.** AGA approved.

## NATURAL GAS & PROPANE CONVECTION & RADIANT HEATERS

No. 3VH20

No. 3VH22

- For a variety of mid-sized and smaller applications
- All steel construction offers increased stability and durability with a rugged base design
- All units are equipped with flame safety systems
- No electrical power needed for operation
- Matchless Piezo ignition
- All L. P. models use 2-100 lb. cylinders, except No. 3VH20 uses 20 lb. cylinder
- 10-ft. UL Listed hose and regulator included with LP models
- AGA Approved (except No. 3VH21)
- Natural gas units require 5 psi supply

**Units cannot be equipped with thermostat controls.**

Replacement Parts Available
1-800-323-0620

Ⓐ **This radiant heater generates 100,000 BtuHs** for moderately-sized areas. For natural gas hook-ups.

Ⓑ **The ideal natural gas heater** for larger industrial uses.

Ⓒ **This reliable, portable convection heater** is perfect for workshops/sheds, outdoors, and other work/leisure activities. Heats for hours on 20 lb. propane cylinder. Quiet operation. Thermocouple flame-out sensor, P.O.L./excess flow device, and safety shield for operation. Variable heat control for 15,000/20,000/25,000 BtuHs per hour.

Ⓓ **Similar features to Ⓒ above,** however, this convection heater outputs 40,000 to 80,000 BtuHs.

Ⓔ **For moderately-sized areas,** this radiant model generates 100,000 BtuHs.

Ⓕ **High output adjustable propane convection heater** provides 100,000 to 200,000 BtuHs. Pilotless burner system. All components enclosed with single control knob operation. Brass and/or copper tubing and fittings for long life. Thermocouple monitors flame and shuts off safety valve if flame goes out. Unit shipped assembled.

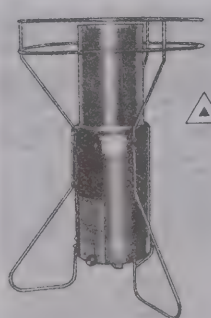
## NATURAL GAS & PROPANE HOT-TOT HEATERS



- Clean burning radiant surface
- All steel construction
- Heats instantly—no costly warm-up period
- Portable—only 28 lbs. with no installation required
- Heavy steel guard; chrome-plated to stay cool
- Safety tip-over switch
- No electricity required
- Manual valve adjustable 5,000 to 90,000 BtuH

**Hot Tot infrared portable gas heaters** provide comfortable warmth in unheated areas like warehouses, loading docks, and construction sites. By emitting radiant energy in a 360° pattern, it provides heat to all person and objects in the surrounding area. Perfection-Schwank brand.

## PORTABLE ELECTRIC SALAMANDERS

fostoria® Quality Since 1917

FREE DELIVERY on orders of $900 or more — See Freight Policy

UL C UL E154159

CSA LR96337 (Except Nos. 3UD73 & 3UD74)

No. 5E168

- **Safe and easy—no need for fueling/refueling**
- **Clean, odor-free, instant heat**
- **Heating enclosure pivots for directing air**

For use in enclosed areas in factories, garages, building co struction where temporary localized heat is needed. Not inten ed for wide-open or high-bay applications or any outdoor app cation. For best results, use in area with ceiling height of 15' less.

Mounted on cart with 10" wheels for easy portability. Three-po tion switch: OFF/Thermostat Control/Continuous ON. Separa switch for FAN-ONLY operation. Protective high-limit therm cutout switch with auto reset.

Factory wired for 3-phase operation. Easy access terminal blo for attaching power cord (cord not included, to order call 1-80 323-0620).Units are UL and C-UL Listed (E154159) and CS Certified (LR96337), except Nos. 3UD73 and 3UD74 which are U Listed only. Fostoria/Sun-Mite brand.

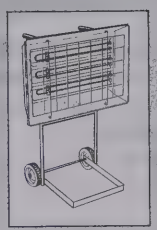
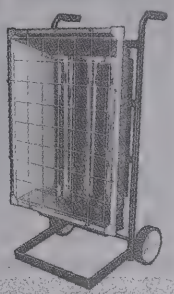
# ELECTRIC INFRARED HEATERS

## HAND-CARRY AND ROLL-ABOUT INFRARED HEATERS





Hand-Carry Type No. 2E526

fostoria® Quality Since 1917

**Metal sheath elements have 5000 hour life expectancy**

**Adjustable Reflector for Desired Heat Pattern**

Roll-About Type No. 2E529

Replacement Parts Available™ 1-800-323-0620

Provide instant, clean, odor-free infrared heat for indoor and outdoor workstations and maintenance areas. Economical because infrared heat warms only persons and objects, not surrounding air. **Not to be used in hazardous or wet locations.**

**All models** have gold anodized aluminum reflectors, unbreakable U-shaped heavy-duty metal sheath heating elements with an imbedded nichrome coil, weather tight terminal box, protective wire screens, and reinforced front edge and corner construction.

**Hand-carry models** have tip-resistant design, rear-mounted carrying handle. All hand-carry models are for single phase operation. 1800-watt unit has 15 ft. cord with grounded plug. 4500 watt units have cast aluminum 3-wire terminal box for connecting cord; cord not included. For power cords call 1-800-323-0620

**Roll-about models** have reflectors that can be adjusted to horizontal or vertical position for best heat pattern, steel hand cart with semi-pneumatic wheels, twin hand grips, weather tight steel conduit box for connecting cord; cord not included. Units are factory-connected for 3-phase operation, field-convertible to single phase.

## INFRARED HEATERS

fostoria® Quality Since 1917

Heater shown with optional cart, No. 4E527, sold separately below

No. 4E525

™ E154159

- **5000 Hour life expectancy**
- **No warmup needed**
- **Safety yellow color**
- **Does not produce fumes or vapors**

**Both heaters use efficient quartz tubes** with 5000 hr. life expectancy. Uniform heat pattern at 45° beam spread. Normally used up to 15 feet from area to be heated. No waiting for warmup, low maintenance. 15 ft., 3-wire cord set with NEMA L6-30P twistlock plug on No. 4E526, and molded 5-20P plug on No. 4E525. Heaters finished in durable, baked-on enamel paint. Chrome-plated steel grid-type guards standard.

**Heaters are constructed of durable 20-gauge steel housing** and high efficiency gold anodized aluminum reflectors, and include four raised slots and chain for permanent overhead installation without cart. Does not produce fumes, vapors, gases or other harmful by-products. 2000/1000W unit has two quartz tubes; 5700/2850W unit has four quartz tubes. Separate switches select high or low heat operation. Heaters must be installed in a horizontal position. Fostoria Sun-Mite brand.

A **2-Heat Low Profile Heater/Fan.** Quiet circulating fan. 2 Heat settings; fan forced heat or cooling breeze. Automatic thermostat and safety overheat switch. Adjustable tilt base. Neutral earth tone finish. 2-prong polarized plug. UL Listed (E10178).

B **2-Heat Personal Heater/Fan** 2 Heat settings; fan only for cooling. Safety overheat automatic shut-off. Fan-forced heat. Power indicator light. Neutral earthtone finish. UL Listed (E10178).

C **2-Heat Oscillating Heater/Fan.** 2 Heat settings; fan only for cooling. Fan forced operation. Oscillates in adjustable 90° arc. Automatic thermostat. Safety overheat automatic shut-off. On/Off and Heat/Cool settings. On/Off oscillator switch and indicator light. High temperature cord and plug. Earth tone finish. 2-prong polarized plug. UL Listed (E10178).

D **2-Heat Multi-Purpose Heater/Fan.** For floor, tabletop, and wall use. Base detaches from heater and can be used as wall mount bracket. Utilizes two power settings (1000/1500 watts) for optimal heating. Thermostat control maintains desired room temperature while dual protection safety system protects against accidental overheating. 2-prong polarized plug. UL Listed (E10178).

E **3-Heat Adjustable Tilt Base Ceramic Heater.** Directs heat where needed. Utilizes three power settings (600/900/1500 watts) for optimal heating. Thermostat control maintains desired room temperature. Dual protection safety system automatically shuts unit off in case of accidental overheating. Neutral taupe color. 2-prong polarized plug. UL Listed (E10178).

F **3-Heat Oscillating Ceramic Heater.** Oscillates for even heat distribution. Utilizes three power settings (600/900/1500 watts) for optimal heating. Thermostat control maintains desired room temperature. Dual protection safety system automatically shuts unit off in case of accidental overheating. Neutral taupe color. 2-prong polarized plug, fan has 70 CFM. UL Listed (E10178).

G ***New!* 2-Heat Office Pro Heater/Fan.** 2 Heat settings; fan is for cooling only. This quiet, portable low profile heater/fan is designed for indoor office use. A dual protection system protects against accidental overheating. An easily adjustable tilt base directs heat in any direction you choose. A clearly visible power light indicates heater is plugged in and capable of producing heat. Earth tone finish. UL listed. (29H40S).

H **2-Heat Compact Heater/Fan.** Powerful heating in a compact design. Utilizes two power settings (1000/1500 watts) for optimal heating. Thermostat control maintains desired room temperature while dual protection safety system protects against accidental overheating. 2-prong polarized plug, fan has 75 CFM. UL Listed (E10178).

I **Wall-Hugger 1-Heat Cord Free Heater/Fan.** Plugs directly into a wall outlet. Utilizes 1200 watt power setting. Thermostat control maintains desired room temperature while dual protection safety system protects against accidental overheating. Night light, fan 75 CFM. UL Listed (E10178).

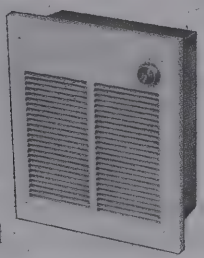
## LIQUID FILLED & CONVECTION BASEBOARD HEATERS

**All portable units are equipped with linear high temperature cut-outs to automatically shut off the heater in the event of accidental air blockage, and have operating light indicators.**

- 2 Prong polarized plug

A **No. 3UG02 Deluxe Portable Electric Hydronic Heater.** Features a no-maintenance sealed system and distinctive low profile design. Two heat settings (5120 or 2560 BtuHs) with built-in automatic thermostat that uses only the required wattage to keep an area warm. Made in U.S.A. Fahrenheat brand.

B **No. 3UG75 Portable Electric Heater.** Sturdy construction with solid steel cabinet, baked enamel finish, and unique protective grille. Dual-heat model (750 and 1500 watts) utilizes a specially formulated fluid that transfers warmth uniformly along the entire length of the heater. Built-in stat. Made in U.S.A. Fahrenheat brand.



C **No. 3UG01 Distinctively Designed Baseboard-Type Portable Electric Convection Heater.** Chimney fin element moves air at a greater velocity, filling the room with even comfort. 1000/1500 watt heat settings, built-in stat and carrying handles in the end panels. Made in U.S.A. Fahrenheat brand.

**QMARK LIMITED WARRANTY**

**5-years on element; 1-year on all other components and workmanship. See Manufacturer's Warranties on page opposite inside back cover.**

UL E21609

c UL

A

**Nos. 3UG12, 3UG13 and 3UG14:**

- **For entryways, dens, bathrooms, small offices, workshops**
- **Built-in fan delay switch energizes fan motor only after elements are heated**
- **Can be mounted vertically or horizontally with airflow up or down, left-to-right or right-to-left**
- **Built-in single-pole thermostat**

Heater dimensions (with grille) are 12½H x 10½W x 4¼"D. Wall opening required 11⅝H x 9⅜W x 4"D. QMark brand.

B

**Nos. 3UG55, 3UG56 and 3UG57:**

- **Used in reception rooms, game rooms, family rooms, offices and similar light-duty commercial and residential applications**
- **Built-in fan delay switch energizes fan motor only after elements are heated**
- **Integral double pole thermostat with positive off**

Steel finned metal sheath heating elements with low sheath temperatures provide uniform heat and long service life.

Rugged stamped steel front covers with Northern White baked enamel finish. Thermal overheat protector disconnects power in the event of overheating due to accidental blockage. Unit dimensions are 19⅛H x 15¾W x 5½"D. Wall opening required is 18¼H x 14⅜W x 4"D. Surface mount in standard 2 x 4" studwalls. Ideal mounting height is 18 to 24" from floor to bottom of back box. Do not install closer than 4" from floor or adjacent wall. Security front cover **No. 3UG58** and surface mounting frame **No. 3UF66**, for B. **No. 4TM75** surface mount frame for A. See page 3387.

# BUILT-IN ELECTRIC WALL HEATERS

**All heaters have operational protection with high temperature thermal cut-out to guard against overheating**

## A RESIDENTIAL FAN-FORCED ZONAL HEATERS

Quiet fan-forced heat for bathrooms, bedrooms, family and game rooms, utility rooms and other similar small areas in homes, apartments, condos and offices. High quality nickel chromium heating elements for fast heat response and uniform heat. High-impact Lexan® cover, steel bar insert grille, built-in thermostat. Unit mounted prior to wiring so both hands are free to make connections. Overall dimensions 12¼ H x 10½ W x 4¾ D. Designed for recess installation in 2x4 wall sections in a 11 H x 9⅛ W wall opening. For surface mounting frames, see information below.

## B ELECTRIC ZONAL WALL HEATERS

Attractive compact grille similar to central system. Centrifical, furnace-type blower for maximum air delivery and quiet operation. Open wound coil element for quick heat response. Heaters are field-adaptable for 4 wattages (750, 1100, 1500 and 2200 watts). Grille dimensions are 5⅝ H x 14⅛ W; Required wall opening is 4¾ H x 13 W. Units require optional remote mounted wall thermostat control, see table below.

## C FAN-FORCED HEATERS

With or without built-in thermostat, three models have multi-wattage capabilities, providing versatility to satisfy a wide range of applications. Heavy-gauge steel finned element, tangential blower, impedance-protected, permanently lubricated motor and constructed to make installation simple and quick. Grille dimensions are 7¾ H x 16⅞ W. Required wall opening is 7 H x 14¾ W.

## A TAMPER-RESISTANT HEATERS

mper-resistant, commercial-grade construction itures are ideal for small entryways, lobbies, cor-ors, stairwells, rest rooms, churches, schools, ices, stores and other public buildings where pplementary heat is required. Integral thermo-it is tamper-resistant and adjustable only by serting narrow blade screwdriver through front r grille of heater. Permanently lubricated totally closed fan motor provides long life and low intenance; gently distributes 100 CFM warm air roughout room area. Contemporary heavy-duty -gauge steel bar grille available in bronze brown ked enamel finish and satin finished aluminum me or Navajo white unit and frame. Recess ounts in standard 2" x 4" stud walls. Housing easures 14⅜W x 18¼H x 3¾"D. Use No. 5E188 ronze Brown) or No. 5E189 (Navajo White) mes for surface mounting applications.

### SURFACE MOUNTING FRAMES FOR TAMPER-RESISTANT HEATERS

r surface installation on brick, concrete block, od, and plaster walls. Frame extends 3⅜₁₆". rews and mounting hardware included.

**. 5E188.** Bronze brown frame. Q-Mark brand (AWH-D). Shpg. wt. 4.0 lbs. List $56.27. Each.....**$45.10**

# INSTITUTIONAL CONVECTION AND RADIANT COVE HEATERS

## INSTITUTIONAL CONVECTION HEATERS

QMARK
A Division of Marley Electric Heating

Replacement Parts Available 1-800-323-0620

No. 3UG49

E21609

- 140°F maximum surface temperature in a 70° ambient means the unit is ideal for applications that require a low-operating temperature below that of most commercial convectors
- Internal tamper proof thermostat with 55° to 100°F range allows for temperature control of the unit with a high degree of security
- 12 gauge perforated steel, sloped top cover creates a rugged unit that is resistant to vandalism
- Built-in double pole disconnect switch is accessible without removing any covers for convenient servicing and cleaning
- A durable, baked enamel finish resists chipping, cracking, or rusting

Designed as an institutional unit with lo operating temperatures. This is a rugge wall mounted, tamper proof convecti heater designed to provide heating at co rectional or rehabilitational institutio where safety is a major concern.

Dimensions are 16"H x 5"D, with lengt from 24" to 98". UL and C-UL Liste QMark brand.

## RADIANT COVE HEATERS

QMARK
A Division of Marley Electric Heating

E21609

- Radiant, infrared-type heat warms people and objects, not the surrounding air
- Extruded aluminum front panel is coated with a lifetime vitreous enamel which has one of the highest levels for radiating heat energy of any known substance
- Mounts near the ceiling, up and out of the way

For supplemental heating of offices, reception rooms, game rooms, family rooms, bathrooms and similar light-duty commercial and residential applications.

In addition to radiant heat, cove heaters also heat air passing behind and over the heater by convection flow, mixing air in the room to achieve balanced heating. By heating people and objects and not the surrounding air, comfort levels are not dependent upon the air temperature. Room tem perature can be lowered 3 to 5 degre while maintaining the same comfort leve

Heaters are an off-white color. **Operat from remote wall thermostat, No. 3UG5** Dimensions are 4"H x 2⅞"D with length of 47" to 83". UL and C-UL Listed. QMa brand.

## DOWNFLOW CEILING MOUNTED HEATERS

- **Single person, hands-free installation**
- **Air delivery up to 14 feet**
- **Adjustable directional airflow**
- **Maximum control system variations**
- **Check installation requirements for accessories below**

**signed for recessed or surface heating appli-tions** for commercial and industrial areas ch as vestibules, hallways, workshops, strooms and entry ways. Enclosure xcluding back box) is heavy-guage steel, osphatized and finished with a baked amel electrostatic painting process.

**iet operation.** The five bladed aluminum n and the rugged impedance-protected, tally enclosed, permanently lubricated otor achieve whisper quiet operation. eel fins are copper brazed to low-watt nsity, steel sheathed, tubular heating ements arranged in a uniform grid pat-ing in uniform heating of all discharged air.

The 208 volt heaters can be converted from single to three phase operation. 277 volt single phase heater also available. The 5000 watt heater can be field converted to 3800 or 2500 watts. The 4000 watt heater is convertible to 3000 or 2000 watts. All heaters have automatic thermal cutout and reset, and built-in fan delay.

Surface Mounted Heaters are designed to mount flat on the ceiling and extend only six inches into the room. Louvers are adjustable to change directional air throw. 20L x 16½W x 5¾"D.

**Recessed Mounted Heaters** have no protrusions outside the recess box, allowing the heater to recess only seven inches into ceiling space. Mounts easily into standard 2 x 2 ceiling grids. Can mount into permanent ceiling with trim ring.

E37116

No. 3UF34

Every heater has spring clips to temporarily support heater section until mounting hardware is secured. Thumb pins then align and temporarily hold the enclosure cover to the heating section, freeing both hands to finish installation. QMark brand.

# DROP-IN, KICKSPACE, AND PUMP HOUSE HEATERS

## ELECTRIC FLOOR DROP-IN HEATER

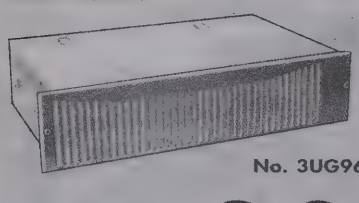
No. 3UG09

E21609

Replacement Parts Available 1-800-323-0620

**Quiet, easy-to-install fan-forced electric heaters are** designed to provide a draft barrier for large window areas, sliding glass doors, entryways, hallways, open stairwells, and other problem areas. Produces a warm air flow pattern five feet wide, four feet above floor. Can also be used for supplementary heating in kitchens, bedrooms, recreation rooms, etc. **For floor mounting only.** Not for bathrooms. Push-on-tab wire terminals permit easy connection for desired wattage.

**Rugged, metal tube, finned, sheathed elements.** Easy-to-install unit mounts between joists, parallel or perpendicular. Heavy-gaug steel, duo directional grille has sanda wood baked enamel finish. **Thermal prote tor** prevents overheating due to obstruc tion of heater. Rough-in housing is 14⅛ 7¼", grille is 15¾ x 8¾". Units are 6⅝ deep. Heaters may be controlled by th built-in thermostat listed below. QMar brand.



**BUILT-IN THERMOSTAT FOR HEATERS ABOV** Fast-acting, single pole thermostat kit. 5 145°F range. QMark model (FDITSP).

**No. 3UG11.** Shpg. wt. 3.0 lbs. List $59.3 Each ..... $47.8

## LOW PROFILE KICKSPACE HEATERS

No. 3UG96

E21609

Replacement Parts Available 1-800-323-0620

- **Multiple wattages in 120, 208, 240V**
- **Compact, slim-line design**
- **Quiet operation**

For heating applications where conventional heater placement is a problem. Fits in the kickspace/toe space of cabinets in kitchens, bathrooms, laundries, checkout counters, toll booths. Can also be easily installed in soffits 120 or 208/240V operation in 750 and 1500 watt units. Must be mounted in horizontal position.

Element has an automatic reset safety overheat protector; fan motor is thermally protected. Fan delay eliminates cold drafts, element heats up before fan cuts in.

Dimensions are 3½H x 14⅝W x 9" D; grill is 3⅝H x 15⅜"W.

Must be used with built-in thermostat No 3UG98 or a line voltage thermostat havin a rating of not less than 16.8 amps at 120 and 8.4 amps at 240V.

### BUILT-IN THERMOSTAT

For low profile heater sold above. Single pole thermostat kit, 55-145°F range mounts on right-hand side of heate QMark brand (QTSTSP).

**No. 3UG98.** Shpg. wt. 1.0 lbs. List $32.0 Each ..... $23.5

## ELECTRIC PUMP HOUSE HEATERS

- **Provides automatic 24-hour protection**
- **Ideal for remote locations**
- **Thermostat accurately senses surrounding air for quick response. 40 to 100°F range**

**Install this unit where heat is needed** to prevent pipes, pumps and other water, hydraulic fluid or oil-filled equipment from freezing. Built-in thermostat controls warm air naturally convected to the desired area—no fans, motors, or other moving parts. Fast discharge of warm air prolongs element life.

Heavy-gauge steel housing with baked enamel finish. Built-in thermal cutout protects against overheating. Built-in mounting brackets. QMark brand.

# ELECTRIC BASEBOARD HEATERS

QMARK A Division of Marley Electric Heating — New

No. 3UG82

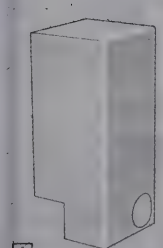
E37116

Replacement Parts Available
1-800-323-0620

- **Easy to install without disassembly**
- **Built-in cable clamps for ease of field wiring**
- **Designed for quiet operation**

For use in residential construction such as single family homes, apartments, modular or mobile homes as well as commercial, industrial and institutional construction.

Constructed of precision formed, pre-painted cold-roll steel. Aluminum finned, steel tubular heating element is suspended in heater for quiet operation. Lead wires and multiple knockouts at each end allow for quick connection at either end. Ground wire pigtails and built-in cable clamp provided in each junction box. Mounting holes across the back of each unit for ease of installation to studs without drilling.



All units are 6¾" H, 2⅞" D at the top, 1¾" D at the bottom. UL and C-UL Listed (E37116) for installation on wall at floor level with wall-to-wall carpeting. Heaters stand unsupported during installation. Color is Northern white. QMark brand.

# ELECTRIC HYDRONIC AND SLOPE TOP BASEBOARD HEATERS

## HYDRONIC BASEBOARD HEATERS

- **Clean, quiet operation without the noise of a traditional hot water piping system**
- **No-maintenance sealed system—nothing to fill or replace, liquid solution is permanently sealed**
- **Safe. Low surface temperatures; high-temperature shutoff protection**

For heating of bedrooms, game rooms, family rooms and other areas in homes, apartments, condos and offices. Low profile design and off-white color blends with any decor.

Sheathed electric heating element is completely submerged in heat transfer fluid, totally sealed in a copper tube spanning the length of the heater. Heat transfers evenly across the entire length of heater. Even after the thermostat is off, soft warmth continues to radiate because of maximum heat retention of the hydronic element.

Just three inches deep, heaters mount flush to wall and flat on wood, tile or carpet. Large wiring compartment is accessible from either end or front, enabling easy, rapid hookup. High-impact Lexan® and heavy-gauge steel unitized body resists dents and scratches for long cabinet life. Dimensions are 8⅜ H x 3" D, 240 VAC.

End cap with double-pole thermostat (No. 3UG32 sold separately) is designed to mount easily at either end of the heater. QMark brand.

QMARK
A Division of Marley Electric Heating

Ruggedly designed for heavy-duty use i schools, offices, institutions, motels, apar ments and special residential application 16 gauge steel cover, white baked on enan el finish. Front cover design incorporates sloped top which prevents objects bein placed on the unit.

240/208 VAC operation. Single phase oper tion only; must be controlled by option built-in thermostat (No. 3UH14) or remot wall-mounted thermostat (sold separately

Mounts directly to the floor and carpetin can be brought up to the front of the uni Mounting holes are conveniently locate on the back of the unit for quick, easy fas tening to the wall. Thermal limit switc with linear type, full length, sensing bul provides constant protection against ove heating and automatically resets when no mal operating temperatures are restored.

Replacement Parts Available 1-800-323-0620

No. 3UG34

**Certified for use in Class 1, Groups B, C and D, Division 1 and 2 atmosphere having ignition temperature code ratings down to 392°F (200°C, T3)**

- **Sloped top cabinet prevents objects from being set on top and restricting airflow**
- **Easily mounted with brackets provided for wall installation**
- **Heavy gauge steel with epoxy paint finish for excellent corrosion resistance**

esigned for typical applications involving petroleum refineries nd gasoline storage and dispensing areas, industrial firms that se flammable liquids in dip tanks for parts cleaning, petrochem-al companies manufacturing chemicals, dry cleaning plants, tility and natural gas plants, aircraft hangers, fueling areas, and any other hazardous areas covered by these classifications.

built-in automatic reset thermal limit for overtemperature pro-ection. Contactors, where required, will be supplied by cus-omer. Can be operated by a non explosion-resistant thermostat the stat is in an area remote from the hazardous location.

**Element**—High quality, long-life finned tubular elements with high grade resistance wire embedded in MGO, centered in a heavy gauge diameter sheath with 1⅛"diameter fins.

**Terminal Box**—Explosion proof stainless steel terminal box included, with provision for rigid metallic conduit entry and ease of wiring.

**Clearance**—Must be installed a minimum of 8" from the floor to provide sufficient area for air flow into the bottom of the heater.

## NATIONAL ELECTRICAL CODE CLASSIFICATIONS FOR HAZARDOUS LOCATIONS

bbreviated descriptions of Classes, Groups and Divisions. efore selecting any heater for a particular application, refer to rticle 500 of the National Electrical Code (NEC) as well as ational Fire Prevention Association and ANSI standards for fur-ier information.

### Class I

quipment does not have surface operating temperature in xcess of the ignition temperature of the specific gas or vapor.

### Class II

quipment does not have surface temperature greater than the nition temperature of the specified dust.

### Group B

tmospheres such as but not limited to acrolein (inhibited) (2), rsine, butadiene (1), ethylene oxide (2), hydrogen, manufac-red gases containing more than 30% hydrogen (by volume), ropylene oxide (2) and propylnitrate.

### Group C

tmospheres such as but not limited to acetaldehyde, allyl alco-ol, n-butyraldehyde, carbon monoxide, crotonaldehyde, cyclo-ropane, diethyl ether, diethylamine, epichlorohydrin, ethylene, thylenimine, ethyl mercaptan, ethyl sulphide, hydrogen cyanide, ydrogen sulfide, morpholine, 2-nitropropane, tetrahydrofuran nd unsymmetrical dimethyl hydrazine.

### Group D

Atmospheres such as but not limited to acetone, alcohol, gasoline, lacquer solvent vapors, natural gas, propane or other gases or vapors of equivalent hazard.

### Group E

Atmospheres containing combustible metal dust regardless of resistivity, or other combustible dust of similar hazard characteristics having resistivity of less than $10^5$ OHM-Centimeter.

### Group F

Atmospheres containing black, charcoal, coal, or coke dust.

### Group G

Atmospheres containing combustible dust having resistivity of $10^5$ OHM-Centimeter or greater.

### Division I

A location in which ignitable concentrations of flammable material exist under normal operating conditions.

### Division II

Locations in which flammable materials will normally be confined within closed containers and escape only in the case of accidental rupture, breakdown or during maintenance operations. Any equipment approved for Division I is automatically also approved for Division II.

**HEAT EXCHANGER**—Advanced design allows lower operating temperatures from the liquid to air heat exhanger with steel tubes, aluminum fins, a non-toxic heat transfer fluid, and a 70PSIG relief valve.

**CONTROLS**—Prewired, self-contained control center. Standard controls include dual (redundant) automatic reset thermal limit, a magnetic contactor, and 24 volt control circuit.

**FAN & MOTOR**—Ball bearing permanently lubricated explosion resistant motor has built-in thermal overload protection.

**CABINET**—Epoxy coated heavy gauge steel cabinet surrounds a 14 gauge heavy duty steel frame which supports internal components.

Designed to heat areas classified as ha ardous locations designated as Class Group C and D or Class II, Groups F and Divisions 1 & 2, with a T3C ignition ter perature code rating (320°F, 160°C) to pr vide primary or supplementary heating f comfort or freeze protection. Typic applications include oil refineries, sewag treatment plants, petrochemical plants, c rigs, unattended pumping stations, chen cal storage and handling facilities, pai storage areas, and countless other ha ardous areas covered by these classific tions.

## WASHDOWN CORROSION RESISTANT UNIT HEATERS

QMARK A Division of Marley Electric Heating

FREE DELIVERY on orders of $900 or more See Freight Policy

No. 3UG43

UL E21609

Replacement Parts Available 1-800-323-0620

**ELEMENTS:**

High-quality, long life, type 304 stainless steel finned tubular elements with stainless steel threaded fittings for watertight seal between elements and junction box.

**MOTOR:**

Totally enclosed, permanently lubricated, ball bearing type, epoxy painted. Wired to a NEMA 4X enclosure.

**FAN:**

Dependable air flow from an epoxy coated aluminum fan, blade suitable for wet and corrosive areas.

**CASE, BRACKET AND HARDWARE:**

Heavy gauge stainless steel. Bracket for wall or ceiling mounting.

**GRILLES:**

Adjustable stainless steel louvered outlet grille can be rotated 90° to direct air flow up, down, left, or right. Heavy gauge plated rear grille protects against accidental contact with fan blade.

**JUNCTION BOX AND CONTROL ENCLOSURE:**

NEMA-4X rated junction box. Non-metall enclosure for element terminals and buil in controls meets NEMA-4X hose dow requirements.

**CONTROLS:**

Power contactor, motor contactor (heate over 12KW), fan delay relay, automat over temperature cutout, transformer f 24V control circuit.

**APPLICATIONS:**

Ideal for comfort heating or freeze prote tion in non-hazardous dusty/dirty enviro ments including: waste water treatme plants, coal handling areas, food proces ing plants, foundries, steel mills, cemer plants, car washes, swimming pool area canneries and dairies. This unit offers bot corrosion protection in harsh enviro ments and the ability to be hosed down f cleaning. QMark brand.

# ELECTRIC UTILITY HEATERS

QMARK

E21609

Replacement Parts Available 1-800-323-0620

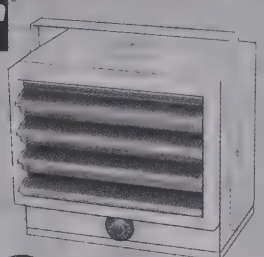
Plug Type 6-30P

## ELECTRIC UTILITY HEATER

- **Built-in thermostat, Hi-Lo heat selector and Fan Only switch**
- **Steel sheathed tube-type heating element with aluminum fins**
- **Compact, lightweight**
- **Quiet high velocity fan with totally enclosed, permanently lubricated motor**

**Ideal as primary, supplementary, spot or dual** system heating, such as construction sites and garages. Choice of 2.5 or 5KW, 8532 or 17,065 BtuH, and usable on 208, 220, or 240 volt systems. Pull through design draws ambient temperature air across elements for low element operating temperature and maximum life.

**Rugged high temperature polycarbonate grille** is styled with closely spaced webs for safety and greater air throw; low heat transfer rate makes grille safe to touch even on high heat setting. Heater can be ceiling or wall mounted at any angle, using predrilled 16" O.C. mounting holes. Three-way bracket enables heater to stand freely on floor, or to be carried by the handles. Heater can be easily converted to portable use by installing optional cord set listed below. Dimensions with bracket are 22H x 9.7W x 18.3"D. Meets all UL, CUL, NEC, and OSHA requirements. UL listed (E21609). QMark brand.



### OPTIONAL 6 FT. CORD SET

Converts heater No. 4E169 to portable heater. 30 Amp, 250V, NEMA No. 6-30P.

## ELECTRIC UTILITY HEATERS

- **Horizontal and downflow in one unit**
- **Ceiling-mount bracket included**
- **Built-in thermostat, rugged plate fin element**
- **Automatic fan delay control**
- **High limit thermal cutout automatically shuts off heater in the event of overheating**

For primary or supplemental heating in factories, stores, garages, warehouses, public buildings, service stations, stockrooms, basements, toll booths, workshops, any large exposed areas or additions. Neutral gray baked enamel finish with contrasting bronze brown adjustable louvers. 208 and 240V models with multiple wattage, 12½ H x 14 W x 11¼" D, not including bracket.

# ELECTRIC UNIT HEATERS AND ACCESSORIES

E21609

**Refer to Terminology and Technical Data Section for Determining Heat Requirements.**

**Steel sheathed tube type heating elements** with aluminum fins for faster heat dissipation. Widely spaced to resist dirt clogging. 24V contactors on all models except 3 and 5 KW, 208 and 240V units, which have contactors with line voltage holding coils. Select proper duty controls on facing page 3395.

**Pull-through design** draws air across heating element for more uniform air distribution.

**Die-formed steel housing,** two-tone neutral gray/statuary bronze finish.

**Automatic reset linear thermal cut-out** shuts off power to element overheating occurs. Fan delay feature eliminates cold drafts; el ments heat up before fan cuts in, fan continues to distribute he after elements shut off.

**Quiet, dynamically balanced fans;** totally enclosed, permanent lubricated fan motors, with automatic-reset thermal protectio and vibration isolators. Motors are same voltage as heaters.

**Individually adjustable louvers** for directing air flow; choice optional diffusers for heat concentration and coverage whe units are used in vertical position; see listing on facing pa 3395.

**Versatile units** can be mounted vertically or horizontally in fact ries, warehouses, garages, stores, shipping rooms, power st tions, and aircraft hangars, as primary, supplementary, spot dual-system heating. Completely self-contained; easy to install.

**Rugged construction** for long life; minimum maintenance.

**Mount on wall, ceiling or building support** members. All units ha recessed fasteners for suspension mounting using 5/16-18 threa ed rods (not supplied). Optional wall/ceiling brackets simpli mounting, see listing on facing page 3395.

**Meets UL and Canadian UL, NEC and OSHA requirements.** QMa brand.

**Heater controlled by thermostat,** see below.

# 3.0 TO 50.0 KW HEAVY-DUTY ELECTRIC UNIT HEATERS

Vertical (Downflow)

E154218

Replacement Parts Available
1-800-323-0620

- **Adjustable outlet louvers**
- **All units 60 Hz fan forced, ceiling or wall mounted**
- **Meet NEC and OSHA requirements**

Designed for auxiliary, supplemental or primary heat source in factories, stores, garages, warehouses, public buildings, stock rooms, service stations, any large or exposed areas, or additions. Heavy-duty, totally enclosed motors. Aluminum-finned, copper clad steel sheath heating element. Advanced pull-through air flow design draws air across heating element for more even air distribution and cooler element operation. Automatic reset linear thermal protector provides protection over entire length of element area to disconnect heater if normal operating temperatures are exceeded. Specially designed venturi outlet with large dynamically balanced fan blade provides maximum air flow. Heavy gauge die-formed steel housing.

All heaters are 60Hz and 3-phase models are phased balanced. Some 5 through 15kw units are field convertible from single to three phase. 24 volt low voltage control circuit standard on all models except 3 and 5kw 208, 240/208 and 277V units (line voltage control on these models). All heaters have four top and four back threaded reinforced holes for field mounting with 5/16"-18 thread rods. Optional vertical and horizontal mounting brackets available. NOTE: Wall mounted or built-in thermostat (not included) must be used with these heaters 3395,3398. (see page 3327).

) These models are wired for direct line voltage control. (*) Maximum AMP rating reflects single phase on combination single/three phase units.
obtain amperage draw on three phase power supply, divide single phase rating by 1.73 (#) 30 and 50 KW models are wired for single or two stage, low voltage control.
ese units also contain two speed motor for Hi-Lo fan selection. (‡) Air delivery data on dual voltage units reflects high voltage

# MOUNTING BRACKETS

ertical mounting is desirable in high bay areas or where heater cation does not interfere with plant operation. Horizontal ounted units should have air streams wipe exposed walls without blowing at them. All heaters must be mounted at least 8 feet above the floor and are not intended for use in potentially explosive atmospheres. Where square footage is large and comfort is essential, both vertical and horizontal installations may be used.

## MOUNTING BRACKET SELECTION GUIDE AND ORDERING DATA

| Use With Heaters | Mount Bracket For Horizontal Throw Stock No. | List | Each | Shpg. Wt. | Mount Bracket For Vertical Throw Stock No. | List | Each | Shpg. Wt. |

# HEAVY DUTY ELECTRIC UNIT HEATER DIFFUSERS AND CONTROLS

## DIFFUSER OPTIONS FOR VERTICAL (DOWNFLOW) INSTALLATIONS

Standard louvers (included with heater) on Dayton electric unit heaters permit straight line air flow as in air curtain applications ov doorways. A rectangular pattern is formed and altered by turning in either direction to desired coverage. If these louvers are remove heater venturi permits general downflow air pattern distribution which can also be altered using optional diffusers for specific inst lations described below.

### OPTIONAL ANEMOSTAT DIFFUSER

Use for applications where draft restriction is required at lower unit mounting heights.

| For KW* | Max. Mtg. Ht. (Ft.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **7.5, 10.0 15.0, 20.0** | 12 15/17 | **3UG61** | $272.25 | **$193.75** | 10.0 |
| **30.0 50.0** | 17 20 | **3UG60** | 434.72 | **310.25** | 21.0 |

(*) Anemostat diffuser not recommended for models under 7.5 KW.

### OPTIONAL RADIAL DIFFUSER

Individually adjustable fins permit increased floor coverage 45° open. Additional throw is achieved when fins are 90° vertic Allow higher mounting height.

| For KW‡ | Max. Mtg. Ht. (Ft.) 45° | Stock No. | List | Each | Shpg Wt. |
